

Brazil's comment's on the Zero Draft of the Uptake Action Plan

- a) Need a better definition of the scope of the action plan, taking into account the **mandate of the CFS** and the ultimate goal of the committee to **ensure the realization of the human right to food for all**;
- b) The plan should be guided by a framework based on human rights guarantees;
- c) There should be differentiation between the work to be carried out by the UN agencies based in Rome and other international organizations, with a focus on the former;
- d) More specific definition of the scope and action of national governments to implement the proposed actions;
- e) The actions of the plan should include an estimate of execution/implementation within a specific timeframe and estimated budget;
- f) Budget estimates (including those exceeding the ordinary budget of the CFS) should be provided for each specific action of the plan;
- g) The gender perspective should be better reflected in the plan;
- h) Need to ensure resources for the translation of policy products, both into the official languages of the UN and into local languages;
- i) Actions should be summarized to a reduced number (suggestion of approximately ten), objective, and with a budget forecast for implementation.
- j) Actions should foresee greater encouragement for the creation and strengthening of multi-stakeholder platforms at the subnational, national and regional levels, such as CONSEA.
