3-Input Statistics:

During the inter-session period (2004-2005), 34 records were prepared, checked by FAO and send to CSA for publication. 12 other records (journal articles) are in preparation and will be submitted to CSA as soon as possible. The input statistic of the recent years are detailed as follows:

Year	J.article (AS)	Book (M)	Book series (MS)	Book paper (AM)	Total
2002	10	3	2	5	20
2004	67	2	-	3	72
2005	24	1	-	9	34

4- ASFA Entitlement:

INSTM staff uses ASFA Internet Database (IDS) and ASFA CD-ROMs regularly.

5- Usefulness of ASFA products:

ASFA continues to be one of the most useful bibliographic tools used by INSTM researchers. ASFA is available via Internet to all INSTM staff in the different regional centres as well to scientists and students visiting the library.

6- Monitoring list information:

At present the monitoring list consists of 5 serial titles. There has been no change in this list:

- Bulletin de l'INSTM
- Revue de l'INAT
- Actes de l'ATSB
- Actes de l'ATSMer
- Annales des l'INRAT
- Archives de l'Institut Pasteur

7-Problems :

-We have some problems with the software. In fact, corrections were not saved, but this problem was solved with the kind help of Ms Luciana Lombardi from FAO.

-Many descriptions don't exist in ASFA thesaurus as well as subject categorie. So, ASFA thesaurus should be up to date.
