INTRODUCTION

This publication is the ninth issue of the FAO Forestry Paper - Forest Products Prices. The present publication contains 742 series of prices.

The principal function of these international price series is to provide information relevant to medium and long-term policy formulation in forestry and the forest industries, and a readily available source of comparative information for use at the preliminary stages in the formulation of investment projects. In view of the difficulty of publishing price information sufficiently quickly to be useful for short-term market decision making, it was considered that publication of data suitable for this purpose should not be attempted as part of this project. It should also be recognised that the preparation and appraisal of investment projects will require more up-to-date, specific and more detailed price data than can be provided by this publication.

The aim in preparing this survey was to obtain series, which were clearly specified in terms of product characteristics and location, and representative of the production and trade in forest products in the countries concerned. Preference was given in publication to fully specified market prices over average prices or price indices.

Presentation

Where available, data are provided for the year 1971-1990. The prices are quoted (i) in national currency, (ii) in the equivalent price in US dollars, and (iii) as an index of the dollar price with base year 1980. The price quoted is usually an average for the year, but in some specified cases it is for a particular month for which data were consistently available. Prices were converted from national currency to US dollars using exchange rates quoted in IMF International Financial Statistics and shown on page 251. Volume is given in locally used units and converted to standard units - cubic metres or metric tons - appropriate conversion factors having been applied where necessary.

The series are grouped according to main product and for the first time by country. The product groups and the country tables are listed in the table of contents. Information about the available detail of specification and the location of sale is shown for each series, together with a reference to the source of the series. The specifications are presented in English and in French or Spanish where these are the language of origin.

For many countries and for important forest products regularly reported data are not available. However, in some cases information for some years has been obtained. This type of incomplete data has been shown in supplementary tables converted to US dollars and in standard units only. Details of source and specification are not shown for these cases (stumpage fees and royalties).

Graphical presentation is included at the beginning of each of the 17 product groups to highlight overall development of prices in the group. Both current prices and indices are presented. The group average of prices is graphed to describe movements in the price level to emphasize relative price changes compared to the base year 1980. The pictures include the scatter of individual prices to describe deviations from mean.

A summary presentation of price development in the form of aggregate price indices is included as an introduction to the tables. Seven aggregate indices are formed and graphed together with their component price indices. Finally, a forest products price index, being a weighted average of all price indices, is presented. The seventeen aggregate indices and the forest products price index are given in current prices and in deflated prices. The index of export unit values of manufactured goods from the UN Monthly Bulletin of Statistics is used as deflator.

A more restricted series of prices appears in the Timber Bulletin for Europe, ECE, Geneva. Tables of the average unit value of forest products in trade appear in the annual Yearbook of Forest Products, FAO, Rome. "Monthly Prices for Forest Products" is published as a supplement to the Timber Bulletin for Europe, FAO/ECE, Geneva. The FAO Quarterly Bulletin of Statistics, FAO, Rome, includes forest product price series of international significance.

INTRODUCTION

La présente publication est le neuvième numéro de l'étude FAO: Forêts - Prix des Produits forestiers. Cette publication comprend 742 séries de prix.

La principale raison d'être de ces séries internationales de prix est de fournir une information pour l'élaboration des politiques à long terme en matière de foresterie et d'industries forestières et une source d'accès facile de renseignements comparatifs qui serviront au stade préliminaire, délai suffisamment bref pour qu'il puisse en être tenu compte dans un contexte commercial à court terme. On a estimé préférable de ne pas chercher à publier des données, destinées à ce genre d'utilisation. Il faut également reconnaître que l'élaboration et l'évaluation des projets d'investissement exigera des données en matière de prix plus récentes, plus spécifiques et plus détaillées que ne peut en fournir la présente publication.

L'objectif de cette enquête a été d'obtenir des séries clairement définies en termes de caractéristiques et de sources des produits, et représentative de la production et du commerce des produits forestiers dans les pays en cause. On a jugé préférable de publier des prix de marché bien définis plutôt que des moyennes ou des indices de prix.

Présentation

Dans la mesure du possible, les données ont été fournies pour les années 1971 à 1990. Les prix sont publiés (i) en monnaie nationale, (ii) en équivalent dollars des Etats-Unis et (iii) en indice du prix en dollars avec pour base l'année 1980. Le prix indiqué est généralement une moyenne pour l'année, mais dans certains cas, il a trait à un mois particulier pour lequel on disposait de renseignements précis. Les prix en monnaie nationale ont été convertis en dollars des Etats-Unis en utilisant les taux de change figurant dans "International Financial Statistics", publié par le Fonds monétaire international, et indiqués à la page 251. Les quantités sont données en unités locales et converties en unités standard - mètres cubes ou tonnes - grâce à des coefficients de conversion appropriés.

Les séries sont groupées par produits principaux et pour la première fois, par pays. La liste des groupes de produits et les tableaux par pays figure dans la table des matières. On trouvera les renseignements disponibles sur les caractéristiques et l'emplacement de vente des produits de chaque série, ainsi que l'indication de la source des séries. Les caractéristiques sont présentées en anglais en français ou en espagnol, s'il s'agit de la langue originale.

Pour de nombreux pays et pour d'importants produits forestiers, on ne dispose pas de données régulières. Toutefois, dans certains cas, on a pu obtenir des renseignements pour certaines années. Ces données incomplètes figurent dans des tableaux supplémentaires, converties en dollars des Etats-Unis et en unités standards seulement. Dans ce cas, les sources et les caractéristiques ne sont pas indiquées (redevances d'abattage).

Chacun des 17 groupes de produits est précédé de graphiques qui mettent en relief l'évolution générale des prix dans le groupe. Les prix courants ainsi que les indices sont mentionnés. Une courbe de la moyenne des prix pour le groupe illustre les variations du niveau des prix et fait apparaître les changements des prix relatifs par rapport à l'année de base 1980. Ces graphiques indiquent aussi la dispersion des différents prix pour faire ressortir ces écarts par rapport à la moyenne.

Des indices agrégatifs récapitulant de l'évolution des prix figurent en introduction aux tableaux. On a formé sept indices agrégatifs qui ont été reportés sur une courbe avec les indices des prix qui les composent. Enfin, un indice des produits forestiers, qui est la moyenne pondérée de tous les indices de prix, est également présenté. Les dix sept indices agrégatifs et l'indice des prix des produits forestiers sont donnés en prix courants et en prix ajustés. Ils sont ajustés à l'aide de l'indice des valeurs unitaires à l'exportation des produits manufacturés extraits du Bulletin mensuel de statistiques des Nations Unies.

Une série de prix plus limitée figure dans le Bulletin du bois pour l'Europe, FAO/ECE, Genève. Des tableaux donnant la valeur unitaire moyenne du commerce des produits forestiers figurant dans l'Annuaire des produits forestiers, FAO, Rome. "Prix mensuels des produits forestiers" est publié à titre de supplément au Bulletin du bois pour l'Europe, FAO/ECE, Genève. Le Bulletin trimestriel FAO de statistiques, FAO, Rome, publie des séries de prix de produits forestiers d'importance internationale.

INTRODUCCION

La presente publicación es el nono número de los Documentos Forestales de la FAO - Precios de los Productos Forestales. La presente publicación contiene 742 series de precios.

La función principal de estas series de precios internacionales es dar información pertinente para la formulación de políticas a mediano y largo plazo en materia de montes e industrias forestales, y constituir una fuente asequible de información comparada que pueda utilizarse en las fases preliminares de la formulación de proyectos de inversión. En vista de la dificultad de publicar información sobre precios con la suficiente rapidez para que resulte útil en la adopción de decisiones comerciales a corto plazo, se consideró que la publicación de datos a tal efecto no debía formar parte del presente proyecto. Debe reconocerse también que la preparación y evaluación de los proyectos de inversión requerirán datos sobre precios más actualizados, concretos y detallados de los que puede proporcionar esta publicación.

El objetivo de la preparación de este estudio consistía en obtener series que especificaran claramente las características y la ubicación de los productos y que fueran representativas de la producción y el comercio de productos forestales en los países de referencia. Se consideró preferible publicar los precios del mercado claramente especificados, en vez de los promedios o índices de precios.

Presentación

Se facilitan los datos disponibles correspondientes a los años 1971 a 1990. Los precios se indican (i) en moneda nacional, (ii) en el precio equivalente en dólares EE.UU. y (iii) como índice del precio en dólares, tomando 1980 como año de base. El precio indicado es normalmente un promedio anual, pero en algunos casos que se especifican corresponde a un mes determinado del que se tenían datos. Los precios se han convertido de la moneda nacional a dólares de los EE.UU., aplicando las cotizaciones indicadas en el International Financial Statistics del FMI, y que figuran en la página 251. El volumen se expresa en unidades de uso local y se convierte a unidades standard - metros cúbicos o toneladas métricas - mediante la aplicación, cuando resulta necesario, de factores de conversión adecuados.

Las series se agrupan según el producto principal y por primera vez por países. Los grupos de productos y los cuadros de los países se enumeran en el índice de materias. Se da información, para cada serie, sobre los particulares de las descripciones disponibles y sobre el lugar de venta de cada serie, y además se incluye una referencia a la procedencia de la serie. Las descripciones figuran en inglés y francés o español, cuando estos son los idiomas originales.

Para muchos países e importantes productos forestales no se dispone de datos periódicos. Sin embargo, en algunos casos se han obtenido datos correspondientes a algunos años. Este tipo de información incompleta se ha consignado en cuadros suplementarios, expresados en dólares de los EE.UU. y en unidades standard únicamente. En tales casos no se dan detalles sobre la procedencia o la descripción (impuestos forestales).

Al principio de cada uno de los 17 grupos de productos, se ha incluido una presentación gráfica con el fin de destacar el movimiento general de los precios en el grupo. Se presentan tanto los precios corrientes como los índices correspondientes. Se da un gráfico en el que figura el promedio de precios del grupo para describir así los movimientos registrados en el nivel de precios y para poner de relieve los cambios relativos de los precios en comparación con los del año de base de 1980. En los cuadros se incluye la dispersión de los distintos precios para describir las desviaciones de la media.

Como introducción se incluye en los cuadros una presentación resumida del movimiento de los precios en forma de índice de precios agregados. Se forman así y se dan en un gráfico común siete índices agregados, con sus correspondientes índices de los precios componentes. Finalmente se presenta un índice de precios de productos forestales, que es la media ponderada de todos los índices de precios. Los diecisiete índices agregados y el índice de precios de productos forestales se dan tanto en precios corrientes como en precios reales (constantes). Se usa como factor de deflación el índice de valores unitarios de exportación de artículos manufacturados tomado del UN Monthly Bulletin of Statistics.

Una serie más limitada de precios figura en la publicación semestral Timber Bulletin for Europe, CEPE, Ginebra. El Anuario de Productos Forestales de la FAO, Roma, contiene cuadros del valor unitario medio de los productos forestales comerciales. "Precios mensuales de los productos forestales" se publicó como suplemento del Timber Bulletin for Europe, FAO/CEPE, Ginebra. En el Boletín Trimestral de Estadísticas de la FAO, ROMA, han figurado series de precios de productos forestales de importancia internacional.
