

Mike May

Vice-President, Public Affairs, Futura Gene-Suzano

Mike May previously worked at Plant Genetic Sciences (PGS) and Hoechst-Agrevo prior to developing career-long experience in international cooperation, policy and technological solutions for global challenges in the biotechnology sector. He sits on various United Nations and International policy boards. Mike has published more than 40 scientific papers in genetics and molecular biology. He received his doctorate in biological sciences from the University of Warwick and post-doctoral experience at the Universities of Oxford and Ghent.
