INTRODUCTION

This publication of forest product prices has been prepared following the requests of Member Countries of FAO at regional forestry commissions, the Committee on Forestry, and the FAO Conference. The first issue of these statistics was prepared and published jointly with the Economic Commission for Europe and published under the title "Forest Products Statistics - Price Series 1950-1976" - Supplement 6 of Vol. XXX Timber Bulletin for Europe, December 1977.

The principal function of these international price series is to provide information relevant to medium- and long-term policy formulation in forestry and the forest industries, and a readily available source of comparative information for use at the preliminary stages in the formulation of investment projects. In view of the difficulty of publishing price information sufficiently quickly to be useful for short-term market decision making, it was considered that publication of data suitable for this purpose should not be attempted as part of this project.

The aim in preparing this survey was to obtain series, which were clearly specified in terms of product characteristics and location, and representative of the production and trade in forest products in the countries concerned. It was considered that the publication of fully specified market prices would be of wider use than that of average prices or price indices.

Member countries of FAO and ECE were invited to provide information on price series through enquiries circulated in 1976 and 1978. At the same time, a study was carried out by the Statistics and Economic Analysis Unit of the Forestry Department, FAO, Rome, to identify forest product price series published a) by international agencies, b) in official government publications, and c) in trade and industry publications. In selecting the series, importance was attached to the regular and consistent formulation of the series over a period of time and to obtaining series representative of the spectrum of products and locations making up the world production of, and trade in, forest products.

Presentation

The present publication contains 341 series of prices. Of these, 234 relate to roundwood, sawnwood and wood-based panels, including 69 of tropical logs and sawnwood, and 94 to pulp, paper and paperboard.

Where available, data are provided for the years 1960 to 1977. The prices are quoted (i) in national currency, (ii) in the equivalent price in US dollars, and (iii) as an index of the dollar price with base year 1970. The price quoted is usually an average for the year, but in some specified cases it is for a particular month for which data were consistently available. Prices were converted from national currency to US dollars using exchange rates quoted in IMF International Financial Statistics and shown on page 81. Volume is given in locally used units and converted to standard units - cubic metres or metric tons - appropriate conversion factors having been applied where necessary.

The series are grouped according to main product. The product groups are listed in the table of contents. Information about the available detail of specification and the location of sale for each series is shown in Chapter III, together with a reference to the source of the series. The specifications are presented in English and in French or Spanish where these are the language of origin.

For many countries and for important forest products regularly reported data are not available. However in some cases information for some years have been obtained. This type of incomplete data has been shown in supplementary tables converted to US dollars and in standard units only. Details of source and specification are not shown for these cases.

A more restricted series of prices appears in the twice-yearly Timber Bulletin for Europe, ECE, Geneva. Tables of the average unit value of forest products in trade appear in the annual Yearbook of Forest Products, FAO, Rome.

INTRODUCTION

Cette publication sur les prix des produits forestiers a été préparée à la demande d'Etats Membres de la FAO lors des commissions régionales des forêts, du Comité des forêts et de la Conférence de la FAO. La première édition de ces statistiques a été établie et publiée conjointement par la FAO et la Commission économique pour l'Europe, sous le titre "Statistiques des produits forestiers - Séries de prix 1950-1976" - Supplément 6 du volume XXX du Bulletin du bois pour l'Europe, décembre 1977.

La principale raison d'être de ces séries internationales de prix est de fournir une information de base pour l'élaboration des politiques à moyen et à long terme en matière de foresterie et d'industries forestières et une source d'accès facile des renseignements comparatifs qui serviront au stade préliminaire de l'élaboration des projets d'investissement. Puisqu'il est difficile de publier des prix dans un délai suffisamment bref pour qu'il puisse en être tenu compte dans un contexte commercial à court terme, on a estimé préférable de ne pas chercher à publier des données destinées à ce genre d'utilisation.

L'objectif de cette enquête a été d'obtenir des séries clairement définies en termes de caractéristiques et de sources des produits, et représentative de la production et du commerce des produits forestiers dans les pays intéressés. Il a été estimé que la publication des prix de marché bien définis serait plus largement utilisée que celle de la moyenne des prix ou des indices de prix.

Les Etats Membres de la FAO et de la CEE ont été invités à fournir des renseignements sur les séries de prix à l'aide de questionnaires envoyés en 1976 et en 1978. En même temps, la section Statistiques et analyse économique du Département des forêts de la FAO à Rome faisait une étude pour identifier les séries de prix des produits forestiers a) publiées par des organisations internationales b) paraissant dans les publications officielles gouvernementales et c) paraissant dans les publications du commerce et de l'industrie. Lors du choix des séries, on s'est attaché à établir des séries régulières et uniformes pour une période donnée et qui soient représentatives de la gamme des produits, et de leur source, qui entrent dans la production et le commerce mondial des produits forestiers.

Présentation

Cette publication comprend 341 séries de prix qui se décomposent comme suit: 234 se rapporte au bois rond, aux sciages et aux panneaux dérivés du bois, dont 69 séries concernent les grumes et sciages tropicaux; 94 à la pâte, aux papiers et cartons.

Dans la mesure du possible, les données ont été fournies pour les années 1960 à 1977. Les prix sont publiés i) en monnaie nationale, ii) en équivalent dollars des Etats-Unis et iii) en indice du prix en dollars avec pour base l'année 1970. Le prix indiqué est généralement une moyenne pour l'année, mais dans certains cas, il a trait à un mois particulier pour lequel on disposait de renseignements précis. Les prix en monnaie nationale ont été convertis en dollars des Etats-Unis en utilisant les taux de change figurant dans "International Financial Statistics", publié par le Fonds monétaire international, et indiqués à la page 81. Les quantités sont données en unités locales et converties en unités standard - mètres cubes ou tonnes métriques - grâce à des coefficients de conversion adéquats.

Les séries sont groupées par principaux produits. La liste des groupes de produits figure dans la table des matières. On trouvera au chapitre III les renseignements disponibles sur les caractéristiques et l'emplacement de vente des produits de chaque série, ainsi que l'indication de la source des séries. Les caractéristiques sont présentées en anglais, et en français ou espagnol, s'il s'agit de la langue originale.

Pour de nombreux pays et pour d'importants produits forestiers, on ne dispose pas de données régulières. Toutefois, dans certains cas, on a pu obtenir des renseignements pour certains années. Ces données incomplètes figurent dans des tableaux supplémentaires, converties en dollars des Etats-Unis et en unités standard seulement. Dans ce cas, les sources et les caractéristiques ne sont pas indiquées.

Une série de prix plus limitée figure dans le Bulletin du bois pour l'Europe qui paraît deux fois par an, FAO/CEE Genève. Des tableaux donnant la valeur unitaire moyenne du commerce des produits forestiers figurent dans l'Annuaire des produits forestiers, FAO, Rome.

INTRODUCCION

Esta publicación de los precios de los productos forestales se ha preparado atendiendo a solicitudes formuladas por Estados Miembros de la FAO en comisiones forestales regionales, el Comité de Montes y la Conferencia de la FAO. El primer número de estas estadísticas se preparó y publicó conjuntamente con la Comisión Económica para Europa con el título de "Forest Products Statistics - Price Series 1950-1976" - Suplemento 6 del Vol. XXX Timber Bulletin for Europe, diciembre 1977.

La función principal de estas series de precios internacionales es dar información pertinente para la formación de políticas a mediano y largo plazo en materia de montes e industrias forestales, y constituir una fuente asequible de información comparada que pueda utilizarse en las fases preliminares de la formulación de proyectos de inversión. En vista de la dificultad de publicar información sobre precios con la suficiente rapidez para que resulte útil en la toma de decisiones comerciales a corto plazo, se consideró que la publicación de datos a tal efecto no debía formar parte del presente proyecto.

Al preparar este estudio se quiso obtener series que especificaran claramente las características y la ubicación de los productos y que fueran representativas de la producción y el comercio de productos forestales en los países correspondientes. Se consideró que sería más útil publicar los precios del mercado claramente especificados que los precios o índices de precios medios.

Mediante encuestas distribuidas en 1976 y 1978, se invitó a países miembros de la FAO y la CEPE a que suministraran información sobre las series de precios. Al mismo tiempo, la Dependencia de Estadística y Análisis Económico del Departamento de Montes de la FAO en Roma llevó a cabo un estudio con objeto de localizar las series de precios de productos forestales publicadas a) por organismos internacionales, b) en publicaciones gubernamentales oficiales y c) en publicaciones del comercio y de la industria. Al seleccionar las series, se dió importancia a su formulación periódica y coherente durante determinado tiempo y la obtención de series representativas de la gama de productos y lugares que componen la producción y el comercio mundiales de productos forestales.

Presentación

La presente publicación contiene 341 series de precios. De estos, 234 se refieren a la madera en rollo, la madera aserrada y los tableros de madera, incluidos 69 de trozas y madera aserrada de especies tropicales, y 94 a la pasta, el papel y el cartón.

Se facilitan los datos disponibles correspondientes a los años 1960 a 1977. Los precios se dan (i) en moneda nacional, (ii) en el precio equivalente en dólares EE.UU., y (iii) como índice del precio en dólares tomando 1970 como año de base. El precio indicado es normalmente un promedio anual, pero en algunos casos que se especifican corresponde a un mes determinado del que se tenían datos. Los precios se convirtieron de la moneda nacional en dólares EE.UU. utilizando los tipos de cambio indicados en las International Financial Statistics del FMI y que figuran en la página 81. El volumen se da en unidades de uso local y se convierte en unidades estandar - metros cúbicos o toneladas métricas - mediante la aplicación, cuando resulta necesario, de factores de conversión adecuados.

Las series se agrupan según el producto principal. Los grupos de productos se enumeran en el índice de materias. En el Capítulo III se informa sobre los particulares de las descripciones disponibles y sobre el lugar de venta de cada serie, y además se incluye una referencia a la precedencia de la serie. Las descripciones se presentan en inglés y en francés o español cuando estos son los idiomas originales.

En el caso de muchos países y de importantes productos forestales no se dispone de datos periódicos. Sin embargo, en algunos casos se han obtenido datos correspondientes a algunos años. Este tipo de información incompleta se ha conseguido en cuadros suplementarios y los datos figuran convertidos a dólares EE.UU. y a unidades estandar solamente. En tales casos no se dan detalles sobre la procedencia y la descripción.

Una serie más limitada de precios figura en la publicación semestral Timber Bulletin for Europe, FAO/CEPE, Ginebra. El Anuario de Productos Forestales de la FAO, Roma, contiene cuadros del valor unitario medio de los productos forestales comerciales.

1/ Stacked volume - volume empilé - volumen hacinado				

APPROXIMATE EQUIVALENTS FOR FOREST PRODUCTS MEASURES

C) EQUIVALENTS APPROXIMATIFS DES MESURES POUR LES PRODUITS FORESTIERS

EQUIVALENTES APPROXIMADOS DE LAS MEDIDAS DE PRODUCTOS FORESTALES

Product and unit Produits et unités Productos y unidades	Cubic metres Mètres cubes Metros cúbicos	Cubic feet Pieds cubes Pies cúbico
	Solide volume without bark Volume solide sans écorce Volumen sólido sin corteza	
SAWLOGS + VENEER LOGS - GRUMES SCIAGE + PLACAGE - TROZAS, ASERRAR + CHAPAS		
1 000 board/super feet - 1 000 board feet/pieds superficiels - 1 000 pies madereros/superficiales	4.53	160
PULPWOOD - BOIS DE TRITURATION - MADERA PARA PULPA		
1 stere - 1 stère - 1 estéreo	0.72	25.4
1 cord - 1 corde - 1 cuerda	2.55	90
PITPROPS - BOIS DE MINE - MADERA PARA MINAS		
1 piled cubic fathom - 1 fathom (pied cube empilé) - 1 fathom (pie cúbico hacinado)	4.28	151.1
1 cord - 1 corde - 1 cuerda	2.416	85.3
FUELWOOD - BOIS DE CHAUFFAGE - LEÑA		
1 stere - 1 stère - 1 estéreo	0.65	23
1 cord - 1 corde - 1 cuerda	2.12	74.9
1 000 stacked cubic feet - 1 000 pieds cubes empilés - 1 000 pies cúbicos hacinados	18.41	650

2/ For Canada and the United States in converting the volume of sawnwood reported in 1 000 board feet to cubic metres, the nominal conversion factor 2.36 m³ per 1 000 board feet has been applied. Sawing conventions in these countries generally result in the volume being less than the nominal volume. For example, it is estimated that for the U.S., taking coniferous and non-coniferous together, the actual average volume of rough green sawnwood would be 3% less than the nominal volume, while the weighted average volume for surfaced dry coniferous and rough dry non-coniferous sawnwood would be 27% less than the nominal volume.

2/ En ce qui concerne le Canada et les Etats-Unis, on a utilisé - pour convertir en mètres cubes le volume de sciages exprimé en 1.000 pieds planches, le facteur de conversion 2,36 m³ par 1.000 pieds planches. Selon les conventions sur les sciages en vigueur dans ces pays, le volume est généralement inférieur au volume nominal. Ainsi, par exemple, aux Etats-Unis, le volume moyen effectif - pour les résineux et les non résineux pris ensemble - des sciages verts bruts serait de 3% inférieur au volume nominal, tandis que le volume moyen pondéré pour les sciages de résineux secs surfacés et les sciages bruts secs de non résineux serait de 27% inférieur au volume nominal.

2/ En el caso de Canadá y los Estados Unidos, al convertir a metros cúbicos el volumen de madera aserrada comprendido en 1 000 pies tablares, se aplicó un factor de conversión nominal de 2,36 m³ por 1 000 pies tablares. En esos países, la normas relativas al aserrado se traducen por lo general en que el volumen sea inferior al volumen nominal. Por ejemplo, se estima que en el caso de los Estados Unidos, tomando en conjunto las coníferas y las no coníferas, el volumen promedio real de madera aserrada verde sin cepillar sería inferior en un 3 por ciento al volumen nominal, en tanto que el volumen promedio ponderado de la madera seca y cepillada de coníferas y de la madera aserrada seca sin cepillar de especies no coníferas sería inferior en un 27 por ciento al volumen nominal.
