Sidona Media

Background/Issue
Sidona Media is an **agricultural media company** specializing in creating quality agricultural content as we are aware that the agricultural sector is an **integral part of our society**.

Innovation/Solution
As much, as the business sector, oil & gas, finance, and entertainment are up front, the agricultural sector should also be **prioritized**. The agricultural sector needs to **stand out**, we need to spread the word about this sector we love so much and, Sharon Idahosa is the forefront as the CEO of Sidona Media.

Opportunity
83% of persons who took part in our survey believe that there are **few agricultural media** companies out there and that has given us the extra push to launch Sidona Media in 2021.
Our services vary from content writing to marketing, event hosting/coverage to production. We will provide quality **articles**, **video adverts**, **animations**, **webinar/talk shows**, as well as **series of podcasts**, to ensure the content is **reachable** by anyone interested.
This is a great way how to increase the visibility and spread the word of **farmers**, **key stakeholders**, **indigenous people**, **women**, **youth** and anyone involved in the agri-business.
