

16. SOURCES OF MORE INFORMATION

CHAPTER 1

General information on apiculture Organizations and networks

Apimondia

Apimondia is the World Federation of Beekeepers' Associations. Apimondia's Secretariat is based in Rome. The Members of Apimondia are beekeeping organizations. One of the main activities of Apimondia is convening the Apimondia Congress, which takes place every second year, and is the major international event in the apicultural calendar. Apimondia also organises other specialized Symposia and meetings, publishes a quarterly journal, *Apiacta*, communicating the results of bee research to beekeepers. Further information from:

Apimondia

Corso Vittorio Emanuele II, 101
00186 Rome, Italy
Fax +39 06685 2287
E-mail: APIMONDIA@MCLINK.IT
www.apimondia.org

Asian Apiculture Association (AAA)

AAA operates a network between Asian apiculturalists and organises a Conference within Asia every second year (alternating with the Apimondia Congress).

Bees for Development (BfD)

Bees *for* Development works to assist people in poor countries to create livelihoods involving bees, in ways that are sustainable and environmentally beneficial. The organization organises training, manages research and development projects and provides information on beekeeping development worldwide. For example in year 2004, BfD responded to over 3,500 technical enquiries. **Bees for Development Journal** is published quarterly and distributed worldwide. Bees *for* Development is supported by a Charity registered in the UK, the Bees *for* Development Trust. The website carries a wealth of up-to-date information on sustainable beekeeping, and website store makes available hard-to-find publications on beekeeping in developing countries.
