

## **IDF response to EWG request for technological justification and proof of products**

The purpose of this document is to provide examples of dairy-based products listed below. These *sweetened and/or sweetened and flavoured* dairy-based products serve as proof to the electronic working group (EWG) of the Codex Committee on Food Additives (CCFA) that such products exist in international markets and therefore that use of sweeteners are justified. It will also assist the EWG when considering the proposed notes:

- **“for use in pre-sweetened products only”**: Several EWG members questioned the meaning of “pre-sweetened”. Other members requested information on the use of sweeteners in these food categories – what types of products in these food categories are “sweet” and if sweeteners are used to replace sugar in those products. However, other EWG members stated that these food categories include both sweetened and unsweetened products, and that sweeteners are used in place of sugar in sweetened products. Some EWG members suggested that the adopted alternative notes may be more appropriate rather than limiting use to “pre-sweetened only” as the term “pre-sweetened” was not defined and the adopted alternative notes appear to address the use.
- **“for use in sweet and sour products only”**: Several EWG members requested information from industry if this note was sufficient to cover all of the products where sweeteners are used in those food categories.
- **Other notes limiting use to specific products**: Several EWG members requested information from industry if this note was sufficient to cover all of the products where sweeteners are used in those food categories. More information on the use of sweeteners in these food categories is requested.

The EWG requested the following technological justification for each of the dairy-based food categories:

<b>Food Category No.</b>	<b>Title</b>	<b>Recommendation from CX/FA 15/47/13</b>	<b>2<sup>nd</sup> circular proposal</b>
01.3.2	Beverage whiteners	Replace with new note “For use in pre-sweetened beverage whiteners only”	The comments of some EWG members indicated that this food category includes both sweetened and unsweetened products.  <b>Request information on the technological justification and specific product types in this food category that use sweeteners</b>
01.4.4	Cream analogues	Replace with a new note “For use in pre-sweetened cream analogues only”	The comments of some EWG members indicated that this food category includes both sweetened and unsweetened products.  <b>Request information on the technological justification and specific product types in this food category that use sweeteners</b>
01.5.2	Milk and cream powder analogues	Replace with a new note “For use in pre-sweetened milk and cream powder analogues only”	The comments of some EWG members indicated that this food category includes both sweetened and unsweetened products.  <b>Request information on the technological justification and specific product types in this food category that use sweeteners</b>
01.6.1	Unripened cheese	<b>Replace with a new note “For use in flavoured unripened cheese only”</b>	The descriptor for this FC includes flavoured products.  <b>Request further information on the types of flavoured products in this food category that use sweeteners and technological justification for sweeteners in those products</b>

01.6.5	Cheese analogues	Replace with a new note "For use in pre-sweetened products only"	Request information on the technological justification and specific product types in this food category that use sweeteners
--------	------------------	---	---

### 1.3.2 Dairy- based Beverage Whiteners

Recommendation: Replace with new note "For use in pre-sweetened beverage whiteners only"

**Goal:** Provide EWG with a list of **beverage whiteners** which are **flavoured and sweetened** (with sugar or sweetener)

*Codex Definition of 01.3.2 Beverage whiteners: Milk or cream substitute consisting of a vegetable fat-water emulsion in water with milk protein and lactose or vegetable proteins for use in beverages such as coffee and tea. Also includes the same type of products in powdered form. Includes condensed milk analogues, blends of evaporated skimmed milk and vegetable fat and blends of sweetened condensed skimmed milk and vegetable fat.*

### 1.6.1 Unripened Cheeses

Codex defines 01.6.1 Unripened cheese, including fresh cheese, is ready for consumption soon after manufacture. Examples include cottage cheese (a soft, unripened, coagulated curd cheese), creamed cottage cheese (cottage cheese covered with a creaming mixture), cream cheese (rahmfrischkase, an uncured, soft spreadable cheese), mozzarella and scamorza cheeses and paneer (milk protein coagulated by the addition of citric acid from lemon or lime juice or of lactic acid from whey, that is strained into a solid mass, and is used in vegetarian versions of, e.g. hamburgers). Includes the whole unripened cheese and unripened cheese rind (for those unripened cheeses with a “skin” such as mozzarella). Most products are plain, however, some, such as cottage cheese and cream cheese, may be flavoured or contain ingredients such as fruit, vegetables or meat. Excludes ripened cream cheese, where cream is a qualifier for a high fat content.

Recommendation from CX/FA 15/37/14: Replace with a new note “For use in flavoured unripened cheese only”

**Goal:** Provide EWG with a list of examples **Unripened Cheeses** which are **flavoured and sweetened**
