

## Workstreams and Activities Updates

**\*\*\*These updates cover the period since the 10 September 2021 CFS Bureau Meeting\*\*\***

---

### **1. Gender Equality and Women's and Girls' Empowerment**

#### **Regional consultations**

All six planned regional consultations to discuss the *CFS Voluntary Guidelines on Gender Equality and Women's and Girls' Empowerment in the Context of Food Security and Nutrition* were successfully organized. The objective of the consultations was to obtain inputs from CFS stakeholders to align the Guidelines with regional and national priorities and needs. The discussions have been summarized in the Co-Chairs' Summaries that are being posted when ready on the dedicated [webpage](#) of the CFS website.

#### **Electronic consultation**

All CFS stakeholders have been invited to provide their comments on the Voluntary Guidelines electronically via the FAO Global Forum on Food Security and Nutrition. Comments will be accepted until 23 November 2021.

#### **First Draft of the Guidelines**

The inputs obtained in the regional and electronic consultations will inform the preparation of the First Draft of the Guidelines to be shared with the OEWG on 17 December.

### **2. Food systems and Nutrition**

A session on the uptake of the Voluntary Guidelines on Food Systems and Nutrition (VGFSN) was held at CFS 49 to discuss and mobilize political commitments by governments, donors, civil society, private sector, and the UN system for further promotion and implementation of the Voluntary Guidelines. The session brought together different food systems and nutrition actors who shared plans and ideas concerning uptake of the Voluntary Guidelines, their potential use at regional, national, and local levels, and the role of different stakeholders and coordination mechanisms in promoting their uptake.

A number of concrete activities being developed in support of the uptake of the VGFSN were presented. These included, among others, projects funded by the Swiss Agency for Development and Cooperation such as the [one being implemented by John Hopkins University, CIAT, Rikolto Honduras and the International Institute of Rural Reconstruction](#)). In addition an [evidence platform for agri-food systems and nutrition](#) that was developed by FAO was launched. The platform links the VGFSN recommendations with existing evidence to support governments and stakeholders in the implementation of the CFS Voluntary Guidelines on Food Systems and Nutrition.

A recording of the session is available [here](#).

**3. Youth**

The policy convergence process on this workstream kicked off at a [CFS 49 session on 13 October](#). This session was based on the HLPE Report on [Promoting Youth Engagement and Employment in Agriculture and Food Systems](#) (available in all UN languages). The inclusive discussion highlighted the key role played by youth in building the food systems of the future.

In line with the [workplan and timeline](#) approved by the Bureau in September 2021, CFS stakeholders were asked to provide further inputs in writing to [cfs@fao.org](mailto:cfs@fao.org) by **22 November** sharing views on and addressing the following guiding questions:

1. Which priority issues and policy-relevant areas should be addressed through this CFS policy convergence process and included in the policy recommendations?
2. Do you have any suggestions for CFS meaningfully engaging youth constituencies in the policy convergence process?

All inputs will be posted on the CFS website and be used to inform preparations for the first Open Ended Working Group meeting scheduled for the afternoon of 19 November (15:00 – 18:00).

Bureau and Advisory Group members are warmly encouraged to disseminate information regarding this policy workstream among their constituencies, regional groups as well as youth organizations with a view to promoting an inclusive and participatory process.

Relevant info and background document are available in a [dedicated section of the CFS Working Space](#).

**4. Data**

The CFS Secretariat has been in discussion with a partner for a substantial financial contribution to this workstream. The contribution agreement will be confirmed before the end of this calendar year.

**5. Monitoring**

A first meeting of the Technical Task Team for the Monitoring of the CFS Principles for Responsible Investments in Agriculture and Food Systems (2014, CFS-RAI) was held on 26 October 2021. Participants were informed of the timeline of the process (below), reminded of the two different types of Calls for Inputs (one for events referencing the Principles and the other for use & application experiences related to CFS-RAI) and requested to share the Calls for Inputs within their respective networks. Participants also exchanged ideas for a relevant and forward-looking event to be organised at CFS 50
