

## Session 4

### Selection of value chains – Regional Priority 2

The main scope of this session is strengthening value chains, as well as the related opportunities and untapped potential in the agrifood processing sector in the region, highlighted through a case study on the value chain selection processes in Ukraine.

A moderated panel discussion will explore specific aspects of value chain work in the region and the importance of supporting food systems transformation in achieving the SDGs.

The session expects members and non-state actors to provide their thoughts and views along the lines of the guiding questions in the background document on the value chain innovations needed to project food systems into the future, in consideration of social, economic and environmental aspects of food systems transformation. The discussion should reflect on addressing regional Priority 2.
