Created	27 June 2002
Powepoint presentation	15 slides – File: FIGIS-2002-13_Thesauri.ppt

Abstract

This presentation describes the classical terminology systems such as thesauri, taxonomies, controlled vocabularies and explains their role in information management. The presentation also cites some examples of different terminology systems in the fishery domain and explains their basic differences. Finally, it indicates the challenges posed by using different terminology systems in different applications of a domain.
