

Tables

TABLE 1

Per caput DES by region and economic group, 1969-71, 1979-81 and 1990-92 11

TABLE 2

Top five and bottom five developing countries in terms of per caput DES growth rates, 1969-71 to 1990-92 12

TABLE 3

DES and population growth by region and economic group, 1969-71 to 1979-81 and 1979-81 to 1990-92 13

TABLE 4

Distribution of 98 developing countries by per caput DES in 1969-71 and its growth from 1969-71 to 1990-92, and by population growth 15

TABLE 5

Total and animal protein supplies by region and economic group, 1969-71, 1979-81 and 1990-92 16

TABLE 6

Total and animal fat supplies by region and economic group, 1969-71, 1979-81 and 1990-92 17

TABLE 7

Share of major food groups in total DES by region and economic group, 1969-71 and 1990-92 23

TABLES

TABLE 8

Share of major food groups in total protein supplies
by region and economic group, 1969-71 and 1990-92 26

TABLE 9

Share of major food groups in total fat supplies by
region and economic group, 1969-71 and 1990-92 28

TABLE 10

Extent of diversification of national diets by region,
1969-71 and 1990-92 30

TABLE 11

Share of main cereals and roots in total DES by region,
1969-71 and 1990-92 31

TABLE 12

Percentage of population with energy intake below
800 kcal per caput/day 41

TABLE 13

Prevalence of food inadequacy at different levels
of per caput DES and CV 42

TABLE 14

Prevalence of food inadequacy in developing regions,
1969-71, 1979-81 and 1990-92 45

TABLE 15

Level and apparent trend in prevalence of food
inadequacy in 98 developing countries, 1969-71 to 1990-92 49

TABLE 16

Average per caput energy consumption of undernourished population compared with minimum and average per caput energy requirements	53
---	----

TABLE 17

Relative inadequacy of food supply by developing region, 1969-71, 1979-81 and 1990-92	56
---	----

TABLE 18

Distribution of 98 developing countries classified according to their relative inadequacy ratios, 1969-71 and 1990-92	57
---	----

TABLE 19

Classification of 98 developing countries into four categories based on roles of per caput DES growth and redistribution in eliminating food inadequacy	60
---	----

TABLE 20

Comparison of actual and required levels of per caput DES, 1990-92	61
--	----

TABLE 21

Estimates of prevalence and numbers of wasted, stunted and underweight children in developing countries, 1990	69
---	----

TABLE 22

Change over time in the prevalence of underweight children (under 5 years) in selected developing countries	72
---	----

TABLE 23

Prevalence of stunting indicated by national height surveys among schoolchildren in Latin America and the Caribbean 75

TABLE 24

Prevalence of stunting and thinness among adolescent males and females in selected countries 76

TABLE 25

Percentage of adults in different BMI classes based on available country surveys 77
