

## FARM AFRICA

[www.farmafrica.org](http://www.farmafrica.org)

### Background/Issue

Farm Africa is an international NGO that promotes **sustainable agricultural practices, strengthens markets and protects the environment** in rural eastern Africa. Farm Africa works with smallholder farmers, young people, pastoralists, farmer organizations, agribusinesses and public stakeholders in **Kenya, Democratic Republic of Congo (DRC), Ethiopia, Tanzania and Uganda**.

### Innovation/Solution

Farm Africa works to build the **resilience of rural communities** using an approach based on three pillars:

**Agriculture:** Farm Africa supports smallholder farmers and agro-pastoralists to increase their productivity, household incomes and resilience to shocks.

**Market engagement:** Farm Africa helps farmers and agribusinesses develop the business skills, routes to market and access to finance they need to create thriving rural enterprises.

**Environment:** Farm Africa promotes the sustainable management of fields, forests, grazing lands and water resources.

### Opportunity

Farm Africa **supports farmers to increase their productivity** in core value chains such as coffee, aquaculture, oilseeds and livestock while maintaining a focus on the environmental and resilience benefits that come from **diversified farming systems and integrated soil fertility management**.
