Finding the linkages and the gaps:

- How do RD instruments affect/interact with land markets/structures?
- How do land market (/structures) performance constraint the implementation of RD policies?

How can the European Commission support proper development of land markets and related instruments?

- In which way RD instruments could be fine-tuned/"land market/structures enabled"?
- Check list regarding land market/structures situation when implementing RD instruments

How can the LANDNET support EU rural development policies? (streaming land issues into RD policies?)
