Foresight: looking into emerging issues in Food and Feed Safety

Objective

This side event will provide participants insight into the work of the FAO foresight programme, exploring the several cross-cutting issues that will influence and transform agrifood systems. The session will provide an overview on some emerging issues, including e.g. new foods, feed safety, circular economy etc., and, and the current strategies and policies to take advantage of future opportunities as well as to manage potential risks. The session will also showcase examples of foresight work by CCCF Members and stimulate discussion among them.
