

# CODEX ALIMENTARIUS COMMISSION

Food and Agriculture  
Organization of the  
United Nations

World Health  
Organization

Viale delle Terme di Caracalla, 00153 Rome, Italy - Tel: (+39) 06 57051 - E-mail: [codex@fao.org](mailto:codex@fao.org) - [www.codexalimentarius.org](http://www.codexalimentarius.org)

REP22/CAC  
February 2023

## JOINT FAO/WHO FOOD STANDARDS PROGRAMME CODEX ALIMENTARIUS COMMISSION

*Forty-fifth Session*

*FAO headquarters, Rome, Italy*

*21-25 November 2022, 12-13 December 2022, and  
19 December 2022-6 February 2023*

REPORT

## TABLE OF CONTENTS

<b>Executive Summary</b>	page iv
<b>Report of 45th Session of the Codex Alimentarius Commission</b> .....	page 1
	<i>Paragraph</i>
<b>Introduction</b> .....	1 - 2
<b>Opening</b> .....	3 - 4
<b>Adoption of the Agenda</b> (Agenda item 1) .....	5
<b>Report by the Chairperson on the 82nd and 83rd Sessions of the Executive Committee</b> (Agenda item 2) .....	6 - 42
<b>Amendments to the Procedural Manual</b> (Agenda item 3) .....	43 - 44
Work of Codex Committees (adoption, new work, revocation, discontinuation and editorial amendments to Codex texts proposed by the Committee) (Agenda item 4) .....	
Codex Committee on Fats and Oils (Agenda item 4.1) .....	46 - 52
Codex Committee on Nutrition and Foods for Special Dietary Uses (Agenda item 4.2) .....	53 - 54
Codex Committee on Food Hygiene (Agenda item 4.3) .....	55 - 58
Codex Committee on Fresh Fruits and Vegetables (Agenda item 4.4) .....	59 - 64
Codex Committee on Contaminants in Food (Agenda item 4.5) .....	65 - 76
Codex Committee on Pesticide Residues (Agenda item 4.6) .....	77 - 93
Codex Committee on Spices and Culinary Herbs (Agenda item 4.7) .....	94 - 99
Codex Committee on Residues of Veterinary Drugs in Foods (Agenda item 4.8) .....	100 - 148
FAO/WHO Regional Coordinating Committees (Agenda item 4.9) .....	149 - 153
<b>Editorial amendments to Codex texts proposed by the Codex Secretariat</b> (Agenda item 5) .....	154 - 156
<b>Matters related to other Codex Subsidiary Bodies</b> (Agenda item 6) .....	157 - 177
<b>Strategic Plan 2020-2025: Implementation Report 2020-2021</b> (Agenda item 7) .....	178 - 187
<b>Codex Budgetary and Financial Matters</b> (Agenda item 8) .....	188 - 194
<b>Matters Arising from FAO and WHO</b> (Agenda item 9) .....	195 - 209
<b>Appointment of Coordinators</b> (Agenda item 10) .....	210 - 217
<b>Election of the Chairperson and Vice-Chairpersons</b> (Agenda item 11) .....	218
<b>Designation of Countries Responsible for Appointing the Chairpersons of Codex Subsidiary Bodies</b> (Agenda item 12) .....	219 - 220
<b>60th Anniversary of the Codex Alimentarius Commission: 1963-2023</b> (Agenda item 13) .....	221 - 228
<b>Participation of the European Union as Adviser to the Member for Europe in the Executive Committee of the Codex Alimentarius Commission</b> (Agenda item 14.1) .....	229 - 237

### Appendices

		Page
Appendix I	List of Participants	31
Appendix II	List of Adopted Standards and Related Texts	69
Appendix III	List of Draft Standards and Related Texts Adopted at Step 5	71
Appendix IV	List of Revoked Standards and Related Texts	72
Appendix V	List of Approved New Work	73
Appendix VI	List of Discontinued Work	74
Appendix VII	List of Amendments	75
Appendix VIII Part A	CAC 45 Vote without recoding names	81
Appendix VIII Part B	CAC 45 nominal vote	82
Appendix IX	Statements on Adoption at Step 5 of Draft MRLs for Zilpaterol hydrochloride in cattle liver, kidney and muscle	83
Appendix X	Countries responsible for appointing the Chairpersons of Codex Subsidiary Bodies	87

## EXECUTIVE SUMMARY

CAC45 was opened by the Directors-General of FAO and WHO. The session was attended by delegates from 163 Member countries, one Member Organization, and Observers of eight international governmental organizations (IGOs), 37 non-governmental organizations (NGOs) and two United Nations agencies. Of these, nine Member countries, three IGOs and 22 NGOs attended the meeting virtually.

Main decisions of CAC45:

### **Final adoption of more than 500 new and revised Codex standards (including numerical standards), guidelines and codes of practice, including**

- *Standard for Dried Floral Parts - Saffron*
- *Standard for Dried Seeds - Nutmeg*
- *Standard for Dried or Dehydrated Chilli Pepper and Paprika*
- *Standard for Onions and Shallots*
- *Standard for Berry Fruits*
- *Regional Standard for Dried Meat (Africa)*
- Revision to the *Standard for Named Vegetable Oils* (CXS 210-1999): Essential composition of sunflower seed oils
- *Guidelines for Ready-to-Use Therapeutic Foods (RUTF)*
- *Guidelines for the Management of Biological Foodborne Outbreaks*
- *Guidelines for Developing Harmonized Food Safety Legislation for the CCAFRICA Region*
- *Guidelines for the Recognition of Active Substances or Authorized Uses of Active Substances of Low Public Health Concern that Are Considered Exempted from the Establishment of Maximum Residue Limits or Do Not Give Rise to Residues*
- *Code of Practice for the Prevention and Reduction of Cadmium Contamination in Cocoa Beans*
- Revision to the *General Principles of Food Hygiene* (CXC 1-1969)
- Maximum level (ML) for cadmium in cocoa powder (100% cocoa solids on a dry matter basis)
- Maximum levels (MLs) for lead in cereal-based foods for infants and young children, white and refined sugar, corn and maple syrups, honey and sugar-based candies
- Maximum levels (MLs) for methylmercury in orange roughy and pink cusk eel
- Maximum levels (MLs) for total aflatoxins in maize grain, destined for further processing; flour meal, semolina and flakes derived from maize; husked rice; polished rice; sorghum grain, destined for further processing; cereal-based food for infants and young children (excluding foods for food aid programs); and cereal-based food for infants and young children for food aid programs
- 476 maximum residue limits (MRLs) for different combinations of pesticides/commodity(ies)
- Revision of the *Classification of Food and Feed* (CXA 4-1989)

Adoption at Step 5:

- Draft Standard for Fresh Dates
- Draft Standard for Dried Small Cardamom
- Draft Standard for Spices Derived from Dried Fruits and Berries (Part A - Allspice, Juniper berry, Star anise)
- Draft revision to the *Standard for Named Vegetable Oils* (CXS 210-1999): Inclusion of avocado oil
- Draft Code of Practice for Prevention and Reduction of Mycotoxin Contamination in Cassava and Cassava-Based Products
- Draft maximum level (ML) for lead in ready-to-eat meals for infants and young children
- Draft maximum residue limits (MRLs) for zilpaterol hydrochloride (cattle kidney, liver, muscle)

New work:

- *Standard for Named Vegetable Oils* (CXS 210-1999) to include Camellia seed oil; Sacha inchi oil; and High oleic acid soya bean oil (Amendment/revision)
- *Standard for Fish Oils* (CXS 329-2017) to include Calanus oil (Revision)
- Regional Standard for *Castilla Lulo (Latin America and the Caribbean)* (New)
- Standard for Fresh Curry Leaves (New)
- Principles and Guidelines on the Use of Remote Audit and Verification in Regulatory Frameworks (New)
- Alignment of food hygiene texts with the revised *General Principles on Food Hygiene* (CXC 1-1969)

**CAC45:**

- **Re-elected**, as **Chairperson**, Mr Steve Wearne (United Kingdom) and, as **Vice-Chairpersons**, Mr Allan Azegele (Kenya), Mr Raj Rajasekar (New Zealand) and Mr Diego Varela (Chile).
- **Appointed** Germany as **Coordinator** for Europe, and **re-appointed** Uganda, China and Ecuador as **Coordinators** for Africa, Asia and Latin America and the Caribbean, respectively.
- **Elected** as **Member of the Executive Committee elected on a geographic basis**, Europe: Finland

**CAC45 discussed/ took decisions as follows on general items as proposed by the Executive Committee:**

- **Statements of Principle concerning the role of Science (SoP):** Referred the draft guidance on the application of the SoP to the Chairpersons of Codex subsidiary bodies to facilitate deliberations on matters that fell within the scope of the SoP, urged Members to take account of the draft guidance as appropriate during standards development and advancement, and requested the Secretariat to issue a Circular Letter (CL) inviting specific suggestions to improve the draft guidance for consideration by CAC46.
- **New food sources and production methods (NFPS):** Recognized the importance of Codex working in a flexible and timely manner to consider NFPS, encouraged Members to submit proposals related to NFPS using existing Codex mechanisms, and requested the Codex Secretariat to send a CL to Members and Observers to identify possible issues related to NFPS that the current structure and procedures could not address and options to address them for discussion at CAC46.
- **The future of Codex:** Had an initial discussion and noted that it was a work in progress and that there would be an opportunity in 2023 for all Members and Observers to engage on this topic.

### LIST OF ABBREVIATIONS AND ACRONYMS

AfCTA	African Continental Free Trade Area
AMR	antimicrobial resistance
BEUC	The European Consumer Organization
CAC	Codex Alimentarius Commission
CCAFRICA	FAO/WHO Coordinating Committee for Africa
CCCF	Codex Committee on Contaminants in Foods
CCCPL	Codex Committee on Cereals, Pulses and Legumes
CCEURO	FAO/WHO Coordinating Committee for Europe
CCEXEC	Executive Committee of the Codex Alimentarius Commission
CCFA	Codex Committees on Food Additives
CCFFV	Codex Committee on Fresh Fruits and Vegetables
CCFH	Codex Committee on Food Hygiene
CCFICS	Codex Committee on Food Import and Export Inspection and Certification Systems
CCFL	Codex Committee on Food Labelling
CCFO	Codex Committee on Fats and Oils
CCGP	Codex Committee on General Principles
CCLAC	FAO/WHO Coordinating Committee for Latin America and the Caribbean
CCLM	Committee on Constitutional and Legal Matters
CCNASWP	FAO/WHO Coordinating Committee for North America and South-West Pacific
CCNE	FAO/WHO Coordinating Committee for Near East
CCNFSDU	Codex Committee on Nutrition and Foods for Special Dietary Uses
CCPR	Codex Committee on Pesticide Residues
CCPFV	Codex Committee on Processed Fruits and Vegetables
CCRVDF	Codex Committee on Residues of Veterinary Drugs in Foods
CCSCH	Codex Committee on Spices and Culinary Herbs
CL	Circular Letter
CRD	Conference Room Document
CTF	Codex Trust Fund
CVCs	Vice-Chairpersons
CXL	Codex maximum residue limit for pesticide
DG	Director-General
DON	deoxynivalenol
EMRL	extraneous maximum residue limit
EU	European Union
EWG	electronic working group
FAO	Food and Agriculture Organization of the United Nations
FAO DG	FAO Director-General
GAP	good agricultural practice

GEMS/Food	The Global Environment Monitoring System – Food Contamination Monitoring and Assessment Programme
GROs	General Rules of the Organization
IESTI	international estimated short-term intake
IFT	Institute of Food Technologists
IGO	international governmental organization
INF	information document
IPBES	Intergovernmental Science-Policy Platform on Biodiversity and Ecosystem Services
JECFA	Joint FAO/WHO Expert Committee on Food Additives
JMPR	Joint FAO/WHO Meeting on Pesticide Residues
LAC	Latin America and the Caribbean
ML	maximum level
MRL	maximum residue limit
MSF	Médecins Sans Frontiers
NCD	non-communicable disease
NHF	The National Health Federation
NFPS	new food sources and production systems
NGO	non-governmental organization
PM	Codex Procedural Manual
RCC	FAO/WHO (Regional) Coordinating Committee
RUTF	ready-to-use therapeutic foods
SoP	Statements of Principle concerning the role of Science
SP	Codex Strategic Plan 2020-2025
SPS	sanitary and phytosanitary measures
TBT	technical barriers to trade
TFA	trans-fatty acids
UN	United Nations
UNEP	United Nations Environment Programme
WFP	World Food Programme
WG	working group
WHO	World Health Organization
WHO DG	WHO Director-General
WOAH	World Organization for Animal Health
WTO	World Trade Organization

## INTRODUCTION

1. The Codex Alimentarius Commission convened its forty-fifth session (CAC45) at the Headquarters of the Food and Agriculture Organization of the United Nations (FAO), Rome, Italy, from 21 to 25 November 2022. Remote participation (via Zoom) was possible for listening and verbal interventions, however, all Members had been invited to plan to have at least one in-person delegate attend the session for in-person voting. With the endorsement of the Members, report adoption was convened virtually on 12-13 December 2022<sup>1</sup>.
2. CAC45 was chaired by Mr Steve Wearne (United Kingdom), Chairperson of the Commission assisted by the Vice-Chairpersons Mr Allan Azegele (Kenya), Mr Raj Rajasekar (New Zealand), and Mr Diego Varela (Chile). The session was attended by delegates from 163 Member countries, one Member Organization, and Observers of eight international governmental (IGOs), 37 non-governmental organizations (NGOs) and two United Nations agencies. Of these, nine Member countries, three IGOs and 22 NGOs attended the meeting virtually. The list of participants is contained in Appendix I.

## OPENING

### Welcome addresses by FAO and WHO

3. The Director-General of the Food and Agriculture Organization of the United Nations (FAO), Dr QU Dongyu<sup>2</sup> and the Director-General of the World Health Organization (WHO), Dr Tedros Ghebreyesus Adhanom<sup>3</sup> welcomed participants and addressed the Commission. The Directors-General highlighted the importance of science and data in the work of the Codex standard-setting body, and of the role the Commission can play in guiding country regulations that promote health, while facilitating fair trade.

### Division of competence<sup>4</sup>

4. CAC45 noted the division of competence between the European Union (EU) and its Member States in accordance with Rule II, paragraph 5, of the CAC Rules of Procedure.

### ADOPTION OF THE AGENDA (Agenda Item 1)<sup>5</sup>

5. CAC45 adopted the provisional agenda as its agenda for the Session and agreed to discuss *Participation of the European Union as Adviser to the Member for Europe in the Executive Committee of the Codex Alimentarius Commission*, on the basis of a document prepared by the FAO and WHO Legal Offices (CX/CAC 22/45/21), under Agenda Item 14 Other Business.

### REPORT BY THE CHAIRPERSON ON THE 82ND AND 83RD SESSIONS OF THE EXECUTIVE COMMITTEE (Agenda Item 2)<sup>6</sup>

6. The Chairperson in introducing the item noted that the Vice-Chairpersons would give reports on each of the subcommittees that they chaired and that the report of the Executive Committee of the Codex Alimentarius Commission (CCEXEC) on items that had their own agenda item for CAC45 would be reported on directly under those agenda items.
7. Regarding the regular review of NGOs with observer status in the work of Codex, the Chairperson recalled the recognition of CCEXEC of the ongoing interest from the wider NGO community to engage with Codex, especially as it embarked on new areas of work and expressed his appreciation for their continuing interest and contributions. He noted that CCEXEC82 had also recommended that the Directors-General of FAO and WHO revoke the Observer status of a number of organisations that no longer met the criteria necessary for retention of Observer status.
8. The Chairperson highlighted two further issues that had arisen from the Observer review:
  - Regarding the modalities by which NGOs with observer status contribute to Codex work he noted that CCEXEC83 had recognised the contributions that Observers may make to advancing the objectives of Codex other than through their participation in Codex standard setting activities, and had recommended that the Codex Secretariat and the Legal offices of FAO and WHO evaluate potential amendments to the Procedural Manual (PM) which might recognise these contributions, and present any proposals for consideration by the 33rd Session of the Codex Committee on General Principles (CCGP33).

<sup>1</sup> As the Commission did not complete report adoption within the time available in the virtual sessions, report adoption was completed using a written procedure which concluded on 6 February 2023.

<sup>3</sup> <https://www.fao.org/webcast/home/en/item/6056/icode/> from 6:32

<sup>4</sup> Division of Competence between the European Union and its Member States (CRD1)

<sup>5</sup> CX/CAC 22/45/1 Rev. 1

<sup>6</sup> REP22/EXEC1; REP22/EXEC2; CRD4 (FAO); CRD5 (Panama); CRD7 (Thailand); CRD18 (Mali); CRD31 (Dominican Republic); CRD33 (Good Food Institute); CRD34 (Singapore); CRD38 (Republic of Korea); CRD39 (Liberia)

- Regarding the double representation clause currently applied to Observers that are members of larger Observer organizations, CCEXEC83 had requested a further analysis by the Codex Secretariat and the Legal offices of FAO and WHO for consideration by CCEXEC84.
9. The Chairperson also highlighted that the review of new applications for Observer status in Codex had been on hold for some months following the adoption of the FAO strategy for private sector engagement 2021-2025, in order to consider whether it had any implications for the review of applications for Observer status in Codex. He noted that FAO had recently advised the Codex Secretariat to continue applying the procedures established in the PM and the relevant texts of FAO and WHO, and that it was therefore expected that new applications for Observer status in Codex would be presented at CCEXEC84.
10. The Chairperson of CCGP indicated that CCGP was ready and willing to take on the work as recommended by CCEXEC and reminded all Members that CCGP33 would take place in October 2023 in Bordeaux, France which would provide an inclusive and transparent forum to discuss any amendments to the PM.

### **Conclusion**

11. CAC45 noted:
- i. the discussions of CCEXEC82 and CCEXEC83 and endorsed the conclusions and recommendations contained in the reports, and in particular with regard to the modalities by which NGOs with Observer Status contribute to Codex work;
  - ii. the resumption of the review of applications for Observer status in Codex; and
  - iii. that the recommendations on the Critical Review of CCEXEC82 and CCEXEC83 would be addressed in conjunction with Agenda Items 4-6, and recommendations on the Codex Strategic Plan 2020-2025, Codex Budgetary and Financial Matters, Matters from FAO and WHO including the Codex Trust Fund (CTF), and the 60th Anniversary of Codex, would be addressed in conjunction with Agenda Items 7, 8, 9 and 13, respectively.

### **Subcommittee on the application of the Statements of Principle concerning the role of Science<sup>7</sup>**

12. The Chairperson of the subcommittee recalled that CCEXEC83 had reviewed the outcome of the 3rd subcommittee on the Statements of Principle concerning the role of Science (SoP) that was established by CCEXEC82 and that CCEXEC83 had agreed to retain the text as presented apart from shortening the title and paragraph 23 and to forward it to CAC45 for further consideration. He also recalled that CCEXEC83 agreed that the sub-committee had completed its work and agreed to close the discussion on this topic.
13. It was noted that although the text as annexed to the CCEXEC83 report was not final with square brackets remaining, CCEXEC83 had considered it a serviceable document that fairly reflected the comments made and considered by the subcommittee. It was recalled that the task was to provide practical guidance to operationalize the SoP and promote their consistent application, and not to reopen or change the SoP.
14. Members of CAC were invited to determine whether and how to take this work forward.

### *Discussion*

15. Members commended the subcommittee on its substantive work.
16. Members expressed a range of views, including that the draft guidance:
- a. was serviceable and useful, in particular the flowchart, and had already been applied to varying degrees during CAC45;
  - b. was practical and helpful and there was no need for any prescriptive guidance;
  - c. should not be reopened (including the flowchart) as it could unravel the good work done;
  - d. should be shared with Chairpersons of subsidiary committees and be piloted so that experience could be gained for possible future refinement and inclusion in the Chairperson's handbook;
  - e. could be the basis for Chairpersons when briefing Members and be integrated into a future Members' guidance document;
  - f. should continue being developed to provide Members and Chairpersons with all the help and support that they need when they are involved in difficult discussions;
  - g. was still in a preliminary stage and therefore it would be premature to share it with Chairpersons and implement it;

---

<sup>7</sup> REP22/EXEC2, Appendix II

- h. should continue being developed as its finalization was needed for consensus building in work of Codex and practical application of the SoP;
  - i. needed more guidance on the difference between abstention from acceptance and reservation; and
  - j. should cover the entire standard development process, including proposals for new work and also required more clarity on the determination of other legitimate factors.
17. The Chairperson of the subcommittee noted that the option of the use of a footnote in a standard (paragraph 20 of Appendix II, REP22/EXEC2) in square brackets remained an outstanding issue, with some arguing the option should be deleted and others supporting its retention. Those delegations supporting deletion were concerned such a footnote would create a precedent and devalue Codex standards in the future. Those delegations supporting retention recalled that footnotes added clarity and transparency and had been usefully employed in Codex texts.
18. One delegation noted that it was important not just to focus on the risks of different foods, but to also consider their potential benefits to health noting that WHO had defined health as a state of complete physical, mental and social well-being and not merely the absence of disease and infirmity.
19. It was suggested that the Chairperson and the Vice-Chairpersons organize informal consultations with the Codex membership to support understanding and application of the draft guidance.
20. The Chairperson of CCRVDF highlighted that while the draft guidance was not complete, it provided a structured yet flexible approach that could be tested on the very few occasions when consensus was difficult to achieve.
21. It was proposed that the Codex Secretariat issue a Circular Letter (CL) requesting comments to Codex Members and Observers for further consideration by CAC46.

### **Conclusions**

22. CAC45:
- i. commended the progress made with the development of Guidance for Codex Chairpersons and Members on the application of the SoP;
  - ii. acknowledged that the draft guidance attached to the report of CCEXEC83 was neither final nor agreed;
  - iii. noted that through the process of developing the draft guidance, Members had been sensitized to the practical application of the SoP;
  - iv. endorsed the proposal to refer the draft guidance to the Chairpersons of Codex subsidiary bodies to facilitate deliberations on matters that fell within the scope of the SoP;
  - v. urged Members to take account of the draft guidance as appropriate during the process of standards development and advancement;
  - vi. requested the Secretariat to issue a CL following CAC45 drawing on the discussions at this session inviting Members and Observers to provide specific suggestions to improve the draft guidance, its finalization and its possible incorporation into guidance documents for Chairpersons and Members; and
  - vii. agreed to review comments received on the CL and from Chairpersons of committees on the draft guidance and consider its next steps at CAC46.

### **CCEXEC subcommittee on new food sources and production systems – Report**

23. The Chairperson of the subcommittee acknowledged with appreciation the engagement of Coordinators, Members and Observers, FAO and WHO as well as the members of CCEXEC in the efforts of the past year to collect and collate information on new food sources and production systems (NFPS). This had allowed the compilation of information reflecting different perspectives from different sectors around the world and provided the basis for further deliberations. He drew the attention of CAC45 to the conclusions of CAC44, CCEXEC82, and CCEXEC83 on this topic.

### **Discussion**

#### *General reflections*

24. The Chairperson of the subcommittee invited general reflections on the relationship between the Codex work and NFPS.

25. Delegations expressed their appreciation for the work of the subcommittee and its Chairperson, and had a range of general reflections on NFPS:
- a. Setting international standards on NFPS was in line with Goal 1 in the Codex Strategic Plan 2020-2025 (SP) addressing current emerging and critical issues in a timely manner.
  - b. It was of utmost importance that Codex was capable to address NFPS issues in a timely and efficient manner.
  - c. NFPS were complex and required an inclusive interdisciplinary approach to effectively analyse matters.
  - d. NFPS were of increasing importance and there was a lack of international guidance to assist countries in regulating them. Harmonization would be more difficult in the future if Codex did not take timely action.
  - e. Currently there was no clear definition of NFPS, which may be needed to facilitate further discussion and communication on the topic.
  - f. Areas NFPS might encompass included:
    - plant, animal, or microbial based foods that were part of the traditional diet in some countries but not yet widely consumed elsewhere;
    - new ways in which existing foods were processed; and
    - foods produced by various new technologies such as cell-based protein.
  - g. Some of these areas could be addressed using existing approaches while for others which were still in the research and development stage, standard setting would be premature.
  - h. Innovation and NFPS would be key to adapting food systems capable of feeding a growing population and could significantly contribute to more sustainable and healthy diets and were also developing in response to consumer demands, hence international guidance was important.
  - i. Countries needed to look at NFPS positively to ensure food security.
  - j. Codex texts were needed to minimize trade barriers in this area.
  - k. There was a high interest in this diverse topic which may confront Codex in a range of areas and therefore further consultation with Members and experts in the area would be useful.
  - l. The development of risk analysis principles for new food may need to be further explored.
  - m. Codex as a standard setting body, should not deal with production systems at the global level as they were diverse and adapted to local contexts. Codex should rather focus on how to evaluate NFPS and guide Members on the related risk identification and options for prevention and control.
  - n. Expert groups and scientific advice provided by FAO and WHO were needed.
  - o. While NFPS presented opportunities and advantages, special attention should be paid to the potential impact in the promotion of highly processed foods, excessive use of additives, and increased need for packaging material.
  - p. There have always been new foods which Codex has addressed, and it should not now address a specific group of new foods to the detriment of others.
  - q. This work was important to ensure that Members were aware of NFPS, but this did not mean that it was necessary to immediately invest more time/new approaches into the area. Existing Codex mechanisms could be used to consider new work proposals and/or any specific needs of NFPS could be considered in new or ongoing horizontal work.
  - r. This new work was important for countries to improve safety of traditional foods and had the potential to safely trade such foods more widely.
  - s. Commodity standards were not needed for all foods noting that general Codex texts, such as those on hygiene, contaminants, and labelling apply to all foods.

*Way forward for Codex work on NFPS*

26. The Chairperson of the subcommittee then invited reflections on the how Codex could work on this matter.
27. Two potential approaches were identified:

28. There was the view that given the complexity and diversity of NFPS and to be proactive in preparing for the future of Codex, it was important to continue discussions in an overarching manner, to further consider what it might entail for Codex and what existing or new approaches could be used within Codex. For example, how specific areas such as insects as food, on which the Codex Committee on Contaminants in Foods (CCCF) had requested advice of CCEXEC, could be addressed. For this purpose, the establishment of an electronic working group under the Commission open to all Codex Members and Observers to work on these matters was proposed.
29. The other view was that the existing mechanisms within Codex were sufficient to address any specific new work proposals on NFPS. Members of this view supported the recommendations of CCEXEC that Members were encouraged to submit new work proposals as this would provide Codex with concrete subjects on which working mechanisms could be further considered.
30. Following an extensive debate, the Chairperson noted that there was no agreement in the Commission on the best way forward and therefore proposed a step wise approach whereby CAC45 would not establish an electronic working group (EWG) at this time, while such an EWG should not be precluded in the future. In the interest of moving forward, he proposed that a CL would be sent to all Members and Observers to identify the specific topics for more discussion at the Commission level including identification of topics that the current structure and procedures could not address.

### **Conclusion**

31. CAC45:
  - i. agreed that the work done by the CCEXEC subcommittee and the information collected on NFPS had sensitized Codex to their challenges and opportunities;
  - ii. recognized the importance of Codex working in a flexible and timely manner to consider NFPS as an important topic in the development of international standards aimed at protecting consumer health and ensuring fair practices in the food trade;
  - iii. acknowledged the role of CCEXEC in ensuring cross-committee coordination, as part of the critical review, noting that this could be of particular relevance for any work on NFPS;
  - iv. strongly encouraged FAO and WHO to continue sharing information on NFPS with CAC and its subsidiary bodies through the agenda item on "Matters arising from FAO and WHO", to ensure Codex Members were fully aware of upcoming issues in this area and could consider them as appropriate;
  - v. encouraged Members to submit proposals related to NFPS using existing Codex mechanisms, and Codex subsidiary bodies to consider NFPS in their deliberations; and
  - vi. could not find consensus on the need for a new cross-cutting coordination mechanism for NFPS, and requested the Codex Secretariat to send a CL to Members and Observers to identify possible issues related to NFPS that the current structure and procedures could not address and options to address them for discussion at CAC46.

### **CCEXEC subcommittee on the future of Codex – Interim report**

#### **Introduction by the Chairperson of the subcommittee**

32. The Chairperson introduced the item and recalled that the changes to Codex procedures implemented during the COVID-19 pandemic and the upcoming 60th anniversary presented timely opportunities to reflect on the future of Codex. The subcommittee was established by CCEXEC82 to take the lead on this issue with the aim of producing a blueprint on the future of Codex by CCEXEC84. He emphasised that the work was still in progress.
33. In summarising the work so far, he noted that while the future of Codex was potentially a broad issue, the focus to date had been on preparedness in terms of working modalities and the evolution of working practices within Codex related to meeting formats, meeting schedules and working groups and other virtual informal working mechanisms.
34. He recalled that CCEXEC82 had requested specific feedback on any procedural issues that might need to be addressed. Highlighting that the interim report related to: *Virtual and hybrid meetings*; *Development of new work*; and *Electronic working groups* he shared the outcome of the CCEXEC discussions on these three areas, emphasising the timeline for the way forward and noting that consultation with Members and Observers was scheduled for March – April 2023.

**Discussion**

35. Delegations expressed appreciation for the work, noted its importance for Codex to remain the preeminent food standards body for next 60 years, and confirmed their willingness to contribute to the work.
36. The Coordinator for CCLAC expressed the views of their region that irrespective of future work modalities, Codex should guarantee transparency and the greatest possible participation of Codex Members.
37. Views were expressed on the necessity to eventually review the PM to ensure that it could guarantee the resilience and flexibility needed to facilitate a range of meeting modalities, however it was also noted that it may still be premature to review the PM as there was a need to gain further experience with different meeting modalities.
38. One Member proposed that work on the revision of the Codex Rules of Procedure to allow virtual sessions of the CAC without need for endorsement should be discussed at the next session of the CCGP.
39. The Codex Secretary clarified that the decision of CAC44, that “place of Session” could be interpreted as a virtual place only applied to Codex subsidiary bodies including the CCEXEC, and not the Commission. He further noted that it was still necessary to have the endorsement of the two thirds majority of Codex Members for any deviation from convening the CAC at either FAO or WHO headquarters. To avoid such an endorsement process in the future, a change would be needed to the PM, but such a revision needed to consider legal advice so as to ensure there would be no unintended consequences.
40. One Member while welcoming the request of CCEXEC to the Codex Secretariat to draft practical guidance for Codex Members on new work proposals for further consideration by CCEXEC, noted that such guidance must remain true to the PM and that CCGP presented the most logical opportunity to discuss the draft practical guidance with the wider Codex membership.

**Conclusion**

41. CAC45:
  - i. noted that the future of Codex was a work in progress and that there would be an opportunity in 2023 for all Members and Observers to engage on this topic;
  - ii. noted the need, in due course, to review the PM to ensure that its provisions enabled and facilitated continued virtual and hybrid meetings; and
  - iii. requested the Codex Secretariat to consult with the FAO and WHO Legal Offices on a possible amendment to the rules of procedure allowing the Commission to take place virtually if needed and to prepare a paper on this specific issue for consideration by CCGP33, which in turn should advise CAC46.

**Amendments to the Procedural Manual (Agenda Item 3)<sup>8</sup>**

42. The Codex Secretariat introduced the item and explained the extensive process that had been undertaken to complete work on consistency in the PM since the initiative had been proposed at CCGP32. He noted that this had delayed publication of the 28th edition of the PM, but confirmed that the forthcoming version would include all the latest changes to the PM as agreed by CAC.
43. The Codex Secretariat further explained that in all gradual moves to digitalization of the PM, the Secretariat would be guided by industry standards and the expertise of the publishing branches of FAO and WHO as well as resource and budget implications. Work on harmonizing all the texts that make up the Codex Alimentarius would also focus on ensuring that criteria for revisions, amendments and corrections would be clearly established; the user experience would be new and functional; and that each language would be considered equally. He noted that any changes to the PM’s provisions on amendments and revisions would be guided by Members and proposed that this could be optimally achieved through discussions at CCGP, in line with their terms of reference.
44. CAC45:
  - i. noted the work on editorial consistency in the PM;
  - ii. requested the Codex Secretariat to prepare a document for CCGP33:
    - a) examining how amendments and revisions of Codex texts have been treated historically;
    - b) suggesting improvements to enhance consistency and alignment with FAO and industry publishing standards;

---

<sup>8</sup> CX/CAC 22/45/2

- c) recommending clear criteria and options for current and future publications concerning amendments/revisions and new editions; and
- d) indicating draft revised text for the PM's Guide to the Procedure for the Amendment and Revision of Codex Standards and Related Texts.

**WORK OF CODEX COMMITTEES (ADOPTION, NEW WORK, REVOCATION, DISCONTINUATION AND EDITORIAL AMENDMENTS TO CODEX TEXTS PROPOSED BY THE COMMITTEE) (Agenda Item 4)**

45. CAC45 considered the standards setting work for each Codex Committee under the following categories: Final adoption and Adoption of editorial amendments; Adoption at Step 5; Proposals for new work; Revocation; Discontinuation; and other issues, in each case taking into account the recommendations of CCEXEC82 and CCEXEC83, as relevant.

**CODEX COMMITTEE ON FATS AND OILS (CCFO) (Agenda Item 4.1)<sup>9</sup>**

Final adoption

46. CAC45 adopted the:
- i. revision to the *Standard for Named Vegetable Oils* (CXS 210-1999): Essential composition of Sunflowerseed oils at Steps 5/8, noting the reservation by the Russian Federation based on their concerns that revising the ranges of fatty acid composition would lead to a reduction in quality of the known traditional sunflowerseed oil and consequently lead to food fraud; and
  - ii. editorial amendments/changes to the *Code of Practice for the Storage and Transport of Edible Fats and Oils in Bulk* (CXC 36-1987): Appendix 2.

Adoption at Step 5

*Discussion*

47. Chile reiterated their reservation on the definition for avocado oil as expressed at CCFO27 noting that the definition allows for oil to be obtained from either the mesocarp or the whole fruit, and that oil from the whole fruit will affect the quality of avocado oil on the international market.
48. One Member stressed the need to accelerate work on avocado oil based on their views of its importance to health and in international trade.
49. Mexico, as chair of the EWG, noted that the issue had been widely discussed at CCFO27, which had agreed to submit the draft for avocado oil for adoption at Step 5; maintain the EWG to consider the proposed values/text in square brackets, and consider comments at Step 5/6 in response to CLs; and to submit a report prior to CCFO28, as CCEXEC82 had agreed to extend the timeline to CCFO28.
50. The Chairperson of CCFO explained that all technical issues including the definition for avocado oil, had been thoroughly discussed at CCFO27. She encouraged all Codex Members and Observers that have an interest in avocado oil to participate in the ongoing working group which is tasked with addressing outstanding issues on product characteristics, noting the outcome of the working group would be further deliberated upon at CCFO28.

*Conclusion*

51. CAC45 adopted at Step 5 the draft revision to the *Standard for Named Vegetable Oils* (CXS 210-1999): inclusion of avocado oil, noting that pending technical comments should be submitted at Step 6 and endorsed the extension of the deadline for completion of the work to CCFO28.

New work approval

52. CAC45 approved the following proposals for new work:
- i. Revision to the *Standard for Named Vegetable Oils* (CXS 210-1999) to include Camellia seed oil; Sacha inchi oil; High oleic acid soya bean oil.
  - ii. Revision to the *Standard for Fish Oils* (CXS 329-2017) to include Calanus oil.

<sup>9</sup> CX/CAC 22/45/3; CX/CAC 22/45/3 Add. 1 (Brazil, Cuba, Iran, Kenya, New Zealand, Peru, Philippines, Saudi Arabia, Tunisia, Venezuela, (Bolivarian Republic of)); CRD19 (Ghana, Mali, Philippines); CRD31 (Dominican Republic); CRD39 (Liberia); CRD44 (Ecuador)

## **CODEX COMMITTEE ON NUTRITION AND FOODS FOR SPECIAL DIETARY USES (CCNFSDU) (Agenda Item 4.2)<sup>10</sup>**

### Final adoption

#### *Discussion*

53. In the discussion on the adoption of the Guidelines for Ready-to-Use Therapeutic Foods (RUTF) at Step 8:
- Many Members intervened in support of final adoption and commended the leadership of the working group in completing the Guidelines.
  - One Member and an Observer noted the level of carbohydrates, specifically sugar, exceeded WHO recommendations. This issue was discussed extensively at CCNFSDU including current constraints on product formulation and it was also highlighted that RUTF were meant for short term use.
  - Observer organizations expressed the view that the level of magnesium was too low; stressed the need to guard against inappropriate promotion of the products; underlined the need to ensure the availability of potable water; expressed the view that the preamble should further address the need for appropriately designed programmes to support continued breastfeeding and re-lactation; and that the use of RUTF should not preclude the use of culturally appropriate home-based foods.

#### *Conclusion*

54. CAC45 adopted the Guidelines for Ready-to-Use Therapeutic Foods (RUTF) at Step 8 with the editorial amendments as proposed by WHO on the definition for Severe Acute Malnutrition and by EU in CX/CAC 22/45/4 Add. 1.

## **CODEX COMMITTEE ON FOOD HYGIENE (CCFH) (Agenda Item 4.3)<sup>11</sup>**

### Final adoption

55. CAC45 adopted the:
- i. Guidelines for the Management of Biological Foodborne Outbreaks at Step 8; and
  - ii. revision to the *General Principles of Food Hygiene* (CXC 1-1969).
56. The Chairperson noted that with the adoption of the decision-tree, Codex had now completed a major revision of the *General Principles of Food Hygiene* (CXC 1-1969). Recalling that this was the foundational text for many of the Codex food hygiene texts and was also extensively cross-referenced in other Codex texts, it was now necessary to ensure that, where relevant, Codex texts were fully aligned with the latest version of the *General Principles on Food Hygiene* (CXC 1-1969).
57. The Chairperson of CCFH requested CAC45 to approve the immediate commencement of the work on alignment of other food hygiene related Codex texts with the *General Principles of Food Hygiene* (CXC 1-1969). Referring to the extensive amount of work involved, and the fact that CCFH would meet immediately following CAC45 and would not meet again until 2024, he noted that this approval would facilitate timely alignment with the *General Principles of Food Hygiene* (CXC 1-1969).
58. CAC45 requested that:
- i. CCFH undertake work on the alignment of all food hygiene texts with the *General Principles of Food Hygiene* (CXC 1-1969), in line with the CCFH work management approach;
  - ii. that other subsidiary bodies ensure that any necessary alignment with the *General Principles of Food Hygiene* (CXC 1-1969) was undertaken in other Codex texts; and
  - iii. where the relevant committees were adjourned, that the Codex Secretariat undertake the alignment review directly.

<sup>10</sup> CX/CAC 22/45/4; CX/CAC 22/45/4 Add. 1 (Australia, Botswana, Brazil, Canada, Colombia, Cuba, Egypt, European Union, Iran, Malaysia, New Zealand, Peru, Philippines, Republic of Korea, Saudi Arabia, Uganda, USA and ENCA, HKI, IBFAN, ICUMSA, UNICEF, WHO); CRD20 (Ghana, Mali, Philippines and Senegal); CRD31 (Dominican Republic); CRD35 (Niger); CRD37 (India); CRD39 (Liberia); CRD44 (Ecuador)

<sup>11</sup> CX/CAC 22/45/5; CX/CAC 22/45/5 Add.1 (Canada, Colombia, Costa Rica, Cuba, Egypt, Honduras, India, Indonesia, Kenya, Saudi Arabia, Singapore, United Kingdom, Uruguay and ICUMSA); CRD21 (El Salvador, Ghana, Mali, Philippines, Republic of Peru and Senegal); CRD31 (Dominican Republic); CRD35 (Niger); CRD39 (Liberia); CRD44 (Ecuador)

**CODEX COMMITTEE ON FRESH FRUITS AND VEGETABLES (CCFFV) (Agenda Item 4.4)<sup>12</sup>**Final adoption

59. CAC45:
- i. adopted the *Standard for Onions and Shallots* at Steps 5/8;
    - a. Noted the reservations of the EU, Norway and Switzerland regarding the tolerances for decay in “Extra class”.
  - ii. adopted the *Standard for Berry Fruits* at Steps 5/8;
    - a. Noted the reservations of the EU, Norway and Switzerland “regarding the tolerances for decay in “Extra class” and the comment from one Member on the need for revising the standard in the future to include additional types of berries.
  - iii. adopted the Amendment to the *Standard for Bananas* (CXS 205-1997).

Adoption at Step 5*Discussion*

60. Delegations representing date-producing countries objected to the adoption of the proposed draft standard for fresh dates at Steps 5/8 as proposed by CCFFV and considered more technical discussions were needed on the proposed minimum value for moisture content of 30% because:
- a. the definition of fresh fruits and vegetables did not make any reference to their moisture content and thus all types of fresh dates irrespective of their moisture content should be included in the standard;
  - b. moisture content was not an appropriate parameter for distinguishing fresh dates from other categories of dates. Other quality parameters should be used for fresh dates e.g. indicating that they did not undergo treatment;
  - c. scientific classification of dates included soft, semi-soft and dry dates. Soft and semi-soft varieties were considered as fresh fruits and had a moisture content between 20% to 30%, which should be taken into account to avoid excluding such dates in the standard;
  - d. the terminology for dates in date-producing countries was based on the stages of harvest;
  - e. the quality of semi-soft dates could be compromised if they were considered as dry dates and therefore kept at room temperature: Thus, semi-soft dates should not be merged with dried and treated dates;
  - f. the proposed minimum moisture level of 30% was not based on scientific data but had been chosen to avoid overlap with the existing *Standard for Dates* (CXS 143-1985) developed by CCFFV with a maximum moisture content of 30%. This standard will be an annex of the *General Standard for Dried Fruits*, adopted by CAC43 once its food additive provisions have been endorsed by CCFA.
  - g. adopting the standard at Steps 5/8, would exclude some date cultivars and not reflect the reality in the marketplace with negative effects on production and international trade; and
  - h. the use of the term ‘fresh dates’ within the proposed draft standard needed to be reconsidered.

*Conclusion*

61. CAC45:
- i. adopted the draft standard for fresh dates at Step 5;
    - a. Encouraged all Members to submit comments at Step 6 particularly related to technical issues as referred to in paragraph 59 along with proposals and relevant new data that would allow CCFFV to consider solutions.
    - b. Requested that CCFFV, discuss the draft standard for fresh dates taking into account the comments made at CAC45.

---

<sup>12</sup> CX/CAC 22/45/6; CX/CAC 22/45/6 Add. 1(Australia, Chile, Costa Rica, Cuba, Ecuador, Egypt, European Union, India, Iran, Kenya, Mauritius, Saudi Arabia, United Kingdom and ICUMSA); CRD17 (Algeria and Morocco); CRD22 (Ghana, Mali, Philippines and Senegal); CRD30 (Mauritius); CRD31 (Dominican Republic); CRD32 (Indonesia); CRD35 (Niger); CRD36 (Syrian Arab Republic); CRD39 (Liberia); CRD44 (Ecuador)

Proposals for new work

62. CAC45 approved new work on developing a standard for fresh curry leaves.
63. CAC45 did not approve the proposal for new work on developing a worldwide standard for *Castilla lulo* due to the limited volume of international trade, however CAC45 approved new work on developing a regional standard on *Castilla lulo* under CCLAC.
64. Colombia confirmed their willingness to lead an EWG to initiate development of the regional standard.

**CODEX COMMITTEE ON CONTAMINANTS IN FOOD (CCCF) (Agenda Item 4.5)<sup>13</sup>**Final adoption

65. CAC45:
- i. adopted the *Code of Practice for the Prevention and Reduction of Cadmium Contamination in Cocoa Beans* at Step 8;
  - ii. adopted the maximum level (ML) for cadmium in cocoa powder (100% cocoa solids on a dry matter basis) at Steps 5/8,
    - a. Noted the reservations of the EU and Cameroon as had been expressed at CCCF15, and of Norway, Switzerland, and the Russian Federation for the same reasons as expressed by the EU.
  - iii. adopted the editorial amendment to the MLs for cadmium in chocolates containing or declaring <30% total cocoa solids on a dry matter basis and chocolates containing or declaring ≥30% to ≤50% total cocoa solids on a dry matter basis;
  - iv. adopted the MLs for lead in cereal-based foods for infants and young children, white and refined sugar, corn and maple syrups, honey and sugar-based candies at Steps 5/8,
    - a. Noted the reservation of India on the ML for lead in white and refined sugar.
  - v. adopted the MLs for methylmercury in orange roughy and pink cusk eel at Steps 5/8.
  - vi. adopted the consequential amendment to the ML for DON (deoxynivalenol) in cereal-based foods for infants and young children.

**Maximum levels (MLs) for aflatoxins in several food categories at Steps 5/8***Discussion*

66. The following views against adoption of the MLs were expressed leading to these Members entering reservations as reported in the conclusion under each category:
- The MLs were not in line with the MLs in their national legislation and should be lowered to provide adequate protection to their consumers in view of their high consumption or dietary patterns.
  - There should not be separate MLs for cereal-based foods for infants and young children (excluding foods for food aid programs) and for these products for food aid, as in their view MLs for aflatoxins should be set as low as reasonably achievable, in particular for foods destined for infants and young children, regardless of whether these foods were for normal consumption or for food aid.
67. The Representatives of World Food Programme (WFP) and Médecins Sans Frontières (MSF) (Doctors without borders) supported the proposed MLs and explained that cereal-based food for infants and young children in food aid was typically for a short period of time during crisis and that a lower level could negatively impact on the food supply, which was already severely challenged and constrained humanitarian responses.
68. Other Observers supported the concerns expressed by Members in order to give best possible protection, especially for those in vulnerable positions, including the differences in MLs proposed for aflatoxins in cereal-based food for infants and young children in different circumstances.
69. The FAO Representative underlined that the risk assessments had taken into account national diets as well as composition of food aid and different intake levels.
70. The Chairperson of CCCF highlighted that the Committee did not have any new data and hence no new MLs could be proposed within the next few years. Therefore, if the proposed MLs were not adopted, there would be no ML to restrict exposure to aflatoxin.

<sup>13</sup> CX/CAC 22/45/7; CRD10 (LAC Region); CRD23 (Ghana, Mali, Philippines, Senegal, and Sudan); CRD31 (Dominican Republic); CRD32 (Indonesia); CRD35 (Niger); CRD36 (Syrian Arab Republic); CRD37 (India); CRD39 (Liberia); CRD41 (United Republic of Tanzania); CRD42 (Uganda); CRD43 (IFT); CRD44 (Ecuador)

*Conclusion*

71. CAC45 adopted the MLs for aflatoxins for the following food categories at Steps 5/8:
- i. Maize grain destined for further processing,
    - a. Noted the reservation of the following countries: Algeria, Bahrain, Benin, Botswana, Burkina Faso, Burundi, Cameroon, Cabo Verde, Comoros, Côte d'Ivoire, Egypt, Ethiopia, Gambia, Ghana, Jordan, Kazakhstan, Kenya, Lesotho, Malawi, Mali, Mauritania, Morocco, Mozambique, Namibia, Niger, Nigeria, North Macedonia, Russian Federation, Rwanda, Senegal, Seychelles, South Sudan, Sudan, Tanzania, Togo, Tunisia, Uganda, United Republic of Tanzania, Zambia, and Zimbabwe.
  - ii. Flour meal, semolina and flakes derived from maize,
    - a. Noted the reservation of the following countries: Algeria, Benin, Botswana, Burkina Faso, Burundi, Cabo Verde, Cameroon, Côte d'Ivoire, Egypt, EU, Gambia, Georgia, Ghana, Jamaica, Jordan, Kazakhstan, Kenya, Lesotho, Malawi, Mali, Mauritania, Mauritius, Morocco, Namibia, Niger, North Macedonia, Norway, Russian Federation, Senegal, Seychelles, South Africa, South Sudan, Sudan, Switzerland, Tanzania, Togo, Tunisia, Uganda, United Republic of Tanzania, Zambia, and Zimbabwe.
  - iii. Husked rice,
    - a. Noted the reservation of the following countries: Algeria, Angola, Benin, Botswana, Burkina Faso, Burundi, Cabo Verde, Cameroon, Comoros, Côte d'Ivoire, Egypt, Ethiopia, EU, Gambia, Ghana, Guinea-Bissau, Jordan, Kazakhstan, Kenya, Kyrgyzstan, Lesotho, Libya, Malawi, Mali, Mauritania, Mauritius, Morocco, Mozambique, Namibia, Niger, Nigeria, North Macedonia, Norway, Russian Federation, Rwanda, Senegal, Seychelles, Singapore, South Africa, Sudan, Switzerland, Syrian Arab Republic, Togo, Tunisia, United Republic of Tanzania, Zambia, and Zimbabwe.
  - iv. Polished rice,
    - a. Noted the reservation of the following countries: Algeria, Bahamas, Benin, Botswana, Burkina Faso, Burundi, Cameroon, Cabo Verde, Comoros, Côte d'Ivoire, Egypt, Ethiopia, Gambia, Ghana, Guinea Bissau, India, Jamaica, Jordan, Kazakhstan, Kenya, Kyrgyzstan, Lesotho, Libya, Malawi, Mali, Mauritania, Mauritius, Niger, Russian Federation, Rwanda, Senegal, Seychelles, South Africa, South Sudan, Syrian Arab Republic, Togo, Tunisia, United Republic of Tanzania, Zambia, and Zimbabwe.
  - v. Sorghum grain, destined for further processing,
    - a. Noted the reservation of the following countries: Algeria, Benin, Botswana, Burundi, Cameroon, Cabo Verde, Egypt, Ethiopia, Gambia, Ghana, Guinea-Bissau, Jordan, Kazakhstan, Kenya, Kyrgyzstan, Lesotho, Malawi, Mali, Mauritania, Mozambique, Namibia, Niger, Russian Federation, Senegal, Seychelles, South Africa, South Sudan, Sudan, Syrian Arab Republic, Togo, Tunisia, United Republic of Tanzania, Zambia, and Zimbabwe.
  - vi. Cereal-based food for infants and young children (excluding foods for food aid programs),
    - a. Noted the reservation of the following countries: Algeria, Benin, Botswana, Burkina Faso, Burundi, Cabo Verde, Cameroon, Comoros, Côte d'Ivoire, Egypt, Ethiopia, EU, Gambia, Ghana, Guinea-Bissau, Iraq, Jordan, Kazakhstan, Kyrgyzstan, Lesotho, Libya, Malawi, Mali, Mauritania, Morocco, Mozambique, Niger, North Macedonia, Norway, Russian Federation, Rwanda, Senegal, Seychelles, Singapore, South Sudan, Sudan, Switzerland, Syrian Arab Republic, Togo, Tunisia, Uganda, United Kingdom, United Republic of Tanzania, Zambia, and Zimbabwe.
  - vii. Cereal-based food for infants and young children for food aid programs,
    - a. Noted the reservation of the following countries: Algeria, Benin, Botswana, Burkina Faso, Burundi, Cabo Verde, Cameroon, Comoros, Côte d'Ivoire, Egypt, Ethiopia, EU, Gambia, Georgia, Ghana, Guinea-Bissau, Iraq, Jordan, Kenya, Kyrgyzstan, Lesotho, Libya, Malawi, Mali, Mauritania, Morocco, Mozambique, Namibia, Niger, North Macedonia, Norway, Oman, Russian Federation, Senegal, South Africa, South Sudan, Sudan, Switzerland, Syrian Arab Republic, Tunisia, Uganda, United Republic of Tanzania, Zambia, and Zimbabwe.

72. CAC45 requested CCCF to undertake a review of all the MLs for total aflatoxins in three years' time, if sufficient data were submitted by Members through GEMS/Food, but in any event to undertake this review in no more than five years' time.
73. CAC45 further requested FAO, WHO, other relevant intergovernmental organizations and the donor community to support capacity development in respect of implementation of codes of practice to reduce aflatoxin contamination and in respect of data generation.

#### Adoption at Step 5

74. One Member, while not opposing the adoption of the Code of Practice for the prevention and reduction of mycotoxin contamination in cassava and cassava-based products at Step 5, requested that the scope and requirements of the Code of Practice be clarified to focus on cassava and cassava-based products for human consumption and not for animal feed.
75. CAC45 adopted at Step 5 the:
- i. ML for lead in ready-to-eat meals for infants and young children; and
  - ii. Code of practice for prevention and reduction of mycotoxin contamination in cassava and cassava-based products.

#### Discontinuation

76. CAC45 endorsed the discontinuation of the work on MLs for lead in fresh eggs, dried garlic, and molasses for the reasons raised in CCCF15<sup>14</sup>.

### **CODEX COMMITTEE ON PESTICIDE RESIDUES (CCPR) (Agenda Item 4.6)<sup>15</sup>**

#### Final adoption

77. CAC45:
- i. adopted the *Guidelines for the recognition of active substances or authorized uses of active substances of low public health concern that are considered exempted from the establishment of maximum residue limits or do not give rise to residues* at Step 8;
  - ii. adopted maximum residue limits (MRLs) for different combinations of pesticide/commodity(ies) at Steps 5/8,
    - a. Noted the reservations of the EU reiterated in CRD24 and supported by Kazakhstan, Norway and Switzerland.
    - b. Noted the reservations by the EU, Kazakhstan, North Macedonia, Norway and Switzerland for: Quinoxifen (222) for the proposed MRL for cherries (subgroup) in light of the ongoing review in the EU of MRLs for non-approved substances due to environmental issues of a global nature, in this case, persistence, bioaccumulation and toxicity in the environment; Clothianidin (238) and Thiamethoxam (245) for all the proposed MRLs in light of environmental issues of a global nature, in these cases, pollinator decline (see also discussion below).
  - iii. adopted the Revision of the *Classification of Food and Feed* (CXA 4-1989): definitions for edible offal, fat, meat/muscle, including the definitions for the portion of the commodity to which MRLs apply and which is analyzed for fat and muscle; and
  - iv. adopted the Revision of the *Classification of Food and Feed* (CXA 4-1989): Consequential amendment to Class D, Processed Food of Plant Origin. Inclusion of additional commodities for citrus fruits pulps (dried) and oils (edible) and soya flour.

#### *Discussion on proposed MRLs for Clothianidin, Quinoxifen and Thiamethoxam*

78. The EU requested that MRLs for Clothianidin, Quinoxifen and Thiamethoxam be adopted at Step 5 for the reasons explained at CCPR53<sup>16</sup> and in CRD24. The EU further stated that in their view this proposal was in line with the second statement of principle in the *Statements of principle concerning the role of science in the Codex decision-making process and the extent to which other factors are taken into account* and the *Criteria*

<sup>14</sup> REP22/CF15, paragraphs 72, 91, 94 and 95.

<sup>15</sup> CX/CAC 22/45/8; CRD10 (LAC Region); CRD24 (EU, Ghana, India, Mali, Philippines, and Senegal); CRD31 (Dominican Republic); CRD32 (Indonesia); CRD35 (Niger); CRD37 (India); CRD39 (Liberia); CRD44 (Ecuador)

<sup>16</sup> REP22/PR53, paragraphs 29, 88, 99 and 103

for the consideration of the other factors referred to in the Second Statement of Principle related to other factors that could be accepted on a worldwide basis (fifth bullet).

79. Other Members supporting this position indicated that in their view:
- a. the proposal was consistent with the One Health approach linking the health of humans, animals, plants and the environment as well as with the participation of the parent organizations, FAO and WHO, together with World Organization for Animal Health (WOAH) and the United Nations Environment Programme (UNEP) in the Quadripartite;
  - b. good agricultural practices (GAPs) in the use of pesticides include the safe use of pesticides authorized at national level considering public and occupational health and environmental safety considerations as stated in the PM;
  - c. environmental considerations could strengthen the role of Codex in the implementation of sustainable food systems as noted by CCEURO32<sup>17</sup>;
  - d. the decline of pollinator populations was a huge environmental threat and, in the absence of an international body that could deal with such issues, Codex could assist in preventing the use of these compounds in agriculture even though such a risk management decision would not be at the center of the Codex's mandate;
  - e. while recognizing that the MRLs for these compounds were based on solid risk assessment provided by JMPR, there were other factors that could be taken into account in the risk management process. As there were open procedural questions which criteria could determine other legitimate factors it was important not to omit steps 6 and 7 to provide an opportunity to further reflect on issues raised in CRD24; and
  - f. Codex needed to reflect on how to ensure that the close links between human, animal and environmental health were identified and reflected upon in Codex as Codex had a mandate to coordinate all food standards work. This would be in line with the launch of the High-Level Expert Panel on One Health and the statement of the WHO Director-General.
80. The above views were supported by two Observers. It was also noted that there was an increased exposure to pesticides and other chemicals so the total burden and their synergistic impact from diet, water, air and all sources should be taken into account when setting risk management measures and this was particularly important for vulnerable groups such as children. It was further noted that pollination was vital for the reproduction of plant species including crops which could impact the food supply/food security. It was also mentioned that pesticides used in agriculture which did not reach their target crops accumulated in the environment and could contribute to the sharp decline in pollinators worldwide. In addition, CCPR had already acknowledged environmental issues by agreeing to consider using environmental inhibitors in agriculture on a case-by-case basis, consistent with its current mandate and definitions.
81. Countries in support of the final adoption of the MRLs at Steps 5/8, while acknowledging the importance of environmental issues, indicated the following:
- a. Issues related to the environment, while important, should be addressed in other relevant multilateral fora mandated to deal with such issues outside the mandate of Codex, and at the national level in terms of pesticides registration/GAPs.
  - b. Codex should contribute to the One Health approach within its own mandate as was the case of FAO, WHO, WOAH and UNEP in forming the Quadripartite.
  - c. The fourth statement of the SoP was more relevant to apply in this situation.
  - d. Environmental issues were outside the mandate of Codex to protect consumer's health and ensure fair practices in trade and as such they did not qualify as a legitimate factor in the SoP nor in the related Criteria.
  - e. The mandate of CCPR, and the procedures for the establishment of MRLs for pesticides, as described in the *Risk Analysis Principles applied by CCPR*, did not consider environmental issues when setting MRLs for pesticides; other organizations had relevant expertise and jurisdiction over issues not included in the Codex mandate.
  - f. The MRLs were consistent with the risk management policies and procedures established in the *Risk Analysis Principles applied by CCPR* and risk assessment policies and methodologies provided by JMPR. They were discussed and agreed in CCPR, consequently the MRLs were safe/protective of

---

<sup>17</sup> REP22/EURO, paragraph 15 iii

human health and complied with the Codex mandate. Codex should respect the risk assessment outcomes provided by JMPR and the decisions taken by CCPR.

- g. CCPR establishes MRLs for pesticides to ensure consumer health and fair practices in the food trade. Matters related to authorization/registration of pesticides were the responsibility of national competent authorities. The PM states that GAPs are determined at the national level, and national authorities, when determining authorized safe use, may consider environmental considerations. Codex therefore had no mandate to assess GAPs. Furthermore, GAPs were dependent of a variety of factors including climatic conditions which may vary across countries/regions and may require different/ specific intervention measures as opposed to application of harmonized measures on a global basis.
  - h. Tailored national/regional solutions were needed to achieve durable and effective solutions for environmental challenges. There were multiple (geographic, climatic, social and economic) factors impacting the environment which varied between regions/ countries as did the way chemicals were used in different regions.
  - i. There was no unified scientific opinion on the causes for the decline of pollinator populations. Codex neither had the mandate nor the expertise to evaluate evidence of environmental effects. The decline of pollinator populations in countries or regions could not be explained by a single factor as was confirmed by the IPBES (2016) assessment report on pollination, pollinators and food production footnoted in CRD24.
82. The above views were supported by one Observer who also noted that it would not be possible to refer to “globally accepted environmental concerns” given the concerns expressed by countries at the WTO SPS and TBT Committees on the decision of the EU to apply this approach to the two neonicotinoid compounds associated with the decline of pollinator populations.
83. The Chairperson concluded that there was no consensus on whether the environmental issues raised for these three pesticides should be taken into account in the framework of Codex. As noted in paragraph 77 the MRLs for Quinoxifen (222), Clothianidin (238) and Thiamethoxam (245) were adopted at Steps 5/8.
84. The EU suggested that countries reflect more in-depth on how Codex could take into account global concerns related to major challenges to food systems and contribute to their sustainability and the application of the One Health approach. In their view, globally accepted environmental concerns could be taken as a legitimate factor when setting MRLs for pesticides.

#### Discontinuation

85. CAC45 endorsed discontinuation of
- i. MRLs for different combinations of pesticides/commodity(ies) in the Step Procedure recommended for withdrawal (discontinuation).
86. CAC45 further noted discontinuation of discussion on the review of the IESTI equations.

#### Revocation

87. India requested to retain the CXLs for Chlorpyrifos (17) until JMPR performed the periodic review of this compound in 2024. They referred to paragraph 90 of the Risk Analysis Principles applied by CCPR concerning the revocation of CXLs particularly on the need to maintain CXLs for a period not exceeding four years and the establishment of EMRLs after submitting monitoring data. They recognized that while there were safety concerns associated with the existing CXLs, this compound was still used in various crops marketed in international trade thus the revocation of the CXLs could negatively impact trade flow and food security. They further mentioned that there had been delays in the submission of data to the JMPR Secretariat due to the COVID-19 pandemic and that they were in the process of submitting relevant data to the JMPR Secretariat to enable JMPR to perform the periodic review.
88. The JMPR Secretariat clarified that MRLs for Chlorpyrifos (17) were proposed for revocation due to concerns of genotoxicity raised in a Concern Form at CCPR 2019 and supported by the JMPR expert panel. The JMPR Secretariat also indicated that revocation of CXLs would not preclude the evaluation of the compound by JMPR provided that a full toxicological database is made available.
89. CAC45 endorsed revocation of:
- i. CXLs for different combinations of pesticide/commodity(ies) proposed for revocation noting the reservation of India regarding the revocation of the MRL for Chlorpyrifos (17) for the reasons explained in paragraph 87 and CRD37; and
  - ii. *Guidelines on the use of mass spectrometry for the identification, confirmation and quantitative determination of residues* (CXG 56- 2005).

Other issues

90. CAC welcomed harmonization of definitions for edible tissues of animal origin between CCPR and CCRVDF, which will facilitate the establishment of single MRLs for compounds with dual use and their subsequent uptake by Codex Member countries.
91. CAC commended the improved work management approaches in CCRVDF and CCPR to enhance coordination of work on matters of mutual interest such as the establishment of joint and parallel WGs between the committees to address compounds with dual use.
92. CAC also commended CCPR for the procedures for parallel review of new compounds and encouraged sponsors and Codex members to submit proposals for the evaluation of new compounds through the parallel review.
93. CAC45 further noted that environmental inhibitors could be addressed on a case-by-case basis within the current mandate of CCPR and established procedures as described in the Risk Analysis Principles applied by CCPR.

**CODEX COMMITTEE ON SPICES AND CULINARY HERBS (Agenda Item 4.7)<sup>18</sup>**Final Adoption

94. CAC45:
- i. adopted the *Standard for dried floral parts – Saffron* at Step 8,
    - a. Noted the reservations of Canada and the United States of America to the adoption of the standard at Step 8 due to: (1) the inclusion of a provision for “extra class” – that in their view there was no scientific or technical justification and it was not aligned to international trade practices; and (2) the provision for the mandatory declaration of country of harvest as in their view the mandatory declaration of the country of harvest was contrary to the advice provided to CCSC by CCFL that this provision be optional and could possibly set a broad precedent.
  - ii. adopted the *Standard for dried seeds – Nutmeg* at Step 8,
    - a. Noted the reservation of Saudi Arabia and Oman due to public health concerns regarding its safety.
  - iii. adopted the *Standard for dried or dehydrated chilli pepper and paprika* at Steps 5/8,
    - a. Noted the reservation of Morocco who expressed the view that the provisions in Annex I of the standard required more discussions before final adoption.

*Amendments to the labelling provisions of non-retail containers in the eight existing spices and culinary herbs (SCH) standards.*

95. CAC45 adopted the amendments to the labelling provisions of non-retail containers in the standards for the eight existing spices and culinary herbs (SCH) standards (*Standards for black, white and green peppers* (CXS 326-2017), *cumin* (CXS 327-2017), *dried thyme* (CXS 328-2017), *dried oregano* (CXS 342-2021), *dried roots, rhizomes and bulbs: dried or dehydrated ginger* (CXS 343-2021), *dried floral parts: cloves* (CXS 344-2021), *dried basil* (CXS 345-2021), and *dried or dehydrated garlic* (CXS 347-2019)).

*Status of endorsements*

96. CAC45 noted that the publication of the *Standard for dried floral parts – Saffron* and the *Standard for dried or dehydrated chilli pepper and paprika* would be subject to the endorsement of their food additives and food labelling provisions by CCFA and CCFL, respectively.

Adoption at Step 5

97. CAC45:
- i. adopted the Draft Standard for dried small cardamom at Step 5; and
  - ii. adopted the Draft Standard for spices derived from dried fruits and berries (Part A - Allspice, Juniper berry, Star anise) at Step 5.

<sup>18</sup> CX/CAC 22/45/9; CX/CAC 22/45/9 Add.1(Chile, Costa Rica, Egypt, India, Iraq, Kenya, Mauritius, Morocco, Panama, Saudi Arabia and ICUMSA); CRD25 (Ghana and Mali); CRD31 (Dominican Republic); CRD32 (Indonesia); CRD39 (Liberia)

98. CAC45 noted that technical comments should be resubmitted at Steps 6/7 for consideration by CCSC, taking into account the critical review of CCEXEC83 and that the provisions for food additives, food labelling, and methods would be forwarded to the relevant Committees for endorsement.
99. CAC45 reaffirmed the Commission's support for the development of group standards as an efficient way of completing the work of this committee on the Spices standard.

**CODEX COMMITTEE ON RESIDUES OF VETERINARY DRUGS IN FOODS (CCRVDF) (Agenda Item 4.8)<sup>19</sup>**

**Introduction**

100. The Chairperson, referring to his letter to delegates of 19 November 2022, emphasized that his first objective was to facilitate and encourage the identification of compromises to established positions which may be acceptable to Members, and which may permit resolution by consensus.
101. Recognizing that consensus may remain elusive which would be consistent with the reluctant conclusions he and the Vice-Chairpersons (CVCs) had drawn from the informal consultations held with Members since CAC44, the Chairperson noted that CAC45 should be prepared for a potential vote on MRLs for zilpaterol hydrochloride in cattle liver, kidney and muscle.
102. The Chairperson recalled that the proposed MRLs were currently at Step 4 and that the Commission must follow its rules of procedure in decision-making. However, it was noted that the Commission might decide to suspend any rule it had made and replace it with an alternative provision, for a specified time, by consensus or by an appropriate majority in the case of a vote. The majority required would depend on the nature of the decision. The Chairperson informed CAC45 that the procedures required that he gave 24 hours' notice of any proposal from the Chairperson to apply a change to Codex rules of procedure.
103. The Chairperson explained that after giving the opportunity to Members to express themselves on the risk assessment and risk management, should the will of the Commission not be clear, he would propose a series of questions as set out in the chart in the letter, that would allow the Commission to decide the way forward either by consensus or by vote.

***Discussion on the JECFA risk assessment of human health risks associated with residues of zilpaterol hydrochloride***

104. Members overall were of the view that the JECFA risk assessment was sound and robust. Further, Members noted that no human health concerns were identified in the three risk assessments conducted by JECFA.
105. Some Members expressed concern that edible offal tissues such as intestines and lungs had not been included in the exposure assessment, and that MRLs should not be set before such tissues had been addressed. It was pointed out that it was not about setting additional MRLs for these tissues but rather that these should be taken into account in a complete risk assessment. One Member was concerned that in some countries the edible offal tissues other than liver and kidney, were consumed in high amount, thus might affect exposure assessment. One Member referred to data showing that beta agonists can cause human dysfunction. Another Member argued that chronic exposure of zilpaterol and its impact on the nervous system had not been thoroughly addressed in the JECFA risk assessment.
106. One Observer stated the view that the risk assessments were carried out addressing zilpaterol in isolation disregarding synergetic effects with other drugs, endocrine disruptors, toxins and hormones and had been implicated as a contributory cause for increased bacterial problems coming off commercial feedlots.
107. Another Observer noted that in their view the risk assessment did not address the impact on food systems and ecology and possibly antimicrobial resistance (AMR) of the use of growth enhancing drugs for purely commercial reasons and that Codex should move to a one health approach.
108. The JECFA Secretariat explained that the Health-based guidance values for zilpaterol were based on the most sensitive toxicological endpoint, which in this specific case is found for acute effects. Furthermore, the acute reference dose was informed by results obtained from human volunteers, which constitutes very strong evidence of the highest confidence. In addition, they explained the approach that JECFA had taken with regard to possible chronic effects and the appropriate inclusion of national/regional and temporal variation of eating habits either on basis of data (where available) or by extrapolation. With regards to mixed exposures, they

<sup>19</sup> (CX/CAC 22/45/10); CRD2 (JECFA Secretariat); CRD6 (LAC Region); CRD7 (Thailand); CRD8 (Mali); CRD9 (Philippines); CRD10 (LAC Region); CRD11 (BEUC); CRD12 (Egypt); CRD13 (El Salvador); CRD14 (Ghana); CRD15 (Senegal); CRD16 (NHF); CRD28 (Dominican Republic); CRD29 (Indonesia); CRD35 (Niger); CRD36 (Syrian Arab Republic); CRD39 (Liberia); CRD40 (African Union); CRD42 (Uganda); CRD44 (Ecuador); [Chairperson-letter-zilpaterol-20221119.pdf \(fao.org\)](#)

explained that for zilpaterol as for all other MRLs this was an area of science that continued to develop, yet as of today not such effects had been found to be relevant for zilpaterol. With regards to health effects that allegedly were not considered they appealed to Members to submit any indications or data that would demonstrate that a health effect was overlooked.

109. The Chairperson of the CCRVDF confirmed that for other edible offal there had been a lack of data, but this would not preclude the committee requesting new advice when data became available, and she also noted the ongoing work on extrapolation for edible offal tissues. It was further noted that Members could submit proposals for new work in response to CL2022/72-RVDF, which was open for comments until 10 January 2023.
110. CAC45 agreed the JECFA risk assessment provided a robust basis for the elaboration for MRLs for zilpaterol hydrochloride in cattle liver, kidney and muscle, noting reservations from:
- China, because in their view, beta agonist drugs can cause human dysfunction and there was a lack of data on residues in edible offal such as intestines and lungs;
  - The Russian Federation, because, in their view, the potential impact of chronic exposure especially on the nervous systems had not been taken into account; and
  - Thailand, because other edible offal tissues had not been taken into account in the exposure assessment.

***Risk management preferences related to setting MRLs for zilpaterol hydrochloride***

111. Members thanked the CVCs for their efforts in finding a consensual way forward on this complex issue.
112. Members reiterated positions that had been stated at CCRVDF25 and CAC44 and expressed a range of views on the way forward, including:
- adopting the proposed MRLs at Steps 5/8;
  - adopting the proposed MRLs at Step 5;
  - holding the MRLs at Step 4; and
  - discontinuing the work
113. Members and Observers intervening in favor of adoption the proposed MRLs at Steps 5 or 5/8 argued that:
- a. Codex should adopt food safety standards that were based on a robust international risk assessment and that had met all scientific and procedural requirements;
  - b. departing from the core principles of basing decisions on science would set a dangerous precedent and have a negative impact on the reputation of Codex;
  - c. setting the MRLs did not mean encouraging the use of zilpaterol;
  - d. no new data was available, the limits were safe and had been substantiated by use over time;
  - e. food products containing residues were traded internationally and many members who did not use zilpaterol had stated a need for MRLs to protect consumer health;
  - f. it was a longstanding Codex practice that members may express their disagreement by recording reservations and not accepting the MRLs into their national regulations;
  - g. a significant part of the cattle population had been treated with zilpaterol under veterinary surveillance and there were no reports on negative human health impact;
  - h. economically it had been shown that zilpaterol was useful, and therefore, MRLs were needed to protect consumers;
  - i. there had been problems with exports because of the absence of MRLs for zilpaterol;
  - j. having MRLs for zilpaterol was better than having none;
  - k. while animal welfare and sustainability were important matters, it was not the task of Codex to debate those or other One Health issues, or decide whether zilpaterol should be used by individual Member countries;
  - l. animal welfare was the mandate of WOA, which had established relevant standards and was updating them currently;
  - m. the adoption of MRLs for zilpaterol would not conflict with the One Health approach or the relevant policy and technical guidance of the Quadripartite agencies on this issue;

- n. by using zilpaterol more high nutritional animal food products could be produced that could be consumed safely;
- o. meat importing countries with limited resources depended on the unbiased scientific research and guidance of JECFA and relied on Codex MRLs supported by independent expert JECFA risk assessments; and
- p. many countries that did not permit the use of zilpaterol respected the science-based risk assessment by JECFA and, as such, were not against the adoption of the science-based MRLs, noting that this position was not to be interpreted as the use of the compound in their country.

114. Members and Observers intervening in favour of not advancing the MRLs argued that:

- a. the development of MRLs for growth promoters was the most long-standing and divisive topic in Codex and that, in line with their opposition to the development of Codex MRLs for growth promoters in general, they opposed to the development of MRLs for zilpaterol from the start of the process;
  - b. animal health and welfare should be taken into account in the implementation of the One Health approach;
  - c. food systems and One Health were included in relevant FAO and WHO strategies and the work of the quadripartite alliance of FAO, WHO, WOA and UNEP;
  - d. there was still a possibility for consensus if the application of SoP4 was clarified;
  - e. the WHO DG had stressed the urgent need to transform the world's food systems based on a One Health approach protecting the health of humans, animals and the planet;
  - f. the FAO DG had highlighted the important role of Codex standards for better nutrition and better environment;
  - g. the UN Secretary General had highlighted the need for sustainable production methods and nature-based solutions and sustainable food systems;
  - h. Codex needed to adequately respond to evolving consumer expectations regarding holistic approaches to food systems and the use growth promoters would go against this.
  - i. it was an open question whether consumer concerns should be considered along with other legitimate factors;
  - j. the strength of Codex was to rely both on scientific assessment and consensus, and in the absence of one of these elements Codex work should not be advanced;
  - k. the use of zilpaterol was limited and no real trade concerns had been expressed so holding the MRLs at Step 4 was a good compromise;
  - l. a survey showed that European consumers rejected the consumption of meat produced using growth promoters because of animal health, welfare, and human health concerns;
  - m. if an MRL was adopted, consumers had a right to know whether the meat they bought was produced using zilpaterol; and
  - n. veterinary medicines should be used for treatment only and use for growth promotion was difficult to understand from an ethical point of view. In addition, this purpose of use was prohibited in certain national legislations.
115. One delegation noting the work of CCEXEC on the SoP, in particular SoP4, expressed a strong preference for a negotiated outcome and explained that they were ready to record their sustained opposition to these MRLs through abstention from acceptance in accordance with SoP4. Ideally, to ensure transparency they requested this to be noted in the standard. They urged other Members that wished to maintain their opposition to these MRLs to consider abstention from acceptance and avoid a vote.
116. One delegation requested that should the MRLs be adopted by a vote, that a note be included in the standard reflecting Members' abstention from acceptance or opposition to the MRLs highlighting that this would be in line with the PM, section IV on Risk analysis, Working Principles for Risk Analysis for Application in the Framework of the Codex Alimentarius, paragraph 31, which stated that "Codex decisions and recommendations on risk management should be documented, and where appropriate clearly identified in individual Codex standards and related texts so as to facilitate a wider understanding of the risk management process by all interested parties".
117. The JECFA Secretariat stressed that JECFA was mandated by Codex to provide food safety risk assessment based on available scientific data and internationally proven methodology. Establishing safe limits did not mean

advocating for the use of zilpaterol. During risk management many other factors might be considered at the national level e.g., animal welfare, animal health, AMR, occupational disease, environmental protection etc. and countries may in this case rely on evaluations by other UN organizations that were more competent to address part of those factors.

118. The Representative of WHO, noted that JECFA was assigned evaluation of a veterinary drug by CCRVDF and subsequently, an evaluation was carried out to assess consumer safety of eating food containing residues of the drug based on available scientific data. WHO supported the evaluation and its outcome, but by this, WHO was not advocating use of the drug. WHO recognized, he said, that there were many elements to consider in risk management decisions (of which consumer safety was one) at country or regional level, but in his view, not in Codex. Those elements comprised occupational health, animal health and welfare, environmental concerns and food security.

### **Decision-making**

#### ***Adoption at Step 5***

119. The Chairperson noted that there were different opinions between Members and proposed to conclude that the MRLs be adopted at Step 5.
120. This Chairpersons' proposal was objected to by the EU and Thailand, and it was thus decided that CAC45 should vote on adopting the MRLs at Step 5, which would be determined by a simple majority.
121. The FAO Election Officer recalled the framework for voting in Codex which was regulated by Rule 8 of the Rules of Procedure of the Codex Alimentarius Commission and complemented by Rule 12 of the General Rules of FAO. He clarified that the default vote was a vote by show of hands, which would be conducted through the electronic voting system and would mean a vote without recording names and the report of the session would therefore not record the votes of each Member.
122. Before proceeding with the vote, it was noted that there were 158 Members registered and the electronic voting system confirmed that 144 Members were present meaning that a quorum (minimum 80) was established. Furthermore, the number of EU Member States present was established (27) as the EU would vote on behalf of the EU Member States according to CRD1.

#### *Conclusion*

123. The vote had the following result:

<b>Votes cast:</b>	135
<b>Majority required:</b>	68
<b>Votes in favour:</b>	87
<b>Votes against:</b>	48
<b>Abstaining:</b>	7
<b>Result:</b>	Proposal adopted.

124. Therefore, the MRLs for zilpaterol hydrochloride for cattle muscle, liver and kidney were adopted at Step 5.
125. The results of the vote are contained in Appendix VIII Part A.

#### ***Amendment of the Codex Procedure to allow for omission of Steps 6 and 7***

126. The Chairperson recalled that with the adoption at Step 5, the draft MRLs for zilpaterol hydrochloride would be moved to Step 6. However, the Commission could also decide to omit Steps 6 and 7 and proceed to adopt it at Step 8 which in line with paragraph 6 of the *Procedures for the Elaboration of Codex standards and related texts* would require a recommendation by the relevant Codex committee in this case CCRVDF. CCRVDF did not make such a recommendation for the MRLs for zilpaterol, thus the Commission would need to agree on an exceptional process for CAC45, whereby the MRLs could be immediately advanced to Step 8 during this session. He recalled that he had given CAC45 the needed 24h notice on this possibility.
127. The Chairperson stated that in his view consideration of such an exceptional process was warranted. In case of a vote on this procedural proposal, a two-thirds majority would be needed to accept the proposal. The Chairperson underlined that if the outcome of the vote on the procedural proposal was negative, the MRLs would remain at Step 5 and be automatically advanced to Step 6. If the procedural proposal was adopted, the Chairperson would then propose adoption of the proposed MRLs at Step 8. In the case of a vote on the latter, a simple majority would be needed.

128. The Chairperson then proposed to replace on an exceptional basis paragraph 6 of the procedures for the elaboration of Codex standards and related texts with an ad hoc process allowing the advancement of MRLs for zilpaterol hydrochloride at Step 8.
129. This proposal was objected to by the EU, and it was thus decided that there should be a vote on whether to amend the procedures on this occasion, which would be determined by a two-thirds majority.
130. The FAO Election Officer recalled the rules and clarified that the default for vote requiring a two-thirds majority was a roll-call vote, which would be conducted through the electronic voting system. The report would thus record how each Member had voted.
131. Before proceeding with the vote, it was noted that there were 158 Members registered and the electronic voting system confirmed that 136 Members were present meaning that quorum (minimum 80) was established. Furthermore, the number of EU Member States present was established (26) as the EU would vote on behalf of the EU Member States according to CRD1.

#### *Conclusion*

132. The vote had the following result:

<b>Votes cast:</b>	130
<b>Majority required:</b>	87
<b>Votes in favour:</b>	84
<b>Votes against:</b>	46
<b>Abstaining:</b>	9
<b>Result:</b>	Proposal rejected.

133. The proposal on whether to replace on an exceptional basis paragraph 6 of the procedures for the elaboration of Codex standards and related texts with an ad hoc process allowing the advancement of MRLs for zilpaterol hydrochloride at Step 8 was rejected.
134. The results of the roll-call vote are contained in Appendix VIII Part B.

#### **Next steps**

135. The Chairperson of CCRVDF noted that the Commission had adopted the MRLs at Step 5 and that there was consensus during CAC45 that the scientific risk assessment was sound and robust and that the technical aspects of the MRLs were complete. She underlined that CCRVDF, as a technical committee, did not have further work to do on these MRLs at this time and requested that the MRLs would remain with the Commission at Step 6. However, she added that CCRVDF would welcome any new work proposals for the priority list for CCRVDF26 and that the deadline was 10 January 2023.
136. While some expressed the view that the work on MRLs for zilpaterol hydrochloride should go back to CCRVDF, there was general consensus to leave the continuation of this work with the Commission. In this context CAC45 noted that Members could propose new work to CCRVDF such as on developing MRLs for zilpaterol hydrochloride for other edible offal tissues.
137. One Member emphasized that it was not a matter of having additional MRLs but rather to have a complete exposure assessment for the risk assessment on zilpaterol hydrochloride to ensure consumer safety. This should also consider withdrawal periods and residues in other tissues. This Member furthermore suggested that CAC46 should implement the guidance on the application of the SoP when referring to the MRLs for zilpaterol hydrochloride.
138. The JECFA Secretariat reassured that the risk assessment had used all available data, including from all countries with food consumption data or food availability studies that are hosted by FAO. Thus, data from all countries were incorporated in the exposure analysis and subsequently reflected in the health-based guidance values. This means that sufficiently inclusive and sufficiently diverse exposure data had been incorporated to reflect the dietary scenarios that can be found in certain countries, but not in other countries. The JECFA Secretariat also reminded that Members could use the concern form to express concerns they may have.
139. The Chairperson noted that with the adoption of the MRLs at Step 5, they would automatically be circulated for comments at Step 6. Any comments would be discussed at Step 7 by CAC46.
140. Members proposed that CAC45 should commit CAC46 to adopt the MRLs at Step 8 if there was no new data.

141. Other Members emphasized that CAC45 could not anticipate nor decide on the course of action at CAC46 but should strictly adhere to the rules of procedure.
142. The Codex Secretariat confirmed that while CAC45 could express a preference for how CAC46 should act, it was not possible to bind CAC46 to this.
143. The importance of further consultations by the CVCs with the Members in advance of CAC46 was highlighted.
144. Some Members stated that it appeared from interventions that not many countries used or allowed zilpaterol, so the issue should not be a priority for CAC. One Member noted that there were no limitations in the PM on the number of countries required to raise a food safety issue in Codex.
145. One Observer noted that while many countries did not want to use zilpaterol, they believed the MRL to be a safeguard. She urged countries to limit its promotion and inform the public to prevent market growth.

### **Conclusion**

146. CAC45:
  - i. adopted the MRLs for zilpaterol hydrochloride in cattle liver, kidney and muscle at Step 5 (by vote);
  - ii. agreed to retain the further elaboration of MRLs for zilpaterol hydrochloride in cattle liver, kidney and muscle, in the Commission noting the reservation of China;
  - iii. advised CAC46 to note the discussions at CAC45; and
  - iv. welcomed the prospect of further informal consultation by the CVCs prior to CAC46 to facilitate consensus.
147. Following the conclusion of the item, the Chairperson invited Members to make final statements.
148. The statements made are collated in Appendix IX.

### **FAO/WHO REGIONAL COORDINATING COMMITTEES (Agenda Item 4.9)<sup>20</sup>**

#### **FAO/WHO Codex Coordinating Committee for Africa (CAFRICA)**

##### Adoption

149. CAC45 adopted the:
  - i. *Regional Standard for dried meat* at Step 8 noting that the standard would be published after endorsement of the of relevant provisions for additives and labelling by CCFA and CCFL, respectively;
  - ii. *Guidelines for Developing Harmonized Food Safety Legislation for the CAFRICA Region* at Steps 5/8; and
  - iii. revised labelling provisions for non-retail containers in the *Regional standard for unrefined shea butter* (CXS 325R-2017), the *Regional standard for fermented cooked cassava based products* (CXS 334R-2020) and the *Regional standard for fresh leaves of Gnetum spp.* (CXS 335R-2020).
150. A Member from outside the African region expressed support for the adoption of the *Regional Standard for dried meat* and highlighted the need to convert the regional standard into a worldwide standard as previously highlighted at CAC43.
151. The Codex Secretariat explained that a possible conversion to a worldwide standard could be discussed after the adoption of the standard, and that any interested Member could prepare and submit a project document to CCEXEC.
152. The Coordinator for Africa observed that the under the African Continental Free Trade Area (AfCTA), Codex Standards had been identified as having a role in enhancing the common market and that the guidelines would be central in the development of potential tools for national policy development, advocacy and modernization of food control systems. The adopted standards and guidelines were therefore timely in marking the 50 years of CAFRICA.

#### **FAO/WHO Codex Coordinating Committee for Europe**

##### Adoption

153. CAC45 adopted the amended text for section 8.2, labeling of non-retail containers, in the *Regional Standard for Chanterelles* (CXS 40R-1981).

---

<sup>20</sup> CX/CAC 22/45/11; CX/CAC 22/45/11 Add.1(Botswana, Egypt, Eritrea, Kenya, Mauritius Morocco and Iraq); CRD26 (Ghana, Mali and Senegal); CRD30 (Mauritius); CRD35 (Niger); CRD39 (Liberia); CRD42 (Uganda)

**EDITORIAL AMENDMENTS TO CODEX TEXTS PROPOSED BY THE CODEX SECRETARIAT (Agenda Item 5)<sup>21</sup>**

154. The Codex Secretariat introduced the item recalling that CAC44, when adopting the *General Standard for the Labelling of Non-retail Containers of Foods* (CXS 346-2021) and the consequential amendments to the section on Labelling in the *Format for Codex Commodity Standards* in the PM, had requested Commodity Committees, and in case of inactive committees the Codex Secretariat, to review the labelling provisions for non-retail containers in existing and draft standards in light of this.
155. The Codex Secretariat noted that it had in collaboration with relevant Host Secretariats had reviewed the labelling provisions for non-retail containers in existing and draft standards that were under the purview of inactive committees and that recommendations for amendments were contained in the working document. The Secretariat noted further that the standards under the adjourned sine die Codex Committee on Cereals, Pulses and Legumes (CCCPL) had not been included in the document as they were still under consideration.

**Conclusion**

156. CAC45 adopted the proposed editorial amendments to Codex texts under the purview of inactive committees noting that the CCCPL standards were still under consideration.

**OTHER MATTERS RELATED TO CODEX SUBSIDIARY BODIES<sup>22</sup>****Proposal for revision of the *Standard for Kimchi***

157. The Codex Secretariat recalled that following a proposal to revise the *Standard for Kimchi* (CXS 223-2001) by the Republic of Korea, a CL had been distributed in all languages requesting the views of Members and Observers with two extensions of the deadline for comments. Five Members had provided comments in response to the CL.
158. CAC45 noted the recommendation from CCEXEC83 not to approve the new work proposal, but rather request the Republic of Korea to continue collecting data and engage with Members with the aim of revising the proposal addressing the concerns raised.
159. The Republic of Korea highlighted their view that the amendment was needed and confirmed their readiness to revise the proposal.
160. While there was some support for the proposal, there was also a request to expand the scope. One Member, supporting the recommendation of CCEXEC83, emphasized that more information and input on food safety or quality concerns should be provided by other producing- and consuming countries.
161. It was clarified that should the proposal be approved, it would be placed in a queue together with the previous proposals on developing a standard on cashew kernels and on dehydrated sweet potato, and CCEXEC would consider whether to propose to CAC a reactivation of CCPFV.

**Conclusion**

162. CAC45:
- i. did not approve the proposal for revision of the *Standard for Kimchi* at this time; and
  - ii. noted that CCPFV could be reactivated should there be sufficient workload and interest.

**Proposal for an amendment of the *Standard for fruit juices and nectars* (CXS 247-2005)**

163. The Codex Secretariat informed CAC45 that Brazil had submitted a proposal for an amendment to the *General Standard for Fruit Juices and Nectars* (CXS 247-2005) which had been presented to CCEXEC83. CCEXEC83 had noted that the Codex Secretariat would issue a CL requesting the views of Members and Observers on the proposed amendment, which would feed into the critical review by CCEXEC84 and its recommendation to CAC46.
164. Several Members and one Observer expressed support for the proposal.
165. In response to question from a Member on the distinction between an amendment and a revision, the Codex Secretariat confirmed that the PM was not fully clear on this and that the issue would be further addressed by CCGP33 as indicated in CX/CAC 22/45/2.

---

<sup>21</sup> CX/CAC 22/45/12 Rev.1; CRD31 (Dominican Republic)

<sup>22</sup> CX/CAC 22/45/13

*Conclusion*

166. CAC45 noted that the Codex Secretariat would issue a CL requesting comments from Members and Observers on the proposal for an amendment of the *General Standard for Fruit Juices and Nectars* (CXS 247-2005).

**Proposal for revision of the *Standard for Milkfat Products* (CXS 280-1973)**

167. The Codex Secretariat recalled that at CCFO27, Iran had introduced a discussion paper on the need to align the MLs for copper and iron in ghee (butter oil) in the *Standard for Milkfat Products* (CXS 280-1973) with those in the *Standard for Named Vegetable Oils* (CXS 210-1999). CCFO27 had agreed to forward a request to CCEXEC for consideration and advice on which mechanisms could be used to consider the proposal.
168. As recommended by CCEXEC82, a CL had been issued seeking the views of Codex Members and Observers.
169. Considering the feedback to the CL, CCEXEC had recommended that CAC45 not approve the proposal noting that any Member could submit a revised new work proposal, taking into account the comments made in response to the CL.
170. Two Members supported the proposal noting that while copper and iron were not considered contaminants for milk, these MLs were used, in some countries, for purposes of export and import control of milk, and that their national data seemed to deviate from the Codex standard. It was further proposed that an EWG be established under the purview of CCFO to investigate the issue further.
171. Two other Members and one Observer supported the recommendation of CCEXEC83, not to approve the new work. They emphasised that these levels cited were not strict limits but had been included for guidance only. Therefore, the proposal was not justified and changing the figures could lead to potential disharmony in the standard.

*Conclusion*

172. CAC45:
- i. agreed not to approve the proposal for revision of the *Standard for Milkfat Products* (CXS 280-1973), and
  - ii. noted that it was open to Members to submit a revised new work proposal.

**New work proposal for the development of principles and guidelines on the use of remote audit and verification in regulatory frameworks**

173. The Codex Secretariat recalled that the 25th Session of the Codex Committee on Food Import and Export Inspection and Certification Systems (CCFICS25) (2021) had agreed to establish an EWG to develop a discussion paper on “Use of remote audit and verification in regulatory frameworks” with the possibility of also developing a new project document. As CCFICS26 would not meet until 2023, a proactive process for submitting the proposal for new work in line with Codex procedures was pursued. The discussion paper and project document for the new work proposal was circulated via a CL for comments and a revised work proposal developed.
174. CAC45 noted that CCEXEC83 had recommended that CAC45 approve the new work proposal.
175. The proposer (Australia), in response to a question from a Member on the scope of work (whether remote inspection would be included) and use of terminologies (remote audit versus verification), informed CAC45 that the work would include a clarification of issues around nomenclature and that the final principles/guidelines would be outcome-based taking into account the lessons learnt during the COVID-19 pandemic.
176. One Member while supporting the proposal, highlighted the importance of intergovernmental organizations providing support to countries to raise awareness and help build capacities in the technologies related to remote audit and verification in order to ensure that any Codex texts developed in this area were useful and implementable by all Members.

*Conclusion*

177. CAC45:
- i. approved the new work proposal on the development of principles and guidelines on the use of remote audit and verification in regulatory frameworks by CCFICS;
  - ii. established an EWG under CCFICS, chaired by Australia and co-chaired by Canada and Singapore and working in English, French and Spanish, to prepare at Step 2 the Proposed draft principles and guidelines on the use of remote audit and verification in regulatory frameworks; and

- iii. requested that the report of the EWG including the proposed draft principles and guidelines be made available to the Codex Secretariat and circulated for comments at Step 3 at least three months before CCFICS26, which would discuss it at Step 4.

## **STRATEGIC PLAN 2020-2025: IMPLEMENTATION REPORT 2020-2021 (Agenda Item 7)<sup>23</sup>**

### **Introduction**

178. The Codex Secretariat presented the report on the implementation of the Codex Strategic Plan 2020-2025 (SP) according to its revised monitoring framework, as approved by CCEXEC81. The report focused on achievements in the 2020-21 biennium, which was atypical because of the COVID-19 pandemic. Despite this, the implementation of the SP progressed satisfactorily and performance under most indicators scored well. Highlights from this monitoring exercise included:
  - the increased participation of developing countries thanks to virtual meeting formats and increased efforts on informal pre-meeting preparatory events;
  - the flexibility and actions of the Codex Secretariat together with the CVCs and Codex Membership to adapt quickly to the new environment, finding innovative, creative and agile ways to progress and minimize disruption to Codex work. This was recognized by Members who overall expressed satisfaction for the organization and implementation of Codex meetings during the biennium; and
  - the continued provision of FAO and WHO scientific advice, critical to Codex standard setting work, despite facing similar challenges as for Codex meetings.
179. The Codex Secretariat reported on the ongoing challenges to monitoring the implementation of the SP, including:
  - data collection for some indicators that relied more on qualitative information, and the difficulties in comparing the results for this type of indicator across biennia;
  - the ongoing changes and uncertainties Codex was operating in that required constant adaptation; and
  - the number of indicators, some of which overlapped.
180. Within this context, it was proposed that CAC consider requesting the Secretariat to reduce the number of indicators to those where the most useful information could be collected.
181. The Secretariat also presented the preliminary report on the pilot survey on the use and impact of Codex texts, which were in general encouraging with Members indicating good familiarity with the selected Codex texts and considering them as extremely or mostly useful. Primary barriers to the use of Codex texts included lack of basic national food safety laws, challenges to catch up with changes in Codex texts, and language issues.
182. The Chairperson highlighted the conclusions of CCEXEC82 and CCEXEC83, and in particular the conclusion of CCEXEC83 that there would be benefit in undertaking the elaboration of the next SP with the Codex membership in parallel with the development of the monitoring framework led by the Codex Secretariat.

### **Discussion**

183. Members expressed appreciation for the comprehensive report. There was agreement on the need to review the monitoring framework of the SP with the aim of providing accurate and complete information, and with the proposal of the Codex Secretariat to reduce the number of indicators, while ensuring that there be at least one indicator per result and that the one related to timely distribution of documents should remain. It was also suggested that the prioritization and work management mechanisms of the different committees be collated in one place for ease of access and understanding. The Codex Secretariat noted that this could be undertaken as part of guidance requested by CCEXEC on development of new work proposals.
184. Members particularly commended the Codex Secretariat for the efforts undertaken under objective 3.1 (raise the awareness of Codex standards) on sustained communication activities. Members also commended the Secretariat for providing preliminary results of the pilot survey on the use and impact of Codex texts in a timely manner. They looked forward to a more in-depth analysis of the results and how this could inform the next Codex SP.
185. Several Members raised the issue of timely distribution of documents and the importance of publication of documents two months in advance of committee meetings to facilitate review and preparation by Member delegations.
186. The Codex Secretariat acknowledged the importance of improvements in this area and noted that, while reasons for delays were multifold and often outside the control of the Secretariat (e.g. late arrival of EWG

---

<sup>23</sup> CX/CAC 22/45/14 & Add. 1

reports), they were in many areas directly related to the workload of the Secretariat and it would be difficult to improve the situation without reducing the output requested by Members. The Codex Secretariat encouraged input on how to address the issue.

### **Conclusion**

187. CAC45:

- i. welcomed the comprehensive report on the implementation of the SP and noted the highlights presented by the Codex Secretariat;
- ii. commended the Codex Secretariat on its efforts to raise awareness of Codex standards through the continued communication activities and the resulting increased visibility, even in challenging circumstances such as the COVID-19 pandemic;
- iii. commended the Codex Secretariat for the preliminary report and analysis of the survey on the use and impact of Codex texts, recognizing its potential as an important tool for Codex;
- iv. requested that further attention be given to the timely distribution of working documents in all languages while recognizing the resource constraints on the Codex Secretariat;
- v. noted the continuing evolution of the SP monitoring framework and requested the Codex Secretariat to further review the SP monitoring framework with the intent to reduce the number of indicators to those where the most useful information was collected, noting in this respect that the Codex Secretariat would propose a revised framework for review at CCEXEC84; and
- vi. noted that there would be benefit in undertaking the elaboration of the next SP with the membership in parallel with the development of the monitoring framework led by the Codex Secretariat.

### **CODEX BUDGETARY AND FINANCIAL MATTERS (Agenda Item 8)<sup>24</sup>**

#### **Introduction**

188. The Codex Secretariat introduced the item highlighting that the COVID-19 pandemic had resulted in dramatic changes in how Codex work was implemented, which had affected most of the 2020-21 biennium. The Secretariat had thus adopted a flexible approach and had managed to deliver the Codex work plan with a 98 percent delivery.
189. For the 2022-23 biennium, as of September 2022, 44 percent of the budget had been spent. Expenditures in 2022 were progressing according to the Codex work plan. Estimated expenditures for 2023 were planned according to the Codex work plan and full delivery was expected by the end of the biennium.
190. The proposed budget for 2024-25 biennium would be in line with the objectives of the SP. Highlighting some of the underlying assumptions to the proposal, it was noted that uncertainties remained in terms of the format of Codex meetings, but it was assumed that physical meetings will have resumed and that it will remain necessary to make provisions for remote participation in meetings of CCEXEC and CAC.
191. Looking at the Codex budget from a more overarching perspective, the Codex Secretariat noted that Codex had operated in a zero-growth budget environment for several biennia. Considering that overall costs were increasing for salaries, contracts, services, etc. and the impact this had on the costs for organizing committees, in particular hybrid sessions of the Commission and potentially supporting hybrid sessions of committees, it was becoming increasingly difficult to run Codex in line with Members' expectations with the available resources. Members were asked to consider requesting FAO and WHO to increase the Codex budget. It was noted that Codex was also seeking extra-budgetary contributions to support its work under Goal 3 and 5 of the SP.
192. The Chairperson highlighted the conclusions made by CCEXEC83 on this item, including the need for a flexible approach in delivering the Codex work plan and the request to advocate for additional funding to the Codex programme.

#### **Discussion**

193. Members welcomed the report and the efforts made by the Secretariat during the COVID-19 pandemic, and supported the recommendations made by CCEXEC83.

---

<sup>24</sup> CX/CAC 22/45/15

**Conclusion**

194. CAC45:
- i. noted the final report for the biennium 2020-2021, progress in line with budgeted expenditure in the biennium 2022-2023; and the proposed budget for 2024-2025;
  - ii. noted the continued need for a flexible approach to the redistribution of resources, within the total financial limit, to best support delivery of the Codex work plan;
  - iii. noted the increasing difficulty in delivering the Codex work plan in a zero-growth budget environment and that, accordingly, Codex was seeking extra-budgetary resources; and
  - iv. urged Members to advocate with their government representatives to FAO and WHO for additional funding for the Codex programme.

**MATTERS ARISING FROM FAO AND WHO (Agenda Item 9)<sup>25</sup>**

195. The Representatives of FAO and WHO highlighted their joint work, including capacity building and scientific advice activities and budget matters. They also provided update on the CTF to CAC45 for consideration and possible action.
196. The Representative of WHO referred to the work of WHO on nutrition and healthy diets, highlighting four areas of work including the WHO guideline on RUTF, the WHO Action Plan to reduce the harmful use of alcohol which highlighted the importance of labelling requirements for alcoholic beverages, elimination of industrially produced *trans*-fatty acids (TFA) by 2023, and global efforts in accelerating actions to achieve the global target of reducing population sodium intake.
197. The Representative of WHO further highlighted that CCEXEC83<sup>26</sup> had requested Codex committees to give due regard to ongoing global efforts to reduce non-communicable disease (NCD) risk factors such as sodium intake, when prioritising and undertaking work on new standards or reviewing existing standards and guidelines.

**Discussion**

198. CAC45 welcomed the reports from FAO and WHO, commended their work, supported the conclusions of CCEXEC83, and encouraged both organisations to sustain their efforts, particularly regarding the provision of scientific advice to support Codex work and their efforts to address new and emerging food safety and nutrition issues.
199. Members appreciated the collaboration of FAO and WHO in implementing both the FAO Food Safety Priorities and the WHO Global Strategy for Food Safety, including through the food safety element of the Quadripartite One Health Joint Plan of Action. Members further requested that this be done respecting the mandates of each organization.
200. Members recognized the benefits of capacity building and awareness raising events, including those delivered virtually. They supported continuing using virtual modalities as part of a blended approach to capacity development, tailored according to the context, and building engagement.
201. The Representatives of FAO and WHO appreciated the strong interest of Members in the work of FAO and WHO and highlighted that the work of the two organizations would not be possible without the active and continuing support of Members. For example, the provision of independent scientific advice provided by FAO and WHO that was central to the work of the CAC was only possible because Members were willing to fund the operational cost of the scientific committees and were willing to promote and facilitate the participation of their experts. The representatives of FAO and WHO further highlighted their appreciation that experts were willing to support and make themselves available to contribute to the scientific advice work of FAO and WHO.

**Codex Trust Fund (CTF)**

202. CAC45 welcomed the information and analysis provided by the CTF Secretariat.
203. Some Members pointed out that the COVID-19 pandemic had a profound impact on how they carried out Codex related work at national and regional level, and requested that the CTF change the criteria for eligibility

<sup>25</sup> CX/CAC 22/45/16; CAC45/INF1; CAC45/INF2; CAC45/INF3; CRD4; CRD27 (Mali)

<sup>26</sup> REP22/EXEC2, paragraph 154

to further facilitate the application process and consequently extend the number of Member countries that could benefit from CTF support.

204. CTF beneficiaries appreciated the support from CTF and donor countries and requested the CTF Secretariat to clarify whether it was possible for a beneficiary to apply to CTF in future rounds and what the relevant follow up steps would be.
205. An Observer emphasized the value of CTF and stressed the importance for CTF to only accept public funds for reasons of transparency.
206. The Representative of WHO welcomed the positive feedback on the CTF2 projects and acknowledged the high expectations for capacity building through CTF and other food safety work streams such as the assessment of national food control systems. The WHO food safety strategy was an attempt to bring these work streams together.
207. The CTF Secretariat welcomed the high interest expressed by Members and noted the requests regarding the eligibility criteria, the need for possible extensions, and the questions on other forms of support such as coaching/mentorship for eligible countries to prepare and submit robust applications. He pointed out that the operations and support of CTF remained bound to the CTF2 project document and that requests for changes would be taken into consideration in the CTF2 mid-term evaluation. He encouraged Members to contact the CTF Secretariat with any specific concerns and reassured them that the CTF Secretariat remained committed to continuously improving the programme. He informed about regional trainings planned for eligible countries in 2023. Finally, the CTF Secretariat encouraged donor countries to increase the contributions to the CTF to match the increasing requests for assistance.
208. The Representative of FAO pointed out that the focus of the CTF was to enable countries to better participate in Codex and encouraged Members to contact FAO and WHO directly for other capacity building requests, for instance on the application of the food control systems assessment tool.

### Conclusion

209. CAC45:
  - i. supported the conclusions of CCEXEC83 and thanked FAO and WHO for their continued support to Codex Alimentarius, its committees, and Members, and in particular its continuing work on:
    - a. mitigation of foodborne AMR;
    - b. risk assessment related to foods including edible seaweed, noting the long history of its consumption in some countries;
    - c. potential risks including those posed by microplastics;
    - d. review and implementation of guidance on traditional food markets; and
    - e. issues related to nutrition, including sodium reduction and elimination of *trans*-fatty acids.
  - ii. encouraged FAO and WHO to continue their collaboration in implementation of the FAO Food Safety Priorities and WHO Global Strategy for Food Safety, including through the food safety element of the Quadripartite One Health Joint Plan of Action, which should respect the mandates of and draw on the expertise of each organization;
  - iii. recognized the benefits to Codex Members of capacity building and awareness raising events, including those delivered virtually; supported the continued use of virtual modalities as part of a blended approach to capacity development, tailored according to the specific context and objective; welcomed the reports from CTF beneficiaries; recognized the important role of CTF in strengthening developing countries' effective participation in Codex; and encouraged all eligible countries to apply to the CTF to benefit from its support; noted the need to develop approaches that sustain the benefits of CTF projects beyond their duration; and
  - iv. noted the concerns of Members regarding the eligibility criteria for CTF projects.

### APPOINTMENT OF COORDINATORS (Agenda Item 10)<sup>27</sup>

210. The Codex Secretariat informed CAC45 that four FAO/WHO Coordinating Committees (RCCs) had met since CAC43, namely, the FAO/WHO Coordinating Committee for Europe (CCEURO) (May 2022), the FAO/WHO Coordinating Committee for Africa (CCAFRICA) (September 2022), the FAO/WHO Coordinating Committee for Asia (CCASIA) (October 2022) and the FAO/WHO Coordinating Committee for Latin America and the Caribbean (CCLAC) (October 2022). The Codex Secretariat further informed CAC45 that CCAFRICA, CCASIA

---

<sup>27</sup> CX/CAC 22/45/17

and CCLAC had nominated the current Coordinators, namely Uganda, China and Ecuador, respectively, for re-appointment.

211. The Codex Secretariat also informed CAC45 that the next Sessions of the FAO/WHO Coordinating Committees for North America and South-West Pacific (CCNASWP) and the Near East (CCNE) had been scheduled for 2023.
212. With regards to Europe, the Codex Secretariat noted that CCEURO recommended the appointment of Germany as the next Coordinator recalling that since Germany was currently serving as Member for Europe elected on a geographic basis to CCEXEC, it could not also serve as Coordinator according to Rule V.1 of the PM.
213. The Delegation of Germany informed CAC45 that following the appointment as Coordinator, they would step down from the position of Member for Europe.
214. The Codex Secretariat noted that the appointment of Germany as Coordinator for Europe would leave a vacancy in CCEXEC for the position of Member for Europe elected on a geographic basis. The Commission would therefore need to be invited to nominate and elect a new Member for Europe to complete the current term as Germany had only served half of their second term.

### **Conclusion**

215. In accordance with Rule IV.2 of the Commission's Rule of Procedure, and on the basis of the nominations made by the FAO/WHO Coordinating Committees, the following Members of the Commission were appointed/reappointed as Coordinators to hold office from the end of CAC45 until the end of the first regular session of the Commission following the next session of the relevant RCC (in accordance with current plans this would be until the end of CAC47 (2024)):
- CCAFRICA: Uganda (re-appointed)
  - CCASIA: China (re-appointed)
  - CCEURO: Germany (appointed)
  - CCLAC: Ecuador (re-appointed)
216. The Chairperson thanked Uganda, China and Ecuador for their successful and productive work despite the challenges faced in taking on the Coordinator role during the COVID-19 pandemic and wished them success for their second term. He also welcomed Germany as new Coordinator for Europe and wished them success. The Chairperson also thanked Kazakhstan for all their work during their two terms as Coordinator for Europe and for ensuring the views of all countries in the region were brought to the attention of CCEXEC and CAC.

### **ELECTION OF THE MEMBER OF THE EXECUTIVE COMMITTEE FROM EUROPE**

217. Following the appointment of Germany as Coordinator for Europe and consequently stepping down from its role as Member for Europe elected on a geographic basis, CAC45 elected Finland as the Member for Europe elected on a geographical basis to complete the current term (expected until the end of CAC46).

### **ELECTION OF THE CHAIRPERSON AND VICE-CHAIRPERSONS (Agenda Item 11)<sup>28</sup>**

218. CAC45 elected the following persons to hold office from the end of its present Session to the end of the next regular Session of the Commission (CAC46):

<b>Chairperson:</b>	Mr Steve Wearne (United Kingdom)
<b>Vice-Chairpersons:</b>	Mr Allan Azegele (Kenya)
	Mr Raj Rajasekar (New Zealand)
	Mr Diego Varela (Chile)

### **DESIGNATION OF COUNTRIES RESPONSIBLE FOR APPOINTING THE CHAIRPERSONS OF CODEX SUBSIDIARY BODIES (Agenda Item 12)<sup>29</sup>**

219. The Chairperson expressed appreciation to the Member Countries responsible for appointing Chairpersons of Codex Subsidiary bodies recalling their relentless efforts to ensure the functioning of Codex and Codex meetings in the virtual environment.

<sup>28</sup> CX/CAC 22/45/18; CRD31 (Dominican Republic)

<sup>29</sup> CX/CAC 22/45/19

### Conclusion

220. CAC45 confirmed the designation of countries responsible for appointing the Chairpersons of Codex subsidiary bodies as outlined in CX/CAC 22/45/19.

### 60th Anniversary of the Codex Alimentarius Commission: 1963-2023 (Agenda Item 13)<sup>30</sup>

221. The Codex Secretariat presented the progress on preparations for the 60th Anniversary of the Codex Alimentarius Commission (Codex@60) since CAC44, noting that FAO senior management had recommended a year of celebration rather than limiting it to a specific day. The Secretariat reiterated the need for Members and Observers to take a proactive approach to organizing events, including through the Codex regional groupings, and sought updates and inputs from them on their plans to mark the occasion.
222. The discussions highlighted the commitment and enthusiasm of Members to celebrate Codex@60 in multiple ways, at regional, national and international levels, using different modalities, ranging from formal to more informal events. Delegations outlined ideas involving all actors throughout the food chain and plans to connect with youth, academia, industry, agriculture, consumers, media and government including at ministerial level. With World Food Safety Day in 2023 dedicated to the theme of standards, opportunities to link events to this UN celebration were noted and encouraged.
223. Celebrating those Members and experts who had dedicated much of their time and careers to steering the work of Codex was another idea that received support.
224. Members and Observers gave several examples of topics that could be the focus for Codex@60 such as strengthening understanding of risk management; food safety control; health and food markets; compliance with food safety policies and regulations; a reflection on the success of Codex standards; and food safety for human health.
225. The Secretariat responded that countries were welcome and encouraged to place emphasis for Codex@60 on local realities and national food safety priorities.
226. Activities planned from the Secretariat, described in CX/CAC 22/45/20, were expanded on, including the desire to engage with Members to develop case studies on the implementation of Codex texts, and their adaptation to national scenarios, as well as ongoing work on the revised, richer layout of Codex publications and the forthcoming website upgrades.
227. One observer appealed to Members to be frank in their assessments of Codex achievements, acknowledging not only its successes but also its problems and risks.

### Conclusion

228. CAC45:
- i. noted the information provided by the Secretariat and the planned celebrations under development by the Secretariat and Members;
  - ii. encouraged Members and Observers to fully engage in the celebrations and to share information on their plans and activities directly and through the Codex Secretariat; and
  - iii. urged Members to commit to advocacy at all levels to ensure both the widest possible participation in the celebrations and the widest possible promotion of the work of Codex.

### PARTICIPATION OF THE EUROPEAN UNION AS ADVISER TO THE MEMBER FOR EUROPE IN THE EXECUTIVE COMMITTEE OF THE CODEX ALIMENTARIUS COMMISSION (Agenda Item 14.1)<sup>31</sup>

#### Introduction

229. The Representative of the Legal Office of FAO speaking on behalf of the Legal Offices of FAO and WHO recalled that at CCEXEC78 and CCEXEC79 (in February and July 2020), the Member for North America had drawn the attention of CCEXEC to the presence of the EU as adviser to the Member for Europe and sought clarifications from the FAO and WHO Legal Offices as to whether this participation was in line with the PM and the 2003 voluntary declaration from the EU concerning its presence at CCEXEC. In response, at CCEXEC79, the FAO/WHO Legal Offices had indicated that any decision on the matter would lie with the Codex membership, bearing in mind that the rules of Codex are silent on the question of the right of the EU to participate in CCEXEC and that the EU had submitted a declaration on the subject.
230. As these concerns had been raised during the COVID-19 pandemic and required a review of the Organizations' archives, the FAO and WHO Legal Offices had committed to prepare a paper addressing the legal aspects of

<sup>30</sup> CX/CAC 22/45/20; CRD31 (Dominican Republic), CRD32 (Indonesia).

<sup>31</sup> CX/CAC 22/45/21

the issue, to assist Members in taking a decision on the matter at the next physical session of the Commission which was the present session.

231. The Representative explained that the first part of the document set out the historical background of the issue, including the practice that has developed over time regarding the participation of Member Organizations in meetings of FAO Governing Bodies and of Codex:

- Paragraph 13 explained the apparent gap in the Codex Rules of Procedure concerning the right of Member Organizations to participate in sessions of CCEXEC as is it only referred to the right of a Member Organization to participate in matters within its competence in meetings of the Commission or its subsidiary bodies, but did not refer to CCEXEC specifically.

232. The Representative further recalled that:

- the FAO Committee on Constitutional and Legal Matters (CCLM) had examined the question of the EU's entitlement to participate in CCEXEC at its 74th session in 2002 and considered that the matter required a review of the functions of CCEXEC to determine whether CCEXEC could be equated with the FAO Council, and noted that this had to be *"dealt by the [CCGP] and ultimately by the Commission"*;
- after the CCLM's review, at CCGP18 in 2003, the Observer from the European Community had submitted the Declaration concerning the EU participation in the Executive Committee, which was reproduced in paragraph 18 of the document.<sup>32</sup>
- the records of the legal offices had revealed that the Commission did not express any view on the 2003 EU Declaration.
- since the 2003 EU Declaration, a practice had evolved whereby the EU had not participated as a Member in CCEXEC sessions; however, individuals employed at the European Commission had occasionally attended sessions of CCEXEC as advisers to the Member for Europe (in 2012, 2013 and 2014, and recently in 2020 and 2021).

233. The Representative explained that the second part of the document outlined the relevant rules providing that:

- the composition of delegations was a matter of sovereignty, i.e.; it was the right of each Member to decide the composition of its delegation – and that advisers formed part of the delegation (Rule III.1 of GROs, Article V.I of the FAO Constitution and Rule VI (paragraphs 4 and 5) of the Codex rules).
- in Codex, the CCGP had clarified that the sovereign right of a Member to choose its advisers was subject to two conditions: must be from the same geographic location as the Member, and no more than two.
- as concerns their role, the relevant rules (Codex Rule VI (paragraph 5) and Rule VIII (paragraph 1)) reveal that advisers were present at a session as part of the Member's delegation without any other status or rights.

234. The Representative further stated that the FAO and WHO Legal Offices had recognized that there might be a lack of clarity between the issue of the presence of the EU as adviser to the Member for Europe and the broader question of EU's entitlement to participate in CCEXEC sessions.

235. Following a thorough review of the background, and all relevant rules and practices in FAO and Codex, the FAO and WHO Legal Offices had concluded that both issues were ultimately for deliberation by the Commission.

#### *Discussion*

236. Members that intervened welcomed the document especially the clarification that advisers form part of the delegation of the Member, and that is the sovereign right of the Member to choose its advisers, subject only to the two conditions mentioned (that the adviser had to come from the same geographic location and a Member cannot bring more than two advisers). They also welcomed the confirmation that the Members of the CCEXEC elected on a geographical basis for Europe who had previously been accompanied by an adviser from the European Commission had acted consistent with the rules of Codex. One Member requested that CAC45 reconfirm these rules.

#### **Conclusion**

237. CAC45 noted the advice of the Legal Offices of FAO and WHO as in CX/CAC 22/45/21, paragraphs 27-30.

Draft Standard for Dried Small Cardamom	REP22/SCH, Paragraph 107, Appendix VI	N01-2021	Adopted
Draft Standard for Spices Derived from Dried Fruits and Berries (Part A - Allspice, Juniper berry, Star anise)	REP22/SCH, Paragraph 121(i), Appendix VII Part A	N03-2021	Adopted
Draft maximum residue limits (MRLs) for zilpaterol hydrochloride (cattle kidney, liver, muscle)	REP21/RVDF, Paragraph 87, Appendix II	Priority List of Veterinary Drugs Requiring Evaluation or Re-evaluation by JECFA (Ongoing)	Adopted

**Appendix IV****LIST OF REVOKED STANDARDS AND RELATED TEXTS**

<b>Standards and related texts</b>	<b>Reference</b>
Codex maximum residue limits (CXLs) for different combinations of pesticides/commodity(ies) proposed for revocation	REP22/PR53, Paragraph 151(i), b), Appendix III
<i>Guidelines on the Use of Mass Spectrometry for the Identification, Confirmation and Quantitative Determination of Residues</i> (CXG 56-2005)	REP22/PR53, Paragraph 234(i)

**Appendix V****LIST OF APPROVED NEW WORK**

<b>Codex body</b>	<b>Text</b>	<b>Reference and project document</b>	<b>Job No.</b>
CCFO	Amendment/revision to the <i>Standard for Named Vegetable Oils</i> (CXS 210-1999) to include: Camellia seed oil; Sacha inchi oil; and High oleic acid soya bean oil	REP22/FO, Paragraphs 152, 160, 169, Appendices V, VI, VIII, CX/CAC 22/45/3, Annexes I, II, III <sup>33</sup>	N01-2022 N02-2022 N03-2022
CCFO	Amendment/revision to the <i>Standard for Fish Oils</i> (CXS 329-2017) - Inclusion of Calanus oil	REP22/FO, Paragraph 166 (i), Appendix VII CX/CAC 22/45/3, Annex IV <sup>34</sup>	N04-2022
CCLAC <sup>35</sup>	Development of a Regional Standard for <i>Castilla Lulo</i>	REP22/FFV, Paragraph 84(i) CX/CAC 22/45/6, Annex I	N05-2022
CCFFV	Development of a Standard for Fresh Curry Leaves	REP22/FFV, Paragraph 97(i), Appendix VI CX/CAC 22/45/6, Annex II	N06-2022
CCFICS	Development of Principles and Guidelines on the Use of Remote Audit and Verification in Regulatory Frameworks	REP21/FICS, Paragraph 114(iv), REP22/EXEC2, Paragraph 64 CX/CAC 22/45/13, Annex III	N07-2022
CCFH <sup>36</sup>	Alignment of food hygiene texts with the revised <i>General Principles on Food Hygiene</i> (CXC 1-1969)	REP22/CAC, Paragraphs 55-57	n/a <sup>37</sup>

<sup>33</sup> The annexes of CX/CAC 22/45/3 have been published in all 6 languages and they are similar to those in REP22/CAC.

<sup>34</sup> See note 1 above

<sup>35</sup> See paragraphs 61-63 of REP22/CAC

<sup>36</sup> While the most significant amount of alignment work is required for the texts developed by CCFH, CAC45 also requested other subsidiary bodies and the Codex Secretariat to ensure any necessary alignment with the *General Principles of Food Hygiene* (CXC 1-1969) was also undertaken in other Codex texts

<sup>37</sup> Job numbers may be assigned later in case initial alignment work indicates an extensive revision of particular texts is required.

**Appendix VI****LIST OF DISCONTINUED WORK**

<b>Codex body</b>	<b>Text</b>	<b>Reference</b>
CCCF	Maximum levels (MLs) for lead in fresh eggs, dried garlic and molasses	REP22/CF15, Paragraph 102(iii),
CCPR	Maximum residue limits (MRLs) for different combinations of pesticides/commodity(ies) in the Step Procedure recommended for withdrawal (discontinuation)	REP22/PR53, Paragraph 151(ii), b), Appendix VI

**Appendix VII****LIST OF AMENDMENTS**

<b>Standards and related texts</b>	<b>Reference</b>	<b>Status</b>
Editorial amendments/changes to the <i>Code of Practice for the Storage and Transport of Edible Fats and Oils in Bulk</i> (CXC 36-1987): Appendix 2	REP22/FO Paragraph 144(iii), Appendix IX	Adopted
Amendment to the <i>Standard for Bananas</i> (CXS 205-1997)	REP22/FFV Paragraph 88, Appendix V	Adopted
Editorial amendment to the maximum levels (MLs) for cadmium in chocolates containing or declaring <30% total cocoa solids on a dry matter basis and chocolates containing or declaring ≥30% to ≤50% total cocoa solids on a dry matter basis	REP22/CF Paragraph 58, Appendix II, Part I	Adopted
Consequential amendment to the maximum level (ML) for DON (deoxynivalenol) in cereal-based foods for infants and young children	REP22/CF Paragraph 154 (iii), Appendix VI, Part II	Adopted
Amendment to the <i>Regional Standard for Chanterelles</i> (CXS 40R-1981), Section 8.2	REP22/EURO Paragraph 21(i v)Appendix II	Adopted
Amendment to the <i>Regional Standard for Unrefined Shea Butter</i> (CXS 325R-2017), Section 7.2	REP22/AFRIC A	Adopted
Amendment to the <i>Regional Standard for Fermented Cooked Cassava-Based Products</i> (CXS 334R-2020), Section 7.3	Paragraph 24	
Amendment to the <i>Regional Standard for Fresh Leaves of Gnetum spp.</i> (CXS 335R-2020), Section 6.2	(iv)Appendix II	
Amendment to the <i>Standard for Black, White and Green Peppers</i> (CXS 326-2017), Section 8.3		
Amendment to the <i>Standard for Cumin</i> (CXS 327-2017), Section 8.3		
Amendment to the <i>Standard for Dried Thyme</i> (CXS 328-2017), Section 8.3		
Amendment to the <i>Standard for Dried Oregano</i> (CXS 342-2021), Section 8.5	REP21/SCH	
Amendment to the <i>Standard for Dried Roots, Rhizomes and Bulbs: Dried or Dehydrated Ginger</i> (CXS 343-2021), Section 8.4	Paragraph 11, Appendix II Part A	Adopted
Amendment to the <i>Standard for Dried Floral Parts: Cloves</i> (CXS 344-2021), Section 8.4		
Amendment <i>Standard for Dried Basil</i> (CXS 345-2021), Section 8.4		
Amendment to the <i>Standard for Dried or Dehydrated Garlic</i> (CXS 347-2019), Section 8.5		

---

Editorial amendment to the <i>Standard for Cocoa Butter</i> (CXS 86-1981), Section 5.2		
Editorial amendment to the <i>Standard for Chocolate and Chocolate Products</i> (CXS 87-1981), Section 5.3		
Editorial amendment to the <i>Standard for Cocoa Powders (Cocoas) and Dry Mixtures of Cocoa and Sugars</i> (CXS 105-1981), Section 6.2		
Editorial amendment to the <i>Standard for Cocoa (Cacao) Mass (Cocoa/Chocolate Liquor) and Cocoa Cake</i> (CXS 141-1983), Section 6.2		
Editorial amendment to the <i>Standard for Milk Powders and Cream Powder</i> (CXS 207-1999), Section 7.5	REP21/CAC Paragraph 86, CX/CAC 22/45/12 Rev. 1	Adopted
Editorial amendment to the <i>Group Standard for Cheeses in Brine</i> (CXS 208-1999), Section 7.3		
Editorial amendment to the <i>Group Standard for Unripened Cheese Including Fresh Cheese</i> (CXS 221-2001), Section 7.3		
Editorial amendment to the <i>Standard for Fermented Milks</i> (CXS 243-2003), Section 7.3		
Editorial amendment to the <i>Standard for Dairy Fat Spreads</i> (CXS 253-2006), Section 7.3		
Editorial amendment to the <i>Standard for Mozzarella</i> (CXS 262-2006), Section 7.4		
Editorial amendment to the <i>Standard for Cheddar</i> (CXS 263-1966), Section 7.5

**STATEMENTS ON ADOPTION AT STEP 5 OF DRAFT MRLs FOR  
ZILPATEROL HYDROCHLORIDE IN CATTLE LIVER, KIDNEY AND MUSCLE**

***Statements received in writing:***

**European Union**

The EU reiterates its strong opposition to the adoption of the MRLs for zilpaterol by the Commission. As zilpaterol is solely used for the purpose of growth promotion, the EU cannot support an international standard that endorses its use. The EU has systematically opposed the development of Codex MRLs for growth promoters. The EU opposition to growth promoters is based on concerns about the health and welfare of animals, consumer preferences, and moral and socio-economic concerns about the sustainability of farming practices that employ growth promoters. The One Health approach also recognizes the interlinkages between these different aspects and the health of consumers.

The EU policy on such substances is widely supported by European citizens and it is applied in a non-discriminatory manner. The EU upholds the core Codex values of inclusiveness, collaboration, consensus building and transparency. Unfortunately, consensus has never been reached in Codex on the question of growth promoters due to divergent conceptions and expectations regarding food production systems. This is in sharp contrast with the rest of Codex work since Codex has successfully adopted thousands of standards and other Codex texts by consensus. The EU remains strongly committed to Codex work and trusts that in the future similar situations can be avoided by ensuring consensus on the amenability of certain standards at the start of the work, allowing the focus of our precious resources on genuine needs and issues of global relevance. The EU is looking forward to discuss this topic at the next CAC, in full respect of the applicable rules of procedure. The EU is grateful to the chair of the Commission for the very precious procedural guidance and clarification provided before this CAC and for his skillful handling of our discussions in line with the rules. The EU remains open to engage in further consensus seeking on this issue in the run-up to CAC46.

**Norway**

Norway voted against the adoption at Step 5 because we would have preferred a consensus decision which might have suited all parties, both for us that strongly oppose the MRLs and for those in need for MRLs. We still consider it important that Members engage further in discussions to find consensus in order to avoid a vote at Step 8 at the next Commission.

**Thailand**

The decision to adopt MRLs for zilpaterol hydrochloride at Step 5 was not taken by consensus. Thailand is concerned that with high consumption of edible offal tissues, including those other than liver and kidney, the risk posed to consumers may include effect of residues from the current recommended use and withdrawal period of zilpaterol hydrochloride and cause adverse health effect of exposure. In this regard, we believe the exposure assessment has not been done completely. In addition, the national policy and regulations in Thailand only allow the use of veterinary drugs for therapeutic purposes, not for the other objectives, such as growth promotion. For these reasons, Thailand would like to reserve its position on the adoption of MRLs for zilpaterol hydrochloride at Step 5.

**United Kingdom**

The United Kingdom maintained its opposition and abstained from acceptance of the decision to adopt MRLs for zilpaterol hydrochloride at Step 5 as this compound is prohibited in national legislation. The United Kingdom further noted that the decision to adopt the zilpaterol MRLs at Step 5 was reached by vote and not consensus.

**United States of America**

The United States welcomes the adoption of MRLs for zilpaterol at Step 5 and commends the Commission and its Members for coming together to advance this work. To meet the global challenge of ensuring the availability and affordability of safe food to every country, community, and household, we must embrace innovation and science. In this spirit, the United States will continue to call on the Commission and Codex Members to uphold the institution's foundations by advancing international standards that are based on science and that serve the collective interests of global consumers and producers. If Codex is to fulfill its mandate, zilpaterol standards must move forward for final adoption at CAC46.

**Statements based upon the transcript of CAC45:****Argentina**

We would like to congratulate the Chairperson for the work carried out. Not because we actually approved zilpaterol, which was the task at hand but for having applied the Procedural Manual and not having continued to prolong the discussion on this matter because this might have been easier and more comfortable. So, we congratulate you on that. I'm worried that there was no reaction to any of the things that were said because it seems that some people have morals and others don't. And I don't know if there's a bar here that's been set on morality. And why do we have to discuss morality in this forum? Here we need to talk about science, we need to talk about results, and we need to be conscious of the fact that it is impossible for 180 countries and their communities to have the same concerns, because obviously it would be denying the world's many different cultures. Talking about the concerns of consumers is not realistic because consumers are extremely diverse and have very different concerns throughout the globe. And so, there are issues that out of respect should not be used here. We've known for years and years, ever since we started discussing these matters, that none of these issues are legitimate or within the legitimate scope of Codex. They are just opinions that are prolonging the debate. It is detrimental to Codex when we postpone a decision for 20 years and do not apply the Procedural Manual.

**Chad**

Thank you for guiding us in these discussions and seeing us through the vote regarding zilpaterol, which is a growth hormone. And as has been said, there have been discussions based on scientific data. I think that we should not leave it at the vote, but we should pursue the discussion regarding risk analysis in order to go deeper into risk management and also communication on risk and therefore the use of zilpaterol.

**Chairperson of CCRVDF**

I wish to express my gratitude to the Members of this Commission for their extensive discussion on the draft MRLs for zilpaterol. As Members noted, the CCRVDF has also thoroughly discussed the draft MRLs during several sessions. The discussion of the MRLs for zilpaterol has been a challenging one, on which there are strongly held views on both sides. As this Commission did, CCRVDF was able to reach consensus on the JECFA risk assessment basis of the MRLs. But the CCRVDF has been unable to reach consensus on any action for the MRLs. The CCRVDF could neither agree to advance nor to hold them. It is always preferable to make decisions based on consensus, but I greatly appreciate the willingness of this Commission to make decisions by other means deemed appropriate. In particular, I thank the Members of this Commission for making decisions that CCRVDF has been unable to make. And lastly, I'm grateful to the Commission for your support and agreement to retain the future discussion of the draft zilpaterol MRLs within the Commission.

**Chile**

Chile would like to thank you for the efforts carried out in order to make headway on this matter. We'd like to recall what we said yesterday. As defined in the principles of risk assessment, in the case of zilpaterol, we also would like to recall that the form for presenting information is always there. And that's why we support what was said by Uruguay, the United States of America, and Ecuador. And Chile would like to make sure that this statement is recorded in the report.

**China**

We would like to congratulate you on your leadership and on your efforts. However, we do regret the decision that's been taken considering zilpaterol, because it is a substance that is forbidden in many countries. It is a growth promoter that does not meet with consensus. We cannot predict the risks, especially in edible offal. We don't know what kind of hazards exist in that context. We did advance the standard to Step 6. We regret that, and we'd like for our reservation to be recorded.

**Ecuador**

We endorse what was just expressed by the United States of America and Uruguay and we accept, of course, the outcome of the vote. We believe that all decisions of Codex Alimentarius ought to be based on science and on the principles of risk assessment. If there are no scientific reasons contrary to the recommendations made by the expert committee, and if there are no other legitimate factors that ought to be considered globally, then they should not influence on our risk management or the attainment of consensus. We believe that there was a consensus to advance. So, we voted, we decided on things, and we're going to continue to work. We ask that our statement be recorded as it was delivered in the report.

**Indonesia**

As we stated on the first day, Indonesian regulation does not approve the use of growth promoters including zilpaterol hydrochloride. Obviously, Indonesia also respects the result of the voting for the proposal on MRLs

yesterday and noted that the decision made has been concluded by the Commission. With that, Indonesia would like to register its reservation for this issue.

### **Kazakhstan**

Kazakhstan would like to echo other countries who have objected to the adoption of the MRL for zilpaterol. I would like to note that consumers in Kazakhstan also consume other edible offals. We need an inclusive approach in assessing the safety of zilpaterol.

As we can see, that the problem we face is the lack of additional scientific data or other factors. Discussion showed that in many countries the use of growth promoters is forbidden, and therefore it cannot be stated that we will have full data in the near future.

This raises a logical question – why should we approve at the international level the MRLs for these promoters? Austria and Norway have well noted that the risk assessment is carried out by JECFA, but we are the ones who make the decision, in other words, the Commission.

And therefore, once again Kazakhstan would like to take the opportunity to call on countries to pay attention to the very serious nature of this matter.

### **Russian Federation**

We vote against the adoption of the standard and we are also against the use of growth promoters, and zilpaterol is one of these. As we proposed earlier, to leave the discussion at Step 4 and to put an end to the discussion because we are unable to reach consensus on this matter. We also pointed out that the scientific data have not been seen through to their conclusion, including the major or chronic impact that this can have on the population. You set out the concrete steps whereby we could take the matter further yesterday, and over the past two days, many countries have said that they do not make use of zilpaterol in their own countries and yet they voted for adoption of the standard. Many of these countries spoke about the WTO and these countries can, between now and the next session, discuss how they will fulfil their obligations vis a vis that particular organization. Of course, the Codex standards are not mandatory, they are recommendations. But nobody has put an end to obligations under the WTO. So, the standard has been left at Step 6. This is not the result that we would have liked to see. But we agree that the matter remains at Step 6 and that going further, we should move along the guidelines, the directives of Codex.

### **Saudi Arabia**

We would like to thank you for your efforts. Saudi Arabia has reservation regarding the adoption of this standard at Step 5 as we do not agree with using growth promoters. That is why we would like to record our reservation.

### **Uganda**

Uganda would like to reecho our submission that we made yesterday. And following the outcome of the decision which was made, we would like to support the progression that was made in terms of moving forward with this particular issue. Although I would have loved to close the matter once and for all in this Commission, which may not have been possible. We are happy to note that we made a step forward and we should be able to keep progressing. We do not think that there would be any difference in terms of the weight of the standard regardless of the method that has been deployed considering that the option is fully available in the Codex Procedural Manual and the application of the standard would not be hindered precisely because of the methodology that was adopted in terms of progression. We would further appeal to the Commission to get the subject out of the way as soon as it could. And in any case, probably in the upcoming session, such that we are able to further engage on other important matters of the Commission.

### **Uruguay**

Uruguay would like to thank the Chairperson for making such great efforts to try to find a satisfactory solution to this problem. There are diverging opinions about voting in Codex. For us voting is a mechanism contained in our statutes and it's a viable way of executively solving a problem that's been drawn out over time. So we reiterate our opinion, which we expressed previously, i.e. a vote in this situation was the right solution. There was agreement that the absence of consensus was based on the existence of objections that are founded on the very tenets of Codex; science and fair trade and safety of consumers. Considering objections that are not within the remit of Codex, as viable, is not good practice. Simply because somebody is against, it doesn't mean that there's no consensus. There is no consensus when there is a divergence with the foundations of the body in question.

**Zimbabwe**

Zimbabwe thanks the Chairperson profusely for the patience to continue to pursue these remarks this morning. Yesterday it was asked one question, to say, do all Members have an equal voice in Codex? And today, in my mind, I think that question still remains. Just two days ago, we had a matter, a conscientious matter. And we solved it amicably through your able leadership, Chairperson, having noted the discontentment among many, many, many countries on the aflatoxins discourse. We submit that the aflatoxins have deleterious effects on people, the majority of these victims being in Zimbabwe or in Africa, in similar countries. The matter did not receive as much attention as we are now having on zilpaterol, where we are flagging animal welfare issues. Animal welfare and the health of the people. Animal welfare and the health of the people. And I must repeat the last time; Animal welfare having pre-eminence above the health of an entire continent. So, I would like to congratulate you, Chairperson. I don't envy your job at all. You worked so hard. You nudged us to get a step forward. We are only unhappy that we were not able to get to a full adoption of these MRL's, but we are happy that we moved some steps. So, we stand with the United States of America, Uganda, Chile, Uruguay, the list is endless, in support of an accelerated adoption of MRLs for zilpaterol. And I think CAC46 will finalize this job.

**COUNTRIES RESPONSIBLE FOR APPOINTING  
THE CHAIRPERSONS OF CODEX SUBSIDIARY BODIES  
Established under Rule XI.1(b)(i)**

<b>Code</b>	<b>Subsidiary body</b>	<b>Member responsible</b>	<b>Status</b>
CX 703	Codex Committee on Milk and Milk Products	New Zealand	Adjourned <i>sine die</i>
