

WRITTEN CORRESPONDENCE PROCEDURE (WCP) 34th SESSION OF COFI

INDONESIA'S COMMENTS ON ITEM 5

Decisions and recommendations of the Tenth Session of the COFI Sub-Committee on Aquaculture, Trondheim, Norway, 23–27 August 2019

Indonesia takes note of the decisions and recommendations made in the Tenth Session of the COFI Sub-Committee on Aquaculture that was held in August 2019 and conveys its appreciation to the Government of Norway for hosting the meeting.

Indonesia takes note of the accomplishments of the implementation of the FAO Action Plan on Antimicrobial Resistance (AMR) 2016-2020 and look forward to contributing in the Action Plan for 2021-2025. Indonesia has also been participating in the project on "*Improving Biosecurity Governance and Legal Framework for Efficient and Sustainable Aquaculture Production*" (GCP/GLO/979/NOR). A final workshop to present the result of the project was originally planned last year, however it was postponed due to the Covid-19 pandemic. Hopefully as things get better, Indonesia would be able to hold the workshop this year. To follow up on the project, Indonesia is also planning to participate in the *pilot testing of the Progressive Management Pathway for Improving Aquaculture Biosecurity* (PMP/AB).

Indonesia supports the holding of the Global Conference on Aquaculture Millennium+20 and will participate virtually due to the current travel restrictions.

Indonesia encourages the finalization of the Guidelines for Sustainable Aquaculture that can serve as an implementation guide for sustainable aquaculture activities.

Indonesia welcomes the publication of the report on the State of the World's Aquatic Genetic Resources for Food and Agriculture and requests FAO's assistance in developing its national management plans on aquatic genetic resources (AqGR) as a follow-up.
