

UNSCN input on the Co-Facilitator's proposal – Zero Draft

At this stage, we do not have any specific inputs to the text. Our contribution aims at providing some 'food for thought' for the formulation of the Strategic Objectives for the next CFS MYPOW. We do believe that the strength of the CFS lies in its multistakeholder platform and the individual stakeholders who engage with CFS, share and use its products and communicate about it. Thus, we consider the current SO1 – Platform more as "internal" objective (or a mechanism or tool) that, if attained, will support and contribute to the achievement of the other two 'external' objectives. We think that SO2 and SO3 state what CFS would like to achieve while SO1 – PLATFORM "Serve as the world-leading and foremost inclusive platform to develop global policy messages on FSN", emphasizes the characteristics and strengths of the CFS as a committee.
