Governance Dialogue Series

Water governance analysis for transformational change

Module 2: Going global

Key water governance priorities and insights for the future

The **first module** of the webinar series on 'Water Governance Analysis for Transformational Change' was held from **7 November to 21 December 2022**. It started with a general introduction into the FAO Water Governance analysis methodological framework and how it was applied in Jordan, Lebanon, Morocco, Palestine and Tunisia. The six weekly webinars focussed on each of the five countries with two sessions dedicated to Morocco. This Module was organised under the WEPS-NENA project funded by SIDA.

The **second module** will start on **18 January 2023**. it aims at opening the scope of water governance to other regions and networks to understand some of the dynamics at the global level and reflect on the way forward to strengthen water governance for people, the planet and prosperity.

This module will have a more global perspective with examples of water governance analyses from Europe, Asia, and Latin America and the Caribbean, hence broadening the scope of the use of water governance analysis and looking at other methodologies and experiences.

The speakers will help envision how to further support the increased use of governance analysis to ensure water security. This module will involve experts from the NEWAVE Network (EU funded initiative) and water tenure experts engaged in the FAO Knowing Water Better (KnoWat) project and the interRegional Technical Platform on Water Scarcity (iRTP– WS).

Module 2 will also dedicate a session on the lessons learnt from the analyses undertaken within the WEPS NENA project and possible priorities for the region. The final session will discuss and elaborate on the way(s) Governance analysis can be leveraged to act on water as a strategic resource within the 2030 agenda, in the presence of international entities involved in water governance representatives.

The series targets people involved in water management and governance, and in economic sectors of use, agriculture *in primis*. The target audience includes FAO staff, stakeholders working in the public sector, decision-makers, development practitioners, academics and others.

Contacts

- Anaïs Rondier Anaïs.Rondier@fao.org
- Paola Landolfi Paola.Landolfi@fao.org

Recordings

- All sessions will be recorded and are available on the iRTP-WS.

Registration

- Participants must use the same email address to register to allow monitoring of participation.

Module 2: Going global

Key water governance priorities and insights for future

Sessions : dates and times

Date & Time (CET)	Title	Speakers	Interpretation	Zoom Link
18 January 13:00–14:30	Session 1. Newave Network. Insights from different approaches to analyse water governance & water tenure	• Jampel Dell'Angelo (Newave)	FRENCH	https://fao.zoom.us/j/6V04gK4T0WhUbr8u5ZUgQ
25 January 10:00–11:30	Session 2: Water Tenure Assessments in Indonesia and Viet Nam	• Mohamad Mova Al'Afghani • Devesh Belbase • Le Van Chinh • Louise Whiting (FAO RAP)	FRENCH	https://fao.zoom.us/j/v5Ez2rMSqi0AADybgQwAg
1 February 17:00–18:30	Session 3: Overview of water governance studies in Bolivia, Chile, El Salvador, Guatemala, Panama, and Peru	• Marcelo Gamboa Agüero (FAO LAC)	SPANISH	https://fao.zoom.us/j/VDSsVq1SlqLIZhMuXdz1Q
