

## SE07: Empowering Women in Agriculture–Entrepreneurs, Food Systems Leaders, and Agents of Change

**REGISTER NOW**

**Organized by:** Mexico; Indonesia; Republic of Korea; Türkiye; Australia

### Description

This side event delves into the critical role women play in achieving more equitable and sustainable food systems. We will explore how empowering women as agricultural entrepreneurs and leaders drives positive change, as promoted by different CFS policy documents.

Through engaging with diverse CFS stakeholders, the event will also highlight actions and strategies to promote gender inclusion in food systems, drawing on the experiences of MIKTA countries. By fostering collaboration, we aim to inspire action to unlock women's full potential for improved nutrition, food security, and overall food systems transformation.
