

## **CFS 47 - BRAZIL**

### IV) CFS Multi-Year Programme of Work (MYPow) 2020-2023

Thank you, Mr Chair,

Nutrition, and its universal realization through food security and the right to adequate food is at the core of the mandate of the CFS. In addition, it is the main goal of all the policy convergence processes we undertake in our Committee on World Food Security.

To achieve that, the ambitious nature of this multi-year program of work 2020-2023 – although straining much of the capacity of some delegations, especially those of developing countries – shows the importance attributed to food security and nutrition by all members of the CFS.

Nevertheless, the CFS workload – especially in light of the extraordinary sanitary conditions we live in – should be carried on taking into account the capabilities of the Representations in Rome, especially those of smaller delegations and of developing countries, and the general calendar of the RBAs.

Mr Chair,

As we approach the middle term of the United Nations Decade of Action on Nutrition, it is never excessive to recall that nutrition is the main and ultimate goal of all activities and policy products of the CFS. Although combatting malnutrition is a multidimensional work, we must have our goal focused and clear: to end all forms of malnutrition for all.

With those comments, Brazil endorses the MYPow Rolling Section.

Thank you very much.
