About World Food Day

Each year, the Food and Agriculture Organization of the United Nations FAO celebrates World Food Day on 16 October to commemorate the founding of the Organization in 1945. Events across the world promote awareness and action for those who suffer from hunger and other forms of malnutrition and for the need to ensure food security and healthy diets for all. World Food Day is also an important opportunity to send a strong message to the public: We can end hunger and all forms of malnutrition in this lifetime and become the Zero Hunger Generation, but everyone needs to work together to achieve this goal.
