

## 5.3 PRODUCER CHARACTERISTICS

### 5.3.1 Livestock Wealth Distribution

From the detailed Level 2 data, information about distribution of livestock ownership could be computed. Four livestock species were used to classify wealth distribution: cattle, sheep, goats and chicken. This information is presented on the basis of province and agro-ecological region.

**Table 15 Livestock wealth distribution classifications**

Class	Cattle	Sheep	Goats	Chicken
1	0	0	0	0
2	1-2	1-49	1-49	1-10
3	3-4	50-99	50-99	11-20
4	5-10	100-499	100-499	21-50
5	> 10	> 499	> 499	> 50

In order to visualize the regional difference in livestock wealth distribution, summary data are presented graphically by agro-ecological region.

**Figure 21 Wealth distribution cattle (percent respondents represented in proportion)**

**Figure 22 Wealth distribution sheep (percent respondents represented in proportion)**

### 5.3.2 Livestock Management

Livestock management comprised the following responses: age structures, performance characteristic for cattle, sheep and goats, herd and flock composition (from Level 2 data) by agro-ecological region, and the culling and herd management policy in these three species.

#### 5.3.2.1 Age structures

## 5.3.2.2 Performance characteristics

<b>Table 21 Livestock performance characteristics</b>					
	<b>Agro-ecological region</b>				
	<b>East</b>	<b>Centre-East</b>	<b>Centre</b>	<b>North</b>	<b>West</b>
<b>Performance Characteristics for Cattle</b>					
Percentage producers owning bull	13.55	23.41	27.83	32.15	14.03
Percentage cows calving each year	43.03	80.49	35.69	55.76	49.57
Keep cattle (years)	9.75	9.74	9.32	9.44	8.73
<b>Performance Characteristics for Sheep</b>					
Ewes per ram	43.01	13.22	20.92	61.57	47.40
Lambs born (per 10)	8.45	10.10	9.04	8.31	8.24
Lambs weaned (per 10)	6.90	7.57	6.82	6.30	7.14
Age weaning (months)	4.12	4.28	4.40	4.36	3.08
Age lambs sold (months)	6.64	9.21	6.58	5.84	5.56
Keep sheep (years)	5.41	4.91	5.22	5.69	5.64
<b>Performance Characteristics for Goats</b>					
Does per buck	42.30	8.19	18.54	39.17	46.77
Kids born (per 10)	9.70	13.45	10.69	9.56	9.96
Kids weaned (per 10)	7.69	9.79	7.96	7.21	8.82
Age weaning (months)	4.28	4.25	4.15	4.23	3.11
Age kids sold (months)	7.10	8.56	6.41	6.34	5.50

It is very obvious that these reproduction data indicate the most important problem: insufficient nutrition impinging upon reproduction. Strategic supplementation during breeding periods is an important and probable high-impact strategy, especially for small ruminants.

## 5.3.2.3 Culling Reasons

<b>Table 22 Culling reasons (percentages)</b>					
<b>Reasons fur Culling</b>	<b>Agro-ecological region</b>				
	<b>East</b>	<b>Centre-East</b>	<b>Centre</b>	<b>North</b>	<b>West</b>
<b>Cows</b>					
Old age	15.9	17.9	29.7	58.9	54.4
Unproductive	1.0	12.1	13.9	13.8	3.1
Infertile		1.9	3.6	3.7	1.3
No milk		6.3	6.1		
Sick	0.5	9.2	4.8	1.7	14.6
Feed shortage	40.4	42.0	35.2	18.5	15.9
Drought	1.9				
Cash need	35.1	9.7	6.7	3.4	10.6
Inadequate breed	5.3	1.0			
<b>Ewes</b>					
Old age	34.7	21.8	36.6	61.2	60.8
Unproductive	2.0	7.5	10.4	12.3	3.2
Infertile		2.0	2.2	3.7	1.6
No milk		4.1	4.5	0.4	
Sick	1.0	10.9	6.0	0.7	10.4
Feed shortage	16.3	41.5	32.8	14.6	12.4
Drought	1.0	0.7			
Cash need	44.9	8.2	7.5	7.1	11.6
Inadequate breed		3.4			

Feed shortage is the most frequently cited reason for culling of cattle, and old age dominates the reasons given for sheep.

## 5.3.2.4 Livestock herd management and sales policy

These data appear at first sight contradictory. Cattle are listed both as animals sold first and as animals kept under all circumstances. The explanation is that cattle must frequently be sold because of feed shortages. When farmers expect to not have sufficient feed, they will sell cows and not take any chances, because of the substantial value of these animals. At the same time, they are the most valued livestock species and only sold when it is certain that they cannot be kept. On the other hand, farmers will not necessarily sell all sheep, even when feed shortages are imminent, but rather gamble that somehow small ruminants will survive anyway. Farmers are prepared to accept small ruminant losses over the winter feeding period.

### 5.3.3 Markets

In this segment, data on comparative advantages of species and animal categories in the market, reasons for sale (prices, buyer behaviour), distance to market, and buyer properties are summarised.

#### 5.3.3.1 Livestock sales – priority categories and reasons

<b>Table 25 Sale of livestock (percentages)</b>					
	<b>Agro-ecological region</b>				
	<b>East</b>	<b>Centre-East</b>	<b>Centre</b>	<b>North</b>	<b>West</b>
Sell calves*	33.1	75.4	39.9	35.3	60.0
Sell cattle*	27.1	70.1	43.8	31.4	58.9
Sell animals for feed	19.1	32.7	25.5	37.2	48.6
Sell animals for cash	26.3	50.2	50.0	59.0	60.1
<b>Priority of Selling for:</b>					
Feed purchase	45.1	90.6	64.2	72.9	61.6
Cash	54.9	9.4	35.8	27.1	38.4
* Only responses from cattle owners were considered					

#### 5.3.3.2 Trading partners for farmers

<b>Table 26 Livestock trading partners for farmers (percentages)</b>					
	<b>Agro-ecological region</b>				
	<b>East</b>	<b>Centre-East</b>	<b>Centre</b>	<b>North</b>	<b>West</b>
Local trader	72.5	60.4	83.8	74.1	82.6
Regional trader	18.4	23.4	7.0	17.0	9.1
Foreign trader	0.4		4.3		
Butcher				3.4	4.9
Bazaar			1.1	0.3	
Different types	8.6	16.2	3.8	5.1	3.4

#### 5.3.3.3 Distance to markets

<b>Table 27 Distance to markets (hours)</b>					
	<b>Agro-ecological region</b>				
	<b>East</b>	<b>Centre-East</b>	<b>Centre</b>	<b>North</b>	<b>West</b>
Selling animal	2.11	1.90	2.86	2.28	1.90
Selling wool	1.84	1.96	2.62	1.83	1.77
Selling milk	1.06	1.81	2.46	1.45	1.43
Buying feed	2.18	2.03	2.93	2.09	1.81

### 5.3.3.4 Sales decisions

Livestock producers were asked about current market experiences compared with the year before. Note that the question on prices was triangulated, asking the same question once in the animal category ('Prices Higher'), and once in the price category ('Price Increased'). There are some numerical differences in the answers, but it is obvious that all responses were optimistic and indicative of strongly improved market prospects.

<b>Table 28 Market changes from 2001/2 to 2002/3 (percentages)</b>					
	<b>Agro-ecological region</b>				
	<b>East</b>	<b>Centre-East</b>	<b>Centre</b>	<b>North</b>	<b>West</b>
<b>Cattle</b>					
Prices higher	67.4	94.7	93.5	88.3	88.1
Earned more money	27.1	42.2	28.8	77.4	55.7
Sold more animals	14.4	34.2	35.9	11.0	11.9
Price Increased	94.9	98.4	98.0	95.1	98.4
More buyers	23.0	21.8	36.5	65.0	15.1
<b>Sheep</b>					
Prices higher	73.1	85.1	88.0	85.3	87.8
Earned more money	49.6	31.0	22.2	76.7	61.5
Sold more animals	27.7	34.5	43.6	14.7	13.5
Price Increased	94.1	89.7	94.9	90.7	98.7
More buyers	55.4	21.5	48.6	58.2	17.9
<b>Goats</b>					
Prices higher	82.1	85.7	91.5	87.7	87.8
Earned more money	47.3	17.1	28.7	77.0	57.1
Sold more animals	25.0	54.3	33.0	11.1	10.2
Price Increased	96.4	85.7	92.6	91.9	98.5
More buyers	37.6	12.9	30.7	55.0	18.4

**Table 29 Which category sells best? (percentages)**

		Agro-ecological region				
		East	Centre-East	Centre	North	West
