

Global Record

(Global Record of Fishing Vessels, Refrigerated Transport Vessels and Supply Vessels)

A recent initiative developed to fight Illegal, Unreported and Unregulated (IUU) Fishing

The Global Record is a 'one-stop-shop' of vessel and vessel related information that can be used to:

- identify the vessel
- describe its capacity and capability
- identify its owners and associated interests
- identify its fishing authorizations
- provide a history of non-compliance (inspections, infractions, IUU lists, etc.)
- provide information on vessels involved in transshipment and refueling operations
- provide any other relevant and available data

The Global Record Programme will help:

- Reduce IUU fishing
- Improve fisheries management
- Enhance food security and livelihoods of rural populations
