Second FAO/OIE/WHO joint scientific consultation on Influenza and other emerging zoonotic diseases at the human-animal interface

Villa Quaranta Park Hotel, Ospedaletto di Pescantina (VR), Italy | 27-29 April 2010

List of participants

The theme of this second meeting is "Past Experiences - New Paradigms - For Future Threats," and its goal will be to examine emerging zoonoses, including influenzas, and identify commonalities at the human-animal interface.

We hope that the outcome will provide the technical basis for developing or modifying policies and strategies to more effectively prepare for and respond to the next emerging event.

The session topics will include:

- Emergence and characteristics of "high public health impact" influenzas
- Endemic and sporadic zoonotic diseases, and animal-origin agents that have emerged into "high public health impact" zoonoses: what are the commonalities and potential risks?
- Cross cutting issues, main points, conclusions and recommendations

IN COLLABORATION WITH

PATRONAGE AND FINANCIAL CONTRIBUTION
