# ROLE OF FOOD HYGIENE IN ASSURING FOOD SAFETY AND QUALITY: EXPERIENCES FROM UNIVERSITY STUDENTS

Side Event

**CCFH54**

## Description

We invite all CCFH54 delegates to join us as we explore the role of food hygiene in assuring food safety and quality. As an important aspect of youth involvement and contribution, university students in food science, nutrition, public health and related disciplines from Kenya will share their experience and thought in this important topic.

The youth in Kenya constitute at least 60% of the population and are seriously affected in various ways whether in schools, colleges or universities by food hygiene. A number of them have paid the consequence of poor food hygiene and their experiences are unique depending on institutions and environmental conditions of habitation.

**Programme** 12:30-12:45 **Keynote presentation** **The Role of Food Hygiene in Food Safety and Quality**

Ian Miheso  
IV Year BSc. Food Science and Technology  
University of Nairobi
