NRV-NCD for EPA and DHA long chain omega-3 fatty acids (CXG 2-1985)

Comments of Ghana

GHANA

POSITION: Ghana supports the decision of the CCNFSDU to discontinue work on NRV-NCD for EPA and DHA long chain omega-3 fatty acids.

RATIONALE: The CCNFSDU noted that it was premature to set NRV-NCD for EPA and DHA at this point in light of the fact that the overall conclusion of the NUGAG analysis did not change even after including the data from three recently conducted trials. The work could be reconsidered when new body of evidence become available in the future.
