Assessing Climate Change Vulnerability in Townships, Developing Township level Climate Change Adaptation Plans and Implementation

### Assessment

### Planning

### Implementation

# Presentation of Project you are working on 3/3

- Governance for Resilience and Sustainability Project (GRSP), UNDP Myanmar

The project has four mutually reinforcing areas of work:

Output 1: Resilience and sustainability policy frameworks are strengthened and implemented

Output 2: Increased promotion of small and large-scale green investments

Output 3: Improved organizational arrangements and capacity of targeted government offices with environment, climate change and DRR responsibilities

Output 4: Local resilience and sustainability issues are addressed through inclusive subnational implementation of innovative policies and programs of action

- Provide technical support to the government by developing National Environmental Policy of Myanmar is launched by U Win Myint, President of Myanmar on World Environment Day (June 5, 2019) in Nay Pyi Taw
