

11 Guidelines for Integrated Territorial Strategies to deal with Climate Change

f:acts!

- 
- We face Climate Change and its effects
 - However future is highly uncertain
- 

11

Guidelines

3

Pillars: the area, the people, the process

1. The potential of the area (3)
 2. Cooperation (4)
 3. Governance (4)
- 

Pillar 1: Understand and use the potential of the area

facts!

1. Broader approach to make areas resilient

- Resilience: the capacity of an area to adapt to different circumstances.
- Better knowledge of territory: looking at it by using multiple perspectives

For instance: basic relationships among agriculture, nature and landscape

facts!

2. Eco system services

- Productive
- Regulatory
- Cultural

facts!
No

3. Driving forces for economic viability

- Territory as a business
- Which are the "values"?
- Who is producing?
- Who is demanding?
- How is the marketing?
- Do we have a proper balance?

facts!

Pillar 2: Mobilising cooperation

facts!

4. Create a sense of urgency

- Abstract concept
- Difficult understanding

facts!

5. Involve all stakeholders

- All we are relevant
- More knowledge, more support, less resistance, sharing responsibilities

facts!

6. Make stakeholders shareholders

- Influence and power
- Relationships
- Roles
- Shared vision
- Responsibilities

facts!

7. Recognise the importance of education

- Cooperative learning
- Creativity and critical thinking
- New skills and knowledge

facts!

Pillar 3. Governance for integrated territorial strategies

facts!

8. Create appropriate governance structures

- Fix cooperation
- Governance principles

facts!

9. Make flexible plans for the long term

- “looking into the future”
 - What do we want to achieve?
 - How to get there?
- Forecasting

10. Combine different objectives and budgets

- Cross-cutting nature
- Mitigating conflicting goals
- Triggering synergies

facts!

11. Make CCA actions visible and measurable

- Involvement not only during planning phases

facts!

11 Guidelines

3 Pillars: the area, the people, the process
