

CONTEST 's RESULT

5 DECEMBER

#Soils4Nutrition

Children's booklet
&
Poster drawing
by kids for kids

on #Soils4Nutrition

The booklets were intended for children between 6 and 11 years old, to give them the opportunity to understand the impact of soil nutrient imbalance and loss of soil fertility.

The posters were created by children from ages 5 to 14, who used their imagination to show how soils are crucial for food production, better nutrition and healthy diets.

World Soil Day 2022 - SOILS: WHERE FOOD BEGINS

Booklet contest

1st prize

Soil: where food begins | A Kenyan story by Anja Weber

Soil: where food begins

a Kenyan story by Anja Weber

Look closely - sand is nothing but little pieces of rocks and stones.
Plants need to hold on to soil with their roots to find water and food to grow.
Sand is too loose for that.

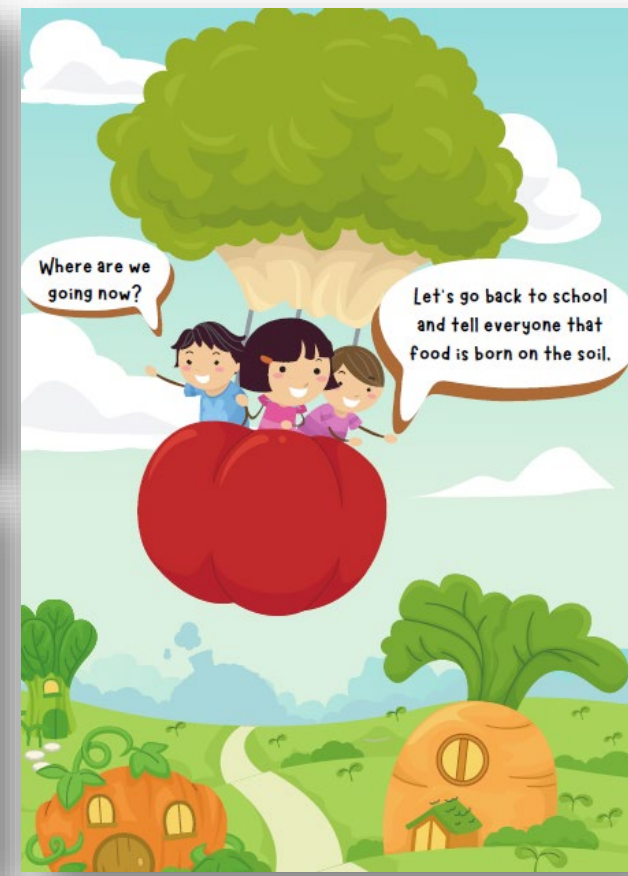

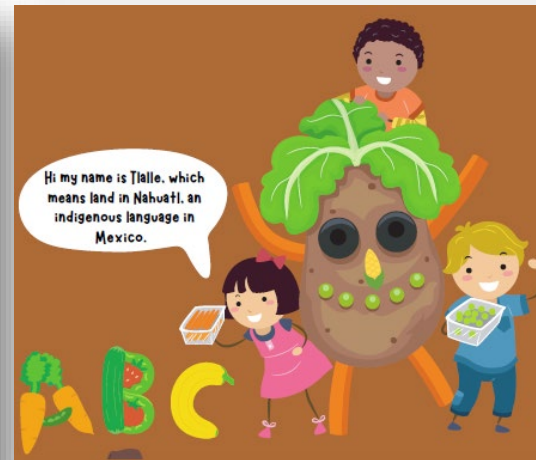

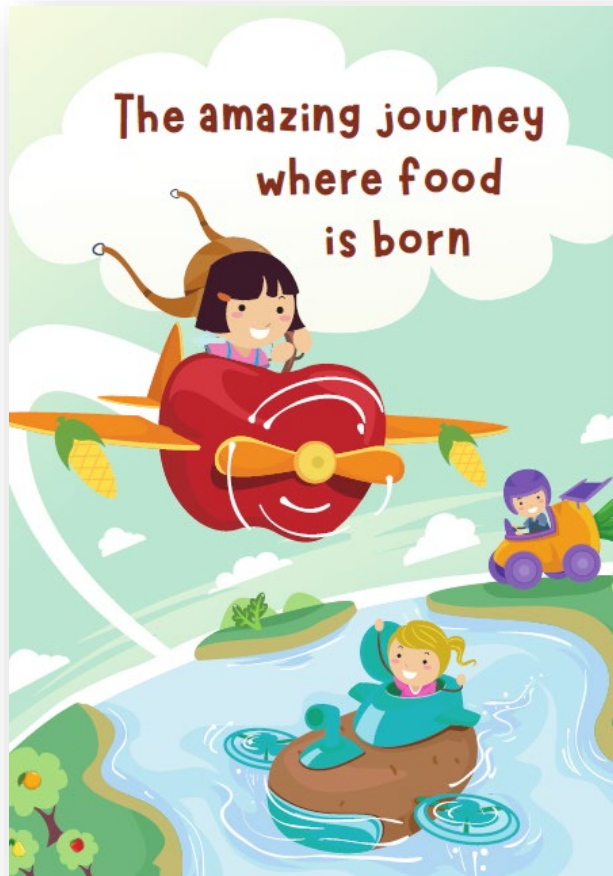

World Soil Day 2022 - SOILS: WHERE FOOD BEGINS
