| 08 | | | | | | |

ARE THERE MORE THAN 8 PERMANENT CROPS REPORTED?

☐ 1 Yes, USE ADDITIONAL CAF FORM 3

☐ 2 No, GO TO SECTION H

☐ 3 No permanent crops planted, GO TO SECTION H

DEFINITION OF TEMPORARY AND PERMANENT CROPS

I. TEMPORARY CROPS – are crops with less than one year growing cycle. Examples are rice, corn, rootcrops such as sweet potato, cassava, and vegetables like squash, string beans, cabbage, and mushroom. In the Philippines, some temporary crops grow for more than a year like strawberries, pineapple, sugarcane, “siling labuyo”, and eggplant.

II. PERMANENT CROPS – are crops with more than one year growing cycle. Examples are mango, banana, jackfruit, coconut, coffee, abaca, and piña for fiber purposes.

REMARKS/COMPUTATION
