WESTERN CENTRAL ATLANTIC FISHERY COMMISSION (WECAFC)

SEVENTEENTH SESSION

Miami, United States of America, 15-18 July 2019

Draft Programme of Work of WECAFC (2019 - 2020)

Suggested Action by the Commission

The Commission is invited to:

- (i) review, amend as appropriate, and endorse the draft programme of work of WECAFC (2019-2020), a collaborative framework for implementation with partners
- (ii) provide guidance on the development of an eventual (new) strategic plan, in light of the WECAFC transformation process launched.

Introduction

- 1. The background paper on "Intersessional activities and matters referred to the attention of the Commission Intersessional activities - review of the WECAFC Work Programme 2019-2020" (WECAFC/XVII/2019/5 showed progress made in the last intersessional period. The document showed that the large majority (over 85 percent) of the approved Programme of Work 2016-2018 was actually implemented, with a remarkably active consultations with the working groups, which subsequently triggered more meetings of the Scientific Advisory Group (SAG). Overall, the last Programme of Work seems to have been realistic and achievable. The main contributions to the implementation of the Commission's Programme of Work were received from various Trust Fund programmes, FAO's Technical Cooperation Programme (TCP) and FAO's regular programme. Joint activities with Caribbean Fishery Management Council (CFMC), Convention on International Trade in Endangered Species (CITES), National Oceanic and Atmospheric Administration (NOAA), Caribbean Regional Fisheries Mechanism (CRFM), Organización del Sector Pesquero y Acuícola del Istmo Centroamericano (OSPESCA), Gulf and Caribbean Fisheries Institute (GCFI), International Game Fish Association (IGFA), Institut Français de Recherche pour l'Exploitation de la Mer (IFREMER), Inter-American Development Bank (IADB), European Union (EU), Global Environment Facility (GEF) and the World Bank further contributed to the implementation of a range activities of the joint Working Groups.
- 2. The Working Groups continued to be effective tools for collaboration between members and relevant institutions. Major achievements have been reached and substantial progress has been made. Despite an increased shared responsibility in the convening role by the main regional fishery bodies (RFBs), i.e. CRFM and OSPESCA, support to the initiation and implementation of the activities remains heavily dependent on the WECAFC Secretariat.
- 3. The background information on the preparation process for the Programme of Work, detailing responsibilities, coordination and management aspects, funding and related arrangements, implementation of the technical work programme, and linkages with regional partners was presented in a specific document of the WECAFC 15 and can be consulted at http://www.fao.org/fishery/docs/DOCUMENT/wecafc/15thsess/14e.pdf for further clarification
- 4. The above indicated piece of information along with the WECAFC 15 approved Strategic Plan 2014-2020, and the endorsed Programme of Work (2016-2017) as provided in Appendix D of the Report of the 16th Session¹ remains the basis for this updated (draft) Work Programme for 2019-2020.
- 5. The SAG, at its 10th session, held electronically on 4 June 2019, reviewed and approved the draft work programme with the following remarks:

To indicate the collaborative nature of the implementation framework of the workplan and budget Make the relevant amendments regarding the existing Sharks and Rays working group and Billfish management plan

¹ The report of the 16th session can be found at: http://www.fao.org/3/a-i6031t.pdf

Draft Work Programme for the period 2019-2020

Technical Focus Area 1. Improve regional fisheries governance

Goal: Improved regional governance of the marine fisheries and aquaculture sector for more effective conservation, management and development and sustainable use of the living marine resources in the area of competence of WECAFC.

Management Focus Area 4: Create an enabling environment within the WECAFC Secretariat to support the achievement of the goals and objective of the Commission.

Goals:

- 1) To deliver high-quality administrative, technical, logistical and scientific support to the Commission, Scientific Advisory Group and the Working Groups.
- 2) To facilitate communication and collaboration among Members and other stakeholders through effective dissemination of information, education, outreach and capacity building.
