3. Input Statistics:

From May 2004 to May 2005, were processed 101 reports corresponding to the 1st and the 2nd International Workshop on Contamination and Environmental Protection (CONyMA, in Spanish). There were also processed and corrected by FAO, 33 reports in waiting to be sent to CSA.

YEAR	INPUT
2004	21 REPORTS
2005	134 REPORTS

4. Distribution List for Complementary ASFA Entitlements:

We have received the CD-ROM corresponding to:

- 1994- June 2005

5. Usefulness of ASFA Products to User:

ASFA constitutes, for researchers, the most complete and consulted database. It is installed in the internal WEB of our Center which is constantly consulted by our researchers. Other similar research Center uses this database for consultation.

6. Changes to Monitoring List Information:

No Change since last year.

7. Problems:

None.

8. Other Aspects of Interest:

We would like to thank the sustained collaboration received from the ASFA secretary, especially Luciana and Helen, from which we have counted on for the development of our work. We also like to thank for the funds received to attend this important meeting.
