## CODEX ALIMENTARIUS COMMISSION

Viale delle Terme di Caracalla, 00153 Rome, Italy - Tel: (+39) 06 57051 - E-mail: codex@fao.org - www.codexalimentarius.org

Agenda Item 7(b) CX/PR 20/52/7

June 2020

# JOINT FAO/WHO FOOD STANDARDS PROGRAMME CODEX COMMITTEE ON PESTICIDE RESIDUES

52<sup>nd</sup> Session Guangzhou, P.R. China 30 March – 4 April 2020

#### REVISION OF THE CLASSIFICATION OF FOOD AND FEED: CLASS D: PROCESSED FOODS OF PLANT ORIGIN

(At Step 4)

(Prepared by the Electronic Working GB chaired by the United States of America and co-chaired by the Netherlands)

Codex members and Observers wishing to submit comments at Step 3 on the revised Class D<sup>1</sup> should do so as instructed in CL 2020/11-PR.

This document should be read in conjunction with relevant working documents and circular letters<sup>2</sup> under Agenda Items 7(a), (c) and (d).

#### **BACKGROUND**

#### Introduction

1. Please refer to CX/PR 20/52/6, paragraphs 1-9 for working principles and decisions made by CCPR in relation to the revision of the Classification of Food and Feed (CXA 4-1989).

Revision of Class C: Primary Animal Feed Commodities
Key decisions and follow-up work

- 2. Please refer to CX/PR 20/52/6, paragraphs 5 9 for the decisions taken at CCPR51 (2019) in relation to the revision of feed commodities in the Classification of Food and Feed.
- 3. The Electronic Working Group on the Revision of the Classification continued the work on the revision of Class D and the work on transferring commodities from Class D to Class C in accordance with the Terms of Reference (TOR) given to it by CCPR51 and taking into account the agreed working principle (CX/PR 20/52/6, paragraph 6). The basis for discussion was Conference Room Document CRD31 which includes comments submitted at the last session of CCPR on Class D.<sup>3</sup>

#### **DISCUSSION**

- 4. The following considerations were made during the discussions in the EWG.
- 5. The introduction of Class D and Class E Processed Foods in the Classification is as follows:

The term "processed food" means the product, resulting from the application of physical, chemical or biological processes or combinations of these to a "primary food commodity", intended for direct sale to the consumer, for direct use as an ingredient in the manufacture of food or for further processing.

"Primary food commodities" treated with ionizing radiation, washed, sorted or submitted to similar treatment are not considered to be "processed foods".

<sup>&</sup>lt;sup>1</sup> Working documents for CCPR52 are available on the dedicated website: http://www.fao.org/fao-who-codexalimentarius/meetings/detail/en/?meeting=CCPR&session=52

<sup>&</sup>lt;sup>2</sup> Circular letters are available on the Codex webpage/Circular Letters and can also be accessed from the CCPR website (related circular letters): http://www.fao.org/fao-who-codexalimentarius/resources/circular-letters/en http://www.fao.org/fao-who-codexalimentarius/committees/committee/related-meetings/jp/?committee=CCPR

<sup>&</sup>lt;sup>3</sup> REP19/PR, para. 179

6. Class D includes 4 Types of commodities: 12 (Secondary food commodities of plant origin), 13 (Derived proucts of plant origin), 14 (Manufactured Foods (single-ingredient) of plant origin) and 15 (Manufactured foods (multi-ingredient) of plant origin). In the overview below of the types with their groups you can find the introduction in the classification of each type.

7. Overview of types of commodities in Class D Processed foods of plant in existing Classification

#### Type 12: Secondary food commodities of plant origin

#### Introduction

The term "secondary food commodity" means a "primary food commodity" which has undergone simple processing, such as removal of certain portions, drying (except natural drying), husking, and comminution, which do not basically alter the composition or identity of the product. Natural field dried mature crops or parts of crops such as pulses, bulb onions or cereal grains are not considered as secondary food commodities.

Secondary food commodities may be processed further or used as ingredients in the manufacture of food or sold directly to the consumer.

#### Groups in Type 12

055 Dried fruits

056 Dried vegetables

057 Dried herbs

058 Milled cereal products (early milling stages)

059 Miscellaneous secondary food commodities of plant origin

#### Type 13: Derived products of plant origin

#### Introduction

"Derived edible products" are foods or edible substances isolated from primary food commodities or raw agricultural commodities, not intended for human consumption as such, using physical, biological or chemical processing.

This type of processed food includes groups such as vegetable oils (crude and refined), by-products of the fractionation of cereals, fruit juices, teas (fermented and dried), cocoa powder and by-products of cocoa manufacturing, and extracts of various plants.

#### Groups in Type 13

065 Cereal grain milling fractions

066 Teas

067 Vegetable oils, crude

068 Vegetable oils, edible (or refined)

069 Miscellaneous derived edible products of plant origin

070 Fruit juices

071 By-products, used for animal feeding purposes, derived from fruit and vegetable processing

#### Type 14: Manufactured Foods (single-ingredient) of plant origin

#### Introduction

The term "single-ingredient manufactured food" means a "processed food" which consists of one identifiable food ingredient, with or without packing medium or minor ingredients, such as flavouring agents, spices and condiments, and which is normally pre-packaged and ready for consumption with or without cooking.

#### Groups in Type 14

075 Reserved

#### Type 15: Manufactured foods (multi-ingredient) of plant origin

#### Introduction:

The term "multi-ingredient manufactured food" means a processed food, consisting of more than one major ingredient.

A multi-ingredient food consisting of ingredients of both plant and animal origin will be included in this type if the ingredients(s) of plant origin is (are) predominant.

#### Groups in Type 15

078 Manufactured multi-ingredient cereal products

#### **CONCLUSIONS AND RECOMMENDATIONS**

8. According to the outcome of TOR (ii) (Continue the work on Class D Processed foods of plant origin) and the outcome of TOR (iii) (Continue the work on transferring commodities from Class D to Class C, taking into account the agreed working principle), the EWG made the following conclusions and recommendations to classify commodities in Class D for consideration by Codex members and observers:

#### Recommendations regarding TOR (ii)

Appendix I: Revised Class D

• It is preferred to keep those <u>flour commodities not originating from cereals</u> separated from the flour from cereals because the group from cereals is aligned with the group of cereals in Class A (Group 20) and Class C (Group 51).

**Recommendation 1**: To include <u>flour commodities not originating from cereals</u> separated from the flour from cereals and to classify <u>them</u> in Group 69 (Miscellaneous derived edible products from plant origin).

• In Group 78 of Type 15 several commodities could be classified e.g. bread, rye bread, steamed bread, whole-meal bread. Until now, no CXLs<sup>4</sup> are set for such commodities. It is not expected that CXLs will be required for these products to allow trade, because of the varying composition of the commodities and because it is not expected that a notifier will have a dossier for those multi-ingredient commodities. So no commodities are proposed to be classified in this Group on this moment but it will be preserved for the possibility to add in future commodities to this Group.

**Recommendation 2**: To keep Group 78 of Type 15 (Manufactured foods (multi-ingredient) of plant origin), but to classify no commodities in this Group.

• There was no clear support in the EWG for the possibility of creating groups for wholemeal analogous to groups for flour from cereals, so such groups are not added.

Recommendation 3: To not create groups for wholemeal analogous to groups for flour from cereals.

• It is suggested to add several juices of vegetables. On this moment there is a group for juices of fruit (Group 070). In this Group some vegetables are already included, the fruiting vegetables.

The existing description of this Group is: "Fruit juices, Group 070, are pressed from various mature fruits, either from the whole fruits or from the pulp (Type 1 and fruits from Fruiting vegetables, Group 011 and 012). A small amount of preserving agent(s) may be added to the juices during processing."

Renaming the Group 070 "Fruit juices" into "Fruit and Vegetable juices" gives the opportunity to add juices of <u>all</u> vegetables to this Group.

It is proposed to rename this Group instead of adding a separate group for vegetables, because:

- On this moment the fruiting vegetables are already included in this Group, (fruiting vegetables from Groups 011 and 012)
- o It will make it possible to add juices of all vegetables to this Group
- It is not necessary to create a new group
- Already existing vegetable juices (e.g. tomato juice) can remain in this Group and don't need to be moved to another group
- o Until now there are no CXLs set for the whole group, so it will not have an impact on the existing CXLs In this proposal, the introduction text of the group is changed accordingly.

**Recommendation 4**: To rename Group 070 "Fruit juices" into "Fruit and vegetable juices" and to change the introduction text accordingly.

<sup>&</sup>lt;sup>4</sup> CXLs or [Codex] MRLs or [existing] MRLs (= Codex maximum residue limits for pesticides as adopted by the Codex Alimentarius Commission)

• Several changes are made in Group 066 Teas (Mainly based on a reaction of THIE (Association for producers and traders for Tea and Herbal Infusion Europe)).

o It is proposed to separate the group of teas in subgroups, because of the wide variation in the group of teas. The following three subgroups are proposed:

066A Teas from Camellia

066B Herbal teas from leaves/blossoms

066C Herbal teas from roots.

- The introduction text is changed accordingly
- Herbal teas can be derived from over 400 different plant and parts, therefore it is not possible to classify all specific species in the Codex system. Only the most important are mentioned separately, the minor ones are covered by the code "DT 9999 Leaves and flowers from other crops used for herbal teas, dried and DT 9998 Roots from other crops used for herbal teas, dried"

**Recommendation 5**: To agree with (i) the structure, locations of commodities and other changes proposed for Group 066 Teas (ii) the approach taken for herbal teas to mention the most important ones separately and to cover minor ones under two single codes DT 9999 Leaves and flowers from other crops used for herbal teas, dried and DT 9998 Roots from other crops used for herbal teas, dried.

#### Recommendations regarding TOR (iii)

Appendix II: Overview of processed food and feed commodities, with the proposed classification in Class C (feed) and Class D (food)

The EWG discussed the classification from processed commodities is discussed based on the working principles agreed by CCPR (see CX/PR 20/52/6, paragraph 6).

- Some processed commodities in Class D have to be relocated from Class D to class C. See Annex II for the proposed Classification of the processed commodities.
- Several new commodities were suggested by the members of the EWG. Those commodities are added in the Classification.

**Recommendation 6**: To agree with the relocation of commodities from Class D to Class C taking into account the working principles from the transferring of commodities from Class D to Class D agreed<sup>5</sup> to by CCPR and the corresponding revisions made to Class C and Class D in this regard.

Recommendation regarding to the revision of Class D and the transfer of commodities from Class D to Class C

**Recommendation 7**: To consider the revised Class D (Appendix I) based on the above conclusions (see also CX/PR 20/52/6, paragraph 18).

-

<sup>&</sup>lt;sup>5</sup> REP19/PR, para. 152

**APPENDIX I** 

#### **CLASS D - PROCESSED FOODS OF PLANT ORIGIN**

(For comments)

#### CLASS D AND CLASS E PROCESSED FOODS

The term "processed food" means the product, resulting from the application of physical, chemical or biological processes or combinations of these to a "primary food commodity", intended for direct sale to the consumer, for direct use as an ingredient in the manufacture of food or for further processing.

"Primary food commodities" treated with ionizing radiation, washed, sorted or submitted to similar treatment are not considered to be "processed foods".

#### CLASS D PROCESSED FOODS OF PLANT ORIGIN

#### TYPE 12 SECONDARY FOOD COMMODITIES OF PLANT ORIGIN

The term "secondary food commodity" means a "primary food commodity" which has undergone simple processing, such as removal of certain portions, drying (except natural drying), husking, and comminution, which do not basically alter the composition or identity of the product. Natural field dried mature crops or parts of crops such as pulses, bulb onions or cereal grains are not considered as secondary food commodities.

Secondary food commodities may be processed further or used as ingredients in the manufacture of food or sold directly to the consumer.

#### **DRIED FRUITS**

Class D

Type 12 Secondary food commodities of plant origin

**Group 055** Group Letter Code DF

Group 055: Dried fruits. The commodities of this Group are in general artificially dried. They may or may not be preserved or candied with addition of sugars.

Exposure to pesticides may arise from pre-harvest applications, post-harvest treatment of the fruits before processing, or treatment of the dried fruit to avoid losses during transport and wholesale or retail distribution.

<u>Portion of the commodity to which the MRL applies (and which is analysed):</u> Whole commodity after removal of stones, but the residue is calculated on the whole commodity.

but the residue is calculated on the whole commodity.

#### **DRIED VEGETABLES**

Class D

Type 12 Secondary food commodities of plant origin

**Group 056** Group Letter Code DV

Group 056, Dried vegetables. The commodities of this Group are in general artificially dried and often comminuted.

Exposure to pesticides is from pre-harvest applications and/or treatment of the dried commodities.

The entire commodity may be consumed after soaking or boiling.

<u>Portion of the commodity to which the MRL applies (and which is analysed):</u> Whole commodity as prepared for wholesale or retail distribution.

Group 056	Dried vegetables
Code No.	<u>Commodity</u>
DV 0168	Group of dried vegetables
DV 0621	Asparagus, dried
	Asparagus officinalis L.
DV 3081	Baby corn, dried
	Zea mays L., several cultivars
DV 0061	Beans with pods (Phaseolus spp) (immature pods and succulent seeds), dried
DV 0400	Broccoli, dried
	Brassica oleracea L. var. italica Plenck
DV 0041	Cabbages, head, dried
	Brassica oleracea L. var. capitata L., several var. and cvs.
DV 0577	Carrot, dried
	Daucus carota L.
DV 0404	Cauliflower, dried
	Brassica oleracea L. var. botrytis L.
DV 0578	Celeriac (Turnip rooted celery), dried
	Apium graveolens L., var. rapaceum (Mill.) Gaudin
DV 0465	Chervil, dried
	Anthriscus cerefolium L. Hoffmann
-	Cantaloupe, dried, see Cucurbits – Melons, Pumpkins and Winter Squashes, dried, DV 2040
DV 2039	<b>Cucurbits - Cucumbers and summer squashes, subgroup of, dried</b> (see Subgroup 011A (Code VC 2039) for species included in the subgroup of cucurbits - cucumbers and summer squashes)
DV 2040	<b>Cucurbits – Melons, pumpkins and winter squashes, subgroup of, dried</b> (see Subgroup 011A (Code VC 2039) for species included in the subgroup of cucurbits – melons, pumpkins and winter squashes)
DV 2600	Daylily, dried
	Hemerocallis fulva L.
DV 0440	Eggplant, dried
	Solanum melongena L.
DV 2084	Fungi, dried
	Various edible species of fungi, wild and cultivated, dried
DV 0381	Garlic, dried
	Allium sativum L.
DV 0784	Ginger, dried
	Zingiber officinale Roscoe

DV 0604	Ginseng, dried including red ginseng
	Panax spp.
DV 2704	Goji berry, dried
	LyFrice brcium barbarum L.
-	Gourd, round, dried, see Cucurbits – Cucumbers and Summer squashes, dried, DV 2039
DV 0480	Kale (Borecole, Collards), dried
	Brassica oleracea L., var. sabelica L.
DV 0384	Leek, dried
	Allium porrum L.
-	<b>Melons, except watermelon, dried,</b> see Cucurbits – Melons, Pumpkins and Winter Squashes, dried, DV 2040
DV 0450	Mushroom (cultivated), dried
	Cultivated cultivars of <i>Agaricus spp</i> . (included Royal sun agaricus = Hime-Matsutake ( <i>Agaricus brasiliensis</i> ), Rodman's agaricus, White button mushroom) Syn: <i>Psalliota</i> spp., mainly <i>Agaricus bisporus</i>
DV 0442	Okra, dried
	Abelmoschus esculentus L.
DV 0385	Onion, bulb, dried
DV 0587	Parsley, Turnip-rooted, dried
	Petroselinum crispum (Mill.) Nyman ex A.W. Hill
DV 0588	Parsnip, dried
	Pastinaca sativa L.
DV 0064	Peas without pods (Pisum spp) (succulent seeds), dried
DV 0445	<b>Pepper, Sweet (incl. pimento or pimiento), dried</b> ( <i>Capsicum annuum, var. grossum</i> and var. <i>longum</i> ) dried;
-	Pepper, Chili, dried, see HS 0444 Peppers, Chili, dried (Capsicum spp.) Subgroup 0281
-	Potato, dried, see Potato, flakes/granules, DV 0589
DV 0589	Potato, flakes/granules,
	Solanum tuberosum L. and other potato species
DV 0446	Roselle, dried
	Hibiscus sabdariffa L. var. sabdariffa L.
-	Pumpkin, dried, see Cucurbits – Melons, Pumpkins and Winter Squashes, dried, DV 2040
DV 0388	Shallot, dried
	A. cepa L., var. aggregatum Don.
DV 0502	Spinach, dried
	Spinacia oleracea L.
-	Squash, Summer, dried, see Cucurbits – Cucumbers and Summer squashes, dried, DV 2039
DV 1275	Sweet corn (whole kernel without cob or husk), dried
	Zea mays L., several cultivars
DV 0448	Tomato, dried
	Lycopersicon esculentum Mill.; Syn: Solanum lycopersicum L.
DV 0506	Turnip, garden, dried
	Brassica rapa L. subsp. rapa
-	Watermelon, dried, see Cucurbits – Melons, Pumpkins and Winter Squashes, dried, DV 2040

#### **DRIED HERBS**

Class D

Type 12 Secondary food commodities of Plant origin

**Group 057 Group Letter Code DH** 

Group 057, Dried herbs. The commodities of this Group are in general artificially dried and often comminuted. For the commodities in the "fresh" state see Group 027 Herbs.

Exposure to pesticides is from pre-harvest applications and/or treatment of the dried commodities.

They are consumed in the dried form or soaked as a condiment in food commodities of plant or animal origin or in drinks, generally in small amounts.

Portion of the commodity to which the MRL applies (and which is analysed): Whole commodity as prepared for wholesale or retail distribution.

#### **MILLED CEREAL PRODUCTS (EARLY MILLING STAGES)**

Class D

Type 12 Secondary food commodities of plant origin

**Group 058 Group Letter Code CM** 

For final milling fractions, whether processed or not, see Group 065 Cereal grain milling fractions

Group 058. Milled cereal products (early milling stages). The Group includes the early milling of fractions of cereal grains, except buckwheat, cañihua and quinoa, such as husked rice, polished rice and the unprocessed cereal grain brans.

Exposure to pesticides is through pre-harvest treatments of the growing cereal grain crop and especially through post-harvest treatment of cereal grains.

The entire commodity may be consumed after further processing or household preparation.

<u>Portion of the commodity to which the MRL applies (and which is analysed):</u> Whole commodity as prepared for wholesale or retail distribution.

Group 058	Milled cereal products (early milling stages)
Code No.	Commodity
CM 0081	Group Bran, unprocessed of cereal grain (except buckwheat, cañihua and quinoa)
CM 0640	Barley, pearled
CM 3510	Barley bran, unprocessed
CM 1206	Rice bran, unprocessed
CM 0649	Rice, husked
CM 1205	Rice, polished
CM 0650	Rye bran, unprocessed
-	Spelt bran, unprocessed, see Wheat bran, unprocessed, CM 0654
CM 0654	Wheat bran, unprocessed

#### MISCELLANEOUS SECONDARY FOOD COMMODITIES OF PLANT ORIGIN

Class D

Type 12 Secondary food commodities of plant origin

**Group 059 Group Letter Code SM** 

Portion of commodity to which the MRL applies (and which is analysed): Whole commodity.

Group 059	Miscellaneous secondary food commodities of plant origin
Code No.	<u>Commodity</u>
SM 0718	Brewer's grain from barley
SM 0720	Brewer's grain from wheat
SM 0715	Cacao beans, roasted
SM 0716	Coffee beans, roasted
SM 0719	Dried distiller's grain from barley
SM 0721	Dried distiller's grain from wheat

#### TYPE 13 DERIVED EDIBLE PRODUCTS OF PLANT ORIGIN

"Derived edible products" are foods or edible substances isolated from primary food commodities or raw agricultural commodities, using physical, biological or chemical processing.

This type of processed food includes groups such as vegetable oils (crude and refined), by-products of the fractionation of cereals, fruit juices, teas (fermented and dried), cacao powder and by-products of cacao manufacturing, and extracts of various plants.

#### **CEREAL GRAIN MILLING FRACTIONS**

Class D

Type 13 Derived products of Plant origin

**Group 065** Group Letter Code CF

Group 065. Cereal grain milling fractions includes milling fractions of cereal grains at the final stage of milling and preparation in the fractions. The Group also include the processed brans, as prepared for direct consumption.

Portion of the commodity to which the MRL applies (and which is analysed): Whole commodity.

Group 065	Cereal grain milling fractions
Code No.	<u>Commodity</u>
CF 0080	<b>Group of Cereal grains, flour</b> ; (see Group 020 (Code GC 0080) for species included in the group of cereals grains)

germ, flour, and tailing	ngs)
CF 3515	Wheat, shorts (cereal grain milling by-product)
CF 1212	Wheat, wholemeal

#### **TEAS**

Class D

#### Type 13 Derived edible products of plant origin

**Group 066 Group Letter Code DT** 

Group 066 Teas, are mainly derived from the leaves of several plants, principally Camellia sinensis.

Tea from *Camellia sinensis* is derived solely and exclusively from the tender shoots of varieties of the species *Camellia sinensis* (L.) Kuntze and produced by good agricultural and acceptable manufacturing processes. This tea is intended for making a brew suitable for consumption as a beverage.

Herbal teas: Plant materials for herbal teas are from plants or from parts of plants that do not originate from the tea plant (*Camellia sinensis* (L.) Kuntze) and are intended for food use by brewing with freshly boiling water.

The Group Teas and herbal teas is divided into three subgroups

Subgroup 66A Teas - Teas from Camellia sinensis

Subgroup 66B Teas - Herbal teas from leaves/blossoms

Subgroup 66C Teas - Herbal teas from roots

<u>Portion of commodity to which the MRL applies (and which is analysed):</u> Whole commodity as prepared for wholesale or retail distribution.

	Valeriana officinalis

#### **VEGETABLE OILS, CRUDE**

Class D

Type 13 Derived edible products of plant origin

**Group 067 Group Letter Code OC** 

Group 067. Vegetable oils, crude, includes the crude vegetable oils derived from oil seeds, nuts, tropical and sub-tropical oil-containing fruits such as olives, and some pulses (e.g. soya bean, dried). For the definition and characteristics of Olive oil, crude see CXS 33-1981. The crude oils are used as constituents of compounded animal feeds or further processed (refined, clarified). See Group 068, Vegetable oils, edible (or refined).

Exposure to pesticides is through pre-harvest treatment of the relevant crops or post-harvest treatment of the oilseeds or oil-containing pulses.

<u>Portion of commodity to which the MRL applies (and which is analysed):</u> Whole commodity as prepared for wholesale distribution.

Group 067	Vegetable oils, crude
Code No.	Commodity
OC 0172	Group of vegetable oils, crude (includes all commodities in this Group)
-	Corn oil, crude, see Maize oil, crude
OC 0665	Coconut oil, crude

#### **VEGETABLE OILS, EDIBLE (OR REFINED)**

Class D

Type 13 Derived edible products of plant origin

**Group 068 Group Letter Code OR** 

Group 068. Vegetable oils, edible (or refined) include the vegetable oils derived from oil seeds, nuts, tropical and subtropical oil-containing fruits such as olives, and some pulses with a high oil content. The edible oils are derived from the crude oils through a refining and/or clarifying process. For definitions and characteristics of the edible oils listed below, see CXS 20-27 (inclusive), 33, 124 and 126 (inclusive) (1981).

Exposure to pesticides is through pre-harvest treatment of the relevant crops, or post-harvest treatment of the oilseeds and oil containing pulses.

<u>Portion of commodity to which the MRL applies (and which is analysed):</u> Whole commodity as prepared for wholesale or retail distribution.

Group 068	Vegetable oils, edible (or refined)
Code No.	Commodity
OR 0172	Group of vegetable oils, edible (includes all commodities in this Group)
OR 0660	Almond oil
OR 0326	Avocado oil, refined
OR 3501	Babassu oil
OR 3140	Borage seed oil
OR 3170	Castor oil, refined
OR 0001	Citrus oil, edible
-	Corn oil, edible, see Maize oil, edible, OR 0645

OR 0702	Sunflower seed oil, edible
OR 3502	Tea seed oil, edible
OR 0678	Walnut oil, edible

#### MISCELLANEOUS DERIVED EDIBLE PRODUCTS OF PLANT ORIGIN

Class D

Type 13 Derived edible products of plant origin

**Group 069** Group Letter Code DM

Group 069. Miscellaneous derived edible products include various intermediate products in the manufacture of edible food products. Some of these are used for further processing and not consumed as food or feed as such.

Portion of the commodity to which the MRL applies (and which is analysed): Whole commodity.

Group 069	Miscellaneous derived edible products of plant origin
Code No.	Commodity
DM 0560	Adzuki bean, flour
DM 0523	Broad bean, flour
DM 2065	<b>Beans, subgroup of, flour (</b> see Subgroup 015A (Code VD 2065) for species included in the subgroup of beans)
DM 0071	<b>Beans (Phaseolus), subgroup of, flour (</b> see Subgroup 015A (Code VD 0071) for species included in the subgroup of beans)
DM 2891	<b>Beans (Vigna), subgroup of, flour (</b> see Subgroup 015A (Code VD 2891) for species included in the subgroup of beans)
DM 0001	Citrus molasses
DM 1215	Cacao butter
DM 1216	Cacao mass
DM 0715	Cacao powder
DM 0524	Chickpea, flour
DM 0665	Coconut, Copra (dried meat)
DM 0604	Ginseng, extracts
DM 0533	Lentil, flour
DM 0545	Lupin, flour
DM 0536	Mung bean, flour
DM 0305	Olives, processed
DM 0697	Peanut, flour
DM 2066	Pea, subgroup of, flour (see Subgroup 015B (Code VD 2066) for species in the subgroup of peas)
DM 0070	Pulses, group of, flour, (see Group 015 (Code VD 0070) for species in the subgroup of pulses)
DM 0651	Sorghum, sweet syrup
DM 0658	Sorghum molasses
DM 0596	Sugar beet molasses
DM 3517	Sugar beet, sugar refined
DM 0659	Sugar cane molasses
DM 3518	Sugar cane, sugar refined
-	Tomato, paste, see tomato, puree, DM 0448
DM 3519	Tomato, pomace
DM 0448	Tomato, puree CXS 57-1981

#### **FRUIT AND VEGETABLE JUICES**

Class D

Type 13 Derived edible products of plant origin

Group 070 Group Letter Code JF

Fruit and vegetable juices, Group 070, are pressed from various mature fruits, either from the whole fruits or from the pulp or from vegetable commodities. A small amount of preserving agent(s) may be added to the juices during processing. The juices are often prepared for international trade in a concentrated form which is reconstituted for wholesale or retail distribution to about the original juice concentration as obtained by the pressing process.

<u>Portion of the commodity to which the MRL applies (and which is analysed):</u> Whole commodity (not concentrated) or commodity reconstituted to the original juice concentration.

Group 070	Fruit and vegetable juices
Code No.	<u>Commodity</u>
JF 0175	Group of fruit and vegetable, juices, (includes all commodities in this Group)
JF 0026	<b>Group of Assorted tropical and subtropical fruits – edible peel, juices</b> (see Group 005 (Code FT 0026) for species included in the group of Assorted tropical and subtropical fruits – edible peel)
JF 0030	<b>Group of Assorted tropical and subtropical fruits – inedible peel, juices</b> (see Group 006 (Code FI 0030) for species included in the group of Assorted tropical and subtropical fruits – inedible peel)
JF 0018	<b>Group of Berries and other small fruits, juices</b> (see Group 004 (Code FB 0018) for species included in the group of Berries and other small fruits)
JF 0001	Group of Citrus, juice (see Group 001 (Code FC 0001) for species in the group of citrus fruits)
JF 0009	<b>Group of Pome Fruit, juices</b> (see Group 002 (Code FT 0009) for species in the group of pome fruits)
JF 0012	<b>Group of Stone Fruit, juices</b> (see Group 003 (Code FS 0012) for species in the group of stone fruits)
JF 0226	Apple, juice
JF 1140	Black currant, juice
-	Cassis, see Black currant juice, JF 1140
JF 0577	Carrot, juice
JF 0665	Coconut, juice
JF 0265	Cranberry, juice
JF 0269	Grape, juice
JF 0203	Grapefruit, juice
JF 0204	Lemon, juice
JF 0345	Mango, juice
JF 0004	Orange, juice
JF 2001	Peach, juice
JF 0341	Pineapple, juice
JF 0355	Pomegranate, juice
JF 0448	Tomato, juice
JF 0432	Watermelon, juice

#### BY-PRODUCTS DERIVED FROM FRUIT AND VEGETABLE PROCESSING

Class D

Type 13 Derived edible products of plant origin

**Group 071 Group Letter Code AB** 

Group 071. The commodities of this Group are by-products derived from Fruit and Vegetable processing, e.g. by product from the extraction of oil (meal). The commodities are prepared, in general, in a dry form for wholesale or retail distribution.

<u>Portion of the commodity to which the MRL applies (and which is analysed):</u> Whole commodity. Residues in "wet" commodities of this Group should be expressed on a "dry-weight" basis; see explanation in Group 050, Legume animal feeds.

Group 071	By-products, derived from fruit and vegetable processing
Code No.	Commodity
AB 0226	Apple pomace, dried
AB 1230	Apple pomace, wet
AB 0001	Citrus pulp, dried
AB 0665	Coconut, meal
AB 0691	Cotton seed, meal
AB 2040	Cucurbita seed, meal
AB 3141	Gold of pleasure seed, meal
AB 0269	Grape pomace, dried
AB 3154	Hemp seed, meal
AB 0693	Linseed, meal
AB 0545	Lupin seed, meal
AB 0696	Palm kernel, meal
AB 0561	Pea, meal
AB 0697	Peanut, meal
AB 0698	Poppy seed, meal
AB 0699	Safflower seed, meal
AB 0700	Sesame seed, meal
AB 1265	Soya bean, meal
AB 0702	Sunflower seed, meal

#### **MANUFACTURED FOODS (SINGLE-INGREDIENT) OF PLANT ORIGIN**

Class D

#### Type 14 Manufactured Foods (single-ingredient) of plant origin

The term "single-ingredient manufactured food" means a "processed food" which consists of one identifiable food ingredient, with or without packing medium or minor ingredients, such as flavouring agents, spices and condiments, and which is normally pre-packaged and ready for consumption with or without cooking.

#### **Group 075 Reserved for future purposes**

#### **MANUFACTURED FOODS (MULTI-INGREDIENT) OF PLANT ORIGIN**

The term "multi-ingredient manufactured food" means a processed food, consisting of more than one major ingredient.

A multi-ingredient food consisting of ingredients of both plant and animal origin will be included in this type if the ingredients(s) of plant origin is (are) predominant.

#### Manufactured multi-ingredient cereal products

Class D

Type 15 Manufactured foods (multi-ingredient) of plant origin

**Group 078 Reserved for future purposes** 

The commodities of this Group are manufactured with several ingredients; products derived from cereal grains however form the major ingredient.

<u>Portion of the commodity to which the MRL applies (and which is analysed):</u> Whole commodity as prepared for wholesale or retail distribution.

#### MISCELLANEOUS PROCESSED FOODS OF PLANT ORIGIN

Class D

Type M Miscellaneous processed foods of plant origin

**Group 079 Group Letter Code MU** 

Miscellaneous commodities are those commodities which do not meet the criteria for crop grouping. These criteria include (1) commodity's similar potential for pesticide residues, (2) similar morphology, (3) similar production practices, growth habits, etc., (4) edible portion, (5) similar GAP for pesticides uses, (6) similar residue behavior, and (7) to provide flexibility for setting subgroup tolerances. Due to the heterogeneous nature of miscellaneous commodities, no representative commodity will be established for miscellaneous groups.

Portion of commodity to which the MRL applies (and which is analysed): Whole commodity as prepared

for wholesale or retail distribution.

Group 079 Miscellaneous processed foods of plant origin

Code No.CommodityMU 1100Hops, dried

Humulus lupulus L.

#### **APPENDIX II**

# OVERVIEW OF PROCESSED FOOD AND FEED COMMODITIES, WITH THE PROPOSED CLASSIFICATION IN CLASS C (FEED) AND CLASS D (FOOD) (Supporting information when submitting comments on the revision of Class C and Class D (Agenda Items 7a/b))

#### Remarks:

Fruit pomaces can have several uses in food production (e.g. pectins as a gelling agent for food, wine vinegar), the pomaces are classified in Class D (Processed food).

In several meals of oilseeds specific amino-acids and proteins are present, it makes them suitable as a source for nutritional additives in dietary items for human food. Therefor it is proposed to classify most of the meals of oilseeds in Class D.

Although for several oils the main purpose will be for feed (or even industrial uses), for most oils also an edible purpose is known. However this part is sometimes very small, it is proposed to keep the oils together in Class D.

The column Change of classification is only applicable for commodities that are already classified and not for new commodities
