PREPARATION OF THIS DOCUMENT

This revised list constitutes an attempt to bring together most of the material related to aquaculture and published since 1964 by FAO and its Statutory Bodies. It also includes a limited selection of the numerous reports prepared as part of various technical assistance projects (see page vi).

The titles of the printed documents are listed and numbered (K series) in chronological order of year of publication. For each particular year, they are listed in alphabetical order of authors' names. In a final section, selected Web sites (W series numbers) and CD-ROMs (C series numbers) are identified. Author, taxonomic, geographic and subject indexes provide further assistance in retrieving the information required.

The abbreviations used are based on the American Standards Institute, Standards Committee 239, prepared for the UNISIST/ICSU-AB Working Group on Bibliographic Descriptions. A list of acronyms is given on pages xiii and xiv. Common bibliographic abbreviations in English, French and Spanish are given on page xv.

Within FAO, the constant assistance of the staff of the Inland Water Resources and Aquaculture Service and of the Fisheries Branch Library is thankfully acknowledged. For their invaluable help, I am especially grateful to Françoise Schatto and Isabella Pieroni of the Fishery Information, Data and Statistics Unit.

COMMENT OBTENIR LES PUBLICATIONS DE LA FAO

Les documents publiés au Siège de la FAO à Rome peuvent être commandés de l'un des points de vente des publications de la FAO (voir liste annexée en fin de ce document). Ils peuvent également être commandés soit par l'intermédiaire du Bureau du Représentant de la FAO dans votre pays, soit directement:

- par lettre adressée au: Groupe des ventes et de la commercialisation
Division de l'Information
FAO, Viale delle Terme di Caracalla, 00100 Rome, Italie
- par télécopie au numéro: +39 06 57053360
- par courriel à: publications-sales@fao.org
- en ligne sur le site Web: <http://www.fao.org/icatalog/gen-f.htm>

Seules quelques Circulaires sur les pêches sont gratuites. Toutes les autres publications sont en vente. Pour les obtenir, la commande doit être payée à l'avance (voir ci-dessous) et **une photocopie de la preuve de ce paiement** doit être envoyée aussitôt que possible au Groupe des ventes et de la commercialisation de la FAO. Au cas où un document serait hors stock, veuillez indiquer si oui ou non vous désirez une reproduction (voir conditions ci-dessous).

Les publications FAO/GLOBEFISH peuvent être commandées comme suit:

- par lettre adressée à: GLOBEFISH, Département des pêches
FAO, Viale delle Terme di Caracalla, 00100 Rome, Italie

Dans tous les cas, citez clairement **la référence bibliographique complète** de chaque document commandé. Ne mentionnez pas uniquement le numéro K de code d'index, car cela ralentira considérablement l'envoi de votre commande. Le plus simple serait de marquer les documents choisis sur une photocopie des pages de cette circulaire.

Los informes de campo están disponibles en forma de fotocopia o de microficha como se menciona más abajo.

En todos los casos, especificar claramente **la referencia bibliográfica completa** de cada documento. No mencione únicamente el número K del código de índice ya que ello retardaría considerablemente la respuesta a su pedido. Lo más práctico sería que marcara los documentos elegidos en una fotocopia de las páginas seleccionadas de esta circular.

C016 Halwart, M. and Bartley, D. (eds). 2005.

Aquatic biodiversity in rice-based ecosystems. Studies and reports from Cambodia, China, Lao PDR and Viet Nam.

Illustrates the vital role that aquatic biodiversity from rice-based ecosystems plays for the livelihoods of rural people in Southeast Asia. It contains the findings of five case studies on the availability and use of aquatic biodiversity as well as local management arrangements from Cambodia, China, Laos, and Viet Nam (see ref.C008 also included in this CD-ROM). The rich variety of utilized aquatic species (fishes, reptiles, amphibians, crustaceans, molluscs, insects and plants) collected by farmers in their rice fields is presented together with information on traditional practices and local knowledge regarding collection tools and methods, species availability, consumption preference, and preparation methods.
