INTRODUCTION

This publication is the second issue of the FAO Forestry Paper (Forest Products Prices). In this issue a number of new series have been added and the presentation of the tables has been modified with the intention of making them more easy to refer to.

The principal function of these international price series is to provide information relevant to medium- and long-term policy formulation in forestry and the forest industries, and a readily available source of comparative information for use at the preliminary stages in the formulation of investment projects. In view of the difficulty of publishing price information sufficiently quickly to be useful for short-term market decision making, it was considered that publication of data suitable for this purpose should not be attempted as part of this project. It should also be recognised that the preparation and appraisal of investment projects will require more up-to-date, specific and more detailed price data that can be provided by this publication.

The aim in preparing this survey was to obtain series, which were clearly specified in terms of product characteristics and location, and representative of the production and trade in forest products in the countries concerned. Preference was given in publication to fully specified market prices over average prices or price indices.

Presentation

The present publication contains 453 series of prices. Of these, 312 relate to roundwood, sawnwood and wood-based panels, including 142 of tropical logs and sawnwood, and 103 to pulp, paper and paperboard. Series are contributed by 52 countries.

Where available, data are provided for the years 1960 to 1978. The prices are quoted (i) in national currency, (ii) in the equivalent price in US dollars, and (iii) as an index of the dollar price with base year 1970. The price quoted is usually an average for the year, but in some specified cases it is for a particular month for which data were consistently available. Prices were converted from national currency to US dollars using exchange rates quoted in IMF International Financial Statistics and shown on page 81. Volume is given in locally used units and converted to standard units - cubic metres or metric tons - appropriate conversion factors having been applied where necessary.

The series are grouped according to main product. The product groups are listed in the table of contents. Information about the available detail of specification and the location of sale is shown for each series, together with a reference to the source of the series. The specifications are presented in English and in French or Spanish where these are the language of origin.

For many countries and for important forest products regularly reported data are not available. However, in some cases information for some years have been obtained. This type of incomplete data has been shown in supplementary tables converted to US dollars and in standard units only. Details of source and specification are not shown for these cases.

A more restricted series of prices appears in the Timber Bulletin for Europe, ECE, Geneva. Tables of the average unit value of forest products in trade appear in the annual Yearbook of Forest Products, FAO, Rome. The first issue of "Monthly Prices for Forest Products" was published as a supplement to the Timber Bulletin for Europe, FAO/ECE Geneva, February 1979. The FAO Monthly Bulletin of Statistics, FAO, Rome, has included in issues since Vol. 2, No. 1, January 1979, forest product price series of international significance.

INTRODUCTION

La présente publication est le deuxième numéro de l'étude FAO: forêts (Prix des Produits forestiers). Dans ce numéro, on a ajouté un certain nombre de nouvelles séries de prix et la présentation des tableaux a été modifiée afin de faciliter les références.

La principale raison d'être de ces séries internationales de prix est de fournir une information pour l'élaboration des politiques à moyen et long terme en matière de foresterie et d'industries forestières et une source d'accès facile de renseignements comparatifs qui serviront au stade préliminaire de l'élaboration des projets d'investissement. Puisqu'il est difficile de publier des prix dans un délai suffisamment bref pour qu'il puisse en être tenu compte dans un contexte commercial à court terme, on a estimé préférable de ne pas chercher à publier des données destinées à ce genre d'utilisation. Il faut également reconnaître que l'élaboration et l'évaluation des projets d'investissement exigera des données en matière de prix plus récentes, plus spécifiques et plus détaillées que ne peut en fournir la présente publication.

L'objectif de cette enquête a été d'obtenir des séries clairement définies en termes de caractéristiques et de sources des produits, et représentative de la production et du commerce des produits forestiers dans les pays en cause. On a jugé préférable de publier des prix de marché bien définis plutôt que des moyennes ou des indices de prix.

Présentation

Cette publication comprend 453 séries de prix qui se décomposent comme suit: 312 séries se rapportent aux bois ronds, sciages et panneaux dérivés du bois, dont 142 provenant de grumes et sciages tropicaux, et 103 à la pâte, aux papiers et cartons. Ces séries ont été fournies par 52 pays.

Dans la mesure du possible, les données ont été fournies pour les années 1960 à 1978. Les prix sont publiés i) en monnaie nationale, ii) en équivalent dollars des Etats-Unis et iii) en indice du prix en dollars avec pour base l'année 1970. Le prix indiqué est généralement une moyenne pour l'année, mais dans certains cas, il a trait à un mois particulier pour lequel on disposait de renseignements précis. Les prix en monnaie nationale ont été convertis en dollars des Etats-Unis en utilisant les taux de change figurant dans "International Financial Statistics", publié par le Fonds monétaire international, et indiqués à la page 81. Les quantités sont données en unités locales et converties en unités standard - mètres cubes ou tonnes - grâce à des coefficients de conversion appropriés.

Les séries sont groupées par produits principaux. La liste des groupes de produits figure dans la table des matières. On trouvera les renseignements disponibles sur les caractéristiques et l'emplacement de vente des produits de chaque série, ainsi que l'indication de la source des séries. Les caractéristiques sont présentées en anglais, et en français ou espagnol, s'il s'agit de la langue originale.

Pour de nombreux pays et pour d'importants produits forestiers, on ne dispose pas de données régulières. Toutefois, dans certains cas, on a pu obtenir des renseignements pour certaines années. Ces données incomplètes figurent dans des tableaux supplémentaires, converties en dollars des Etats-Unis et en unités standard seulement. Dans ce cas, les sources et les caractéristiques ne sont pas indiquées.

Une série de prix plus limitée figure dans le Bulletin du bois pour l'Europe, FAO/CEE Genève. Des tableaux donnant la valeur unitaire moyenne du commerce des produits forestiers figurent dans l'Annuaire des produits forestiers, FAO, Rome. Le premier numéro de "Prix mensuels des produits forestiers" a été publié à titre de supplément au Bulletin du bois pour l'Europe, FAO/CEE Genève, février 1979. Le Bulletin mensuel FAO de statistiques, FAO, Rome, publie, depuis le No. 1 du Vol. 2 (janvier 1979), des séries de prix de produits forestiers d'importance internationale.

INTRODUCCION

La presente publicación es el segundo número de los Documentos Forestales de la FAO (Precios de los Productos Forestales). En este número se han añadido varias series nuevas y se ha modificado la presentación de los cuadros, a fin de facilitar la referencia.

La función principal de estas series de precios internacionales es dar información pertinente para la formulación de políticas a mediano y largo plazo en materia de montes e industrias forestales, y constituir una fuente asequible de información comparada que pueda utilizarse en las fases preliminares de la formulación de proyectos de inversión. En vista de la dificultad de publicar información sobre precios con la suficiente rapidez para que resulte útil en la adopción de decisiones comerciales a corto plazo, se consideró que la publicación de datos a tal efecto no debía formar parte del presente proyecto. Debe reconocerse también que la preparación y evaluación de los proyectos de inversión requerirá datos sobre precios más actualizados, concretos y detallados de los que puede proporcionar esta publicación.

El objetivo de la preparación de este estudio consistía en obtener series que especificaran claramente las características y la ubicación de los productos, y que fueran representativas de la producción y el comercio de productos forestales en los países de referencia. Se consideró preferible publicar los precios del mercado claramente especificados, en vez de los promedios o índices de precios.

Presentación

La presente publicación contiene 453 series de precios. De estas, 312 se refieren a la madera en rollo, la madera aserrada y los tableros de madera, incluidos 142 de trozas y madera aserrada de especies tropicales y 103 a la pasta del papel y el cartón. Las series han sido proporcionadas por 52 países.

Se facilitan los datos disponibles correspondientes a los años 1960 a 1978. Los precios se indican (i) en moneda nacional, (ii) en el precio equivalente en dólares EE.UU. y (iii) como índice del precio en dólares, tomando 1970 como año de base. El precio indicado es normalmente un promedio anual, pero en algunos casos que se especifican corresponde a un mes determinado del que se tenían datos. Los precios se han convertido de la moneda nacional a dólares de los EE.UU., aplicando las cotizaciones indicadas en las International Financial Statistics del FMI, y que figuran en la página 81. El volumen se expresa en unidades de uso local y se convierte a unidades estándar - metros cúbicos o toneladas métricas - mediante la aplicación, cuando resulta necesario, de factores de conversión adecuados.

Las series se agrupan según el producto principal. Los grupos de productos se enumeran en el índice de materias. Se da información, para cada serie, sobre los particulares de las descripciones disponibles y sobre el lugar de venta de cada serie, y además se incluye una referencia a la procedencia de la serie. Las descripciones figuran en inglés y francés o español, cuando estos son los idiomas originales.

Para muchos países e importantes productos forestales no se dispone de datos periódicos. Sin embargo, en algunos casos se han obtenido datos correspondientes a algunos años. Este tipo de información incompleta se ha consignado en cuadros suplementarios, expresados en dólares de los EE.UU. y en unidades estándar únicamente. En tales casos no se dan detalles sobre la procedencia o la descripción.

Una serie más limitada de precios figura en la publicación semestral Timber Bulletin for Europe, CEPE, Ginebra. El Anuario de Productos Forestales de la FAO, Roma, contiene cuadros del valor unitario medio de los productos forestales comerciales. El primer número de "Precios mensuales de los productos forestales" se publicó como suplemento del Timber Bulletin for Europe, FAO/CEPE, Ginebra, febrero de 1979. En el Boletín Mensual de Estadística de la FAO, Roma, han figurado series de precios de productos forestales de importancia internacional, desde el Vol. 2, No. 1 de enero de 1979.

1 cord - 1 corde - 1 cuerda	2.12	74.9
1 000 stacked cubic feet - 1 000 pieds cubes empilés - 1 000 pies cúbicos hacinados	18.41	650

2/ For Canada and the United States in converting the volume of sawnwood reported in 1 000 board feet to cubic metres, the nominal conversion factor 2.36 m³ per 1 000 board feet has been applied. Sawing conventions in these countries generally result in the volume being less than the nominal volume. For example, it is estimated that for the U.S., taking coniferous and non-coniferous together, the actual average volume of rough green sawnwood would be 3% less than the nominal volume, while the weighted average volume for surfaced dry coniferous and rough dry non-coniferous sawnwood would be 27% less than the nominal volume.

2/ En ce que concerne le Canada et les Etats-Unis, on a utilisé - pour convertir en mètres cubes le volume de sciages exprimé en 1.000 pieds planchés, le facteur de conversion 2,36 m³ par 1.000 pieds planches. Selon les conventions sur les sciages en vigueur dans ces pays, le volume est généralement inférieur au volume nominal. Ainsi, par exemple, aux Etats-Unis, le volume moyen effectif - pour les résineux et les non résineux pris ensemble - des sciages verts bruts serait de 3% inférieur au volume nominal, tandis que le volume moyen pondéré pour les sciages de résineux secs surfacés et les sciages bruts secs de non résineux serait de 27% inférieur au volume nominal.

2/ En el caso de Canadá y los Estados Unidos, al convertir a metros cúbicos el volumen de madera aserrada comprendido en 1 000 pies tablares, se aplicó un factor de conversión nominal de 2,36 m³ por 1 000 pies tablares. En esos países, la normas relativas al aserrado se traducen por lo general en que el volumen sea inferior al volumen nominal. Por ejemplo, se estima que en el caso de los Estados Unidos, tomando en conjunto las coníferas y las no coníferas, el volumen promedio real de madera aserrada verde sin cepillar sería inferior en un 3 por ciento al volumen nominal, en tanto que el volumen promedio ponderado de la madera seca y cepillada de coníferas y de la madera aserrada seca sin cepillar de especies no coníferas sería inferior en un 27 por ciento al volumen nominal.
