Creating industrial timber products. Adding value in Cross River State

Timber Sales

Establishment

Undertaking significant tree breeding research and development specific to the local area

MIRC FORESTRY COMPANY

Experienced Team

Workforce >200

Training and skills development

Harvesting and replanting energy forestry and pulp timber crops

Harvesting

Rehabilitation and Maintenance

Absorbing c.20 tonnes of atmospheric Carbon per hectare planted

Supporting education and welfare in local communities

Ideal climate for high tree growth rate

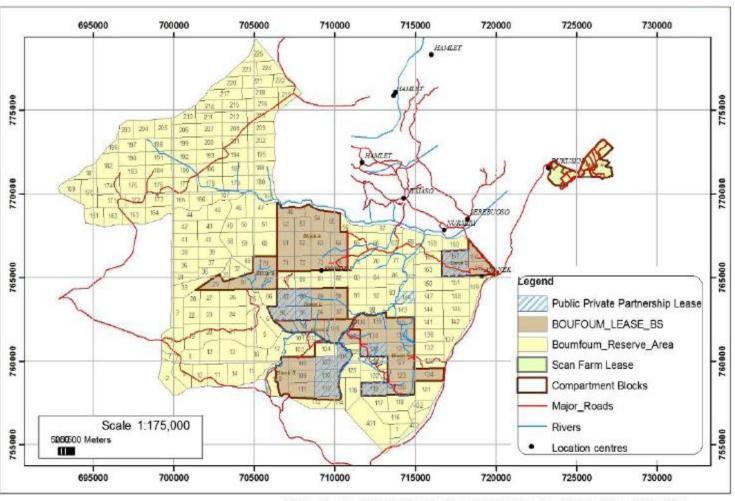

# History of the Boumfuom For Reserve

- > 26,000 ha BFR owned by the people of Agogo, Kumawu & Kwamang
- ➤ Under the reservation agreement, the people have hunting rights in the Reserve and are allowed to collect firewood and NTFPs
- > Reserve got degraded after the long drought in 1983; fires
- Current land-use: agricultural farming (onions, cassava, maize and plantain), other parts have been previously used for the establishment of Teak plantations.
- > 5,000 ha allocated to Miro
- ➤ Benefit sharing arrangements, which include landowners, are defined in lease agreements between Miro and the Forestry Commission

#### MIRO FORESTRY GHANA LIMITED: BOUFOUM & PPP LEASES
