## NOTE

The international export data, converted to live weight, exclude products obtained from whales, seals, other aquatic mammals and aquatic plants. These exports are arranged by FAO within the groups of species constituting six of the nine divisions of the FAO "International Standard Statistical Classification of Aquatic Animals and Plants" (ISSCAAP). For more information on this classification and for the complete list of groups of species and divisions, please refer to the "notes on species items" of the FAO Yearbook of Fishery Statistics: Capture production. Grand total in tonnes differs from total exports shown in table A-2 (page 14) due to the inclusion of re-exports.

## NOTE

Les données sur les exportations internationales qui ont été converties en poids vif, excluent les produits préparés à partir de baleines, phoques, autres mammifères aquatiques et plantes aquatiques. Ces exportations sont rassemblées par la FAO selon les groupes d'espèces constituant six des neuf divisions de la «Classification statistique internationale type des animaux et des plantes aquatiques» (CSITAPA) de la FAO. Pour des renseignements plus détaillés sur cette classification, ainsi que pour la liste complète des groupes et divisions, voir les «notes sur les catégories d'espèces» contenues dans l'Annuaire FAO des statistiques des pêches: captures. Le total général en tonnes diffère du total des exportations montré dans le tableau A-2 (page 14) à cause de l'inclusion des réexportations.

## NOTA

Los datos de exportación internacional convertidos a peso en vivo no incluyen los productos derivados de ballenas, focas, mamíferos acuáticos y plantas acuáticas. Estas exportaciones están desglosadas para la FAO según los grupos de especies que constituyen seis de las nueve divisiones de la Clasificación Estadística Internacional Uniforme de los Animales y Plantas Acuáticas (CEIUAPA) de la FAO. Para mayores informaciones sobre esta clasificación y para la lista completa de los grupos de especies y de las divisiones, se ruega a los lectores consultar las «notas sobre las partidas de especies» incluidas en el Anuario FAO de las estadísticas de pesca: capturas. El total general en toneladas se diferencia del total de las exportaciones mostrado en la tabla A-2 (página 14) debido a la inclusión de reexportaciones.
