

WECAFC-FIRMS Data workshop
FAO sub-Regional Office for the Caribbean – Christ Church, Barbados, 19-21 January 2016
Working Group TORs for IT system

The IT working group should provide recommendations for the management and maintenance of the Regional DataBase (RDB);

In particular, the following domains should be discussed:

- RDB Specifications: list defects, improvements and new features to be implemented, define priorities and ensure that these issues are addressed by the development team
- Technologies: provides recommendations on the technologies to be used for the RDB developments.
- Development and implementation: the WG will act as a steering committee with regular meetings to follow-up RDB development and implementation; ensure all functionalities are implemented and test; provide guidance when required
- Hosting: provide recommendations on hosting best solution and follow-up hosting solution
- Maintenance: ensure that RDB is maintained

Expected outputs

- RDB specifications including technical recommendations are drafted, validated and implemented;
- Development and implementation roadmap / Deliverable validation;
- Hosting scheme is proposed and validated;
- Maintenance scheme is proposed and validated;
