Map of Asia and the Pacific is used courtesy of The General Libraries, The University of Texas at Austin. The picture on the cover was taken by Farooq Naeem/FAO. Tables were prepared by the FAO Statistics Division and the Regional Office for Asia and the Pacific, on the basis of information available as of August 2012. Please note that growth rates take into consideration data that are not printed. Inquiries about the technical contents and comments about the profiles should be addressed to the Senior Statistician, FAO Regional office for Asia and the Pacific.

## FOREWORD

This document is the twenty-eighth issue of the publication *Selected indicators of food and agricultural development in the Asia-Pacific region*. It presents data on selected items for the years 2001-2010, except for some tables that also provide information for 2011. Most tables show two types of information: annual figures for 2000, 2007, 2008, 2009 and 2010 and the average annual growth rate for the period 2000-2010. The indicators are grouped under the following headings: Agricultural land and population, Agricultural inputs, Production indices, Staple food crops, Edible oil crops, Horticultural crops, Fibre crops, Other crops, Livestock, Agricultural trade, Fisheries, Forestry, Nutrition and Other indicators, including two tables reporting the status of organic farming and the production and trade of biofuels in the region. A section on country profiles precedes the tables.

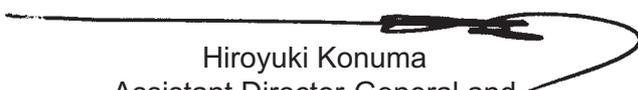

Member countries in the region are shown under two main groups: "Developing countries/transition economies" and "Developed countries". Subregional totals are also shown under the first group. Statistics obtained using data values from all of these member countries are labeled as "Asia & Pacific\*". For comparison purposes, figures relating to "Rest of world" and "World" are also presented. Country data for Timor-Leste were reported as provincial data for Indonesia before 2000.

For almost all commodity tables, data are mainly retrieved from the FAO computerized data bases, especially FAOSTAT, on the basis of information available as of August 2012. Data given for 2011 was still incomplete and preliminary as of that date. These data are based on information supplied by member countries. Other sources of data are cited.

Many members have substantially revised statistics for earlier years or have provided estimates for 2010. Totals for these years may be under-estimates due to non-reporting or partial reporting. Such instances are identified by the superscripts used in the tables. Caution should therefore be used when interpreting these estimates.

To indicate the overall regional performance and also to highlight intercountry differences, growth rates shown in the present publication have been calculated using the semi-log regression (or exponential growth) covering all time points.

Various units of FAO, especially the Statistics Division and in particular the Production, Trade and Food Balance Sheet, and the Statistical Systems and Data Dissemination Teams, substantially contributed to the preparation of this publication. Their collaboration is gratefully acknowledged.

Hiroyuki Konuma  
Assistant Director-General and  
FAO Regional Representative for Asia and the Pacific

Bangkok, October 2012

## SYMBOLS USED IN THE TABLES

<b>*</b>	Unofficial figure
<b>A</b>	May include official, semi-official or estimated data
<b>F</b>	FAO estimate
<b>Fc</b>	FAO Calculated
<b>P</b>	Partner data
<b>T</b>	Trend calculation
<b>...</b>	Data not available
<b>MT</b>	Metric tonne
<b>Ha</b>	Hectare
<b>Kg</b>	Kilogram
<b>Kg/ha</b>	Kilogram per hectare
<b>CUM</b>	Cubic meter

In most tables a blank space has the same meaning as the symbol (...) defined above.

Subregional totals refer only to countries in the table.

For crop yields and all subregional totals no (F) or (\*) symbol is used as these are derived data.

To divide decimals from whole numbers, a full stop (.) is used.

Please note that **Asia-Pacific\*** refers to countries in the table.

128	Cotton lint: exports in volume ..... 184
129	Jute: imports in volume ..... 185
130	Jute: exports in volume ..... 186
131	Silk: imports in volume ..... 187
132	Silk: exports in volume ..... 188
<b>FISHERIES</b>	
133	Inland capture fisheries: production ..... 191
134	Marine capture fisheries: production ..... 192
135	Total capture fisheries: production ..... 193
136	Aquaculture: production ..... 194
137	Fish and fish products: imports and exports in volume ..... 195
138	Fish and fish products: imports and exports in value ..... 196
<b>FORESTRY</b>	
139	Roundwood: production ..... 199
140	Wood fuel (including wood for charcoal): production ..... 200
141	Industrial roundwood: production ..... 201
142	Sawlogs and veneer logs: production ..... 202
143	Sawnwood and sleepers: production ..... 203
144	Wood-based panels: production ..... 204
145	Wood pulp: production ..... 205
146	Paper and paperboard: production ..... 206
147	Forestry products: imports in value ..... 207
148	Forestry products: exports in value ..... 208

## CONTENTS (continued)

	Page
<b>NUTRITION</b>	
149	Per person dietary energy consumption (DEC), number and proportion of undernourished population ..... 211
150	Daily per capita energy availability from major food groups: vegetal and animal products ..... 212
151	Daily per capita energy availability from major food groups: cereals, starchy roots and pulses ..... 213
152	Daily per capita energy availability from major food groups: sugar and sweeteners, oilcrops, fruits and vegetables ..... 214
153	Daily per capita energy availability from major food groups: vegetable oils, meat, milk – excluding butter and fish-seafood ..... 215
154	Availability from major food groups as percentage of total energy supply: vegetal and animal products ..... 216
155	Availability from major food groups as percentage of total energy supply: cereals, starchy roots and pulses ..... 217
156	Availability from major food groups as percentage of total energy supply: sugar and sweeteners, oilcrops, fruits and vegetables ..... 218
157	Availability from major food groups as percentage of total energy supply: vegetable oils, meat, milk – excluding butter and fish-seafood ..... 219
158	Desirable dietary pattern (DDP) ..... 220
159	Percentage of protein and fats from animal sources in total dietary energy supply ..... 221
160	Yearly per capita consumption in kilogrammes from major food groups, 2009 ..... 222
161	Some population indicators affecting nutritional status ..... 223
<b>OTHER INDICATORS</b>	
162	Number and area of agricultural holdings ..... 227
163	Organic farming in Asia and the Pacific 2010 ..... 228
164	Population and agricultural labour force ..... 229
165	Growth of GDP and agricultural GDP ..... 230
166	Agriculture's share in GDP, growth rate of value added in agriculture and industry ..... 231
167	GNI per caput, its growth, inflation and ODA receipts ..... 232
168	Food consumption, food imports and food aid ..... 233
169	Bioenergy production, consumption and trade ..... 234

### SOUTHEAST ASIA

#### CAMBODIA

Land Use 2009	Total area: 17 652 000 ha
	Arable & perm. crops: 23%
Population 2011	Total population: 14 305 thousand
	Agricultural population: 65.5%
GDP/GNI 2010	Total GDP: US\$11 242 million
	GNI per capita: US\$750
	Agricultural GDP: 36% of total GDP
Agricultural Trade 2010	Imports: US\$639.4 million
	Exports: US\$161.7 million
Nutrition 2010-2012	Per capita DEC: 2 410 kcal/day
	Proportion of undernourishment: 17%

Cambodia is located on mainland Southeast Asia between Thailand, Viet Nam and Lao PDR. Cambodia has a sea coast on the Gulf of Thailand. Natural resources are abundant in timber, gemstones, some iron ore, manganese and phosphate and hydroelectric potential from the Mekong River. Agriculture dominates the Cambodian economy, contributing 36 percent GDP in 2010 and employing 65.4 percent of the workforce in 2011. The majority of farming households are engaged in rice production. Main agricultural products are paddy rice, cassava, maize, cattle meat, pig meat, and vegetables. Agricultural imports have grown at an annual rate of 20 percent from 2000 to 2010. The main agricultural imports include refined sugar, cigarettes, prepared food, non-alcoholic beverage, and food waste. Over the same period, agricultural exports have increased 17.3 percent annually. Soybeans is the major agricultural export followed by natural rubber, rice, maize, palm oil and cigarettes.

#### INDONESIA

Land Use 2009	Total area: 181 157 000 ha
	Arable & perm. crops: 23.5%
Population 2011	Total population: 242 326 thousand
	Agricultural population: 36.7%
GDP/GNI 2010	Total GDP: US\$708 027 million
	GNI per capita: US\$2 500
	Agricultural GDP: 15.3% of total GDP
Agricultural Trade 2010	Imports: US\$12 474.9 million
	Exports: US\$30 722.4 million
Nutrition 2010-2012	Per capita DEC: 2 700 kcal/day
	Proportion of undernourishment: 9%

Indonesia, the world's largest archipelago, is located between the Indian and the Pacific Oceans. A large part of its land area is coastal lowlands; larger islands have interior mountains. The country has extensive natural resources, including abundant forest and oceanic resources, fertile land and rich deposits of petroleum, natural gas, tin, nickel, timber, bauxite, copper, coal, gold and silver. Indonesia has a well-balanced economy in which all major sectors play an important role. Agriculture (including animal husbandry, fishing and forestry) is both an important source of export earnings and formal employment, and the means by which the majority of the Indonesian rural population subsists. About 40.8 percent of the workforce in 2011 engages in agriculture. The agricultural sector contributed 15.3 percent of the total GDP in 2010. Main agricultural products are paddy rice, palm oil, rubber, cassava, chicken meat, coconuts, maize, and bananas. Agricultural imports have grown at an annual rate of 12.7 percent from 2000 to 2010. Main agricultural imports include wheat, cake of soybean, cotton lint, soybeans, and refined sugar. Over the same period, agricultural exports have grown at 22.4 percent annually. Palm oil is the major agricultural export followed by dry natural rubber, palm kernels, cocoa beans and green coffee.

## LAO PDR

Land Use 2009	Total area: 23 080 000 ha
	Arable & perm. crops: 6.4%
Population 2011	Total population: 6 288 thousand
	Agricultural population: 74.7%
GDP/GNI 2010	Total GDP: US\$7 181 million
	GNI per capita: US\$1 010
	Agricultural GDP: 32.7% of total GDP
Agricultural Trade 2010	Imports: US\$289.4 million
	Exports: US\$77.0 million
Nutrition 2010-2012	Per capita DEC: 2 310 kcal/day
	Proportion of undernourishment: 28%

Lao People's Democratic Republic is a mountainous, land-locked, small country heavily dependant economically on Thailand with an inadequate infrastructure and a largely unskilled workforce. The most valuable natural resources are forests and rivers which are useful for producing electricity; but some of the electricity produced is exported to Thailand and little is available outside of urban areas. Agriculture (including forestry and fishing) is the most important economic sector. Agriculture, mostly subsistence rice farming, employs an estimated 74.7 percent of the workforce in 2011 and produces about 32.7 percent of GDP in 2010. Rice production dominates agriculture, accounting for 40 percent of land under cultivation. Fresh vegetable is the most important non-rice cash crop. Other crops include maize, pig meat, buffalo meat, green coffee, tobacco, and cattle meat. Agricultural imports have grown at an annual rate of 16.9 percent from 2000 to 2010. The main agricultural imports include non-alcoholic beverages, beer, prepared food, coffee extracts, refined sugar, and food wastes. Over the same period, agricultural exports have expanded 13.3 percent annually. Green coffee is the major agricultural export followed by maize, sesame seed and prepared fruit.

## MALAYSIA

Land Use 2009	Total area: 32 855 000 ha
	Arable & perm. crops: 23.1%
Population 2011	Total population: 28 859 thousand
	Agricultural population: 11.5%
GDP/GNI 2010	Total GDP: US\$237 797 million
	GNI per capita: US\$7 760
	Agricultural GDP: 10.6% of total GDP
Agricultural Trade 2010	Imports: US\$14 080.1 million
	Exports: US\$25 912.7 million
Nutrition 2010-2012	Per capita DEC: 2 800 kcal/day
	Proportion of undernourishment: <5%

Malaysia consists of two separate parts divided by the South China Sea: Peninsular Malaysia on the Malay Peninsula; and East Malaysia, the northern part of the Island of Borneo. Both West and East Malaysia feature coastal plains rising to often densely forested hills and mountains. Natural resources are petroleum, liquefied natural gas (LNG), tin and minerals. The main agricultural products are palm oil, chicken meat, palm kernels, natural rubber, paddy rice, hen eggs and pig meat. Malaysia transformed itself from 1971 through the late 1990s from a producer of raw materials into an emerging multi-sector economy via the New Economic Plan (NEP). Manufacturing grew from 13.9 percent of GDP in 1970 to 25.5 percent in 2009, while agriculture and mining, which together had accounted for 42.7 percent of GDP in 1970, dropped to approximately 10.6 percent in 2010. Agricultural imports have grown at an annual rate of 14.7 percent from 2000 to 2010. Main agricultural imports include natural rubber, cocoa beans, palm oil, sugar raw centrifugal, maize, and rice. Over the same period, agricultural exports have increased 17.1 percent annually. Palm oil is the major agricultural export (world's largest exporter) followed by hydrogenated oil, natural rubber, fatty acids, cocoa butter and palm kernel.

## MYANMAR

Land Use 2009	Total area: 65 352 000 ha
	Arable & perm. crops: 18.6%
Population 2011	Total population: 48 337 thousand
	Agricultural population: 66.7%
GDP/GNI 2010	Total GDP: n.a.
	GNI per capita: n.a.
	Agricultural GDP %: n.a.
Agricultural Trade 2010	Imports: US\$1 227.8 million
	Exports: US\$645.5 million
Nutrition 2010-2012	Per capita DEC: n.a.
	Proportion of undernourishment: n.a.

Myanmar has borders on the Andaman Sea and the Bay of Bengal and is located between Bangladesh and Thailand. It has central lowlands ringed by steep, rugged highlands. Natural resources are petroleum, timber, tin, antimony, zinc, copper, tungsten, lead, coal, some marble, limestone, precious stones, natural gas and hydropower. Main agricultural products are paddy rice, dry beans, chicken meat, pig meat, vegetables, sesame seed, and fresh fruit. According to official data, agriculture (including forestry and fishing) remains by far the biggest sector, accounting for 59.1 percent of current-price GDP in 2010, and employing close to 66.7 percent of the workforce in 2011. Agricultural imports have increased at an annual rate of 13.4 percent from 2000 to 2010. Main agricultural imports include palm oil, prepared food, non-alcoholic beverage, beer, and beer of barley. Over the same period, agricultural exports have increased 11.5 percent annually. Dry beans are the major agricultural export followed by sesame seeds, maize, rice and chick peas.

## PHILIPPINES

Land Use 2009	Total area: 29 817 000 ha
	Arable & perm. crops: 35%
Population 2011	Total population: 94 852 thousand
	Agricultural population: 32.9%
GDP/GNI 2010	Total GDP: US\$199 589 million
	GNI per capita: US\$2 060
	Agricultural GDP: 12.3% of total GDP
Agricultural Trade 2010	Imports: US\$5 827.6 million
	Exports: US\$3 362.9 million
Nutrition 2010-2012	Per capita DEC: 2 500 kcal/day
	Proportion of undernourishment: 17%

The Philippines is one of the world's largest archipelagos; with more than 7 100 islands, it extends 1 900 km north to south and 1 100 km east to west. The land is mostly mountainous with coastal lowlands. The Philippines has extensive fishing resources (both marine and inland) and large deposits of mineral and energy resources, such as petroleum, nickel, cobalt, silver and gold, and timber. Reflecting its varied resource endowments, physical and human, the economy is diversified. Rice production continues to dominate the agricultural sector. Other main agricultural products include pig meat, bananas, coconut, tropical fresh fruit, and chicken meat. About 33.1 percent of the workforce engages in agriculture. The share of agriculture in total GDP has declined as the sector contributed only about 12.3 percent of the total GDP in 2010. Reflecting this trend, agricultural exports currently account for less than 6 percent of the country's foreign earnings. Agricultural imports have grown at an annual rate of 10.3 percent from 2000 to 2010. Rice is the main agricultural import, followed by wheat, cake of soya beans, prepared food, tobacco, and skimmed milk. Over the same period, agricultural exports have grown at 8.9 percent. Coconut oil are the country's a major agricultural export. The country also exports bananas, desiccated coconut, pineapples and prepared fruits.

## THAILAND

Land Use 2009	Total area: 51 089 000 ha
	Arable & perm. crops: 37.2%
Population 2011	Total population: 69 519 thousand
	Agricultural population: 40.3%
GDP/GNI 2010	Total GDP: US\$318 908 million
	GNI per capita: US\$4 150
	Agricultural GDP: 12.4% of total GDP
Agricultural Trade 2010	Imports: US\$7 433.1 million
	Exports: US\$25 895.0 million
Nutrition 2010-2012	Per capita DEC: 2 850 kcal/day
	Proportion of undernourishment: 7%

Thailand consists of a densely populated central plain; northeastern plateau; mountain range in the west; and a southern isthmus that connects to Malaysia. Natural resources are tin, rubber, natural gas, tungsten, tantalum, timber, lead, fish, gypsum, lignite and fluorite. The Thai economy is export-dependent, with exports accounting for 60 percent of GDP. The agriculture sector accounted for 12.4 percent of GDP in 2010. Approximately 47.7 percent of Thailand's labour force is employed in agriculture. Rice, the dominant agricultural export crop, is irrigated in the Central Plains and in the basins of northern Thailand, but it is rain-fed elsewhere. Thailand remains the world's largest exporter of rice, and in 2008 sold over 10.2 million tonnes of rice worth almost US\$6.1 billion. Other agricultural products are natural rubber, cassava, sugar cane, chicken meat, mangoes and pig meat. Other agricultural commodities produced in significant amounts include fish and fishery products. Agricultural imports have grown at an annual rate of 11 percent from 2000 to 2010. Soya beans (including cake) is the main agricultural import, followed by cotton lint, prepared food and wheat. Over the same period, agricultural exports have grown at an annual rate of 14.6 percent. Rice and natural rubber (world's largest exporter) are the country's two major agricultural export items. The country also exports canned chicken, prepared foods and sugar.

## TIMOR-LESTE

Land Use 2009	Total area: 1 487 000 ha
	Arable & perm. crops: 15.1%
Population 2011	Total population: 1 154 thousand
	Agricultural population: 79.4%
GDP/GNI 2010	Total GDP: US\$875 million
	GNI per capita: US\$2 730
	Agricultural GDP%: n.a.
Agricultural Trade 2010	Imports: US\$67.8 million
	Exports: US\$16.4 million
Nutrition 2010-2012	Per capita DEC: 1 880 kcal/day
	Proportion of undernourishment: 38%

Timor-Leste is a small mountainous country that is classified among the poorest countries of the world and the poorest in Southeast Asia. Approximately 42 percent of the population of 1.1 million is considered to be below the national poverty line of US\$1.5 per day and 79.4 percent work in agriculture. GDP is expected to decline further, reflecting the continued effect of the reduced international presence and the adverse impact of the weather on agricultural output. The agricultural economy is dominated by low input/output subsistence agriculture. Important products are rice, meat, maize, pig meat, and green coffee. Household food security is highly heterogeneous across districts and the country, although food insecurity is generally a more pronounced problem in rural upland areas. Main agricultural imports include rice, prepared foods, palm oil, non-alcoholic beverage, and chicken meat. Green coffee is the major agricultural export followed by cocoa beans, spices and copra.

## VIET NAM

Land Use 2009	Total area: 31 007 000 ha
	Arable & perm. crops: 31.1%
Population 2011	Total population: 88 792 thousand
	Agricultural population: 62.7%
GDP/GNI 2010	Total GDP: US\$106 427 million
	GNI per capita: US\$1 160
	Agricultural GDP: 20.6% of total GDP
Agricultural Trade 2010	Imports: US\$9 072.7 million
	Exports: US\$10 411.0 million
Nutrition 2010-2012	Per capita DEC: 2 760 kcal/day
	Proportion of undernourishment: 9%

The terrain of Viet Nam varies from mountainous to coastal delta. Natural resources are coal, crude oil, zinc, copper, silver, gold, manganese and iron. Main agricultural products are rice, sugar cane, cassava, vegetables and maize. Measured by employment, Viet Nam is an agrarian society, with around 62.7 percent of the labour force working in agriculture. Since 1986, when the Sixth Party Congress approved a broad economic reform package called “Doi Moi” (renovation), Viet Nam became one of the fastest growing economies in the world, averaging around 7.5 percent annual GDP growth from 2000 to 2010. Simultaneously, agricultural production doubled, transforming Viet Nam from a net food importer to one of the world’s largest producers of rice and of commodities such as pig meat, vegetables, green coffee, cashew nuts, fresh fruit, cassava and rubber. However, agriculture’s share of economic output declined, falling from 42 percent in 1989 to 20.6 percent in 2010 (as production in other sectors of the economy increased). Agricultural imports have grown at an annual rate of 23.4 percent from 2000 to 2010. The main agricultural imports include soya bean cake, beef, palm oil, cotton lint, cigarettes, wheat, and chicken meat. Over the same period, agricultural exports have increased 18.2 percent annually. Rice is the major agricultural export followed by green coffee (world’s second largest exporter), cashew nuts, natural rubber, and pepper.

## SOUTH AND SOUTHWEST ASIA

### AFGHANISTAN

Land Use 2009	Total area: 65 223 000 ha
	Arable & perm. crops: 12.1%
Population 2011	Total population: 32 358 thousand
	Agricultural population: 59.4%
GDP/GNI 2010	Total GDP: US\$17 243 million
	GNI per capita: US\$410
	Agricultural GDP: 29.9% of total GDP
Agricultural Trade 2010	Imports: US\$1 045.0 million
	Exports: US\$271.7 million
Nutrition 2010-2012	Per capita DEC: n.a.
	Proportion of undernourishment: n.a.

Afghanistan is a country of rugged mountains and arid plains, which become deserts in the southwest. It has a wealth of natural resources, including extensive deposits of natural gas, petroleum, coal, copper, chromites as well as (semi)precious stones. Agricultural production is constrained by an almost total dependence on erratic winter snows and spring rains for water; irrigation is primitive. The main agriculture products are wheat, cow milk, cattle meat, sheep meat, grapes, rice and vegetables. The economy has traditionally been dominated by agriculture, which accounted for 29.9 percent of the GDP at current prices in 2010 and employed around 59.4 percent of the workforce in 2011. Relatively little use is made of machines, chemical fertilizers or pesticides. Years of fighting left former cultivated lands uncultivated and yields have dropped, leading to persistent food shortages and increasing food imports. Four consecutive recent years of drought brought a food crisis to Afghanistan. Official statistics have been non-existent since the fall of the government in 1992. One of the largest sectors of the economy is opium poppy cultivation and processing, which together with a growing opium trade may account for one-third of the country's GDP. Main agricultural imports include wheat, palm oil, prepared food, cigarettes, and hydrogenated oil. Raisins, shelled almonds, and pistachios are the main agricultural exports.

### BANGLADESH

Land Use 2009	Total area: 13 017 000 ha
	Arable & perm. crops: 65.7%
Population 2011	Total population: 150 494 thousand
	Agricultural population: 44.4%
GDP/GNI 2010	Total GDP: US\$100 357 million
	GNI per capita: US\$700
	Agricultural GDP: 18.6% of total GDP
Agricultural Trade 2010	Imports: US\$5 399.1 million
	Exports: US\$364.7 million
Nutrition 2010-2012	Per capita DEC: 2 350 kcal/day
	Proportion of undernourishment: 17%

The land of Bangladesh is mostly flat, although there are some hilly areas in the northeastern and southeastern regions. Much of the land is intersected by the numerous waterways of the Ganges Delta and the Brahmaputra River. The annual flooding of the land provides rich alluvial soils. Natural resources are natural gas, fertile soil and water. Around 75 percent of the planted crop area is devoted to rice crops which can be harvested three times a year in many areas thanks to fertile soil and ample water supply. Other agriculture products are potatoes, goat milk, mangoes, goat meat, and cattle meat. Bangladesh's predominantly agricultural economy accounted for 18.6 percent of the total GDP in 2010, depending heavily on an erratic monsoonal cycle with periodic flooding and drought. Most Bangladeshis, 44.4 percent of the total workforce, earn their living from agriculture. Population pressure continues to place a severe burden on productive capacity, creating a food deficit, especially of wheat. Foreign assistance and commercial imports fill the gap. Agricultural imports have grown at an annual rate of 14.2 percent from 2000 to 2010. Main agricultural imports include wheat, sugar, cotton lint, palm oil, dry onions, and soy bean oil. Over the same period, agricultural exports have increased 15.8 percent annually. Jute is the country's major agricultural export (world's largest exporter), followed by tobacco, vegetables, tea and cotton waste.

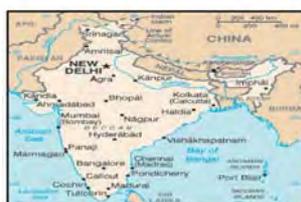

## BHUTAN

Land Use 2009	Total area: 3 839 400 ha
	Arable & perm. crops: 2.6%
Population 2011	Total population: 738 thousand
	Agricultural population: 92.8%
GDP/GNI 2010	Total GDP: US\$1 516 million
	GNI per capita: US\$1 870
	Agricultural GDP: 18.7% of total GDP
Agricultural Trade 2010	Imports: US\$97.8 million
	Exports: US\$29.7 million
Nutrition 2010-2012	Per capita DEC: n.a.
	Proportion of undernourishment: n.a.

Bhutan, one of the world's smallest and least developed countries, is mostly mountainous with some fertile valleys and savanna; 84 percent of the total land is forest. Natural resources are timber, hydropower, gypsum and calcium carbide. The economy is closely aligned with India through strong trade and monetary links and dependence on India's financial assistance. Although poor in terms of income per head, poverty is less evident than in most countries of similar income levels. The economy of Bhutan is based on agriculture, mainly subsistence farming, animal husbandry and forestry, providing the main livelihood to over 92.8 percent of the workforce and contributing 18.7 percent of GDP in 2010. However, the main growth in the sector is a result of forestry and cash-crop production. Increasing self-sufficiency is a major target of the Government. Main agricultural products are nutmeg, and cardamoms, paddy rice, cow milk, cattle meat, and dry chillies and peppers. Agricultural imports have increased at an annual rate of 2.7 percent from 2000 to 2010. Main agricultural imports include rice, barley beer, macaroni, non-alcoholic beverages, and natural rubber. Over the same period, agricultural exports have decreased at 8.7 percent annually. Non-alcoholic beverages are the country's major agricultural export followed by oil citronella and homogen cooked.

## INDIA

Land Use 2009	Total area: 297 319 000 ha
	Arable & perm. crops: 57.1%
Population 2011	Total population: 1 241 492 thousand
	Agricultural population: 47.9%
GDP/GNI 2010	Total GDP: US\$1 684 324 million
	GNI per capita: US\$1 260
	Agricultural GDP: 17.7% of total GDP
Agricultural Trade 2010	Imports: US\$10 406.6 million
	Exports: US\$19 933.4 million
Nutrition 2010-2012	Per capita DEC: 2 320 kcal/day
	Proportion of undernourishment: 17%

The terrain of India varies from the Himalayas to flat river valleys. Natural resources are coal, iron ore, manganese, mica, bauxite, chromite, thorium, limestone, barite, titanium ore, diamonds and crude oil. About 54 percent of India's labour force works in agriculture which, with forestry and fishing, accounts for around 17.7 percent of GDP. However, the majority of landholdings are farmed at subsistence level, and many farming families live below the poverty line. India has some of the lowest human development indicators in the world, particularly in rural areas. At the other end of the scale, India also has a large number of highly qualified professionals, as well as several internationally established industrial groups. Main agriculture products are paddy rice, buffalo milk, cow milk, wheat, mangoes, bananas, sugar cane, and cotton lint. With the introduction of high-yield crop varieties and new fertilizing and irrigation techniques, the so-called Green Revolution, India has been self-sufficient in food since the mid-1970s. Agricultural imports have grown at an annual rate of 14.6 percent from 2000 to 2010. Main agricultural imports include palm oil, sugar, dry beans, soy bean oil, and cashew nuts. Over the same period, agricultural exports have increased 16.9 percent annually. Rice is the major agricultural export (world's third largest exporter) followed by cotton lint (world's third largest exporter), soya bean cake, buffalo meat and tobacco.

## IRAN (ISLAMIC REP. OF)

Land Use 2009	Total area: 162 855 000 ha
	Arable & perm. crops: 11.7%
Population 2011	Total population: 74 799 thousand
	Agricultural population: 21.1%
GDP/GNI 2010	Total GDP: US\$331 015 million
	GNI per capita: n.a.
	Agricultural GDP: 10.2% of total GDP
Agricultural Trade 2010	Imports: US\$9 137.3 million
	Exports: US\$5 402.3 million
Nutrition 2010-2012	Per capita DEC: 3 080 kcal/day
	Proportion of undernourishment: <5%

The terrain of Iran mostly consists of desert and mountains. Natural resources are petroleum, natural gas and some mineral deposits. Main agriculture products are chicken meat, cow milk, tomatoes, wheat, pistachios, grapes, and cattle meat. Historically an agricultural society, Iran achieved significant industrialization and economic modernization by the 1970s, but the economy slowed dramatically until after the end of the war with Iraq. The oil sector's share of GDP declined from 30-40 percent in the 1970s to 10-20 percent, mainly as a result of war damage to production facilities; oil revenue still provides a substantial portion of export earnings. State investment, large-scale irrigation schemes and wider production of export-based agricultural items such as dates, flowers and pistachios made agriculture Iran's fastest growing sector over much of the 1990s. Production was reduced significantly by severe drought from 1999-2001, leading to heavy losses in livestock and cereal production. After a strong recovery Iran appears within reach of food self-sufficiency. Agriculture remains one of the largest employers, accounting for about 21.2 percent of all jobs and 10.2 percent of GDP. Agricultural imports have grown at an annual rate of 14.3 percent from 2000 to 2010. Wheat is the main agricultural import, followed by rice, maize, soybean, palm oil, and soya bean oil. Over the same period, agricultural exports have increased at 14.5 percent annually. Pistachios, spices, soya bean oil, raisins, and dates are the main agricultural exports.

## MALDIVES

Land Use 2009	Total area: 30 000 ha
	Arable & perm. crops: 23.3%
Population 2011	Total population: 320 thousand
	Agricultural population: 17.8%
GDP/GNI 2010	Total GDP: US\$2 076 million
	GNI per capita: US\$6 150
	Agricultural GDP: 3.1% of total GDP
Agricultural Trade 2010	Imports: US\$235.6 million
	Exports: US\$0.0 million
Nutrition 2010-2012	Per capita DEC: 2 720 kcal/day
	Proportion of undernourishment: 6%

The 1 190 islands of the Maldives are scattered over a vast area of the Indian Ocean (90 000 square kilometres), complicating transport, especially in rough seas, and making service delivery to the unevenly distributed and widely dispersed population living on 198 islands very expensive. Marine resources are the main natural endowment, with economic activities concentrated on fishing and tourism. There are no inland fisheries and no aquaculture in the Maldives. Fishing operations take place in offshore, coastal and reef waters. A small internal market (many island communities depend on a single source of income (fishing), scarcity of jobs and very limited agricultural opportunities add to the complexity of development challenges. Agricultural imports grew at an annual rate of 12.4 percent from 2000 to 2010. Main agricultural imports include rice, cigarettes, chicken meat, milk, and wheat flour. Over the same period, agricultural exports have declined 32.6 percent annually and remain limited. Prepared food is the major agricultural export followed by hides.

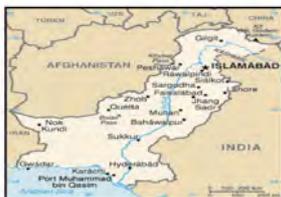

## NEPAL

Land Use 2009	Total area: 14 335 000 ha
	Arable & perm. crops: 17.6%
Population 2011	Total population: 30 486 thousand
	Agricultural population: 92.9%
GDP/GNI 2010	Total GDP: US\$16 014 million
	GNI per capita: US\$490
	Agricultural GDP: 36.5% of total GDP
Agricultural Trade 2010	Imports: US\$666.9 million
	Exports: US\$188.1 million
Nutrition 2010-2012	Per capita DEC: 2 400 kcal/day
	Proportion of undernourishment: 18%

Nepal is located between China and India and has eight of the world's ten highest peaks. The mountains, hills and terai comprise 35 percent, 42 percent and 23 percent of the country's land area, respectively. Around 92.9 percent of the economically active population live in rural areas and depend on subsistence farming. Agriculture accounts for about 36.5 percent of the total GDP. Timber is one of Nepal's main natural resources, but the area under forest has declined to under 25 percent over the past three decades due to overexploitation. The country's other natural resources include quartz, water, hydropower, lignite, copper, cobalt and iron ore. The country's main agricultural production includes paddy rice, buffalo meat, vegetables, buffalo milk, potatoes, fresh fruit, and maize. Agricultural imports have increased at an annual rate of 11.3 percent from 2000 to 2010. Main imported agricultural commodities include soya bean oil, arecanuts, rapeseed, palm oil, and prepared food. Over the same period, agricultural exports have grown at 10.9 percent annually. Nepal's main exports include lentils, nutmeg, tea, wheat and fruit juice.

## PAKISTAN

Land Use 2009	Total area: 77 088 000 ha
	Arable & perm. crops: 27.6%
Population 2011	Total population: 176 745 thousand
	Agricultural population: 42.3%
GDP/GNI 2010	Total GDP: US\$176 870 million
	GNI per capita: US\$1 050
	Agricultural GDP: 21.2% of total GDP
Agricultural Trade 2010	Imports: US\$4 518.6 million
	Exports: US\$3 446.6 million
Nutrition 2010-2012	Per capita DEC: 2 360 kcal/day
	Proportion of undernourishment: 20%

Pakistan is located in southern Asia and is bordered by India in the east, China in the northeast, Afghanistan in the north and northwest, Iran in the southwest and the Arabian Sea to the south. The size of the annual cotton crop, the bulk of it grown in Punjab province, is a crucial barometer of the health of the overall economy since it accounts for a sizeable share of export earnings. Natural resources are arable land, natural gas, limited petroleum, substantial hydropower potential, coal and iron ore. Main agriculture products are buffalo milk, cow milk, wheat, cotton lint, buffalo meat, cattle meat, and paddy rice. In 2010, agriculture accounted for 21.2 percent of GDP and provided employment to 38.6 percent of the labour force. It supplies most of the country's food, but is also the source of raw materials for major domestic industries, especially for cotton products. Two fundamental problems that trouble the agricultural sector are: an excessive dependence on a cotton crop highly susceptible to adverse weather conditions and pest damage; and the food import bill, which is rising rapidly despite a steady increase in crop, livestock, and fruit production. Agricultural imports grew at an annual rate of 14.6 percent from 2000 to 2010. Main imported agricultural commodities include palm oil, wheat, cotton lint, rapeseed and tea. Over the same period, agricultural exports have grown at 14.1 percent annually. Rice is the main agricultural export followed by hydrogenated oil, broken rice, molasses and cotton lint.

## SRI LANKA

Land Use 2009	Total area: 6 271 000 ha
	Arable & perm. crops: 34.6%
Population 2011	Total population: 21 045 thousand
	Agricultural population: 43%
GDP/GNI 2010	Total GDP: US\$49 568 million
	GNI per capita: US\$2 260
	Agricultural GDP: 12.8% of total GDP
Agricultural Trade 2010	Imports: US\$1 822.7 million
	Exports: US\$2 361.2 million
Nutrition 2010-2012	Per capita DEC: 2 420 kcal/day
	Proportion of undernourishment: 24%

The terrain of Sri Lanka consists of coastal plains in the northern third of the country; with hills and mountains in south-central Sri Lanka which rise as high as 2 133 metres. Natural resources are limestone, graphite, mineral sands, gems and phosphate. Sri Lanka's economy is highly dependent on domestic trade. The main agriculture products are paddy rice, tea, coconut, rubber, chicken meat, and plantains. Sri Lanka is the world's leading tea exporter, and second only to the Philippines in the export of desiccated coconut. Paddy rice dominates the non-plantation agricultural sector and accounts for one-fifth of total agricultural output, rendering it an important determinant of agricultural growth. Although yields have improved continuously, high production costs are a drawback. Agriculture has lost its relative importance in the Sri Lankan economy in recent decades. It accounts for 12.8 percent of GDP and provides employment to 42.2 percent of the working population. Agricultural imports have grown at an annual rate of 10.6 percent from 2000 to 2010. Main imported agricultural commodities include wheat, refined sugar, milk, lentils, and dry onions. Over the same period, agricultural exports have grown at 9.2 percent annually. Tea is the main export followed by natural rubber, fibre crops, cinnamon, desiccated coconuts and wheat flour.

## NORTH AND CENTRAL ASIA

### KAZAKHSTAN

Land Use 2009	Total area: 269 970 000 ha
	Arable & perm. crops: 8.7%
Population 2011	Total population: 16 207 thousand
	Agricultural population: 15.3%
GDP/GNI 2010	Total GDP: US\$148 047 million
	GNI per capita: US\$7 500
	Agricultural GDP: 4.8% of total GDP
Agricultural Trade 2010	Imports: US\$2 202.2 million
	Exports: US\$1 876.0 million
Nutrition 2010-2012	Per capita DEC: 3 260 kcal/day
	Proportion of undernourishment: <5%

Kazakhstan borders many countries and has coastlines on the Aral Sea and the Caspian Sea. Its terrain extends east to west from the Caspian Sea to the Altay Mountains and north to south from the plains of Western Siberia to the oasis and desert of Central Asia. Oil, gas and mineral exports are key to its economic success and have attracted billions of US\$ in foreign investment since the early 1990s. Kazakhstan has significant deposits of coal, iron, copper, zinc, uranium and gold. Kazakhstan is the sixth-largest producer of grain in the world; livestock is another important agricultural commodity. Agricultural land occupies 23.5 million hectares while permanent pastures occupy more than 185 million hectares (68.5 percent of the total land area). Chief livestock products are dairy goods, leather, meat and wool. The country's major agricultural products include cow milk, cattle meat, wheat, sheep meat, potatoes, and pig meat. Agriculture accounts for over 4.8 percent of the GDP and accommodates 13.6 percent of the whole workforce. Agricultural imports have increased at an annual rate of 22.9 percent from 2000 to 2010. Main imported agricultural commodities include prepared food, sugar, chocolate products, and pastry. Over the same period, agricultural exports have grown at 16.6 percent annually. Wheat exports are a major source of hard currency; other agricultural exports are wheat flour (world's largest exporter), cotton lint and barley.

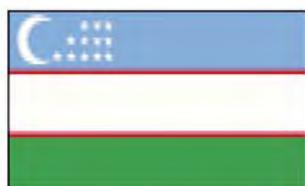

### RUSSIAN FEDERATION

Land Use 2009	Total area: 1 637 687 000 ha
	Arable & perm. crops: 7.5%
Population 2011	Total population: 142 836 thousand
	Agricultural population: 7.8%
GDP/GNI 2010	Total GDP: US\$1 487 516 million
	GNI per capita: US\$9 880
	Agricultural GDP: 4% of total GDP
Agricultural Trade 2010	Imports: US\$31 843.1 million
	Exports: US\$5 832.4 million
Nutrition 2010-2012	Per capita DEC: 3 130 kcal/day
	Proportion of undernourishment: <5%

The Russian Federation is located on Northern Asia, bordering the Arctic Ocean, between Europe and the North Pacific Ocean. At over 17 million square kilometres, Russia is the largest country in the world, covering more than one eighth of the Earth's inhabited land area. It extends across the whole of northern Asia and 40 percent of Europe, spanning nine time zones and incorporating a wide range of environments and landforms. Russia has the world's largest reserves of mineral and energy resources. It has the world's largest forest reserves and its lakes contain approximately one-quarter of the world's fresh water. Natural resources are petroleum, natural gas, timber, furs, precious and nonferrous metals. The Russian Federation has a strong production of wood fuel and industrial roundwood. Agricultural import shares in Russian Federation greatly outbalance shares of agricultural exports. About 7.8 percent of Russian Federation's labour force works in agriculture, contributing 4 percent of GDP in 2010. Main agricultural products are cow milk, cattle meat, wheat, chicken meat, pig meat, and potatoes. Agricultural imports have grown at an annual rate of 17.3 percent from 2000 to 2010. Pig meat are the major agricultural imports followed by beef and veal, tobacco, chicken meat, and cheese of cow milk. Over the same period, agricultural exports have grown at 23.9 percent annually. Main agricultural exports include wheat, sunflower oil, barley, prepared food and cigarettes.

## UZBEKISTAN

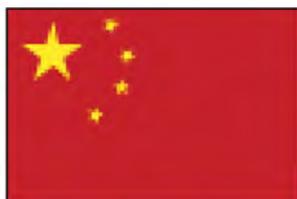

Land Use 2009	Total area: 42 540 000 ha
	Arable & perm. crops: 10.9%
Population 2011	Total population: 27 760 thousand
	Agricultural population: 20.9%
GDP/GNI 2010	Total GDP: US\$39 333 million
	GNI per capita: US\$1 300
	Agricultural GDP: 19.5% of total GDP
Agricultural Trade 2010	Imports: US\$885.1 million
	Exports: US\$1 293.2 million
Nutrition 2010-2012	Per capita DEC: 2 620 kcal/day
	Proportion of undernourishment: 6%

The terrain of Uzbekistan consists of various regions: flat-to-rolling sandy desert with many dunes; broad, flat, intensely irrigated river valleys along Amu Darya and Syr Darya; a shrinking Aral Sea; and semiarid grasslands surrounded by mountainous Tajikistan and Kyrgyzstan in the east. Uzbekistan was one of the poorest republics of the former Soviet Union. The economy is based primarily on agriculture and agricultural processing; much of its population is engaged in cotton farming in small rural communities. Uzbekistan is a major producer and the world's second largest exporter of cotton (roughly 70 percent of total agricultural exports). It is also a major producer of gold with the largest open-pit gold mine in the world and has substantial deposits of copper, strategic minerals, gas and oil. Annual real GDP growth in 2000-2010 was estimated at 7.1 percent. Agriculture and the agro-industrial sector contributed more than 19.5 percent to Uzbekistan's GDP in 2010. Uzbekistan also produces significant amounts of cattle meat, cotton lint, cow milk, tomatoes, and wheat. Agricultural productivity is low, with many farmers focusing on producing fruits and vegetables on small plots of land. Agricultural imports have increased at an annual rate of 14.2 percent from 2000 to 2010. Main imported agricultural commodities include wheat flour, refined sugar, sunflower oil and tea. Over the same period, agricultural exports have also increased at 1 percent annually. Cotton lint is the main export followed by grapes, fruits, raisins and vegetables.

## EAST ASIA

### CHINA

Land Use 2009	Total area: 932 748 950 ha
	Arable & perm. crops: 13.3%
Population 2011	Total population: 1 378 506 thousand
	Agricultural population: 60.2%
GDP/GNI 2010	Total GDP: US\$6 183 257 million
	GNI per capita: US\$4 440
	Agricultural GDP: 11% of total GDP
Agricultural Trade 2010	Imports: US\$81 415.4 million
	Exports: US\$36 164.0 million
Nutrition 2010-2012	Per capita DEC: 2 950 kcal/day
	Proportion of undernourishment: 11%

China is the world's fourth largest country; its terrain is mostly mountains, high plateaus and deserts in the west; and plains, deltas and hills in the east. China is endowed with various natural resources including coal (the world's largest production volume), iron ore, petroleum, natural gas, mercury, tin, tungsten, antimony, manganese, molybdenum, vanadium, magnetite, aluminum, lead, zinc and uranium. In late 1978 the Chinese leadership began moving the economy from a sluggish, centrally planned economy to a more market-oriented system. In 2010, with its 1.37 billion people but a GDP of 5 222 billion, China stood as the second-largest economy in the world after the United States. Agriculture is the most important economic activity, providing a livelihood for over 60.2 percent of the labour force for the country with the world's largest population. Main agricultural products are pig meat, rice, vegetables, hen eggs, chicken meat, cattle meat, wheat, and tomatoes. The country also produces pork and fish. Agricultural imports have grown at an annual rate of 19.1 percent from 2000 to 2010. China is the world's largest importer of soybeans and palm oil. China is also the world's second largest importer of natural rubber and the largest importer of cotton lint and soybean oil. Over the same period, agricultural exports have grown by 11.4 percent annually. Prepared food, prepared fruit, garlic, paste of tomatoes, dry beans, and preserved vegetables are the main agricultural exports.

### DPR KOREA

Land Use 2009	Total area: 12 041 000 ha
	Arable & perm. crops: 23.7%
Population 2011	Total population: 24 451 thousand
	Agricultural population: 22.7%
GDP/GNI 2010	Total GDP: n.a.
	GNI per capita: n.a.
	Agricultural GDP%: n.a.
Agricultural Trade 2010	Imports: US\$381.0 million
	Exports: US\$12.2 million
Nutrition 2010-2012	Per capita DEC: 2 130 kcal/day
	Proportion of undernourishment: 32%

The Democratic People's Republic of Korea occupies the northern half of the Korean peninsula; it borders China and Russian Federation to the north and the Republic of Korea across the demilitarized zone. Mountains, uplands and forests cover 75-80 percent of the total area, leaving barely less than 25 percent to cultivable plains and lowlands, mostly in the west, plus a strip along the eastern coast. DPR Korea is well endowed with a range of minerals: coal, lead, tungsten, zinc, graphite, magnesite, iron ore, copper, gold and pyrites. Agriculture cooperatives were created in the mid-1950s and with the use of modern technology doubled harvests between 1966 and 1984. Yields have since fallen. Only a few areas are suited to agriculture and the drive for food self-sufficiency in hilly terrain led to terracing and soil exhaustion. Since 1995, natural disasters have affected agriculture virtually every year with varying degrees of severity. Imports of much needed agricultural inputs such as fertilizer, pesticides, plastic sheeting, spare parts for machinery, tires for tractors and trucks and fuel have been limited. Most agricultural products are paddy rice, vegetables, apples, rabbit meat, potatoes, and fresh fruit. Agricultural imports have decreased at an annual rate of 2 percent from 2000 to 2010 while exports declined by 6.6 percent over the same period. Wheat flour is the main agricultural import, followed by rice, maize, soya bean oil, and tobacco. Nuts, raw silk, dry beans and cigarettes are the main agricultural exports.

## MONGOLIA

Land Use 2009	Total area: 155 356 000 ha
	Arable & perm. crops: 0.6%
Population 2011	Total population: 2 800 thousand
	Agricultural population: 17.3%
GDP/GNI 2010	Total GDP: US\$6 200 million
	GNI per capita: US\$1 870
	Agricultural GDP: 16.2% of total GDP
Agricultural Trade 2010	Imports: US\$348.2 million
	Exports: US\$106.1 million
Nutrition 2010-2012	Per capita DEC: 2 330 kcal/day
	Proportion of undernourishment: 24%

Almost 93 percent of Mongolia's area is pasture or desert wasteland of varying usefulness; and 6.5 percent is forested. Camels, horses, cattle, sheep and goats are raised in pasture lands. The severe continental climate restricts other agricultural activities. Water is scarce and the growing season lasts no more than 100 days. Land quality is also adversely affected by desertification (which affects 30 percent of pasture) and by overgrazing (especially by goats). Mongolia is rich in minerals, with oil reserves and deposits of other ores such as coal, copper, molybdenum, iron, phosphates, tin, nickel, zinc, wolfram, fluorspar, gold and uranium. Rapid political changes in 1990-1991 marked the beginning of efforts to develop a market economy, but these efforts were complicated and disrupted by the dissolution and continuing deterioration of the economy of the former Soviet Union. Mongolian agriculture, which traditionally relies on nomadic, livestock-based agriculture, accounts for 16.2 percent of 2010 GDP and sustains livelihood for about 17.3 percent of the workforce. GDP growth fell from 3.2 percent in 1999 to 1.3 percent in 2000 as a result of the loss of millions of livestock in bad weather and natural disasters. Main agricultural products are sheep meat, cattle meat, goat meat, cow milk, wheat, and wool. Agricultural imports have grown at an annual rate of 15.1 percent from 2000 to 2010. Wheat and wheat flour are the main imported agricultural commodities, followed by cigarettes, chocolate products, and prepared food. Over the same period, agricultural exports decreased by 1 percent annually. Fine hair, horse meat, chocolate products, combed hair, and degreased wool are the main agricultural exports.

## REPUBLIC OF KOREA

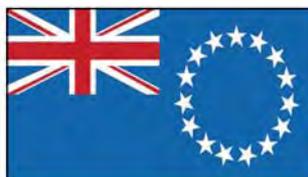

Land Use 2009	Total area: 9 710 000 ha
	Arable & perm. crops: 18.5%
Population 2011	Total population: 48 391 thousand
	Agricultural population: 4.3%
GDP/GNI 2010	Total GDP: US\$1 014 890 million
	GNI per capita: US\$19 720
	Agricultural GDP: 2.6% of total GDP
Agricultural Trade 2010	Imports: US\$18 795.8 million
	Exports: US\$3 851.2 million
Nutrition 2010-2012	Per capita DEC: 3 180 kcal/day
	Proportion of undernourishment: <5%

Approximately 70 percent of Korea's land area is mountainous and hilly with wide coastal plains in the west and south. Natural resources are limited and include coal, tungsten, iron ore, limestone, kaolinite and graphite. Main agricultural products are pig meat, paddy rice, cattle meat, chicken meat, cow milk, and vegetables. Until the late 1980s the manufacturing industry accounted for a rising share of GDP, for example, nearly one-third in 1988, compared with only one-quarter in 1973. There was a fall in the share of agriculture, forestry and fishing, from one-quarter to one-tenth, over the same 15-year period. Since 1988, the share of manufacturing in GDP has risen to 45 percent whereas that of agriculture has continued to fall to nearly 2.6 percent in 2010. Agriculture employs 4.9 percent of the workforce and over half of Korean farmers are engaged in rice cultivation. Agricultural imports have grown at an annual rate of 9.3 percent from 2000 to 2010. Maize is the main agricultural import, followed by wheat, soya beans (including cake), pork, prepared food, and sugar. Over the same period, agricultural exports increased by 9.2 percent annually. Prepared food, cigarettes, refined sugar, coffee extracts and pastry are the main agricultural exports.

## PACIFIC ISLANDS

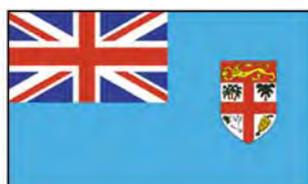

### COOK ISLANDS

Land Use 2009	Total area: 24 000 ha
	Arable & perm. crops: 12.5%
Population 2011	Total population: 20 thousand
	Agricultural population: 25%
GDP/GNI 2010	Total GDP: n.a.
	GNI per capita: n.a.
	Agricultural GDP%: n.a.
Agricultural Trade 2010	Imports: US\$29.4 million
	Exports: US\$1.0 million
Nutrition 2010-2012	Per capita DEC: n.a.
	Proportion of undernourishment: n.a.

The Cook Islands consists of two groups of islands (13 inhabited and two uninhabited) extending over 2 million square kilometres, about half of the way from Hawaii to New Zealand. The North Cook Islands are atolls while the South Cook Islands are volcanic and comparatively fertile. The waters surrounding the Cook Islands are believed to contain substantial reserves of manganese, cobalt and other metals. The islands became a British protectorate in 1888. By 1900, administrative control was transferred to New Zealand; in 1965 residents chose self-government in free association with New Zealand. Economic development is hindered by the isolation of the country from foreign markets, the limited size of domestic markets, lack of natural resources, periodic devastation from natural disasters, and inadequate infrastructure. Key economic activities are tourism, pearl farming and the newly emerging fishing sector. Agriculture provides the economic base with major exports made up of citrus fruit and copra. Manufacturing activities are limited to fruit processing, clothing and handicrafts. The agriculture sector employed 25 percent of the workforce in 2010. Agricultural imports have increased at an annual rate of 11.3 percent from 2000 to 2010. Prepared food is the country's main agricultural import, followed by chicken meat, barley beer, beer, beef preparations, and non-alcoholic beverages. Over the same period, agricultural exports (mainly fruit juices) have increased 12.6 percent annually.

### FIJI ISLANDS

Land Use 2009	Total area: 1 827 000 ha
	Arable & perm. crops: 13.3%
Population 2011	Total population: 868 thousand
	Agricultural population: 35.7%
GDP/GNI 2010	Total GDP: US\$3 173 million
	GNI per capita: US\$3 610
	Agricultural GDP: 12.1% of total GDP
Agricultural Trade 2010	Imports: US\$276.4 million
	Exports: US\$211.0 million
Nutrition 2010-2012	Per capita DEC: 2 920 kcal/day
	Proportion of undernourishment: 4%

The Fiji Island group, located about two-thirds of the way from Hawaii to New Zealand, is an archipelago of 332 islands endowed with forest, mineral and fish resources. It is one of the most developed of the Pacific Island economies, but Fiji still has a large subsistence sector. Natural resources are timber, fish, gold, copper, offshore oil potential and hydropower. Sugar exports and a growing tourist industry (300 000 to 400 000 tourists annually) are the major sources of foreign exchange. Sugar processing makes up one-third of industrial activity. Agriculture (sugar cane, cattle meat, chicken meat, cow milk and coconuts) and fishing remain important, accounting for about 20 percent of GDP in the 1990s, but declining to 12.1 percent by 2010. Sugar cane is still the most important crop, although its proportion of agricultural GDP has fallen over the last years. Timber and fish (mainly tuna) have become increasingly important in recent years. Sugar and ice waters are also exported. Agricultural imports increased at an annual rate of 11.4 percent from 2000 to 2010 while agricultural exports grew 5.8 percent annually. Wheat is the main agricultural import, followed by macaroni, sheep meat, sugar, rice and milk.

## KIRIBATI

Land Use 2009	Total area: 81 000 ha
	Arable & perm. crops: 42%
Population 2011	Total population: 101 thousand
	Agricultural population: 22.8%
GDP/GNI 2010	Total GDP: US\$151 million
	GNI per capita: US\$2 010
	Agricultural GDP: 28.6% of total GDP
Agricultural Trade 2010	Imports: US\$26.9 million
	Exports: US\$1.9 million
Nutrition 2010-2012	Per capita DEC: 2 700 kcal/day
	Proportion of undernourishment: 8%

Kiribati consists of three main island groups scattered over an expanse of ocean roughly halfway between Hawaii and Australia. The three main groupings are the Gilbert Islands, Phoenix Islands and Line Islands. Kiribati has little or no soil, and rainfall is variable, giving only limited opportunities for agricultural development. The greatest development potential lies in the exploitation of marine resources within the 200-mile exclusive economic zone. Covering about 3 million square kilometres, it is one of the world's largest fishing zones. The per capita GDP of about US\$830 makes it one of the poorest countries in the world. Phosphates had been profitably exported from Banaban Island since the turn of the century, but the deposits were exhausted in 1979. The economy now relies heavily on income from abroad, from the sale of fishing licenses, development assistance, worker remittances and tourism. Given its limited domestic resources, the country depends on imports for most of its basic food needs as well as manufactured goods. Most islanders engage in subsistence activities ranging from fishing to the growing of food crops like coconuts, bananas, roots and tubers, pig meat and vegetables. Kiribati's principal trading partner is Australia. Agricultural imports grew at an annual rate of 14.9 percent from 2000 to 2010. Rice is the main agricultural import, in addition to sugar, wheat flour and tobacco. In the same period, agricultural exports have increased 7 percent annually.

## MARSHALL ISLANDS

Land Use 2009	Total area: 18 000 ha
	Arable & perm. crops: 55.6%
Population 2011	Total population: 55 thousand
	Agricultural population: 21.8%
GDP/GNI 2010	Total GDP: US\$163 million
	GNI per capita: US\$3 640
	Agricultural GDP%: n.a.
Agricultural Trade 2010	Imports: n.a.
	Exports: n.a.
Nutrition 2010-2012	Per capita DEC: n.a.
	Proportion of undernourishment: n.a.

The Marshall Islands are comprised of 29 atolls and five major islands, which form two parallel groups – the “Ratak” (sunrise) chain and the “Ralik” (sunset) chain, containing 29 coral atolls and a total of 1 152 islands and islets. Natural resources are marine resources, including mariculture and deep seabed minerals. The economy is heavily dependent on payments from the United States of America (more than 80 percent of government revenue) and foreign aid from a variety of sources. Declining tourism and income from the sale of fishery rights has held GDP growth to an average of 1 percent over the past decade. The main agriculture product is coconuts; taro and breadfruit are subsistence crops. Subsistence farming is the main economic activity. Soil quality is generally poor, but fruit and vegetables, coconuts, pandanus taro and breadfruit are produced for local consumption. The country's export base is narrow, with copra and coconut accounting for the bulk of exports. A wide variety of goods, including foodstuffs, machinery, petroleum products, beverages and tobacco are imported.

## MICRONESIA, FED. STATES OF

Land Use 2009	Total area: 70 000 ha
	Arable & perm. crops: 27.1%
Population 2011	Total population: 112 thousand
	Agricultural population: 22.3%
GDP/GNI 2010	Total GDP: US\$297 million
	GNI per capita: US\$2 730
	Agricultural GDP%: n.a.
Agricultural Trade 2010	Imports: US\$19.1 million
	Exports: US\$0.2 million
Nutrition 2010-2012	Per capita DEC: n.a.
	Proportion of undernourishment: n.a.

The Federated States of Micronesia (FSM) consists of 607 islands extending 1 800 miles across the archipelago of the Caroline Islands east of the Philippines. The four constituent island groups are Yap, Chuuk, Pohnpei and Kosrae. The economy is heavily dependent on foreign aid with the United States of America, accounting for most of the total official development assistance from all sources which total about US\$115 million a year. The fishing industry is highly important. Foreign commercial fishing fleets pay over US\$20 million annually for the right to operate in FSM territorial waters (nearly 30 percent of domestic budgetary revenue). The tourist industry is present but has been hampered by a lack of infrastructure. Farming is mainly subsistence, and its importance is declining. The principal crops are coconuts, pig meat, cassava, bananas, cattle meat and vegetables.

## NAURU

Land Use 2009	Total area: 2 000 ha
	Arable & perm. crops: 20%
Population 2011	Total population: 10 thousand
	Agricultural population: 20%
GDP/GNI 2010	Total GDP: n.a.
	GNI per capita: n.a.
	Agricultural GDP%: n.a.
Agricultural Trade 2010	Imports: US\$2.0 million
	Exports: n.a.
Nutrition 2010-2012	Per capita DEC: n.a.
	Proportion of undernourishment: n.a.

Nauru is a small oval-shaped island in the western Pacific Ocean, located just 42 kilometres south of the Equator. It is one of three great phosphate rock islands in the Pacific Ocean and its economy depends almost entirely on declining phosphate deposits. The island is surrounded by a coral reef, exposed at low tide and dotted with pinnacles. The reef is bounded seaward by deep water, inside by a sandy beach. The only parts of the island suitable for agriculture are the narrow coastal strip and the area surrounding the inland Buada Lagoon. Coconut and pandanus palms grow around the lagoon. Nauru now lacks money to perform many of the basic functions of government. There is a small amount of agricultural production for domestic consumption but most food, like all other necessities, has to be imported. Owing to porous soil and uncertain rainfall, production is limited to small quantities grown by individuals for home consumption. A few food crops are grown on the inland plateau. Fishing is popular and provides a limited amount of food although commercial fishing is underdeveloped. The main agriculture imports are prepared food, fresh vegetables, pig meat and barley beer.

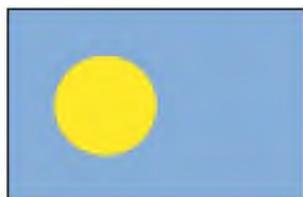

## NIUE

Land Use 2009	Total area: 26 000 ha
	Arable & perm. crops: 15.4%
Population 2011	Total population: 1 thousand
	Agricultural population: 0%
GDP/GNI 2010	Total GDP: n.a.
	GNI per capita: n.a.
	Agricultural GDP%: n.a.
Agricultural Trade 2010	Imports: US\$1.7 million
	Exports: US\$0.2 million
Nutrition 2010-2012	Per capita DEC: n.a.
	Proportion of undernourishment: n.a.

Niue is one of world's largest coral islands and is located in the South Pacific Ocean, east of Tonga. Its terrain is steep limestone cliffs along the coast and central plateau. Main natural resources are fish and arable land. Niue is self-governing in free association with New Zealand since 1974. The economy suffers from the typical island problems of geographic isolation, few resources, and a small population. The agricultural sector consists mainly of subsistence gardening (taro, coconuts, and fresh fruits), although some cash crops are grown for export. Agricultural imports have grown at an annual rate of 12.5 percent from 2000 to 2010. Non-alcoholic beverage, pastry, and prepared foods are the main agricultural imports, followed by chicken meat. Agricultural exports are very limited and consists mainly of fruit juices and coconuts.

## PALAU

Land Use 2009	Total area: 46 000 ha
	Arable & perm. crops: 6.5%
Population 2011	Total population: 21 thousand
	Agricultural population: 23.8%
GDP/GNI 2010	Total GDP: US\$171 million
	GNI per capita: US\$6 560
	Agricultural GDP: 3.5% of total GDP
Agricultural Trade 2010	Imports: n.a.
	Exports: n.a.
Nutrition 2010-2012	Per capita DEC: n.a.
	Proportion of undernourishment: n.a.

The Republic of Palau consists of eight principal islands and more than 250 smaller ones lying roughly 500 miles southeast of the Philippines. The islands of Palau constitute part of the Caroline Islands chain. About 70 percent of the Palauan population lives in the capital city of Koror on Koror Island. Its terrain varies from the mountainous main island to smaller, reef-rimmed coral islands. Palau has among the highest living standards in the Pacific, with GDP per capita standing at around US\$8 269 in 2010. However, rapid population growth and a stagnant economy have seen per capita incomes fall over the last five years and income disparities widen. Tourism and the service sectors are Palau's main industries contributing almost 81 percent of GDP and employing about three-quarters of the workforce. Agriculture is mainly on a subsistence level employing 20 percent of the workforce and contributing only 3.5 percent to GDP in 2010.

## PAPUA NEW GUINEA

Land Use 2009	Total area: 45 286 000 ha
	Arable & perm. crops: 2.1%
Population 2011	Total population: 7 014 thousand
	Agricultural population: 72.1%
GDP/GNI 2010	Total GDP: US\$9 480 million
	GNI per capita: US\$1 300
	Agricultural GDP: 35.8% of total GDP
Agricultural Trade 2010	Imports: US\$527.4 million
	Exports: US\$861.3 million
Nutrition 2010-2012	Per capita DEC: n.a.
	Proportion of undernourishment: n.a.

Papua New Guinea (PNG) is a group of islands including the eastern half of the island of New Guinea. Its terrain is mostly mountainous, with coastal lowlands and rolling foothills; less than one-third of the total land area is suitable for cultivation. Forests and woodland cover almost two-thirds of PNG's land area. PNG has rich natural resources including gold, copper, silver, oil and natural gas. Mineral deposits, mostly copper and gold, account for nearly two-third of export earnings. The country is endowed with abundant forest and fishery resources. Agriculture is the country's important economic activity, providing a livelihood for 68.7 percent of the population and accounting for about 35.8 percent of the total GDP in 2010. Main agricultural products include game meat, bananas, fruits, berries, and palm oil. Agricultural imports have grown by 12.2 percent per annum from 2000 to 2010. The main agricultural imports include rice, sheep meat, wheat and prepared foods. Over the same period, agricultural exports have grown by 12.3 percent annually. Palm oil, cocoa beans, and coffee green are the country's three major agricultural exports, followed by palm kernel oil, and coconut oil.

## SAMOA

Land Use 2009	Total area: 283 000 ha
	Arable & perm. crops: 22.6%
Population 2011	Total population: 184 thousand
	Agricultural population: 26.6%
GDP/GNI 2010	Total GDP: US\$595 million
	GNI per capita: US\$3 030
	Agricultural GDP: 9.8% of total GDP
Agricultural Trade 2010	Imports: US\$82.1 million
	Exports: US\$5.4 million
Nutrition 2010-2012	Per capita DEC: 2 820 kcal/day
	Proportion of undernourishment: 5%

Samoa consists of the two large islands of Upolu and Savai'i and seven small islets and is located about halfway between Hawaii and New Zealand. Its terrain is mountainous with a narrow coastal plain. The economy is based on agriculture, with subsistence farming being the primary economic activity. The primary sector – agriculture, forestry and fishing – employs nearly one-third of the labour force and produces approximately 9.8 percent of GDP. A large percentage of the workforce engages in subsistence agriculture. The main food crops are coconuts, bananas, pig meat, taro (coco yam), fruits, cattle meat, and mangoes. Tourism is also significant. The government is seeking to improve productivity in agriculture through improved farming systems and by planting species such as hybrid coconuts. There has been a substantial expansion of the fishing industry in recent years but there has been a recent decline of fish stocks in the area. Fresh fish accounted for over half of total export earnings. Agricultural imports have increased at an annual rate of 14 percent from 2000 to 2010. Rice is the country's main imported agricultural commodity, followed by chicken meat, wheat flour, sheep meat, prepared food, sugar, and wheat flour. Over the same period, agricultural exports have increased 1.6 percent annually. Coconut oil, fruit juice, and barley beer are the country's main agricultural exports.

## SOLOMON ISLANDS

Land Use 2009	Total area: 2 799 000 ha
	Arable & perm. crops: 2.7%
Population 2011	Total population: 552 thousand
	Agricultural population: 67.4%
GDP/GNI 2010	Total GDP: US\$679 million
	GNI per capita: US\$1 030
	Agricultural GDP: 38.9% of total GDP
Agricultural Trade 2010	Imports: US\$103.0 million
	Exports: US\$50.0 million
Nutrition 2010-2012	Per capita DEC: 2 350 kcal/day
	Proportion of undernourishment: 13%

The Solomon Islands form an archipelago in the Southwest Pacific about 1 900 kilometres northeast of Australia. The terrain ranges from ruggedly mountainous islands to low-lying coral atolls. The Solomon Islands stretch for over 1 450 kilometres southeast from Papua New Guinea across the Coral Sea to Vanuatu. Natural resources are forests, fish, agricultural land, marine products and gold. Main agriculture products are coconuts, palm oil, fruits, taro (coco yam), yams, sweet potatoes. About 67.4 percent of the islands' labour force is engaged in subsistence farming and fishing. Forests and woodland cover 75 percent of the total land area, which explains why the logging industry is the dominant sector within the economy. Coconut products are traditionally the main agricultural output. Other important cash crops and exports include copra and palm oil. Tourism, particularly diving, is an important service industry for the Solomon Islands. Agricultural imports have increased at an annual rate of 20.7 percent from 2000 to 2010. Rice is the main agricultural import, followed by prepared food, wheat, tobacco products, and refined sugar. Over the same period, agricultural exports have increased at 5 percent annually. Palm oil, copra, and cocoa beans are the main agricultural exports.

## TONGA

Land Use 2009	Total area: 72 000 ha
	Arable & perm. crops: 37.5%
Population 2011	Total population: 105 thousand
	Agricultural population: 25.7%
GDP/GNI 2010	Total GDP: US\$357 million
	GNI per capita: US\$3 340
	Agricultural GDP: 20.3% of total GDP
Agricultural Trade 2010	Imports: US\$44.8 million
	Exports: US\$2.2 million
Nutrition 2010-2012	Per capita DEC: n.a.
	Proportion of undernourishment: n.a.

Tonga is an oceanic archipelago about two-thirds of the way from Hawaii to New Zealand. It has a small, open economy with a narrow export base in agricultural goods. Coconuts, pumpkins, vanilla, pig meat, and vegetables are the main crops, and agricultural exports make up the bulk of total exports. The country must import a high proportion of its food, mainly from New Zealand. Tourism is the second largest source of hard currency earnings following remittances. The country remains dependent on external aid and remittances from Tongan communities overseas to offset its trade deficit. Agriculture accounted for around 20.3 percent of real GDP in 2010. Agricultural imports grew at an annual rate of 6.9 percent from 2000 to 2010. Chicken meat is the main agricultural import, followed by sheep meat, prepared food, and wheat flour. Over the same period, agricultural exports have declined at 10.4 percent annually. Pumpkins, coconuts and dry cassava are the main agricultural exports.

## TUVALU

Land Use 2009	Total area: 3 000 ha
	Arable & perm. crops: 60%
Population 2011	Total population: 10 thousand
	Agricultural population: 30%
GDP/GNI 2010	Total GDP: US\$31 million
	GNI per capita: US\$4 600
	Agricultural GDP%: n.a.
Agricultural Trade 2010	Imports: US\$4.4 million
	Exports: US\$0.0 million
Nutrition 2010-2012	Per capita DEC: n.a.
	Proportion of undernourishment: n.a.

Tuvalu consists of a densely populated, scattered group of nine coral atolls with poor soil, located about one-half of the way from Hawaii to Australia. The country has no known mineral resources and few exports. Subsistence farming (coconuts, pig meat, and fruits) and fishing are the primary economic activities. Less than 1 000 tourists, on average, visit Tuvalu annually. The cash economy depends largely on remittances from citizens working abroad (many as merchant seamen) and government spending. Government finances are supported by foreign aid and the Tuvalu Trust Fund, a publicly owned investment vehicle established in 1987, with capital mainly provided by Australia (about one-third), the United Kingdom and New Zealand, with contributions from Japan and the Republic of Korea. Chicken meat is the country's main agricultural import followed by sugar, pastry and prepared beef.

## VANUATU

Land Use 2009	Total area: 1 219 000 ha
	Arable & perm. crops: 11.9%
Population 2011	Total population: 246 thousand
	Agricultural population: 29.7%
GDP/GNI 2010	Total GDP: US\$689 million
	GNI per capita: US\$2 630
	Agricultural GDP: 19.7% of total GDP
Agricultural Trade 2010	Imports: US\$56.4 million
	Exports: US\$24.0 million
Nutrition 2010-2012	Per capita DEC: 2 660 kcal/day
	Proportion of undernourishment: 8%

Vanuatu is a 'Y' shaped archipelago that comprises 80 islands northeast of Sydney, Australia and southwest of Honolulu. The two largest islands, Espiritu Santo (or Santo) and Malakula, account for nearly one-half of the total land area. They are volcanic, with sharp mountain peaks, plateaus and narrow coastal plains. Natural resources are forests, agricultural land and marine resources. The economy is dominated by subsistence agriculture and services, mostly those associated with tourism and Vanuatu's status as an offshore financial centre. About 30 percent of the population is engaged in agricultural activities and most depends on subsistence agriculture, with the agricultural sector as a whole accounting generally for around 19.7 percent of real GDP in 2010. The services sector normally accounts for around two-thirds of GDP. Agricultural activities range from subsistence farming to smallholder farming of coconuts and other cash crops. Coconut is by far the most important cash crop (making up more than 50 percent of the country's exports), followed by root and tubers, cattle meat, bananas, pig meat and vegetables. Kava root extract exports also have become important. Agricultural imports have grown at an annual rate of 15.9 percent from 2000 to 2010. Rice is the main agricultural import, followed by pastry, wheat flour, chicken meat and alcoholic beverages. Over the same period, agricultural exports have increased at 10.5 percent annually. Vegetables, copra, beef and veal, cocoa beans and alcoholic beverages are the main agricultural exports.

## DEVELOPED COUNTRIES

### AUSTRALIA

Land Use 2009	Total area: 768 230 000 ha
	Arable & perm. crops: 6.2%
Population 2011	Total population: 22 606 thousand
	Agricultural population: 3.8%
GDP/GNI 2010	Total GDP: US\$1 131 623 million
	GNI per capita: US\$46 200
	Agricultural GDP: 2.3% of total GDP
Agricultural Trade 2010	Imports: US\$9 133.2 million
	Exports: US\$26 624.8 million
Nutrition 2010-2012	Per capita DEC: 3 260 kcal/day
	Proportion of undernourishment: <5%

Australia has an abundance of mineral resources and of land suitable for agriculture. Its terrain is varied, but generally low-lying. Urban centres occupy a relatively small proportion of the continent, and the population is concentrated in a narrow strip along the eastern seaboard. Around 6.2 percent of the land is arable or used for agricultural purposes, and 19.6 percent is occupied by forests. Australia has substantial reserves of economically important minerals: lead, iron ore, bauxite, zinc, ilmenite, rutile and zircon and uranium reserves. At the beginning of the 1950s agriculture accounted for about 25 percent of Australia's GDP, but in 2010 agriculture (including forestry and fishing) accounted for only 2.3 percent of GDP. The main agriculture products are cattle meat, cow milk, wheat, sheep meat, chicken meat and sugar cane. Although mining and agriculture are small in terms of Australia's GDP, they account for a large share of exports. Agricultural imports have grown at an annual rate of 13.8 percent from 2000 to 2010. Prepared food is the main agricultural import, followed by barley beer, beverage, wine, and chocolate products. Over the same period, agricultural exports have increased at 5.5 percent annually. Wheat, beef and veal, wine, greasy wool, sheep meat and barley are the main agricultural exports.

### JAPAN

Land Use 2009	Total area: 36 450 000 ha
	Arable & perm. crops: 12.6%
Population 2011	Total population: 126 497 thousand
	Agricultural population: 2%
GDP/GNI 2010	Total GDP: US\$5 488 416 million
	GNI per capita: US\$42 050
	Agricultural GDP: 1.2% of total GDP
Agricultural Trade 2010	Imports: US\$53 816.8 million
	Exports: US\$3 222.2 million
Nutrition 2010-2012	Per capita DEC: 2 630 kcal/day
	Proportion of undernourishment: <5%

The Japanese archipelago, which includes some 7 000 islands, stretches for around 3 000 km from north to south through several climatic zones. Some 70 percent of Japan's landmass is mountainous terrain that is essentially uninhabitable, so the residual areas are used intensively. Japan has few natural resources and a negligible amount of mineral resources and fish. The main agriculture products are paddy rice, cow milk, hen eggs, chicken meat, pig meat and cattle meat. Only 13 percent of Japan's land is suitable for cultivation. With per hectare crop yields among the highest in the world, Japan maintains an overall agricultural self-sufficiency rate of about 50 percent on fewer than 4.7 million cultivated hectares. Japan normally produces a slight surplus of rice but imports large quantities of maize, wheat and soybeans. Manufacturing has been the mainstay of Japan's economy since the 1960s and in 2008 accounted for 19.9 percent of GDP. Although in economic terms agriculture is becoming less important (accounting for 1.2 percent of GDP in 2010 and employing 2.1 percent of the workforce), it remains influential in politics due to the electoral system. Agricultural imports have grown at an annual rate of 4.9 percent from 2000 to 2010. Japan is the world's largest importer of pork, maize, and cigarettes. It also imports natural rubber, beef and veal, and soybeans. Over the same period, agricultural exports increased at 5.9 percent annually. Prepared food, cigarettes, pastry, non-alcoholic beverage, and infant food are the main agricultural exports.

## NEW ZEALAND

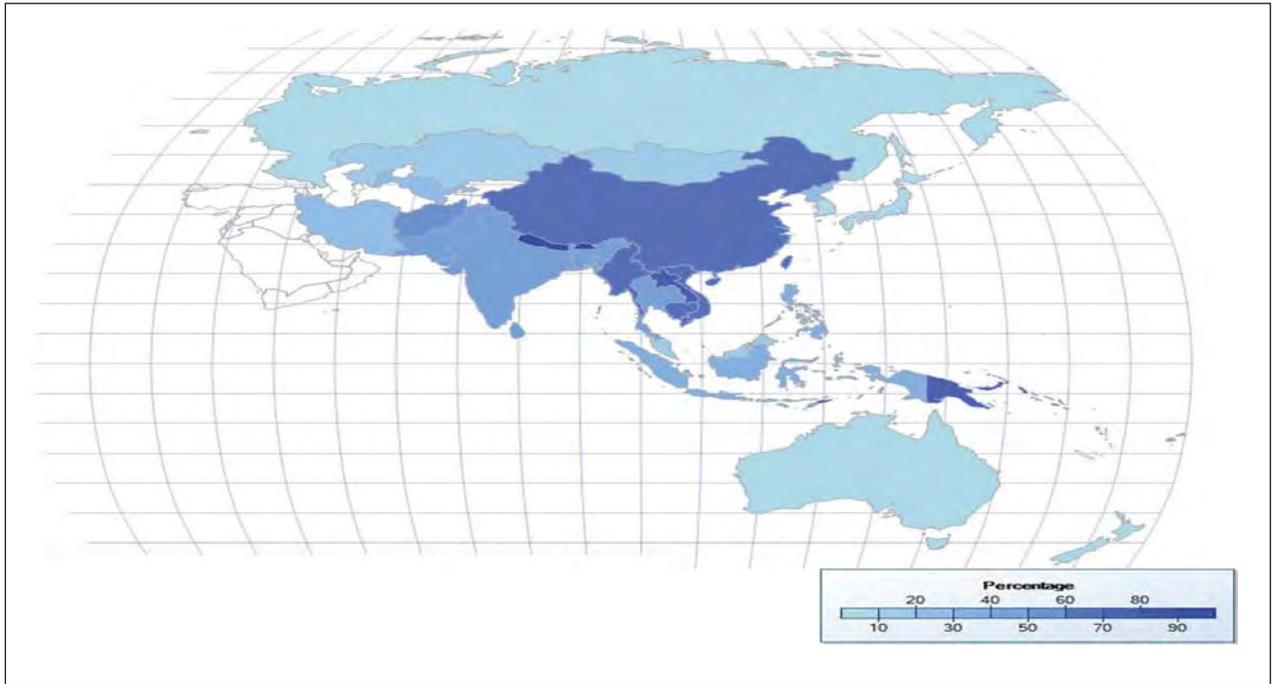

Land Use 2009	Total area: 26 331 000 ha
	Arable & perm. crops: 2.1%
Population 2011	Total population: 4 415 thousand
	Agricultural population: 7.6%
GDP/GNI 2010	Total GDP: US\$142 477 million
	GNI per capita: US\$29 350
	Agricultural GDP%: n.a.
Agricultural Trade 2010	Imports: US\$3 184.0 million
	Exports: US\$16 608.7 million
Nutrition 2010-2012	Per capita DEC: 3 000 kcal/day
	Proportion of undernourishment: <5%

New Zealand is comprised of two main islands (the North and South Islands) and smaller outlying islands in the southwest Pacific Ocean. New Zealand has a mild and temperate climate which is well suited to pastoral agriculture and horticulture (about half of the total land area), with an additional 31.2 percent covered by forest. Terrain is highly varied, from snowcapped mountains to lowland plains. Natural resources are timber, natural gas, iron, sand and coal. Agriculture products are cow milk, cattle meat, sheep meat, greasy wool and kiwi. New Zealand is heavily dependent on trade – particularly in agricultural products – to drive growth. The agriculture, forestry and fishing sectors employ nearly 7.8 percent of the workforce. Leading agricultural exports include meat, dairy products, forest products, fruits and vegetables, fish and wool. Grasslands farming is the basis of its agricultural system since around half of its total land area is used for pastoral farming. Wheat, barley and peas are the major arable crops and are grown mainly in the Canterbury region. Agricultural imports have grown at an annual rate of 12.2 percent from 2000 to 2010 and reached US\$3.1 billion in 2010. Prepared food is the main agricultural import, followed by chocolate products, pastry, wine, wheat, and alcoholic beverages. Over the same period, agricultural exports have increased by 10.8 percent annually. Whole milk, sheep meat, beef and veal, butter, dry skimmed milk, cheese, kiwi and wine are the main agricultural exports.

\* Due to the use of different data sources and overlaps in definitions and classifications, the sum of individual land use categories may exceed "total land area". Examples of such instances include forest and agriculture land with tree cover – such as rubber plantations, permanent tree crops, range land and agro-forestry and shifting cultivation areas.

### Seed cotton: production

Largest Producers in the Asia-Pacific region in 2010

## FIBRE CROPS

### Silk-worm cocoons, reelable: production

World silk-worm cocoons production in selected years: 2000, 2005-2010

China includes China Mainland and Taiwan

### Fisheries: production

Inland and marine capture fisheries major producers in 2010

## FISHERIES

### Fisheries: trade

Largest importers and exporters of fish and fish products in Asia-Pacific in 2010

\* China values include the intra-trade.

\* Food for human consumption

**Table 158. Desirable dietary pattern (DDP)**

Food Groups	Kilocalories (%)	Rating	Score	Maximum* score permissible from each food group
Cereals Roots and tubers Bananas & Plantains	45	0.5	22.5	30
Animal products	20	2.0	40.0	40
Added fats and oils	10	1.0	10.0	10
Nuts and oilseeds	3	0.5	1.5	5
Pulses, beans and soyabeans	5	2.0	10.0	10
Sweeteners	8	0.5	4.0	5
Fruit and vegetables	5	2.0	10.0	10
Beverages and seasonings	4	0.5	2.0	5
<b>Total</b>	<b>100.0</b>		<b>100.0</b>	

\* Maximum scores allowed are, for instance, 60% kilocalories from Cereal group (score = 60% \* 0.5 = 30), 20% kilocalories from animal products (score = 20% \* 2.0 = 40) etc. Over and above the maximum score limit, there will be no additional score to the diet from that food group. For example, 85% kilocalories from the cereal group will score 30 and not (85%\*0.5 = 42.5), similarly 45% kilocalories from animal products will score 40 and not (45% \* 2.0 = 90).

## Labour force in agriculture

Percentage of agricultural labour force of total labour force in Asia-Pacific region in 2011

## OTHER INDICATORS

### Share of agriculture in total GDP

Countries in Asia-Pacific region with largest share of agriculture in GDP in 2010

(1) Concepts used for number and total area of holdings are number of farms household and total area of farm household

(2) Area refers to operated area

(3) Concepts used for number and total area of holdings are number of household and total area of household

(4) Area refers to used agricultural area

(5) Data on total area is not available in the national report

(6) Area refers to cultivated land

(7) Concept used for number of holdings is number of farms

\* Data on organic farms from publication of International Federation of Organic Agriculture Movements (IFOAM); The World of Organic Agriculture 2012: Helga Willer and Lukas Kilcher (Eds.); <http://www.organic-world.net/statistics-2012.html>.

Agricultural land as used in this publication refers to "Arable and permanent cropped land", which excludes permanent meadows and pastures, fallow land resulting from shifting cultivation, and land under trees grown for food or timber. Double cropped areas are counted once.

\*\* indicates figures for 2009; \*\*\* indicates figures for 2008; \*\*\*\* indicates figures for 2006; \*\*\*\*\* indicates figures for 2005

\* Labour force: This term covers all economically active persons in the age from 15 to 64 plus those persons at the age of 10 to 15 and over 64 for whom an economic activity was reported. It includes the armed forces and the unemployed but excludes groups seemed economically inactive such as students, housewives, care-givers and others who are constitutionally excluded from economic activities. (For further definitions see ILO, Economically Active Population Estimates and Projections 1980-2020).

\* Trade data for China refer to China Mainland and Taiwan.

\*\* Figures refer to the year indicated, whenever different from header. Totals include figures from other years.

<sup>1</sup> indicates figures for 2007; <sup>2</sup> for 2008; <sup>3</sup> for 2009

**Table 169. Bioenergy production, consumption and trade**

Country	Production		Supply		Exports		Imports	
	2008	2010	2008	2010	2008	2010	2008	2010
	<i>Unit: Kilotonnes of oil equivalent (ktoe)</i>
