

Global Restoration Monitor

*Enhancing Collaboration for a Greener
Future*

Tuesday 3 May 2022
6:00 PM - 7:30 PM KST

The Global Restoration Monitor (GRM) is a cloud-based Monitoring Platform that tracks the progress and impact of multiple land restoration efforts, offering an inclusive and integrated view of restoration in near-real time. Working with real people and communities on the ground the Global Restoration Monitor brings you data like no other - it allows local efforts and global endeavours to come together. Come along and explore the GRM, listen and talk with the experts behind the technology and our people on the ground who collect the data.

Speakers

Chris Armitage, CEO,
Global EverGreening Alliance

Jonathan Muriuki, Restore Africa
Programme Manager, Global
EverGreening Alliance
