Zusammenarbeit (GIZ) GmbH

12th LANDNET Workshop in Santiago de Compostela, Galicia, Spain

Introduction

The 12th LANDNET workshop will take place from 5 to 8 November 2019 in Santiago de Compostela, Galicia, Spain.

The workshop will be organized jointly between FAO, AGADER (Agency for Rural Development of the Xunta de Galicia) and FIG (International Federation of Surveyors), Commission 8 (Spatial Planning and Development). The event is organized in cooperation with and supported by GIZ.

This workshop is organized as a part of the larger “International conference on rural development and tourism” (<https://mediorural.xunta.gal/en/home/>). The conference is organised by AGADER and will be implemented during four days. During the first day, all participants will follow the general conference track, where *inter alia* the four main conference modules will be introduced. The LANDNET workshop track begins from the second day of the conference and will last for two days. The title of this year’s workshop is “Territorial development – challenges and opportunities” (Module 1 of the conference) with the main theme being root causes of land abandonment and the available land management instruments to address the problem.

The workshop is complemented by an optional field trip, organized on the fourth and last day of the conference, offering to visit some of AGADER’s land mobilization projects.

The objectives of the LANDNET workshop are to:

- Discuss root causes of land abandonment and policy measures and instruments to combat it
- Discuss linkages between land policies and broader rural development
- Present the forthcoming FAO Legal Guide on Land Consolidation and discuss its application

The final version of the workshop programme will be available before the workshop.

We are looking forward to welcome all LANDNET partners in Santiago de Compostela!
