
Acknowledgements

This document was edited by G.J. Meaden (FAO consultant, Canterbury, United Kingdom) and J. Aguilar-Manjarrez (FAO Aquaculture Branch, Rome, Italy). The editors would like to acknowledge the authors of the review chapters contained in FAO Fisheries and Aquaculture Technical Paper No. 552, on which this technical paper is based. They were, in alphabetical order: F. Carocci (FAO Marine and Inland Fisheries Branch, Rome, Italy), A.M. Dean (Hatfield Consultants Partnership, North Vancouver, Canada), W. Fisher (Cornell University, Ithaca, United States of America), J. Jenness (FAO consultant, Flagstaff, Arizona, United States of America), J. M. Kapetsky (FAO consultant, Wilmington, North Carolina, United States of America), J. Populus (IFREMER, Plouzané, France), and S. Walker (NOAA Coastal Services Center, Charleston, United States of America).

In addition, many thanks are also due to reviewers for their many valuable comments: R. Asmah (Water Research Institute, Accra, Ghana), D. Dauwalter (Trout Unlimited, Boise, United States of America), W. Fisher (Cornell University, Ithaca, United States of America), J.M. Kapetsky (FAO consultant, Wilmington, United States of America), J. Long (Oklahoma State University, Stillwater, United States of America), P. Longdill (Environmental Science and Economics COWI, Doha, Qatar), C. Martin (UNEP, Cambridge, United Kingdom), L.G. Ross (Institute of Aquaculture, Stirling, United Kingdom), P.C. Scott (Universidade Santa Ursula, Rio de Janeiro, Brazil), O. Strand (Institute of Marine Research, Bergen, Norway), and P. Suvanachai (Department of Fisheries, Bangkok, Thailand).

The editors would also like to thank M. Giannini (FAO consultant, Rome, Italy) for proofreading the document, and M. Guyonnet (FAO Statistics and Information Branch, Rome, Italy), for supervising its publication. K. Ivens (FAO consultant, Rome, Italy) prepared the layout design and assisted in the cover design. Last, thanks are due to many colleagues who kindly provided copies of their papers, articles and technical reports for review. The editors acknowledge, with thanks, the financial aid provided by the Aquaculture Branch (FIRA) and the Marine and Inland Fisheries Branch (FIRF) of the FAO Fisheries and Aquaculture Department, and the support provided by J. Jiansan (FIRA Chief) and G. Bianchi (FIRF Coordinator).
