3. Input statistics:

Since 2002, a total of 161 records on have been inputted into ASFA. However, with the departure of the Information Manager in December 2004, WorldFish has temporarily stopped adding records to the database. A new inputter from the WorldFish FishBase team based in the Philippines will be being trained at the FAO in late October. We expect to begin working to reduce the backlog as soon as possible.

4. Distribution list for complimentary ASFA entitlements:

None

5. Changes to monitoring list information:

No changes

6. Usefulness of ASFA products to users:

The ASFA CDs and updates are regularly circulated amongst WorldFish outreach offices and are in demand mainly from staff.
