	<p>oversight. He is a member of the Board for the Greenbelt Authority, a Malawi Government Institution mandated to spearhead large scale irrigation investment in Malawi. He also chairs the Advisory Board for MwAPATA Institute, a local agriculture policy think tank.</p>
	<p>Stefanos Fotiou is an expert on environment and sustainable development with 30 years of experience in the United Nations system, private sector and research organisations. He currently serves as Director of the Office of Sustainable Development Goals in the Food and Agriculture Organisation of the United Nations (FAO) as well as Director of the UN Food Systems Coordination Hub, an inter-Agency unit of the UN established at the request of the UN Secretary General. In these roles, Stefanos provides strategic leadership and oversees coordination mechanism to support countries on developing and implementing SDGs based agrifood transformations. One of his latest achievement is leading the successful organization of the UN Food Systems Summit +2 Stocktaking that was characterised by many participants as the “UN Assembly for Food Systems”</p>
	<p>Andrew Bovarnick is the Global Head of the Food Systems Team at UNDP.</p> <p>Throughout his career he has been at the cutting edge of practical innovation and has initiated and directed global initiatives around major levers of change in food systems focused on deep collaboration, mindset shifts and more recently power dynamics. Andrew also participates on several advisory boards of sustainability and research programmes.</p> <p>Since 2010 Andrew has grown UNDP’s global support on food and agricultural commodity systems, initiating first the Green Commodities Programme, then developing UNDPs first food systems strategy, establishing a global team and now global practice. This work is grounded in a decade at UNDP focused on nature and protected</p>

	<p>areas during which Andrew was lead natural resource economist.</p>
	<p>Dr Rachel Waterhouse has a strong history of engagement in land, food systems transformation and international development. She currently leads the Resilient Ocean-Coasts, Water and Land-Use Systems (ROWLS) team in the Climate and Environment division of UK Government's Foreign, Commonwealth and Development Office; holding previous portfolios on forests, climate resilience and human development. Rachel spearheaded the 'Transition to Sustainable Agriculture' campaign for the UK's COP26 Presidency, when she helped design and launch the Global Agriculture Policy Dialogue as a peer platform for policy-makers to share experience and build ambition on policy action for sustainable food systems. Before moving back to London, Rachel worked extensively overseas, particularly in Southern Africa. Her doctoral research explored the interface between gender and land rights in Mozambique.</p>
