

Outline of the SSPARS guidelines

Global Strategy
IMPROVING AG-STATISTICS

High Level Stakeholders Meeting on Global Strategy
From Plan to Action , Rome , 3-5 December 2012

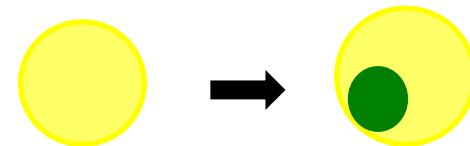

Outline of the outline

- 1) Why specific guidelines on agricultural sector?**
- 2) 4 key principles**
- 3) Draft structure of the guidelines**
- 4) Points of discussion**

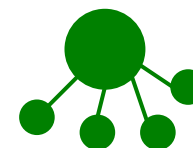

1. Why specific guidelines?

- **Better mainstreaming**

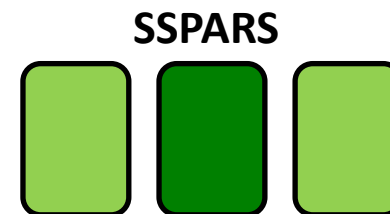

- **Complexity of the agricultural sector**

- **On-going updating NSDS guidelines**

- **One pillar of the Global Strategy**

2. Four Key principles

1. SSPARS as a building block of NSDS

2. Design vs Implementation

3. Sequenced vs Permanent steps

4. Links with norms, tools and best practices

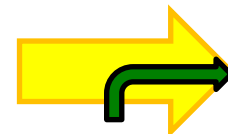

2.1 SSPARS as a building block of NSDS

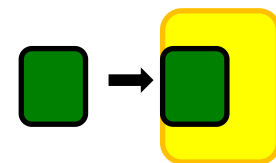

- **SSPARS to be developed whatever NSDS status**

- **SSPARS to be synchronized with NSDS cycle**

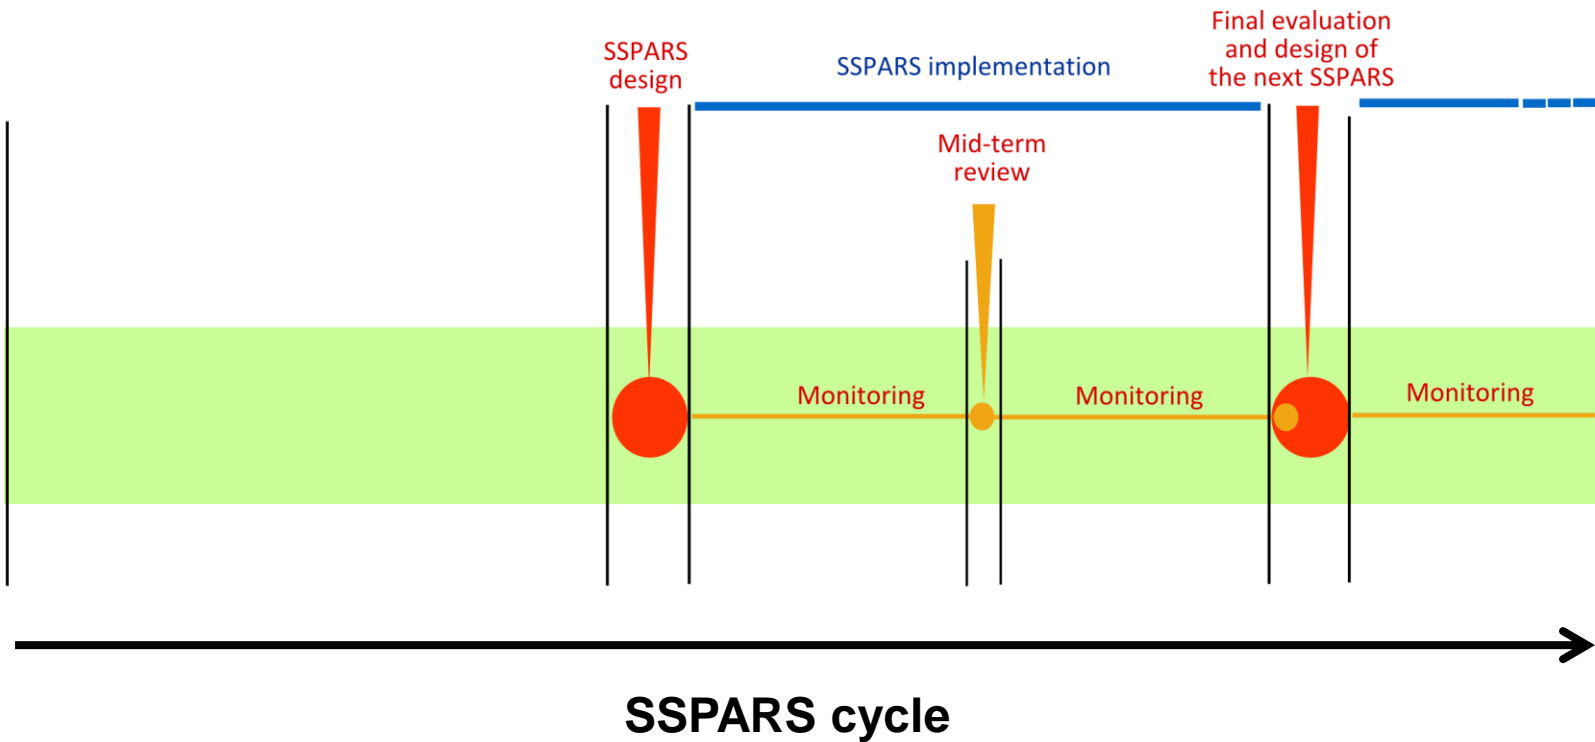

- **SSPARS may be developed before the NSDS:
building block**

Global Strategy
IMPROVING AG-STATISTICS

2.2 Design vs Implementation

2.3 Sequenced vs Permanent (1)

- Processes carried out at a specific moment, according to a specific sequenced process during the design process = **SEQUENCED**
- Processes referring to horizontal and permanent activities over the whole design and implementation of SSPARS = **PERMANENT**

Global Strategy
IMPROVING AG-STATISTICS

2.3 Sequenced vs Permanent (2)

	DESIGN	IMPLEMENTATION
SEQUENCED	●	✘
PERMANENT	●	●

Sequenced steps

1. Acknowledging

2. Understanding

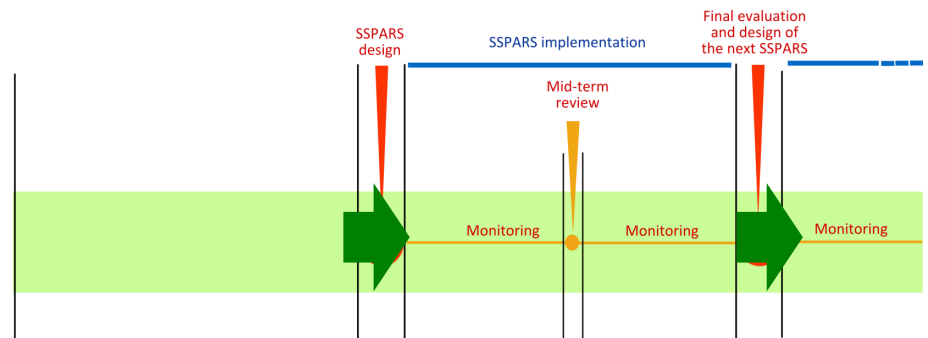

3. Preparing

4. Assessing

5. Envisioning

6. Identifying
Strategic Goals

7. Developing
action plans

High Level Stakeholders Meeting on Global Strategy
From Plan to Action , Rome , 3-5 December 2012

Permanent steps

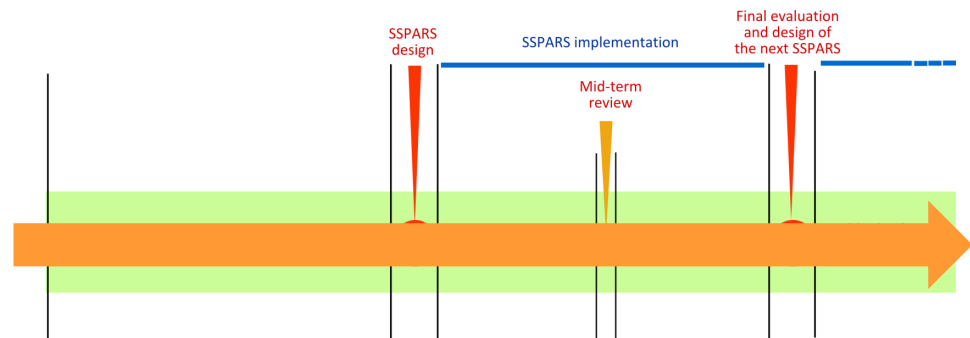

A. Managing

B. Committing

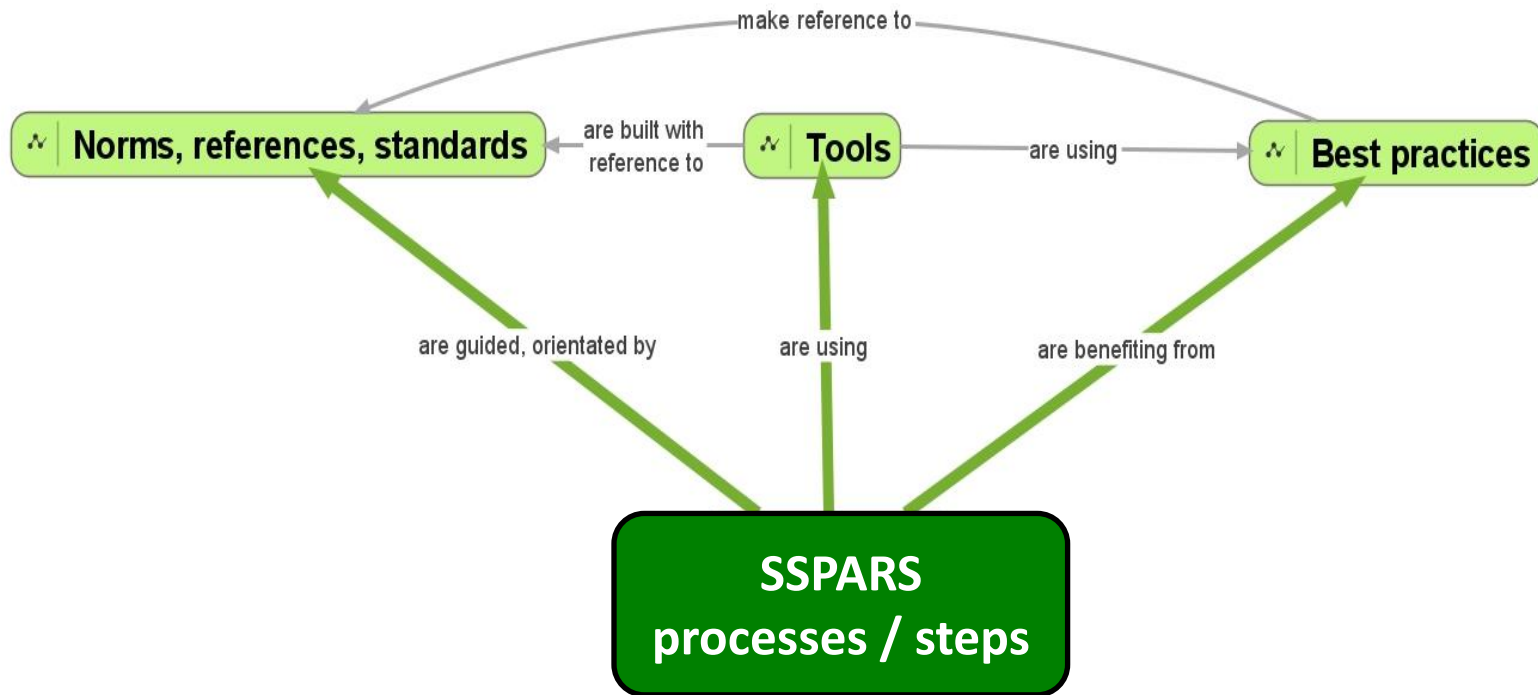

C. Budgeting
Financing

D. Advocating

E. Monitoring
Reviewing
Evaluating
Reporting

2.4 Links with norms, tools and best practices

3. Draft structure of the guidelines: 4 main parts

- **Scope and specificities of agricultural sector**
- **SSPARS as a building block of NSDS**
- **Designing and implementing the SSPARS**
- **Specific issues**
 - Scales: region, infra-national
 - Fragile states, small islands (Light SSPARS)
 - Sub-sectors

4. POSSIBLE POINTS OF DISCUSSION

- Does the proposed outline match the requirement of better mainstreaming the agricultural sector into the NSDS process?
- What is specific and important to the agriculture sector for each of the tasks related to design and implementation of SSPARS. Are there points missing?
- Are there specific issues which should be further addressed?
- How to plan for an appropriate rolling out of the SSPARS guidelines: website, e-learning tools, regional meetings with statisticians, which languages. How better reach the stakeholders in the countries?
- How to cross-fertilize SSPARS and update of NSDS guidelines process?
