

## SUBTHEME 2 – BUILDING RESILIENCE WITH FORESTS

### Programme

#### WHAT IS RESILIENCE AND WHY DOES IT MATTER?

Monday 7 September 2015

16:15 – 18:15

**Hall 1B**

**Chairperson: Mette Løyche Wilkie, Director, Division of Environmental Policy Implementation, UNEP**

|                             |                                                                                          |                                                                                                                                  |
|-----------------------------|------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------|
| <b>Keynote address</b>      | <i>An overview of resilience in forestry</i>                                             | <b>Mr. Mike Wingfield</b><br><i>President, International Union of Forest Research Organizations</i>                              |
| <b>Panellists</b>           | <i>Disaster risk management</i>                                                          | <b>Mr. Mathewos Hunde Tulu</b><br><i>Head, UNISDR Sub Regional Office, Addis Ababa</i>                                           |
|                             | <i>Resilience from the indigenous perspective</i>                                        | <b>Ms. Sara Omi Casama</b><br><i>Embera Wounan Comarca, MesoAmerican Alliance for Peoples &amp; Forests</i>                      |
|                             | <i>Intersectoral decision-making and resilience</i>                                      | <b>Ms. Alice Akinyi Kaudia</b><br><i>Environment Secretary, Ministry of Environment and Mineral Resources, Kenya</i>             |
|                             | <i>Banking on resilience – the economic perspective</i>                                  | <b>Mr. Octavio Carrasquilla</b><br><i>Principal Executive, Environment and Climate Change, Development Bank of Latin America</i> |
|                             | <i>The importance of resilient forests for livelihoods in Low Forest Cover Countries</i> | <b>Mr. Mostafa Jafari</b><br><i>Head of TPS for LFCCs</i>                                                                        |
| <b>MODERATED DISCUSSION</b> |                                                                                          |                                                                                                                                  |

## SUBTHEME 2 – BUILDING RESILIENCE WITH FORESTS

### Programme

### BUILDING AND MAINTAINING RESILIENCE – BEST PRACTICES

#### WORLD CAFÉ

Tuesday 8 September 2015

10:30 – 12:30

| CAFÉ MENU                                                                         | ORGANIZER                                                                                                                                      | Room    |
|-----------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| <b>Fire management</b>                                                            | <b>Working on Fire</b><br><i>Mr. Trevor Abrahams, Divisional Director</i>                                                                      | Hall 4C |
| <b>Tree genetic resources for resilience; maintaining adaptive potential</b>      | <b>Biodiversity International</b><br><i>Ms. Judy Loo, Theme Leader, Conservation and Use of Forest and Tree Genetic Diversity</i>              | 11AB    |
