Agenda Items 8, 9

CRD 11

JOINT FAO/WHO FOOD STANDARDS PROGRAMME CODEX COMMITTEE ON RESIDUES OF VETERINARY DRUGS IN FOODS

Twenty-third Session

Houston, Texas, United States of America, 17 – 21 October 2016

COMMENTS OF THAILAND

Agenda Item 8

Global survey to provide information to the CCRVDF to move compounds from the database on countries' needs for MRLs to the JECFA Priority List (Report of EWG) and Database on countries' needs for MRLs (CX/RVDF 16/23/9 August 2016)

Thailand would like to thank EWG, co-chaired by Costa Rica and United States of America for their hard work to collect requests and information from member countries on the needs of specific MRLs for veterinary drugs. Thailand believes that inputs received from global survey based on national implementation is useful for future work of CCRVDF.

Therefore, Thailand supports the committee to continue the works on development and maintenance of the Database on Countries' Needs for MRLs in order to identify the priority veterinary drugs as well as information gaps for a successful assessment by JECFA.

In addition, Thailand appreciates the opportunity to provide comment on the Database in countries' needs for MRLs (CX/RVDF 16/23/9 Add.1 October 2016) and would like to propose the addition of active ingredients used in veterinary drugs to the database. We consider that veterinary drug used for treatment of enteric diseases for poultry e.g., halquinol is a needed veterinary drug MRL. We propose the inclusion of MRLs for muscle, liver, kidney and egg as follow;

Appendix 2: Form for additions/revisions to the Database

*New or Revised	Name	Species	Tissues	Good Practice in the use of Veterinary Drugs	Existing Data & Source	Manufacturer	Past JECFA Evaluation	Existing Codex MRLs	Member Country MRLs	Comments
N	Halquinol	poultry	muscle, liver, kidney, egg	None	None	Elanco Animal Health	None	No Codex MRL	No	

*Please select N if this is a new request to the database; select R if this revises an existing request.

Agenda Item 9

Draft priority list of veterinary drugs requiring evaluation or re-evaluation by JECFA.

Thailand supports the inclusion of Halquinol, Fosfomycin, Triamcinolone and Flumetrin in the priorities list for evaluation by JECFA.
