

**APPENDIX VIII**  
**PART I**

**REVISION OF THE CLASSIFICATION OF FOOD AND FEED:**  
**CLASS B: PRIMARY FOOD COMMODITIES OF ANIMAL ORIGIN**

**CLASS B                      PRIMARY FOOD COMMODITIES OF ANIMAL ORIGIN**

For the purpose of the Codex Alimentarius the term “primary food commodity” means the product in or nearly in its natural state, intended for processing into food for sale to the consumer or intended for sale to the consumer as a food without further processing. It includes irradiated primary food commodities and products after removal of certain parts of the animal tissue, e.g. bones.

Food commodities of animal origin are parts of domesticated or wild animals, including their eggs and mammary secretions.

**TYPE 6                      MAMMALIAN PRODUCTS**

Mammalian products are derived from the edible parts of various mammals, primarily herbivorous, slaughtered for food. These mammals are usually domesticated, or to a lesser extent obtained as game animals. This type does not include edible products from marine mammals, for which see Group 044.

**Muscle (from mammals other than marine mammals)**

**Class B**

|               |                           |                  |                             |
|---------------|---------------------------|------------------|-----------------------------|
| <b>Type 6</b> | <b>Mammalian products</b> | <b>Group 030</b> | <b>Group Letter Code MM</b> |
|---------------|---------------------------|------------------|-----------------------------|

Group 030. Muscle, including adhering fatty tissues such as intramuscular, intermuscular fat from animal carcasses or cuts of these as prepared for wholesale or retail distribution in a “fresh” state. The cuts offered to the consumer may include bones, connective tissues and tendons as well as nerves and lymph nodes.

The commodity description of “fresh” muscle includes muscle, which has been quick-frozen or quick-frozen and thawed.

The Group does not include edible offal as defined in Group 032.

Exposure to pesticides is through animal metabolism following oral intake with feed or through dermal intake as a consequence of external use of pesticides against ectoparasites.

The entire commodity except bones may be consumed.

Muscle is the skeletal tissue of an animal carcass or cuts of these tissues from an animal carcass that contains interstitial and intramuscular fat. The muscular tissue may also include bone, connective tissue, tendons as well as nerves and lymph nodes in natural portions. It does not include edible offal or trimmable fat.

Portion of the commodity to which the MRL applies (and which is analysed): **Whole commodity (without bones, edible offal and trimmable fat).**

Eight subgroups are defined:

Subgroup 030A Bovine muscle

Subgroup 030B Camelid muscle

Subgroup 030C Caprine muscle

Subgroup 030D Cervine muscle

Subgroup 030E Equine muscle

Subgroup 030F Ovine muscle

Subgroup 030G Swine muscle

Subgroup 030H Various other mammalian muscles

**Group 030 Muscle (from mammals other than marine mammals)****Code No.****Commodity**

MM 0095

**Group of muscle (from mammals other than marine mammals)**  
(includes all commodities in group 030)

**Subgroup 030A Bovine muscle****Code No.****Commodity**

MM 3700

**Subgroup of bovine muscle**  
(includes all commodities in subgroup 030A)

- **Ankole-watusi, muscle**, See cattle muscle, MM 0812

*Bos taurus*

- **AnBanteng, muscle** See cattle muscle, MM 0812

*Bos javanicus* d'Alton

**Mammalian fats (except fat from marine mammals)****Class B****Type 6                      Mammalian products                      Group 031                      Group Letter Code MF**

Group 031. Mammalian fats, excluding milk fats are derived from the fatty tissues of animals (not processed). For processed animal fats see Group 085.

Exposure to pesticides is through animal metabolism following oral intake with feed or through dermal intake as a consequence of external use of the pesticides against ectoparasites.

The entire commodity may be consumed.

Fat is the food-based tissue that is trimmable from an animal carcass or cuts from an animal carcass. It may include omental or perirenal fat. It does not include interstitial or intramuscular carcass fat or milk fat.

Portion of the commodity to which the MRL applies (and which is analysed): **Whole commodity.**

The scientific species names of the relevant animals are not repeated for this group of commodities. For these names see Group 030 Muscle (from mammals other than marine mammals).

Eight subgroups are defined

Subgroup 031A Bovine fat

Subgroup 031B Camelid fat

Subgroup 031C Caprine fat

Subgroup 031D Cervine fat

Subgroup 031E Equine fat

Subgroup 031F Ovine fat

Subgroup 031G Swine fat

Subgroup 031H Various other mammalian fats

**Edible offal (Mammalian)**

**Class B**

**Type 6                      Mammalian products                      Group 032                      Group Letter Code MO**

Group 032. Edible offal are those parts of an animal, apart from the skeletal muscle, fat and attached skin, that are considered fit for human consumption.

Exposure to pesticides is through animal metabolism following oral intake with feed or through dermal intake as a consequence of external use of pesticides on livestock animals against ectoparasites.

The entire commodity may be consumed.

Portion of the commodity to which the MRL applies (and which is analysed): **Whole commodity.**

The scientific species names of the relevant animals are not repeated for this group of commodities. For these names see Group 030 Muscle (from mammals other than marine mammals).

Eight subgroups are defined

Subgroup 032A    Bovine edible offal

Subgroup 032B    Camelid edible offal

Subgroup 032C    Caprine edible offal

Subgroup 032D    Cervine edible offal

Subgroup 032E    Equine edible offal

Subgroup 032F    Ovine edible offal

Subgroup 032G    Swine edible offal

Subgroup 032H    Various other mammalian edible offal

---

**Group 032                      Edible offal (Mammalian)**

---

**Code No.                      Commodity**

MO 0105                      **Group of Edible offal (Mammalian)**

(includes all commodities of group 032)

## Milks

### Class B

**Type 6                      Mammalian products                      Group 033                      Group Letter Code ML**

Group 033. Milks are the mammary secretions of various species of lactating herbivorous ruminant animals, usually domesticated.

In conformity with the Codex Alimentarius Code of Principles concerning Milk and Milk products the term “Milk” shall mean exclusively the normal mammary excretion obtained from one or more milkings without either addition thereto or extraction therefrom.

Notwithstanding the provisions in the preceding paragraph, “the term “Milk” may be used for milk treated without altering its composition, or for milk, the fat content of which has been standardised under domestic legislation”.

The entire commodity may be consumed.

Portion of the commodity to which the MRL applies (and which is analysed): **Whole commodity.**

The scientific species names of the relevant animals are not repeated for this group of commodities. For these names see Group 030 Muscle (from mammals other than marine mammals).

Eight subgroups are defined

Subgroup 033A Bovine milk

Subgroup 033B Camelid milk

Subgroup 033C Caprine milk

Subgroup 033D Cervine milk

Subgroup 033E Equine milk

Subgroup 033F Ovine milk

### **Group 033                      Milks**

**TYPE 7 AVIAN PRODUCTS****Class B**

**Type 7                      Avian products                      Group 036                      Group Letter Code PM**

**Avian muscle**

Muscle is the skeletal tissue of an animal carcass or cuts of these tissues from an animal carcass that contains interstitial and intramuscular fat. The muscular tissue may also include bone, connective tissue, tendons as well as nerves and lymph nodes in natural portions. It does not include edible offal or trimmable fat.

Exposure to pesticides may result from external treatment of animals or poultry houses or through animal metabolism following oral intake of pesticides with feed.

The entire product may be consumed.

Portion of the commodity to which the MRL applies (and which is analysed): **Whole commodity (without bones).**

**TYPE 8                      AQUATIC ANIMAL PRODUCTS**

Aquatic animal products re derived from the edible parts of various aquatic animals, usually wild, harvested for food.

**Group 040-042                      Fish**

Group 040-042 Fish are gilled, aquatic vertebrate and/or cartilaginous animals of various zoological families and species, usually wild, as caught and prepared for wholesale and retail distribution. Exposure to pesticides is through feed exposure, animal metabolism or through water pollution. The fleshy parts of the animals and, to a lesser extent, milt and roe are consumed.

Portion of the commodity to which the MRL applies (and which is analysed): **Whole commodity (edible portion).**

**Group 040 Freshwater fish**

**Class B**

**Type 8                      Aquatic animal products                      Group 040                      Group Letter Code WF**

The freshwater fishes generally remain lifelong, including the spawning period, in freshwater (lakes, ponds, rivers and brooks).

Several species of freshwater fish are domesticated and bred in fish farms. Exposure of the latter species to pesticides is mainly through compounded fish feed and can also be through water pollution.

Six subgroups of freshwater fishes are defined

Subgroup 040A Barbs

Subgroup 040B Carps

Subgroup 040C Catfishes

Subgroup 040D Perches

Subgroup 040E Tilapias

Subgroup 040F Various other freshwater fishes

Includes species belonging to the Salangidae family

WF 0911

**Silver fish**

*Lepisma saccharium*

#### **Group 041 Diadromous fish**

##### **Class B**

**Type 8**

**Aquatic animal products**

**Group 041**

**Group Letter Code WD**

The diadromous fishes in general migrate from the sea to brackish and/or freshwater and in the opposite direction.

The anadromous species spawn in freshwater (streams, small rivers and brooks) e.g. several salmon species, whereas eels spawn in the ocean. Some species, such as trout, are domesticated and do not migrate. They are bred in fish farms in ponds, mountain streams etc. The latter species especially may be exposed to pesticides through compounded fish feed and also through water pollution.

The fleshy parts of the animals and, to a lesser extent, roe and milt are consumed.

Portion of the commodity to which the MRL applies (and which is analysed): **Whole commodity (edible portion).**

Six subgroups of diadromous fish are defined:

|               |                                 |
|---------------|---------------------------------|

**Group 042 Marine fish**

**Class B**

**Type 8**

**Aquatic animal products**

**Group 042**

**Group Letter Code WS**

The marine fishes generally live in open seas. They are all or nearly all wild species, caught and prepared (often deep-frozen) for wholesale and retail distribution. Exposure to pesticides is mainly through water pollution and animal metabolism.

Especially the fleshy parts of the animals and to a lesser extent roe and milt are consumed.

Portion of the commodity to which the MRL applies (and which is analysed): **Whole commodity (edible portion).**

Seven subgroups are defined

Subgroup 042A Cod and Cod-like fishes

Subgroup 042B Flat-fishes

Subgroup 042C Mackerel and Mackerel-like fishes

Subgroup 042D Tunas and Bonitos

Subgroup 042E Herring like fishes

Subgroup 042F Sharks

Subgroup 042G Various other Marine fishes

| WS 0939         | <b>King mackerel</b>                                                                                   |

*Scomberomorus* spp., including *S. cavalla*;

*S. comerson*; *S. guttatus*

WS 0941

**Mackerel**

According to Codex Stan. 119-1981 Mackerel includes species of the following families and genera: *Scombridae*; *Scomber* spp.; *Rastrelliger* spp.

Such as: *Scomber scombrus* L.; *Scomber japonicus*; other *Scomber* spp.; *Rastrelliger kanagurta*; *R. brachysoma*; other *Rastrelliger* spp.

- **Mackerel, Atlantic**, see Mackerel, WS 0941

*Scomber Scombrus* L.

- **Mackerel, Chub**, see Mackerel, WS 0941

*Scomber japonicus*

- **Mackerel, Indian**, see Mackerel, WS 0941

*Rastrelliger kanagurta*

- **Mackerel, short**, see Mackerel, WS 0941

*Rastrelliger brachysoma*

WS 0910

**Pompano**

*Trachinotus ovatus* L.

- **Scad**, see Jack Mackerel, WS 0938

*Decapterus* spp.

- **Spanish mackerel**, see King mackerel, WS 0939

*Scomberomorus* spp.; among others *S. maculatus*;

*Sc. Tritor*; *Sc. niphonius*

- **Seerfish**, see King mackerel, WS 0939

*Scomberomorus* spp.

**Subgroup 042D Tunas and Bonitos**

**Code no.**

**Commodity**

WS 0132

**Subgroup of Tunas and Bonitos**

(includes all commodities in subgroup 042D)

- **Albacore**, see Tuna, WS 0952

*Thunnus alalunga* (Bonnaterre)

- **Bigeye tuna**, see Tuna, WS 0952

- **Blackfin tuna**, see Tuna, WS 0952

WS 0924

**Bonito**

According to Codex Stan. 70-1981 Bonito includes:

*Sarda sarda* (Bloch) ; *S. chiliensis* ; *S. orientalis* ; *S. velox*

- **Bonito, Atlantic**, see Bonito, WS0924

*Sarda sarda* (Bloch)

- **Bonito, eastern Pacific**, see Bonito, WS 0952

*Sarda chiliensis*

- **Longtail tuna**, see Tuna, Longtail
- **Northern bluefin tuna**, see Tuna, WS 0952

*Thunnus thynnus thynnus* L.

**Skipjack tuna**, see Tuna, Skipjack

WS 0952

**Tuna**

According to Codex Stan. 70-1981 Tuna includes:

*Thunnus alalunga* (Bonnaterre);

*Th. Albacares*; *Th. Atlanticus*;

*Th. Obesus*; *Th. thynnus maccoyii*;

*Th. thynnus orientalis*;

*Th. thynnus thunnus* L.; *Th. Tongoll*;

*Euthynnus affinus*;

*Eu. Alletteratus* ; *Eu. Lineatus* ;

*Eu. pelamis* L. ; syn: *Katsuwonus pelumis* L.

- **Tuna, bigeye**, see Tuna, WS 0952

*Thunnus obesus*

- **Tuna, blackfin**, see Tuna, WS 0952

*Thunnus atlanticus*

- **Tuna, bluefin**, see Tuna, WS 0952

*Thunnus thynnus* L.; *Th. Maccoyii*

WS0911

**Tuna, bullet**

*Auxis rochei* Risso

- **Tuna, longtail**, see Tuna, WS 0952

*Thunnus Tongoll*

- **Tuna, skipjack**, see Tuna, WS 0952

*Euthynnus pelamis* L. ;

syn: *Katsuwonis pelamis* L.

- **Tuna, southern bluefin**, see Tuna, WS 0952

*Thunnus thynnus maccoyii*

syn: *Thunnus maccoyii*;

- **Tuna, yellowfin**, see Tuna, WS 0952

*Thunnus albacares*

- **Yellowfin tuna**, see Tuna, WS 0952

**Herring, Pacific**, see Herring WS 0937

*Clupea pallasii*

WS 0942

**Menhaden**

*Brevoortia* spp.

-

**Sardinella**

see-Sardines and Sardine-type fishes, WS 0130

*Sardinella* spp

WS 0130

**Sardines and Sardine-type fishes**

According to Codex Stan. 94-1981 small fishes of the following species:

*Sardina pilchardus* (Walbaum) (European Sardine);

*Sardinops melanosticta*;

*S. neopilchardus*; *S. ocellata*;

*S. sagax*; *S. caerulea* (Pilchards);

*Sardinella aurita* Valenciennes; syn: *S. anchovia*;

*S. brasiliensis*; *S. maderensis* (Sardinella's or oil-sardines);

*Clupea harengus* L. (Atlantic herring, small fishes);

*Clupea antipodum* ; *C. bassensus*; *C. fuengensis* ;

*Sprattus sprattus* (European sprat)

*Sprattus sprattus phalericus* (Risso), Syn: *Clupea sprattus* L. (Sprat) ;

*Hyperlophus vittatus*;

*Nematolosa vlaminghi* ;

*Etrumeus microps*;

*Ethmidium maculatus* ;

*Engraulis anchoita* (Argentine anchovy) ;

*E. ringens* (Peruvian anchovy)

- **Sardine, European**  
see-Sardines and Sardine-type fishes, WS 0130  
*Sardina pilchardus* Walbaum
- **Sardine, oil sardine**, see Sardines and Sardine type fishes, WS 0130  
*Sardinella* spp.

#### **Fish roe (including milt = soft roe) and edible offal of fish**

##### **Class B**

**Type 8                      Aquatic animal products                      Group 043**

**Group Letter Code WR for the roe**

**Group Letter Code WL for liver and other edible fish offal**

Fish roes are the edible reproductive bodies of several species of fish. Of some of these only the “hard roe”, the female reproductive body, is used whereas both the “hard” and “soft” roe (milt) of other species is marketed.

The term roe used in the commodity description includes if relevant both types of roe.

The liver of some species is used as such for human consumption or for production of liver oils (e.g. cod liver oil).

Exposure to pesticides is through animal metabolism.

**Portion of the commodity to which the MRL applies (and which is analysed): Whole commodity.**

See for scientific species or family names and subgroup description Group 040-042. The relevant group is indicated after the commodity name with (f) freshwater fishes, (d) diadromous fishes and (m) marine fishes.

Group 043 is divided in two subgroups:

Subgroup 043A    Fish roe (including milt= soft roe)

Subgroup 043B    Edible offal of fish

**Group 043 Fish roe (including milt = soft roe) and edible offal of fish**

- **Rock lobster**, see Lobsters, WC 0978  
*Jasus* spp. (family *Palinuridae*)
- WC 0979 **Shrimps or Prawns**, see note 2  
According to Codex Stan. 37-1981 and 92-1981 include spp. of the families *Crangonidae*  
*Palaemonidae*, see note 3, *Pandalidae* and *Penaidae*
- **Shrimp, common**, see Shrimps or Prawns, WC 0979  
*Crangon crangon* L. ;  
syn: *C. vulgaris* Fabr. (Europe, Mediterranean)
- **Shrimp, deepwater rose**, see Shrimps or Prawns, , WC 0979  
*Parapenaeus longirostris* Lucas (Atlantic)
- WS 0974 **Shrimp, mantis**  
Species belonging to the order of Stomatopoda
- **Shrimp, Metapenaeus**, see Shrimps or Prawns, WC 0979  
*Metapenaeus* spp.
- **Shrimp, northern brown**, see Shrimps or Prawns, WC 0979  
*Penaeus aztecus* (USA)
- **Shrimp, northern pink**, see Shrimps or Prawns, WC 0979  
*Penaeus notialis*;  
syn: *P. duorarum* (USA, West Africa)
- **Shrimp, northern white**, see Shrimps or Prawns, WC 0979  
*Penaeus sertiferus* (USA)

- **Shrimp, white**, see Shrimps or Prawns , WC 0979  
*Penaeus vannamei* Boone
  - **Slipper lobster**, see Lobsters, WC 0978  
spp. of the family *Scyllaridae*
  - **Spiny lobster**, see Lobsters, WC 0978  
*Palinurus vulgaris* Latreille, other *Palinurus* spp.
- WC 0975 **Squat lobster**  
*Cervimunida* spp.

**Note 1:** In some countries, species such as the Norway lobster (*Nephrops norvegicus* L.) are included in the commodity “Prawns” with some qualifying designation, such as Dublin Bay Prawn or Prawn of Bantry Bay (both Ireland). The Codex Stan. 92-1981 on Quick Frozen Shrimps and Prawns does not prevent this practice, provided that the designation on the label ensures that the consumer will not be misled.

**Note 2:** There is no clear-cut distinction between Shrimps and Prawns. In several countries the commodity name Shrimps is used for the small species whereas the slightly larger ones are called Prawns. However, a species marked in certain regions of the world as “Prawn” may be called in the local English language in other areas a shrimp and visa versa, e.g., *Pandalus borcalis* is called Northern prawn or Deepwater prawn in the United Kingdom and the same species is named Pink shrimp in Canada. In Australia only the name Prawn is used for animals included in this commodity.

**Note 3:** Not including the freshwater species of the *Palaemonidae*.

## TYPE 9 AMPHIBIANS AND REPTILES

### Frogs, lizards, snakes and turtles

#### Class B

#### Type 9 Amphibians and reptiles Group 046 Group Letter Code AR

Frog, lizard, snake, crocodile and turtle products are the edible parts from various animal species of the zoological classes Amphibia and Reptilia, usually wild, harvested for food. Some frog species are cultivated in a few European and Asian countries and to a small extent in the USA and marked in the form of deep-frozen frog legs. The wild species are marketed in the same manner.

A few turtle species are raised from eggs or hatchlings in some tropical countries, especially the Green Turtle.

Exposure to pesticides is through animal metabolism.

The entire product, except the bones and the bony or horny outer shell (turtles) or venom glands, may be consumed.

Portion of the commodity to which the MRL applies (and which is analysed): **Whole commodity as marketed without bones or the outer shell or venom glands.**

**TYPE 10 INVERTEBRATE ANIMALS**

Invertebrate animals are cold-blooded animals without a vertebral column, or spine. Invertebrate animals can live on land or in water.

**Molluscs and various other invertebrate animals****Class B****Type 10 Invertebrate animals Group 047 Group Letter Code IM**

Molluscs are aquatic or land animals of various species, wild or cultivated, which have an inedible outer or inner shell.

The edible aquatic Molluscs live mainly in brackish water or in the sea; several species are cultivated. A few edible species of land snails are cultivated.

Exposure to pesticides is through animal metabolism: the aquatic species also through water contamination.

The entire commodity except the outer or inner shell may be consumed.

Portion of the commodity to which the MRL applies (and which is analysed): **Whole commodity after removal of shell.**

Four subgroups are defined:

|               |                           |
|---------------|---------------------------|

**Insects and spiders****Class B****Type 10                      Invertebrate animals Group 048                      Group Letter Code IN**

Insects are wild-harvested, semi-domesticated or farmed. Several stages of the insects and spiders can be consumed: eggs, caterpillars, puppets and adults. Exposure to pesticides is through animal metabolism

Edible insects and spiders are rich in protein (dry matter), dietary fibre and beneficial fatty acids.

Insects have a exoskeleton made of chitin. The insect body consists of three parts; the head, thorax and abdomen, and insects contain three pairs of jointed legs, compound eyes and one pair of antennae.

Spiders have an exoskeleton. Their body is organized into two tagmata, called the prosoma, or cephalothorax, and the opisthosoma, or abdomen. Almost all adult arachnids have eight legs, however, mites are variable: as well as eight, there are adult mites with six or even four legs

The entire commodity may be consumed.

Portion of the commodity to which the MRL applies (and which is analysed): **Whole commodity as prepared for wholesale or retail distribution.**

#### **TYPE 10a MISCELLANEOUS PRIMARY FOOD COMMODITIES OF ANIMAL ORIGIN**

Miscellaneous commodities are those commodities which do not meet the criteria for crop grouping. These criteria include (1) commodity's similar potential for pesticide residues, (2) similar morphology, (3) similar production practices, growth habits, etc., (4) edible portion, (5) similar GAP for pesticides uses, (6) similar residue behavior, and (7) to provide flexibility for setting subgroup tolerances. Due to the heterogeneous nature of miscellaneous commodities, no representative commodity will be established for miscellaneous groups.

Portion of commodity to which the MRL applies (and which is analysed): **Whole commodity as prepared for wholesale or retail distribution.**

#### **Class B**

**MU 1070      Honey**

According to Codex Stan. 12-1981<sup>1</sup> honey is the natural sweet substance produced by honey bees from the nectar of plants or from secretions of living parts of plants or excretions of plant sucking insects on the living parts of plants, which the bees collect, transform by combining with specific substances of their own, deposit, dehydrate, store and leave in the honey comb to ripen and mature.

**MU 1071      Honeycomb****MU 1072      Pollen, bee**

*alternative name bee bread*

**MU 1073      Propolis**

*alternative name bee glue*

**MU 1074      Royal jelly**

TABLE 9 ON EXAMPLES OF SELECTION OF REPRESENTATIVE COMMODITIES

(For inclusion in the *Principles and Guidance for the Selection of Representative Commodities for the Extrapolation of Maximum Residue Limits for Pesticides for Commodity Groups (CXG 84-2012)*)

### Class B Primary food commodities of animal origin

Type 6 Mammalian products

Type 7 Avian products

Type 8 Aquatic animal products

Type 9 Amphibians and reptiles

Type 10 Invertebrate animals

#### Type 10a Miscellaneous primary food commodities of animal origin

| Codex Group / Subgroup              | Examples of Representative Commodities <sup>1)</sup>                        | Extrapolation to the following commodities                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| Group 049<br>Miscellaneous primary food commodities of animal origin | Honey and honeycomb                                  | <u>Group of Miscellaneous primary food commodities of animal origin</u> : Honey; Honeycomb; Pollen, bee; Propolis; Royal jelly                                                           |

<sup>1)</sup> Alternative representative commodities may be selected based on documented regional/country differences in dietary consumption and/or areas of production.

<sup>2)</sup> It is not possible to set a group CXL for this group because of the broad diversity of commodities. For extrapolation of commodities, extrapolation options in the OECD guideline can also be considered.

**REVISION OF THE CLASSIFICATION OF FOOD AND FEED:  
CLASS E: PROCESSED FOODS OF ANIMAL ORIGIN**

**CLASS E                      PROCESSED FOODS OF ANIMAL ORIGIN**

Definition, see Class D.

**TYPE 16                      SECONDARY FOOD COMMODITIES OF ANIMAL ORIGIN**

The term “secondary food commodity” means a “primary food commodity” which has undergone simple processing, such as removal of certain portions, drying, and comminution, which do not basically alter the composition or identity of the commodity.

Secondary food commodities may be processed further, or used as ingredients in the manufacture of food, or sold directly to the consumer.

This type of processed food includes groups of processed primary food commodities of animal origin which have undergone simple processing, such as processed mammalian muscle and poultry muscle, fishes and other aquatic animals, e.g. dried muscle, dried fish.

**Dried muscle and dried fish products**

Class E

**Type 16                      Secondary food commodities of animal origin**

**Group 080                      Group Letter Code MD**

Group 080. Dried muscle and dried fish products, includes natural or artificial dried muscle products and dried fish, marine or freshwater. Most of the dried fishes are naturally dried (wind and sun). For convenience other marine animals, whether or not fishes or Crustaceans, are classified in this group.

The entire commodity may be consumed, either as such or after processing (e.g. dried fish).

Portion of commodity to which the MRL applies (and which is analysed): **Whole commodity as prepared for wholesale or retail distribution.**

This Group is divided into 3 subgroups:

080A    Dried muscle (from mammals other than marine mammals)

080B    Dried fish

080C    Dried Echinoderms

**Group 080                      Dried muscle, fish products and echinoderms**

---

**Subgroup 080A Dried Muscle (from mammals other than marine mammals)**

---

Code No.

Commodity

MD 0095

**Subgroup of dried muscle (from mammals other than marine mammals)**

#### Secondary milk products

#### Class E

#### **Type 16                      Secondary Food Commodities of animal origin    Group 082                      Group Letter Code LS**

Group 082, secondary milk products, includes milk products which have undergone simple processing such as removal or part removal of certain ingredients e.g. water, milk fat etc. The group and the commodities therein will only be used for pesticides which are not partitioned exclusively or nearly exclusively into the milk fat.

The recommended system for expressing the MRLs for the fat-soluble pesticides in milk and milk products is explained in the introduction to CAC/Vol. XIII-Ed. 2.

The group includes among others the following commodities as defined in the relevant Codex Standards, see CAC/Vol. XVI-Ed.1 (1984). The reference no. of the standard is indicated between brackets.

Milk powders (whole, skimmed and partly skimmed) (Standard A-5 1971); evaporated milks (whole, skimmed) (Standard A-3 1971); skimmed milk.

Portion of the commodity to which the MRL applies (and which is analysed): **Whole commodity.**

|-----------------|-----------------------------------------|
| LS 0106         | <b>Group of Secondary Milk Products</b> |

#### Class E

#### **Type 16                      Secondary invertebrate food commodities of animal origin**

#### **Group 083    Group Letter Code IV**

Group 083. Dried invertebrate products, including dried bivalves, cephalopods and insect products.

The entire commodity may be consumed, either as such or after processing (e.g. dried).

Portion of commodity to which the MRL applies (and which is analysed): **Whole commodity as prepared for wholesale or retail distribution.**

**This Group is divided into 6 subgroups:**

|      |                 |
|------|-----------------|
| 083A | Bivalves, dried |
|------|-----------------|

|      |                                  |
|------|----------------------------------|
| 083B | Cephalopods, dried               |
| 083C | Insects, dried                   |
| 083D | Crustaceans, dried               |
| 083E | Sea and freshwater snails, dried |
| 083F | Amphibiens and reptiles, dried   |

**TYPE 17 DERIVED EDIBLE PRODUCTS OF ANIMAL ORIGIN**

The term “Derived edible products” means foods or edible substances isolated from primary food commodities or raw agricultural commodities not intended for human consumption as such, using physical, biological and chemical processes.

This type includes processed (rendered or extracted, possibly refined and/or clarified) fats from mammals, including aquatic mammals, poultry and aquatic organisms such as fishes.

**Crustaceans, processed**
Class E
**Type 17 Derived edible products of animal origin**
**Group 084 Group Letter Code SC**

Group 084, Crustaceans, processed. Crustaceans are processed to a large extent before entering the national or international trade channels.

Crabs, lobsters and shrimps or prawns are in general cooked directly after catching. Thereafter either the animals are deep-frozen with or without shell, or the muscle without shell is canned, with or without a packing medium. The latter may consist of water, salt, lemon juice and sugars.

Shrimps or prawns may also be “parboiled” and thereafter deep-frozen.

According to the relevant Codex Standards, namely 92-1981, and 95-1981 “cooked” means heated for a period of time such that the thermal centre reaches a temperature adequate to coagulate the protein and “parboiled” means heated for a period of such time that the surface of the product reaches a temperature adequate to coagulate the protein at the surface but inadequate to coagulate the protein at the thermal centre.

The cooked commodities are in general subjected to deep-freezing directly after cooking or the cooking is part of the canning process.

The designation cooked after the commodity may include any of the processes mentioned except the parboiled and deep-frozen shrimps or prawns.

The entire commodity except the shell may be consumed.

Portion of the commodity to which the MRL applies (and which is analysed): **Whole commodity (especially with the small sized species) or the cooked muscle without shell as prepared for wholesale or retail distribution.**

For commodity description and scientific family or species names see Group 045, Crustaceans.

**Group 085      Animal fats, processed**

---

**Animal fats, processed**

Class E

**Type 17      Derived edible products of animal origin**

**Group 085 Group Letter Code FA**

The group 085, processed animal fats, includes rendered or extracted (possibly refined and/or clarified) fats from land and aquatic mammals and poultry and fats and oils derived from fishes.

Portion of the commodity to which the MRL applies (and which is analysed): **Whole commodity as prepared for wholesale or retail distribution.**

This Group is divided into 4 subgroups:

- 085A Processed Fats from mammals (other than marine mammals)
- 085B Processed Fats from Marine mammals
- 085C Processed Fats from Avian species
- 085D Processed Fats from Fish species

---

**Group 087      Derives milk products**

---

**Derived milk products**

Class E

**Type 17      Derived Edible Products of Animal Origin**

**Group 087      Group Letter Code LD**

---

Group 087: Derived milk products, includes food or edible substances isolated from the primary food commodity cattle milk, or milks from other mammals, using physical, biological and chemical processes. This group and the commodities therein will only be used if necessary for pesticides which are not partitioned exclusively or nearly exclusively into the milk fat. For further explanation, see Group 082.

This group include among others the following food commodities, as defined in the relevant Codex Standards, see CAC/Vol. XXI, Ed-1 (1984): Butter, whey butter, both in Standard A-1 (1971): Butteroil, anhydrous butteroil, both in Standard A-2 (1973): Cream, Standard A-9 (1976): Cream powders (half cream, high fat), Standard A-10 (1971): Edible acid casein, Standard A-12 (1976): Edible caseinates, Standard A-13 (1976).

Portion of the commodity to which the MRL applies (and which is analysed): **Whole commodity.**

#### **TYPE 18                      MANUFACTURED FOOD (SINGLE-INGREDIENT) OF ANIMAL ORIGIN**

The term “single ingredient manufactured food” means a processed food which consists of one identifiable food ingredient, with or without packing medium or minor ingredients such as flavouring agents, spices and condiments, and which is normally pre-packaged and ready for consumption, with or without cooking.

##### **Manufactured milk products (single ingredient)**

Class E

#### **Type 18                      Manufactured Food (single ingredient) of animal origin**

##### **Group 090    Group Letter Code LI**

---

Group 090 and the commodities therein will only be used, if the necessity arises, for pesticides which are not partitioned exclusively or nearly exclusively into the milk fat. For further explanation see Group 082.

This group include among others the following food commodities, as defined in the relevant Codex Standards (indicated between brackets): Yoghurt (Codex Standard A-11(a) 1975): Cheeses, individually named (Codex Standard A-6 1978 and Standard C-1 (1966-1978).

Portion of the commodity to which the MRL applies (and which is analysed): **Whole commodity as prepared for wholesale or retail distribution.**

#### **TYPE 19                      MANUFACTURED FOOD (MULTI-INGREDIENT) OF ANIMAL ORIGIN**

The term “multi-ingredient manufactured food” means a processed food consisting of more than one major ingredient.

A multi-ingredient food consisting of ingredients of both animal and plant origin will be included in this type if the ingredient(s) of animal origin is (are) predominant.

##### **Manufactured milk products (multi-ingredient)**

Class E

#### **Type 19                      Manufactured food (multi-ingredient) of animal origin**

##### **Group 092    Group Letter Code LM**

---

Group 092 and the commodities therein will only be used in the classification if necessary for pesticides which are not partitioned exclusively or nearly exclusively into the milk fat. For further explanation see Group 082.

This group includes among others the following commodities, as defined in the relevant Codex Standards, see CAC/Vol XVI, Ed-1 (1984): Processed Cheese products, Codex Standard A-8(a) and A-8(b) (1978): Processed Cheese preparations, Standard A-8(c) (1978): Flavoured yoghurt, Standard A-11(b) (1976): Sweetened condensed milk, Standard A-4 (1971).

Portion of the commodity to which the MRL applies (and which is analysed): **Whole commodity as prepared for wholesale or retail distribution.**

**PART IV****TABLE 10 ON EXAMPLES OF SELECTION OF REPRESENTATIVE COMMODITIES**

(For inclusion in the *Principles and Guidance for the Selection of Representative Commodities for the Extrapolation of Maximum Residue Limits for Pesticides for Commodity Groups (CXG 84-2012)*)

**Class E, Processed foods of animal origin****Type 16 Secondary food commodities of animal origin****Type 17 Derived edible products of animal origin****Type 18 Manufactured Food (single ingredient) of animal origin****Type 19 Manufactured food (multi-ingredient of animal origin**

(For comments)

| Group 092 Manufactured<br>food (multi-ingredient) of<br>animal origin       | 2)                                                   | --                                                                                                                                                                                                                                                                                                                                                          |

<sup>1)</sup> Alternative representative commodities may be selected based on documented regional/country differences in dietary consumption and/or areas of production.

<sup>2)</sup> It is not possible to set a group CXL for this group because of the broad diversity of commodities. However, when a group contains a number of processed commodities originating from raw commodities from one subgroup in Class B (primary food commodities of animal origin), the representative commodity from that subgroup in Class B can be used as a representative crop for the corresponding commodities in processed form. For extrapolation of commodities, extrapolation options in the OECD guideline can also be considered.

**PART V****PORTION OF THE COMMODITY TO WHICH THE MRLS APPLY, AND WHICH IS ANALYZED FOR GROUP 006 ASSORTED TROPICAL AND SUB-TROPICAL FRUITS - INEDIBLE PEEL AND GROUP 023 OILSEEDS AND OILFRUITS****Group 006 Assorted tropical and sub-tropical fruits - inedible peel**

---

Portion of the commodity to which the MRL applies (and which is analysed): Whole fruit unless qualified: e.g.

- Banana after removal of crown tissue and stalks.
- Pineapple after removal of crown.
- Avocado, mangos, and similar fruit with hard seeds: Whole commodity after removal of stone but residue calculated and expressed on whole fruit.

**Group 023 Oilseeds and oilfruits**

---

Portion of the commodity to which the MRL applies (and which is analysed):

- Oilseeds: Unless otherwise specified, seed or kernels, with shell or husk.
- Peanuts: Kernels
- Castor beans: Whole product after removal of capsules
- Cotton seeds: Undelinted
- Oilfruits: Whole commodity

**CONSEQUENTIAL AMENDMENT TO THE CLASSIFICATION OF FOOD AND FEED  
(CXA4 – 1989)**

**CLASS A – PROCESSED FOODS OF PLANT ORIGIN**

Inclusion of additional commodities:

|                              |
|------------------------------|
| <b>VR 2952 Pseudoginseng</b> |
|------------------------------|

**CLASS D – DRIED VEGETABLES**

Inclusion of additional commodities:

|                                  |
|----------------------------------|
| <b>DV 2950 Pencil yam, dried</b> |
|----------------------------------|

|                                     |
|-------------------------------------|
| <b>DV 2952 Pseudoginseng, dried</b> |
|-------------------------------------|

**CLASS D – TEAS**

Inclusion of additional commodities:

|                               |
|-------------------------------|
| <b>DT 0604 Ginseng, dried</b> |
|-------------------------------|
