

# CODEX ALIMENTARIUS COMMISSION

Food and Agriculture  
Organization of the  
United Nations

World Health  
Organization

Viale delle Terme di Caracalla, 00153 Rome, Italy - Tel: (+39) 06 57051 - E-mail: [codex@fao.org](mailto:codex@fao.org) - [www.codexalimentarius.org](http://www.codexalimentarius.org)

CL 2019/04-PR  
February 2019

**TO** Codex Contact Points  
Contact Points of international organizations having observer status with Codex

**FROM** Secretariat,  
Codex Alimentarius Commission,  
Joint FAO/WHO Food Standards Programme

**SUBJECT** **Revision of the Classification of Food and Feed (CXM 4-1989)**  
**Miscellaneous commodities not meeting the criteria for crop grouping**  
**Request for comments at Step 3**

**DEADLINE** 20 March 2019

**COMMENTS To:**  
CCPR Secretariat  
Institute for Control of the Agrochemicals  
Ministry of Agriculture (ICAMA)  
E-mail: [ccpr@agri.gov.cn](mailto:ccpr@agri.gov.cn)

**Copy to:**  
Secretariat  
Codex Alimentarius Commission  
Joint FAO/WHO Food Standards  
Programme  
E-mail: [codex@fao.org](mailto:codex@fao.org)

## BACKGROUND

1. See CX/PR 19/51/11.
2. The Codex Committee on Pesticide Residues endorsed the approach to create a separate Type within each Class of the Classification to provide a list of commodities and codes that do not meet the criteria for inclusion in a crop group as a system within the Classification to provide codes for commodities that do not meet the criteria for grouping.<sup>1</sup>

## REQUEST FOR COMMENTS

3. Codex members and observers are invited to submit comments, through their Contact Points, on the format and codes in Appendices I and II of CX/PR 19/51/11 and provide comments regarding the classification system for miscellaneous commodities to facilitate their consideration by CCPR51.
4. Codex members and observers are reminded of the decision taken by CCPR50 on the agreed approach for miscellaneous commodities not meeting the criteria for crop grouping (see paragraph 2 above).
5. The guiding principles and the criteria for crop grouping of the Classification is presented in the Annex for information.
6. Comments should be submitted in writing in conformity with the Uniform Procedure for the Elaboration of Codex Standards and Related Texts (see Procedural Manual of the Codex Alimentarius Commission) preferably in word file to facilitate compilation and translation of comments.

<sup>1</sup> REP18/PR, para 128.

## **ANNEX**

The Classification of Food and Feed (CXM 4-1989) includes food commodities and animal feedstuffs for which Codex maximum residue limits will not necessarily be established. The Classification is intended:

- to be a listing of food commodities in trade as complete as possible, classified into groups on the basis of the commodity's similar potential for pesticide residues;
- primarily to ensure the use of uniform nomenclature and secondarily to classify foods into groups and/or sub-groups for the purpose of establishing group maximum residue limits for commodities with similar characteristics and residue potential; and
- to promote harmonization of the terms used to describe commodities which are subject to maximum residue limits and of the approach to grouping commodities with similar potential for residue for which a common group maximum residue limit can be set.

### **Characteristics for crop grouping are:**

1. Commodity's similar potential for pesticide residues;
2. Similar morphology;
3. Similar production practices, growth habits, etc;
4. Edible portion;
5. Similar GAP for pesticide uses;
6. Similar residue behavior;
7. To provide flexibility for setting (sub) group tolerances.

The Criteria for the selection of representative commodities include:

1. A representative commodity is most likely to contain the highest residues;
2. A representative commodity is likely to be major in terms of production and/or consumption;
3. A representative commodity is most likely similar in morphology, growth habit, pest problems and edible portion to the related commodities within a group or subgroup.
